Standard low capacitance filters are divided into two series: The 60 series having 175 picofarads max., and 70 series having 400 picofarads max.

ANDERSEN LABORATORIES

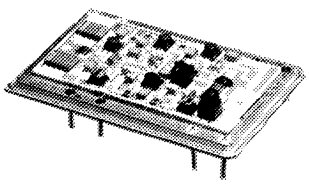
SIGNAL PROCESSING DEVICES & COMPONENTS
RF • MICROWAVE • OPTICAL

SAW Components
for radar & communications

SAW Bandpass Filters

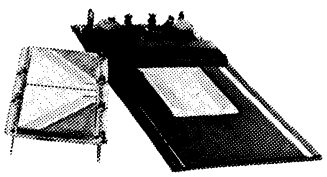
Optimum amplitude and phase characteristics for radar, ECM, ESM and communications filtering.

SAW Hybrid Oscillators



Compact, rugged, alignment-free frequency sources available in standard industry packages for PC mounting, VHF, UHF frequency range and voltage controlled tuning.

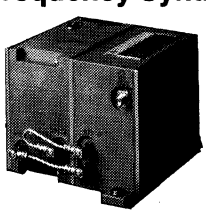
SAW and IMCON Dispersive Delay Lines



The powerful signal processing tool for radar, ELINT, ESM receivers.

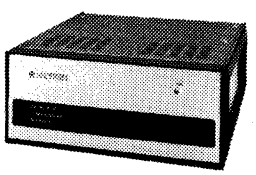
Super Components
for radar & communications

Frequency Synthesizers



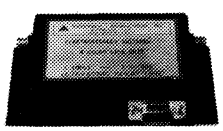
Unique design provides optimized programmable frequency source for today's most demanding applications including radar, radios, telecommunications, TACAN, telemetry, navigational equipment and satellite communications.

Compressive IF Receivers



100% probability of intercept and real time spectrum analysis for ESM and ELINT Receivers.

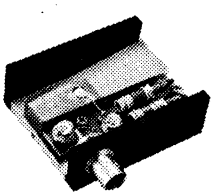
Bulk Acoustic Wave Delay Lines and Subsystems



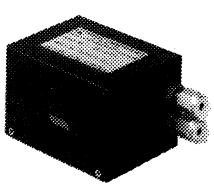
Practical and economical memory for radar, communications and TV signal processing.

Acousto-Optics

Modulators and Beam Deflectors



Q-Switches



Controlling laser energy in computer printing, semiconductor processing, laser scanning and communications.

ANDERSEN LABORATORIES

Andersen Laboratories, Inc., 1280 Blue Hills Avenue, Bloomfield, CT 06002 Telephone (203) 242-0761/TWX 710-425-2390

Active Electronic Filters

Instruments and custom-built modules. Expert assistance in filter selection. Fast prototype service.

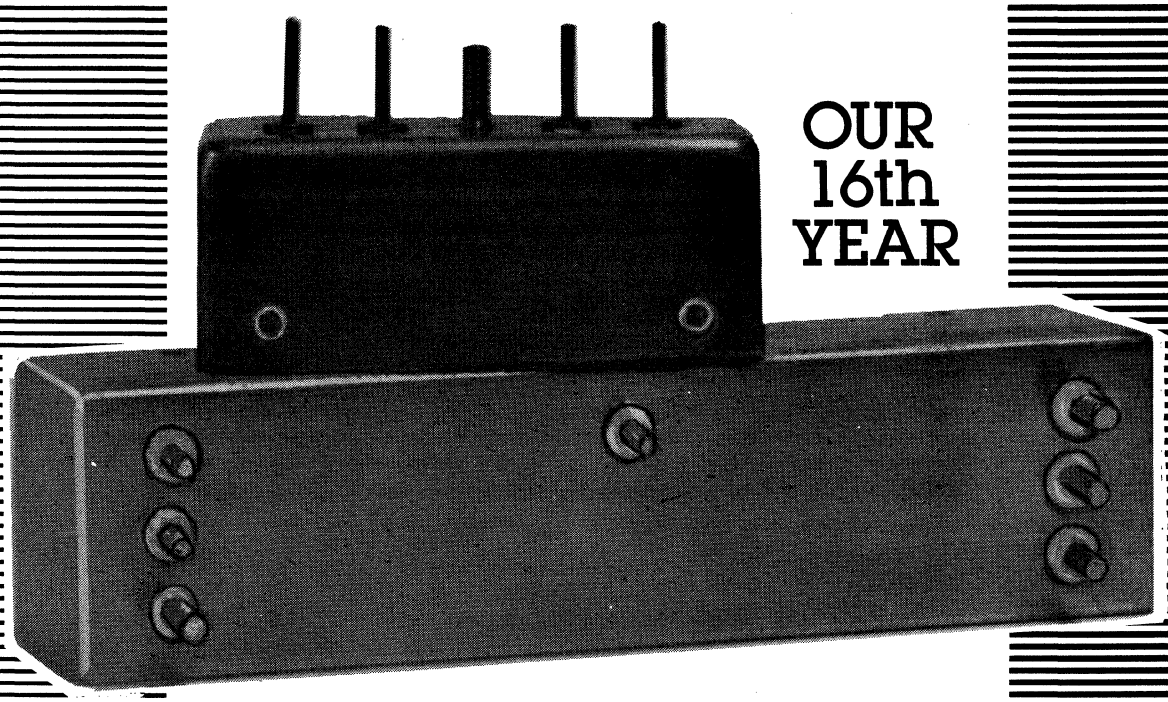
CUSTOMIZED LC FILTERS



OUR 16th YEAR

FAST DELIVERY COMPETITIVE PRICES

Chesterfield Products has a large inventory of customized LC filter designs for a wide variety of applications designed to commercial or military specs.

As a result, we can fulfill all of your technical requirements without adding unnecessary costs and delays. LC filters are available from 1.0 Hz to 1,000 MHz.

Let us quote on high pass, low pass, band pass, band stop, equalizing, weighting, C-notch, C-message, roofing, group delay, junction and phase matching filters.

Call the leader in custom designed, off-the-shelf LC filters: 201/797-9655 today!

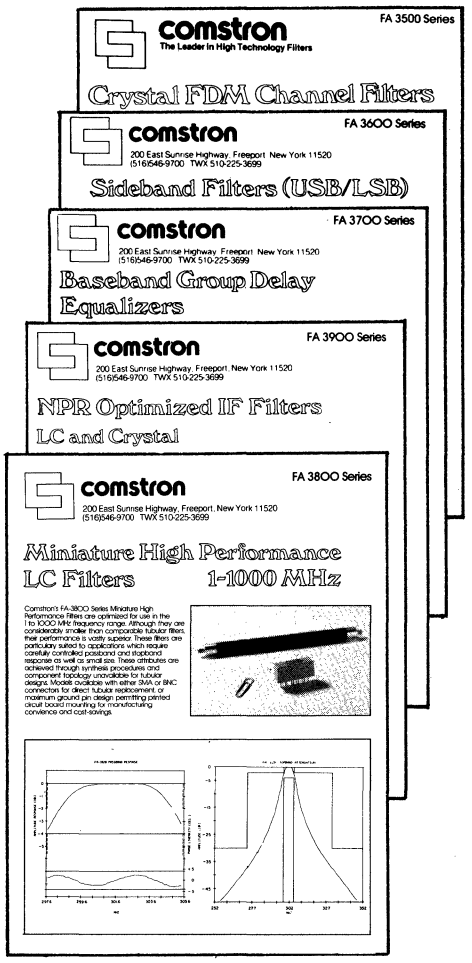
TECHNOLOGY " + " FILTERS

The Extra Edge in Systems Performance DC to 1 GHz

Comstron has developed optimum frequency or time domain filters to produce near theoretical system performance. These technology + filters are available as catalog items or custom tailored to your needs.



Design

Comstron has implemented modern network synthesis and physical realization techniques to the point where highly reliable, compact, LC and crystal filters are available – quickly and economically. Proprietary computer analysis, modeling, and optimization programs efficiently arrive at near-optium solutions to spectral, time domain, and stochastic problems. The Company's Enhanced Synthesis Program (ESP), Filter Optimization Program (FOP) and Parameter Optimization Program (POP) provide design parameters for systems oriented functions. Requirements for group delay equalization, wide band arithmetic symmetry, x/sin x amplitude correction, corrected Nyquist filters, phase compensation, and time domain response designs are routinely and efficiently handled.

Test

The Company's commitment to excellence is evident in its extensive test facilities. Automatic computer based network analyzers cover the frequency range from dc to 1.3 GHz with full plotting and printer output capability. Parameters which are automatically measured include amplitude response, phase response, group delay, and return loss. Time domain testing can also be performed to verify impulse response or response to complex waveforms.
Computer directed environmental testing allows unattended measurements of performance over temperature on a production basis. Comstron's proprietary Automatic Filter Test (AFT) programs permits rapid and accurate generation of acceptance test procedures as well as full documentation and data files when required.

Quality Control

Comstron maintains a Quality Control Department that ensures compliance with MIL-I-45208A and MIL-Q-9858A when applicable. Microscopic inspection, controlled environment, material control and traceability, solder training programs, and strict configuration management all contribute to producing an exceptionally reliable product.
The quality control program is continuously monitored. Over the years since its inception, Comstron has assembled a dedicated, conscientious staff whose pride of workmanship and customer loyalty is the keynote of the Company.

Send for our complete Data Sheets.

Standard Filter Catagories

- FDM Channel
- Quad Phase Matched
- Miniature LC.
- USB/LSB
- Fiber Optic Repeater
- Group Delay Equalizer
- NPR Optimized
- Pulse Response Optimized
- Nyquist
- Video
- Speech Plus
- Group/Super Group/Master Group/Pilot Notch
- 70/140 MHz Satellite IF Filters
- 70 MHz Switchable Equalizer (Delay or Amplitude)

Call Comstron for applications assistance for your LC and Crystal Filter requirements.

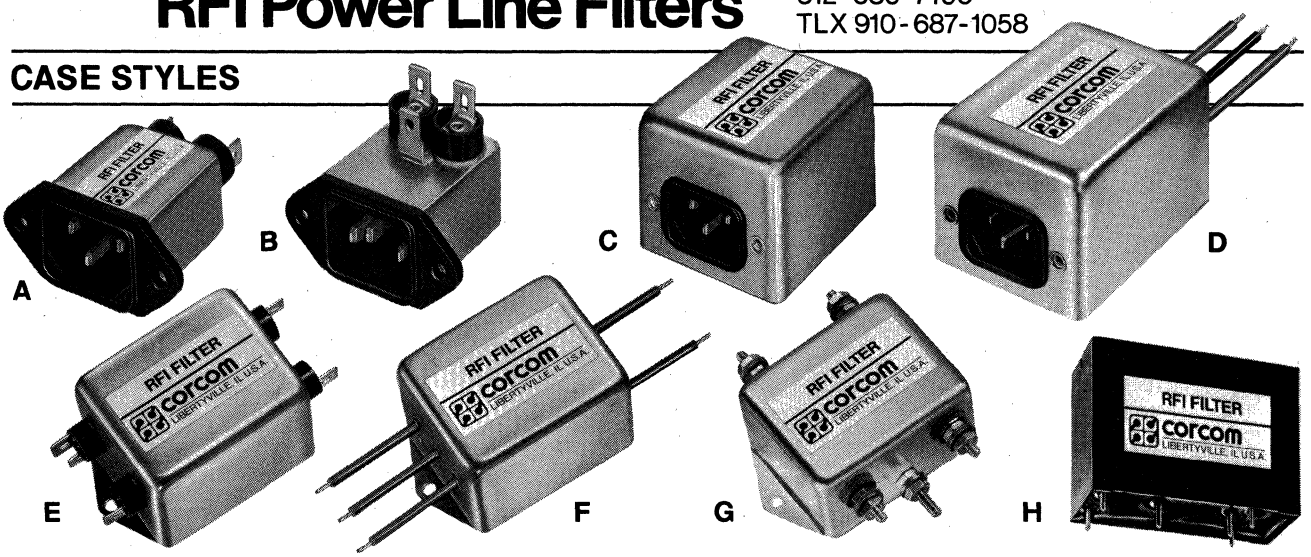
CASE STYLES



CORCOM'S FAMILY OF PRODUCTS

B Series
General purpose common mode filters. Available in case styles E, F, and G. Current ratings: 1, 2, 3, 5, 10, 20, 30 amps.

EF Series
Attenuation performance similar to B series, small package with IEC connector. Available in case styles A and B. Current ratings: 1, 3, 6 amps.

ED & EC Series
Enhanced common mode plus differential mode performance in the EF package for the ED series. Enhanced common mode plus enhanced differential mode performance in a stretched EF package for the EC series. Available in case styles A and B. Current ratings: 1, 3, 6 amps.

H Series
Special purpose filters for medical equipment that must meet the extremely low leakage current requirements of UL544, Patient Care category. Available in case styles A, B, and E. Current rating: 6 amps.

K Series
General purpose common mode performance (similar to B and EF) plus differential mode performance. Available in case styles C, E, F, and G. Current ratings: 1, 2, 3, 5, 10, 20, 30 amps.

R Series
Dual section filter for high common and differential mode performance in low impedance equipment such as synchronous motors. Available in case styles C, E, F, and G. Current ratings: 1, 2, 3, 5, 10, 20 amps.

VS, VV, VW Series
Combines Corcom's successful line-to-ground interference rejection filters with additional circuitry designed to reduce line-to-line noise and transients. Available in case style E. Current ratings: 3, 6, 10, 20 amps.

X, Y, Z Series
Compact PCB mountable filters for emission control applications, such as switching power supplies, offering excellent common and differential mode performance from 10kHz to 30MHz, while meeting the very low leakage requirements of SEV and VDE portable equipment. Available in case style H.

X—Designed to bring most digital equipment (including switching power supplies) into compliance with FCC Class B emission limits. Current rating: 3 amps.

Y—Designed for equipment compliance to VDE 0871 A-level emission limits. Current ratings: 2, 3 amps.

Z—Designed for equipment compliance to VDE 0871 B-level emission limits. Current ratings: 1, 2, 3 amps.

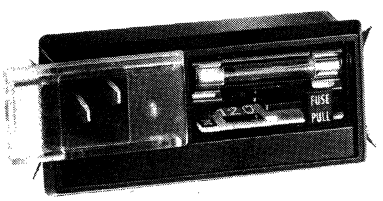
SK Series
Enhanced common mode and differential mode performance with high peak current capability; best suited for FCC emission control applications including switching power supplies. Available in case styles C, E, and F. Current ratings: 3, 6, 10 amps.

EP Series
Superior common and differential mode performance from 150kHz to 30MHz, with high peak current capability for switching power supplies, to meet VDE 0871 A-level and FCC Class B emission limits. Available in case styles C, E, and F. Current ratings: 3, 6, 10 amps.

T Series
Superior common and differential mode performance from 10kHz to 30MHz with high peak current capability for switching power supplies, to meet VDE 0871 A-level emission limits and guidelines down to 10kHz. Available in case styles D, E, and F. Current ratings: 3, 6, 10 amps.

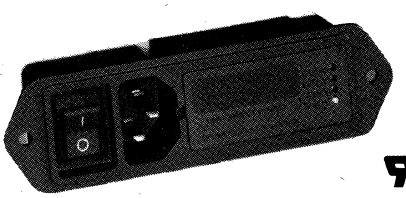
Q Series
Premium common and differential mode performance from 10kHz to 30MHz with high peak current capability for switching power supplies, to meet VDE 0871 B-level emission limits down to 10kHz. Available in case styles D, E, and F. Current ratings: 3, 6 amps.

J SERIES AND M SERIES/POWER ENTRY PRODUCTS



418 419 756

J Series/Voltage Selecting and Fused Connector
Developed for the manufacturer who markets products worldwide, the VS & F Connector eliminates the need for internal wiring changes, special power supplies or the need for stocking different line cords. Designed with an internationally approved line cord connector, a fuse holder and a unique voltage selector card. Available unfiltered or filtered.

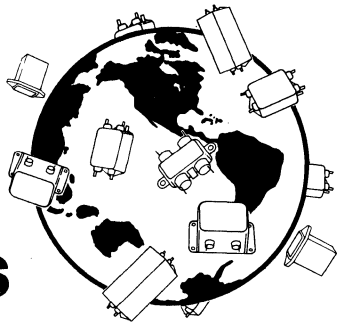


M Series/Power Entry Module Patent Pending
Corcom's Power Entry Module is the new generation of Corcom's VS & F Connector. Incorporated into one unit are the following:
- IEC Line Cord Connector, internationally accepted design
- Fuse Holder, capable of using one U.S. or two European fuses
- Optional DPST Power On/Off Rocker Switch
- Optional 2-Voltage or 4-Voltage Card Selection

©Corcom Inc.

CDE EMI FILTERS — EVERYWHERE!

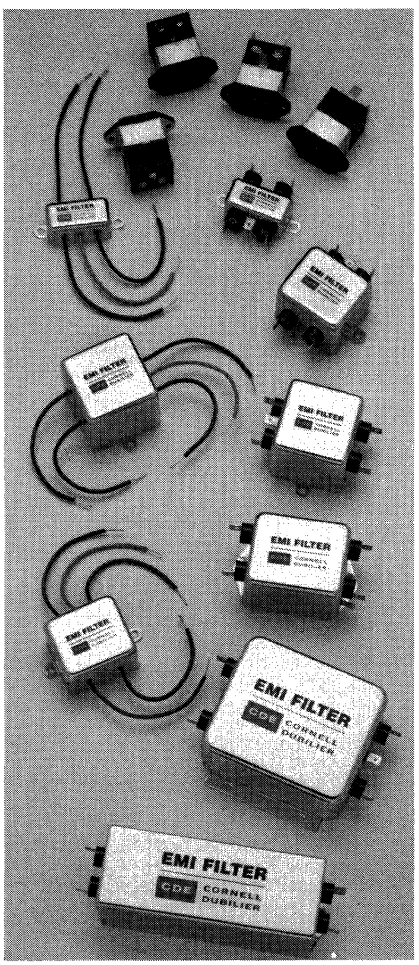
Cornell Dubilier's All Purpose International Series Filters



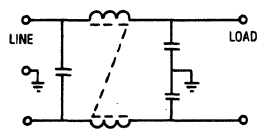
The CORNELL DUBILIER INTERNATIONAL SERIES OF EMI FILTERS feature a broad selection of case and termination styles in current ratings from 1 to 20 amps and a wide range of performance.

APPLICATIONS: Computers, Peripherals, Data Terminals, Printers, Power Supplies, Medical Instrumentation, Industrial Controls, Communications, Military, Consumer Products.

APPROVALS: UL Recognized under the Component Recognition Program of UL 1283; C.S.A. Certified; VDE Approval to VDE Specification 0565, part 3

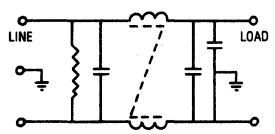


APFV-11 SERIES



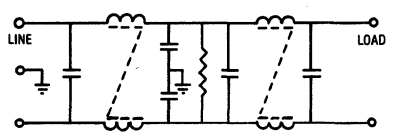
Designed to provide effective reduction of line-to-ground (common mode) interference at low cost. Ideally suited for application in a wide variety of electrical/electronic equipment intended for multnational markets.

APFV-21 SERIES



Provides effective reduction of line-to-ground (common mode) and line-to-line (differential mode) interference. Similar to the APFV-11 Series' line-to-ground performance, the APFV-21 Series provides greater line-to-line interference reduction by the addition of line-to-line capacitance.

APFV-31 SERIES



Offers optimum reduction in line-to-ground (common mode) and line-to-line (differential mode) interference while providing excellent susceptibility protection to equipment operated in "noisy" E.M.I. environments.

SPECIFICATIONS

Rated Voltage: 120-250 VAC
Power Line Frequency: 50-60 Hz
Rated Current: 1-20 Amperes*
Leakage Current — Line-to-Ground
@ 120 VAC, 60 Hz: 0.5 ma max.
@ 250 VAC, 50 Hz: 1.0 ma max.
Test Voltage: Line-to-Ground: 2250 VDC, One minute
Line-to-Line: 1450 VDC, One minute

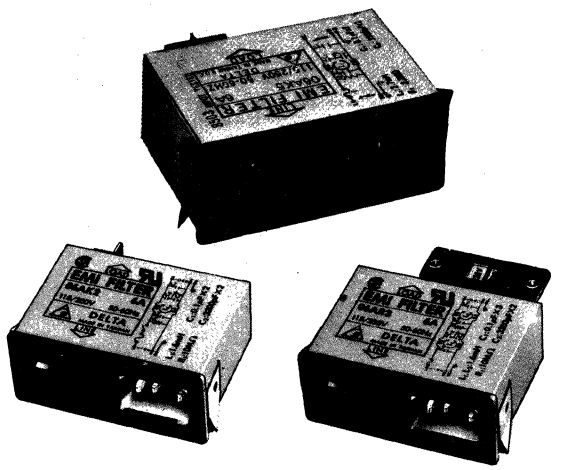
AK/AR SERIES

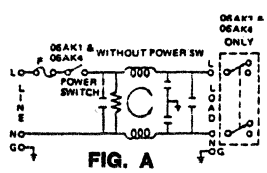
POWER ENTRY MODULE EMI FILTER

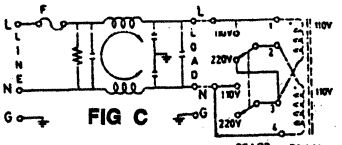
INTRODUCTION

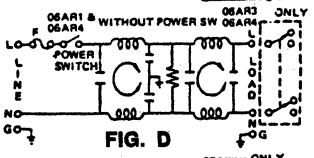
1. Both series incorporate an IEC connector, a fuse holder with optional power on/off switch and voltage selector switch plus an EMI filter all in one single, easy to install unit. **2.** AR series designed as high performance, two stage filter for low impedance load with better noise attenuation than AK series in low frequency application such as switching power supply. **3.** Presents at least a one-third cost saving over individual components, plus additional assembly cost savings and space savings due to compact design. **4.** Power switches are UL, CSA, VDE approved rated 6 amp both at 125V and 250V for single pole, and 6A/125V 4A/250V for double pole. **5.** Fuse holder designed for one IEC 5 20mm fuse and additional space for one spare fuse. **6.** Safety interlock prevents fuse removal with line plug inserted. **7.** All part numbers are UL recognized, CSA certified and VDE approved.

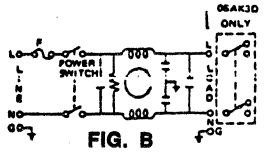


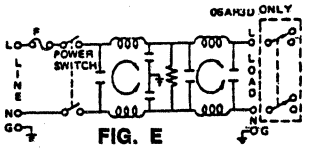
ELECTRICAL SCHEMATIC











SPECIFICATIONS

Maximum leakage current, each line-to-ground:
@ 115 VAC 60 Hz — 0.25 mA
@ 250 VAC 50 Hz — 0.45 mA
Hipot rating (one minute): line-to-ground 2250 VDC
line-to-line 1450 VDC
Operating frequency: 50-60 Hz
Rated voltage: 115/250 VAC
Minimum insertion loss in dB

1. Single Pole Power On/Off Switch approved by UL, CSA & VDE
Current Rating: 6A/250VAC
Electrical Life Time: 50,000 cycles
Maximum In-Rush Current: 24A
2. Double Pole Power On/Off Switch approved by UL, CSA & VDE
Current Rating: UL & CSA — 6A/125VAC, 4A/250VAC,
VDE — 4A/250VAC
Electrical Life Time: 10,000 cycles
Maximum In-Rush Current: 51A
3. Voltage Selector Switches — UL, CSA & VDE approved rated at 10A/125VAC 5A/250VAC, installed at the rear of Filters for 06AK3, 06AK3D & 06AK4, 06AR3, 06AR3D & 06AR4.
4. Voltage Selector Switch — UL, CSA & VDE approved rated 6A both at 125VAC & 250VAC, installed in the Front Panel of Filter for 06AK5.

DELTA

EMI FILTERS

HPF 0565-3

INTRODUCTION

1. 300 standard part numbers UL recognized and CSA certified. **2.** Over 140 part numbers VDE approved to 0565-3 test specification and HPF temperature and humidity specification (−25°C to +85°C, 75% humidity) at full current ratings at both 115V and 250V. **3.** 100% tested for hi-pot, leakage current and insertion loss before and after potting. **4.** Less than 200 ppm defect rate. **5.** Superior mechanical construction, corrosion-proof case. **6.** Molded core cover to separate toroid windings, non-rotating terminal insulators, both crimped and soldered connections. **7.** Precision balance between choke windings, and use of low leakage current high voltage and temperature stable capacitors provide excellent performance under actual operating conditions.

SPECIFICATIONS

Maximum leakage current, each line-to-ground:
@ 115 VAC 60 Hz — 0.25 mA
@ 250 VAC 50 Hz — 0.45 mA
Hipot rating (one minute): line-to-ground 2250 VDC
line-to-line 1450 VDC
Operating frequency: 60-60 Hz
Rated voltage: 115/250 VAC

Minimum insertion loss in dB, in 50 ohm system:

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

epc CORPORATION

MANUFACTURERS OF ACTIVE AND PASSIVE FILTERS—DC TO 500MHz.

LOWPASS, HIGHPASS, BANDPASS, BANDREJECT CUSTOM OR STANDARD DESIGNS.

FILTER TYPES

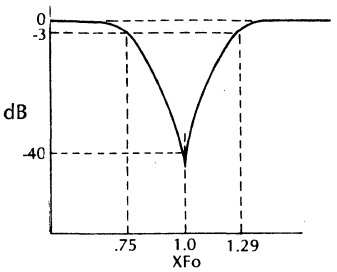
- Elliptic
- Tschebyscheff
- Butterworth
- Bessel
- Gaussian
- Legendre
- Inverted Chebychev
- Audio Frequency
- Equalizers
- Harmonic
- IF
- Video
- Telemetering
- Tone, Telegraph
- Constant group delay
- Wideband Band Pass
- Phase matched
- Attenuation matched

Components manufactured to rigid MIL-STD specifications with operating temperature range from −55°C to + 125°C.

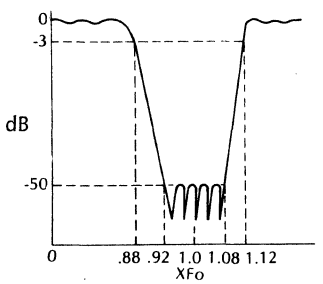
CUSTOM BUILT FILTERS PROMPT DELIVERY

The filters listed here are some of the typical units we build. We can design filters to your exact specifications. Call for more information.

ACTIVE NOTCH FILTER

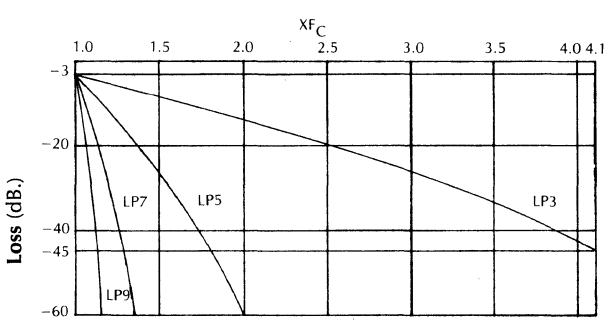


LC BAND REJECT FILTER



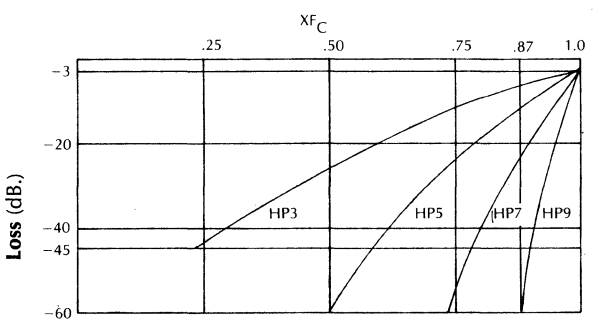
LC LOW PASS SERIES

SERIES TYPE	STOPBAND	MAX. CASE DIMENSIONS
LP3	>45dB @ 4.1 Fc & above	1x1x.6"
LP5	>60dB @ 2 Fc & above	1.25x1.25x.6"
LP7	>60dB @ 1.35 Fc & above	1.5x1.5x.6"
LP9	>60dB @ 1.15 Fc & above	2x1.75x.6"



LC HIGH PASS SERIES

SERIES TYPE	STOPBAND	MAX. CASE DIMENSIONS
HP3	>45dB @ .24 Fc & below	1x1x.6"
HP5	>60dB @ .5 FC & below	1.25x1.25x.6"
HP7	>60dB @ .74 Fc & below	1.5x1.5x.6"
HP9	>60dB @ .87 Fc & below	2x1.75x.6"



LC NARROW BANDPASS SERIES

SERIES TYPE	PERCENT BANDWIDTH (3dB)	PASSBAND 3dB. MAX @	STOPBAND >60dB. @
NB-2	±2	.98 Fo & 1.02 Fo	.85 Fo & below 1.17 Fo & above
NB-3	±3	.97 Fo & 1.03 Fo	.80 Fo & below 1.25 Fo & above
NB-4	±4	.96 Fo & 1.04 Fo	.74 Fo & below 1.35 Fo & above

LC WIDEBAND BANDPASS SERIES

SERIES TYPE	PERCENT BANDWIDTH (3dB)	PASSBAND 3dB. MAX @	STOPBAND >60dB. @
WB-25	25	.87 Fo & 1.14 Fo	.58 Fo & below 1.70 Fo & above
WB-50	50	.78 Fo & 1.28 Fo	.38 Fo & below 2.60 Fo & above
WB-100	100	.62Fo & 1.62 Fo	.21 Fo & below 4.65 Fo & above

CASE DIMENSIONS: 2"x1.75"x.6" MAX

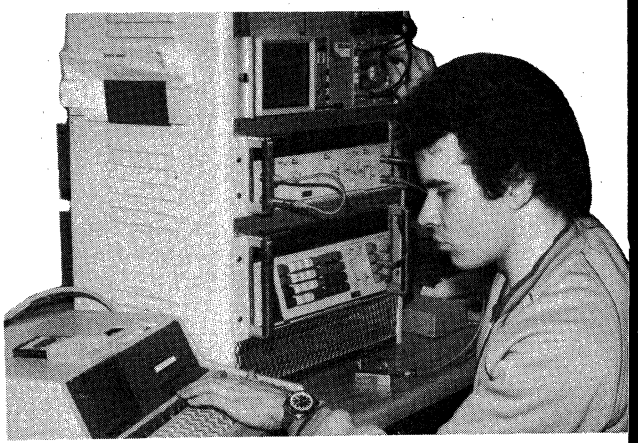
LC FILTERS
DC TO 500 MHZ

30 Year Leadership in Quality and Reliability!



Covering a range of DC to 500 Mhz, ESC designs and manufactures a wide variety of LC filters for commercial and military high reliability applications. Starting with computer aided design through final test on ESC's computer controlled Network Analyzer, ESC's long history of quality and experience assures maximum component efficiency and reliability. ESC has established controlled manufacturing facilities with certified operators to produce components to all levels of reliability from missile applications to space probe environments. Conformance to MIL-F-18327 is normal and to MIL-Q-9858A as required.

Dual-in-Line (14 Pin) LC Filters-Miniature
Size: .76L X .46W X .28H, From 1Khz to 10 Mhz.
Series DIFL20 - Low Pass, 20db Stopband at $1.4f_c$
Series DIFL39 - Low Pass, 39db Stopband at $2.5f_c$
Series DIFLP - Linear Phase, 30db at $5.0f_c$
Series DIFH20 - High Pass, 20db at $.715f_c$
Series DIFH39 - High Pass, 39db at $.4f_c$

Flatpack LC Filter Series-2Khz at 50 Khz
Epoxy molded for P.C. Board mounting, maximum height of .350 and volume of .35 to .55 cubic inches.
Series FL - Low Pass, 130db/octave roll-off
Series MFL - Low Pass, 100db/octave roll-off
Series MFH - High Pass, 100db/octave roll-off
Series CF - 15% Band Pass
Series DF - 20% Band Pass
Series LF - 60% Band Pass

Low Profile Hybrid RLC Filters
Let ESC repackage your RLC filters using advanced hybrid technology. Available for filters in the 1-50Mhz range both single-ended and balanced outputs.
Contact Plant with your requirement.

FILTER TYPES
• LOW PASS • HIGH PASS • BAND PASS
• BAND REJECT • CONSTANT DELAY
• HIGH ATTENUATION • LINEAR PHASE
• PHASE & AMPLITUDE MATCHED
• DELAY & AMPLITUDE MATCHED
• BUTTERWORTH • CHEBYSCHEV • BESSEL
• CAUER (ELLIPTICAL) • GAUSSIAN AND OTHERS;
• AUDIO • VIDEO • RF • MINIATURE...

INDUSTRIAL APPLICATIONS
• DATA MODEM • SONOBUOY • ASW
• COMMUNICATIONS • MEDICAL
• MILITARY • TELEPHONE INDUSTRY
• HIGH REL • TO MIL-F-18327

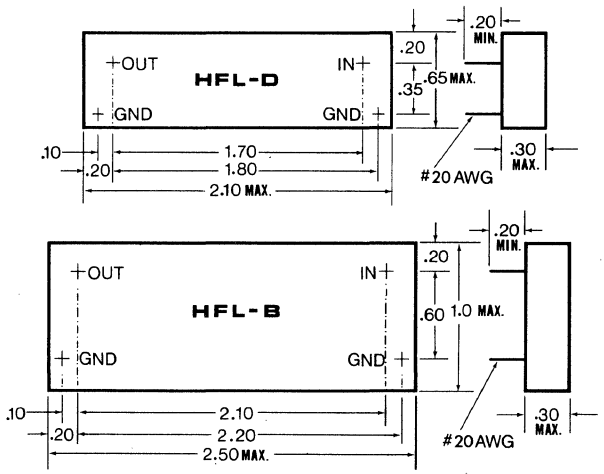
LC FILTERS DC to 500 Mhz

OVER 30 YEARS OF SUPERIOR QUALITY AND RELIABILITY!

ESC LC FILTERS

HFL HIGH FREQUENCY 50 MHZ TO 500 MHZ

Low Pass Series Filters



SPECIFICATIONS:

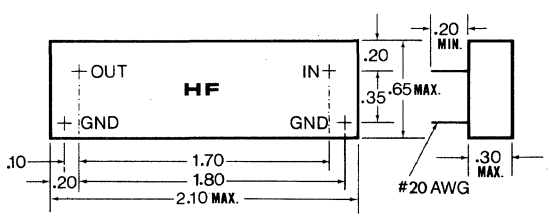
- Insertion Loss: 1 db max at reference frequency
- Reference Frequency: Min. loss in passband
- Source & Load Impedance: 50 Ω
- Cut-off Frequency (f_c): 3 db max at f_c
- Passband Ripple: 1 db max
- Operating Temperature Range: -55°C to + 125°C
- Construction: Metal encased-Hermetically sealed-PC board mounting.
- Built to conform to applicable portions of MIL-F-18327.

Series	Cut-off Frequency (f_c) Range (Mhz)	Stop Band 60 db min. at
HFL-D	50 - 500	1.4 f_c & above
HFL-B	50 - 500	1.2 f_c & above

To order specify by Series number and Passband cut-off frequency.

HF HIGH FREQUENCY 50 MHZ TO 500 MHZ

Band Pass Series Filters



SPECIFICATIONS:

- Insertion Loss: 8 db max
- Source & Load Impedance: 50 Ω
- Passband Ripple: ± .5 db max
- Operating Temperature Range: -55°C to + 125°C
- Construction: Metal encased-Hermetically sealed-PC board mounting.
- Built to conform to applicable portions of MIL-F-18327.

Series	Center Frequency (f_o) Range (Mhz)	3 db Bandwidth	Stopband Attenuation 60 db min. at
HFA	50 - 500	± 2% f_o	.62 f_o & 1.68 f_o
HFB	50 - 500	± 3.5% f_o	.58 f_o & 1.72 f_o
HFC	50 - 500	± 5% f_o	.55 f_o & 1.82 f_o
HFD	50 - 500	± 7.5% f_o	.45 f_o & 2.2 f_o

Order by specifying Series and f_o.

LC FILTERS DC to 500 Mhz

HIGH-PERFORMANCE APPLICATION ENGINEERED EMI FILTERS

- PERFORMANCE PROVEN & TESTED with OEM & custom design switching and linear power supplies
- INDUSTRY'S WIDEST SELECTION OF EMI filters for switchers requiring single or multiple phase AC power

SE SERIES
SWITCHING POWER SUPPLY FILTER

Our most compact and economical T section filter for applications using switching power supplies and required to meet FCC conducted EMI specifications.

SE Series EMI filters are designed to provide balanced differential and common mode insertion loss for reliable performance at 450KHz and above with the typical off line type switcher.

Part No.	Current	Case	Leakage*
SE3	3A	2.75x1.75x.87	0.8 mA
SE7	7.5A	2.75x2.0x1.25	0.8mA
SE15	15A	3.31x2.0x1.5	0.8mA
SE20	20A	3.67x2.12x1.78	0.8mA
SE30	30A	4.0x2.8x2.0	1.6mA
SE50	50A	5.5x3.0x2.75	1.6mA

Rated Voltage: 250VAC 47-63HZ
Test Voltage: Line To Line: 1.5 KVDC
Line To Gnd: 2.2 KVDC
Insertion Loss: (typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	7db	15db	50db	65db	65db	55db
L/L	7db	15db	50db	60db	55db	50db

SF SERIES
HIGH PERFORMANCE SWITCHING SUPPLY FILTER

Designed for applications required to meet the VDE conducted EMI spectrum, SF Series T section filters are designed to effectively attenuate differential and common mode noise from switching supplies down to the 150KHz limit of VDE 0871 and 0875 spectrums.

The SF Series also provides the added performance often required to solve severe FCC conducted EMI problems.

Part No.	Current	Case	Leakage*
SF3	3A	2.75x2.0x1.25	0.8mA
SF5	5A	2.5x2.0x1.5	0.8mA
SF7	7.5A	3.31x2.0x1.5	0.8mA
SF10	10A	3.67x2.12x1.75	0.8mA
SF15	15A	4x2.87x2.0	0.8mA
SF20	20A	5.1x4.1x1.5	1.2mA
SF30	30A	5.5x3.0x2.75	1.6mA
SF45	45A	8.22x3.0x2.75	1.6mA

Rated Voltage: 250VAC, 47-63Hz
Test Voltages: Line To Line: 1.5KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	8db	45db	65db	65db	65db	60db
L/L	15db	45db	60db	60db	65db	60db

SX SERIES
PREMIUM SWITCHING POWER SUPPLY FILTER

With an extra 15 db of performance at 150KHz our SX Series filters are designed to solve severe conducted EMI problems in equipment required to meet VDE 0871 and 0875 spectrums.

SX Series T section filters are designed to remain effective independent of wide variations in line and load impedance and noise characteristics.

Part No.	Current	Case	Leakage*
SX3	3A	3.3x2.0x1.5	0.8mA
SX7	7.5A	5.0x2.0x2.0	0.8mA
SX15	15A	5.5x3.0x2.75	1.6mA
SX30	30A	8.25x3.0x2.75	1.6mA
SX60	60A	12.0x6.5x4.75	1.8mA

Rated Voltage: 250VAC, 47-63HZ
Test Voltages: Line To Line: 1.5VDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	20db	60db	65db	65db	60db	55db
L/L	30db	60db	65db	65db	60db	50db

SW SERIES
WIDE BAND HIGH PERFORMANCE FILTER

Extended high and low frequency insertion loss characteristics are featured with the SW Series filters.

Designed to provide the wide spectrum EMI performance often required for VDE 0871 level B and MIL STD-461B type requirements.

Part No.	Current	Case	Leakage*
SW3	3A	3.67x2.12x1.75	2.4mA
SW5	5A	5.0x2.0x2.0	2.4mA
SW10	10A	5.5x3.0x3.0	2.4mA
SW20	20A	8.25x3.0x3.0	2.4mA
SW30	30A	8.62x4.0x4.0	2.4mA

Rated Voltage: 250VAC, 47-63 Hz
Test Voltages: Line To Line: 1.5KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	0.5MHz	1.5MHz	5.0MHz	50MHz	0.1GHz
L/G	35db	70db	70db	70db	60db	50db
L/L	50db	70db	70db	70db	60db	50db

TF SERIES
HIGH PERFORMANCE LOW LEAKAGE SWITCHING SUPPLY FILTER

High performance low leakage T section filter provides extended low frequency attenuation for applications required to meet enforced VDE conducted EMI spectrums.

TF Series filters provide the balanced differential and common mode performance plus the low leakage current often required for products using off line switching power supplies.

Part No.	Current	Case	Leakage*
TF2	2a	2.75x1.75x1.12	.45mA
TF3	3A	2.75x2.0x1.25	.45mA
TF5	5A	3.31x2.0x1.5	.45mA
TF10	10A	6.0x2.0x1.5	.45mA

Rated Voltage: 250VAC, 47-63 Hz
Test Voltages: Line To Line: 1.5KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	10db	48db	>65db	>65db	>65db	60db
L/L	12db	40db	55db	60db	60db	60db

DF SERIES
POWER SUPPLY OUTPUT FILTER

Multiple channel differential and common mode filter for regulated outputs of switchers to minimize their noise disturbances of low level analog circuitry.

DF Series filters also attenuate EMI from wall mount power supplies.

Part No.	Current	Case	Leakage*
DF104	4x10A	2.75x2.0x1.25	N/A
DF106	6x10A	3.31x2.0x1.50	N/A

Rated Voltage: 50VAC-DC
Test Voltage: Line to Gnd: 200VDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	15db	25db	35db	50db	50db	50db
L/L	3db	15db	35db	45db	50db	50db

Includes a minimum of 10mfds at the load.

FCI reserves the right to make specification changes without notice. Consult the factory for current information.

HIGH-PERFORMANCE APPLICATION ENGINEERED EMI FILTERS

- PERFORMANCE PROVEN & TESTED with OEM & custom design switching and linear power supplies
- INDUSTRY'S WIDEST SELECTION OF EMI filters for switchers requiring single or multiple phase AC power

LE SERIES
LOW LEAKAGE π SECTION FILTER

Our most economical and compact π section filter features low leakage current with balanced differential and common mode performance.

LE Series filters are designed as system level filters to augment the existing filter included with off line switchers. An optional ground isolater is available.

Part No.	Current	Case	Leakage
LE5	5A	2.75x1.75x.87	.30mA
LE10	10A	2.75x1.75x1.12	.30mA
LE15	15A	3.31x2.0x1.50	.30mA
LE20	20A	3.67x2.12x1.75	.30mA
LE30	30A	4.0x2.87x2.0	.45mA

Rated Voltage: 250VAC 47-63Hz
Test Voltages: Line To Line: 1.5KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	8db	20db	32db	40db	45db	50db
L/L	8db	12db	45db	65db	65db	60db

LF SERIES
PREMIUM LOW LEAKAGE π SECTION FILTER FOR SWITCHERS

High performance low leakage π section filter offers enhanced differential and common mode insertion loss in compact case sizes.

The LF Series is designed to work with the existing EMI filter in an off line switcher, or by itself, providing the extra differential and common mode performance often required to meet FCC and VDE specifications.

Part No.	Current	Case	Leakage*
LF2	2A	2.75x1.75x.87	.45mA
LF3	3A	2.75x2.0x1.25	.45mA
LF5	5A	2.5x2.0x1.5	.45mA
LF7	7A	3.31x2.0x1.5	.45mA
LF10	10A	3.67x2.12x1.75	.45mA
LF15	15A	4.0x2.87x2.0	.45mA

Rated Voltage: 250VAC, 47-63Hz
Test Voltages: Line To Line: 1.5KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	18db	30db	42db	50db	50db	50db
L/L	6db	30db	60db	60db	60db	60db

LX SERIES
PREMIUM LOW LEAKAGE π SECTION FILTER FOR SWITCHERS

Providing significant performance from 10KHz to 30MHz, the LX Series filter is designed for applications required to meet the 10KHz to 150KHz extension of VDE 0871.

The LX Series EMI filter is designed to work with the existing filter in a switching supply or as a stand alone unit. It provides the extra differential and common mode low frequency insertion loss required while maintaining good high frequency characteristics.

Part No.	Current	Case	Leakage*
LX1	1.5A	2.75x2.0x1.25	0.45mA
LX3	3A	3.31x2.0x1.5	0.45mA
LX6	6A	6.24x2.0x1.5	.45mA
LX7	7.5A	4.0x2.87x2.0	0.8mA
LX10	10A	6.24x2.0x2.75	0.8mA
LX15	15A	6.0x3.0x3.0	1.2mA
LX20	20A	8.25x3.0x3.0	1.6mA

Rated Voltage: 250VAC 47-63Hz
Test Voltages: Line To Line: 1.5KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	30db	40db	50db	50db	50db	50db
L/L	45db	65db	65db	65db	65db	60db

3E SERIES
3 PHASE T SECTION FILTER

High performance with switching power supplies in 3 phase Wye or Delta configurations is offered by this Series.

3E Series T section filters are proven performers with single or multiple switching supplies in balanced or unbalanced configurations required to meet FCC conducted EMI spectrums.

Part No.	Current	Case	Leakage*
3E15	15A	6.0x3.0x3.0	1.2mA
3E30	30A	6.62x4.0x4.0	1.6mA
3E40	40A	8.62x4.0x4.0	1.8mA
3E60	60A	9.96x5.0x4.75	1.8mA

Rated Voltage: 250VAC, 47-63Hz
Test Voltage: Line To Line: 2.2KVDC
Line to Grid: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	3db	25db	55db	60db	50db	50db
L/L	12db	22db	50db	55db	50db	50db

3F SERIES
HIGH PERFORMANCE 3 PHASE FILTER

Extended low frequency performance for 3 phase applications required to meet VDE conducted EMI spectrums with switch mode power supplies.

3F Series T section filters effectively attenuate differential and common mode noise from switching power supplies in balanced or unbalanced configurations.

Part No.	Current	Case	Leakage
3F15	15A/PH	6.62x4.0x4.0	1.6mA
3F30	30A/PH	10x5.0x4.75	1.8mA
3F60	60A/PH	14x6.5x4.75	2.4mA

Rated Voltage: 250VAC, 47-63 Hz
Test Voltages: Line To Line: 2.2KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	10db	50db	65db	65db	65db	60db
L/L	15db	50db	60db	60db	60db	55db

3X SERIES
PREMIUM 3 PHASE FILTER

The extra 15 db of insertion loss at 150KHz provided by the 3X Series is often required in 30 power systems with multiple high power switch mode supplies.

The 3X Series maintains its enhanced performance in balanced or unbalanced and in Wye or Delta configurations.

Part No.	Current	Case	Leakage*
3X7	7.5A/PH	6.62x4.0x4.0	1.6mA
3X15	15A/PH	10x5.0x4.75	1.6mA
3X30	30A/PH	14x6.5x4.75	1.8mA

Rated Voltage: 250VAC, 47-63 Hz
Test Voltages: Line To Line: 2.2KVDC
Line To Gnd: 2.2KVDC
Insertion Loss: (Typical 50 ohms)

	.05MHz	.15MHz	.50MHz	1.5MHz	5.0MHz	20MHz
L/G	20db	60db	65db	65db	60db	60db
L/L	30db	65db	65db	65db	60db	55db

*Each line to Gnd @250 VAC/50 Hz

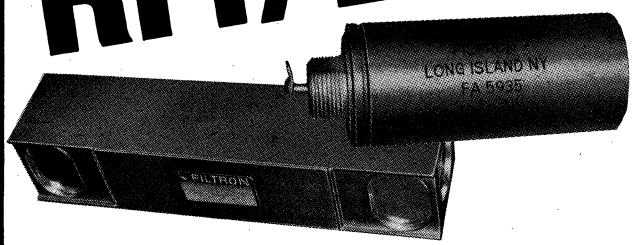
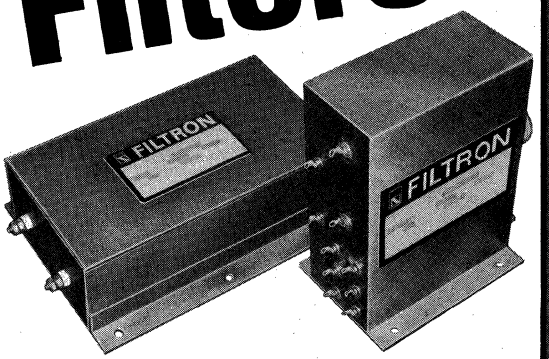
Standard to the Industry Since 1946
RFI/EMC Filters





Powerline® Filters for high power installations, shielded rooms, communication centers, security areas. Currents from 5 to 2,000 Amperes.

Fil-Tel® Filters for secure communication lines, telephone lines and signal lines in Red/Black and Tempest Installations.

Sub-Miniature Filters for your miniaturized electronic equipment, FILTRON manufactures a complete line of microminiature RF filters.

Custom Filters over 30,000 designs available in a wide variety of voltage and current ratings, mounting and terminal configurations — or custom engineered to meet specific customer requirements.

Filtered Circuit Breaker Panel Boards for secure communication installations.

Testing and Consultation Services for customized products and systems to meet such requirements as Red/Black, Tempest, EMP, EMC, EMI, FCC, etc.

Secure Communications Telephone and Signal Line Filters

For secure communications, signal line and telephone filters must be assembled in a shielded, ferrous-metal cabinet with a common RF-tight terminal compartment. Filtron is a major supplier of such equipment and has delivered filter assemblies, completely wired for up to 1,000 circuits, to major communications companies and various commercial and military installations. Any combination of signal line and telephone filters can be supplied, completely pre-wired to customer's standard terminal strips and enclosed in an RF-tight cabinet.

Call Filtron for a Fil-Tel® Telephone & Signal Line Filter catalog.

DIGITALLY PROGRAMMABLE ACTIVE FILTERS

COMPLETE WITH INTERNAL SOLID STATE SWITCHES

A Design and Application Breakthrough

Internal switches eliminate electro-mechanical relays, along with their problems. Now filtering becomes digitally programmable under a computer or any proper digital data source...Reliability, versatility and compact size made possible by internal solid state switching.

Enhances "Intelligent" and Complex Applications

- Anti-Alias Prefiltering
- Data Acquisition Systems
- Programmable Automatic Test (A.T.E) Systems
- Seismic Exploration
- Production Test Systems
- Industrial Process Control
- Real and Compressed Time Data Analysis
- Biomedical Measurements

Fills Long-Felt Need for TUNABLE Classical Filter Responses

- Digitally-Programmable 4-Pole Lowpass, Highpass and Band-pass Butterworth, Bessel and Chebycheff Models
- Internal 3-Mode CMOS Interface Latches Frequency Selection Bytes
- Plug-in and Ready-to-Use Finished Filter Components
- A 256:1 Tuning Range Over Five Frequency Bands Between 0.1Hz and 51.2 kHz
- Internal Solid State switches Extend Operational Lifetime
- Readily Available
- Sensibly Priced

Other Frequency Devices filter products include the following:

- The 900 Series Filter Instrument ...Front-Panel-Switch Tunable
- Resistive Tunable Lowpass, Highpass and Bandpass Filters
- The 9000 Series Digitally Programmable Multi- Channel Filter Instrument
- Fixed Frequency Lowpass, Highpass and Bandpass Filters
- Touch Tone Encoders and Decoders, FSK, PCM and Modem Filters
- Precision Single-Phase and Quadrature Sinewave Oscillators

Our filters span the needs of most technologies, so call Frequency Devices first. Call today with your standard or special, limited-quantity and OEM filter requirements.

HISONIC... pioneers in filter network design.

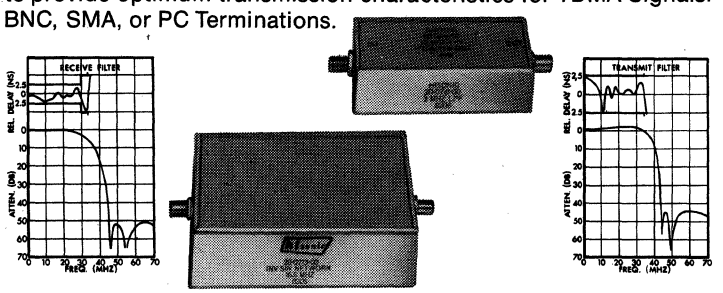
Communications are dependable only with quality components.

The staff at Hisonic, Inc. includes pioneer specialists with over 31 years experience in filter network design. It also includes mathematicians whose backgrounds of program development enable them to achieve design excellence in producing filters for your "out of this world" requirements . . . They use late generation computers, programmed to pre-test any design network. All types of packaging are available.

CUSTOM FILTERS

Modern Filters for Satellite Communication:

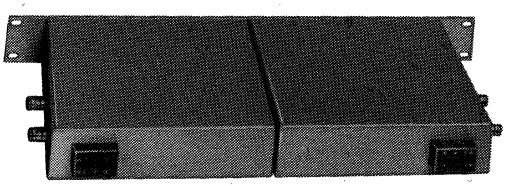
Special Attenuation shapes and controlled delay can be furnished to provide optimum transmission characteristics for TDMA Signals. BNC, SMA, or PC Terminations.



Telephone Interconnect Filters:

Base Group Interconnect 60-108 KHZ
P/N 20-0999-00

Super Group Interconnect 312-552 KHZ
P/N 20-0651-02



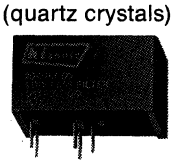
Base Band Separation Filters:

Supergroup 1-2	Supergroup 2-3
0-300 KHZ LP	0-552 KHZ LP
312-12000 KHZ HP	564-12000 KHZ HP
P/N 20-0998-00	P/N 20-0688-02

Many others available or we'll custom design.
Let us know your needs.

Many other Specialized Applications:

- Ultra-sharp transition characteristics (quartz crystals)
- Controlled Delay • Controlled Phase
- Special Attenuation Shapes



We Also Make:

- Conventional Filters
- Filters to MIL-F-18327

OTHER PRODUCTS: (Mil Spec & Commercial) Power & Precision Inductors • Transformers • Tuned Circuits • Amp/phase Equalizers • Lumped Constant Delay Lines

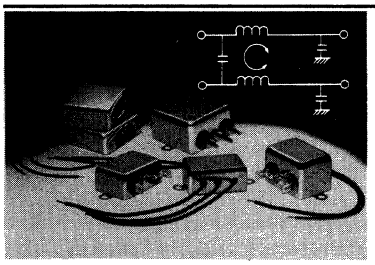
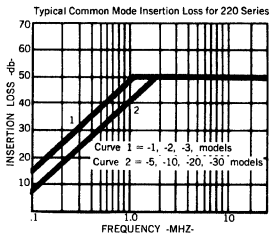
JMK INCORPORATED filters

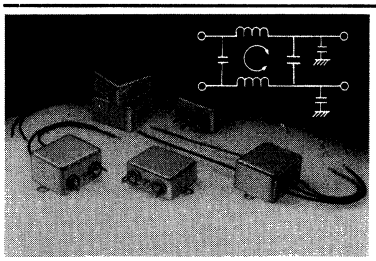
JMK has the filter just right for your power application. Whether it has to do with audio systems, lab test equipment, medical equipment, printers, power converters, video displays, modems, processors, cash registers, pinball machines, televisions, aircraft power supplies, or whatever your specific application may be, we have the filter.



220 Series

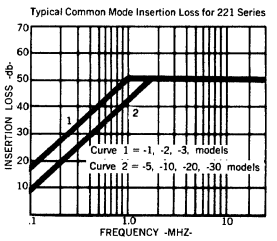
The 220 series is designed to give excellent filtering of "common mode," line-to-ground interference on computer-peripheral and other electronic hardware. Line-to-ground interference is the most common interference experienced and is generally the major source of "interference caused" malfunctions.

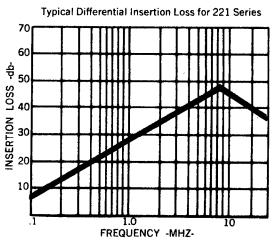


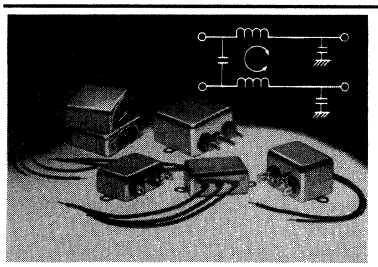


221 Series

The 221 series has the same "common mode" performance as the 220 series but the circuit has been modified to give substantial "differential mode" rejection of noise caused by switching transistors and power supply diodes.

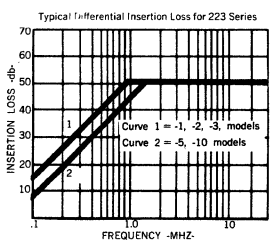


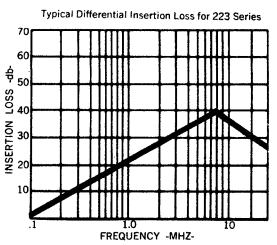


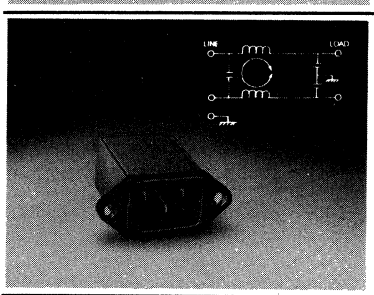


223 Series

The 223 series in intended as an economical compromise between the 220 and 221 series. This filter has the same "common mode" performance as the 220 model with approximately one-half the differential attenuation of the 221 series.

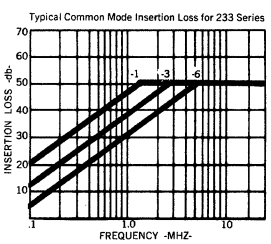


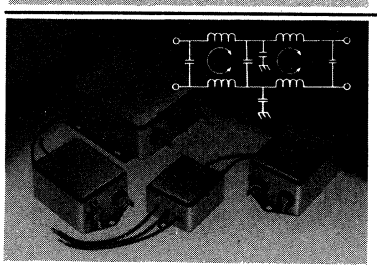




233 Series

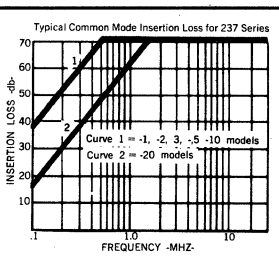
The 233 series filter is a compact filter with an integral IEC connector. This filter gives effective line-to-ground insertion loss and has low leakage current to meet VDE, SEV and other safety organization requirements. If you want an integral filter and connector ask your representative or contact the factory. Many of our other filters can be made available with the IEC connector.

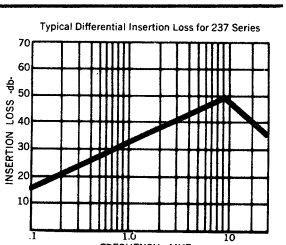


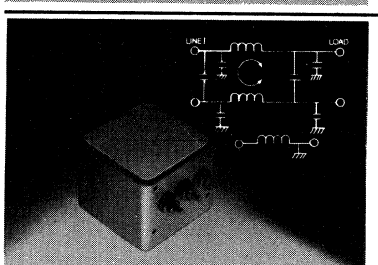


237 Series

This series is a high performance package where filtering requirements are more stringent than those associated with the 220 or 221 series. This package incorporates very high attenuation of both "common mode" and "differential mode" interference yet the cost for such attenuation is moderate.







283 Series

The 283 series is a compact single phase high current filter. This filter is rated for 20 and 30 amps and has good common mode and differential mode insertion loss. This filter has a ground coil for high frequency ground isolation which may be included or omitted as desired.

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

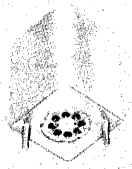
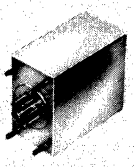
LOW PASS FILTERS



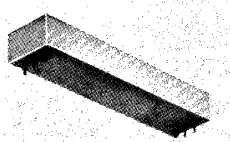
Frequency Range: DC to 50MHz
Impedance Range: 1 ohm to ∞
Stop Bands: 10 to 80db

BAND PASS FILTERS



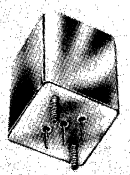
Frequency Range: DC to 50MHz
Band Width: 1% to >100%
Stopband: 10 to 80db
Impedance Range: 1 ohm to ∞

HIGH PASS FILTERS



Frequency Range: DC to 50MHz
Impedance Range: 1 ohm to ∞
Stop Bands: 10 to 80db

BAND REJECT FILTERS



Frequency Range: DC to 50MHz
Band Width: 1% to >100%
Stop Band: 10 to 80db
Impedance Range: 1 to ∞

Custom LC Filters

☐ Filters ☐ Attenuation Equalizers ☐ Group Delay Equalizers ☐ Cable Equalizers ☐ Phase Equalizers ☐ Phase and Attenuation Matched ☐ Delay Lines

Computer-Assisted Design

Shown here are some typical examples of our LC filter design capabilities. Through the use of in-house computers, plus computer time-sharing, we can quickly generate and evaluate such output data as frequency vs. impedance, attenuation, phase, group delay and phase delay in order to provide an immediate quotation.

KR Electronics has computer programs for:

1. Analysis of network behavior to determine attenuation, phase, group delay, transient response and response to a step function and a tone burst.
2. Predistortion of a network and synthesis of a network directly from the poles and zeros.
3. Designing equal ripple group delay networks from your error curve.
4. Determining a network's tolerance sensitivity and reliability.
5. Determining degree of success that can be achieved in production of matched networks.

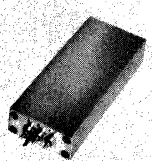
Some of the specialized test equipment used:

1. Computer controlled HP 3042A automatic test set can supply tabular or graphic data with each unit.
2. Programmable synthesizer, phase, gain test sets.
3. Swept low frequency group delay and attenuation test set.
4. Spectrum analyzer.
5. Swept high frequency test set.

DIP Filters

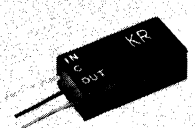
For information on our complete line of DIP filters, send for comprehensive catalog.

MATCHED PHASE & ATTENUATION



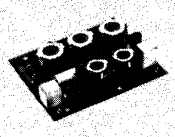
Typical Specifications:
Phase Matched ± 2½° in Pass Band
Attenuation Matched ±.25db in Pass Band for use in Sonar & other multi channel systems.

MAXIMUM FLAT DELAY (BESSEL) FILTER



Size (Typical): .75" x .75" x 1.5"
Frequency Range: 1.5KHz to 1MHz
Z Range: 50 to 10 K
Overshoot: <1%
Delay Flat: <2% to Fc

LINEAR GROUP DELAY VIDEO FILTER



Typical Specifications:
L.P. Cutoff: 4.5 MHz
I.L.: <1db
Passband Ripple: <±.1db
Pass Band Delay Distortion: <25 nsec.
Stopband: >25db

GROUP DELAY & ATTENUATION EQUALIZER NETWORK

To correct system introduced delay distortion & attenuation roll off.

Constant Group Delay Filters

Computer-designed and checked to give equal ripple delay over the pass band insuring exact delay and attenuation characteristics.

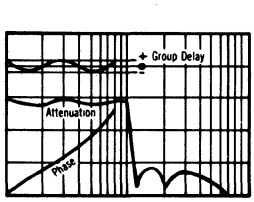
Frequency Range: DC to 50 MHz
Impedance Range: 1 ohm to ∞
Temperature Range: —55°C to +125°C.
Complete Encapsulation
Hermetic Seal
P.C. Board Construction
Case Configuration:
Stock or Custom Designed
P.C. Card
Dual In-Line
Standard Hardware Program
All filters conform to applicable mil specifications.

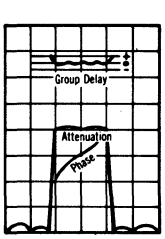
Phase & Attenuation Matching

Differential phase and attenuation matched to eliminate the need for adjustments in multi-channeled systems.

Linear Phase Filters

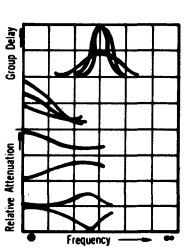
To reduce distortions and lower transient response in modulated systems.





Equalizers

Phase/Delay/Attenuation Computer-designed correction networks derived from system error curves.



Printed in USA

Military Filters

Shown below are a few of the most commonly used Military approved filters. These filters are approved to MIL-F-15733. Metuchen Capacitors stocks several hundred different MIL-F-15733 filters from MIL-F-15733/23 thru MIL-F-15733/70. Those shown below are IN STOCK continuously and offer a wide selection for your various applications. Both hermetic and non-hermetic (resin seal) are listed as well as different electrical configurations—L's and A's and Voltages from 50 VDC to 125 VAC.

EMI/RFI Suppression Filters

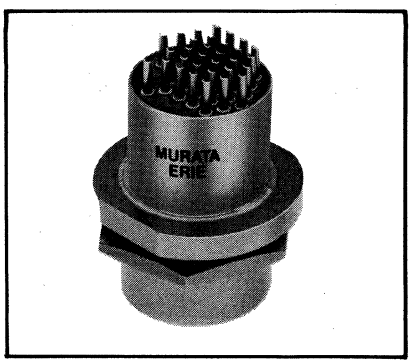
EMI/RFI filter connectors

muRata ERIE
MURATA ERIE NORTH AMERICA, INC.

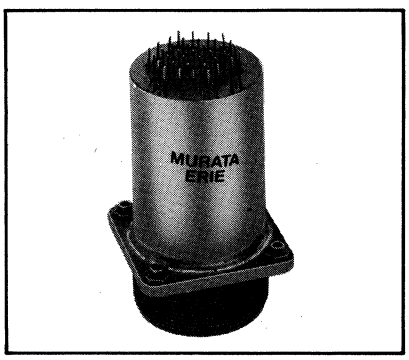
Cylindrical Connectors

Murata Erie cylindrical filter connectors can be found in numerous military, aerospace and commercial programs and have to be of the highest reliability. Because of the large variations in requirements for specific applications, Murata Erie has a competent staff of applications engineers available to aid in custom designs. Shown are some typical examples of Murata Erie cylindrical filter connectors and the appropriate MIL specifications which they meet.

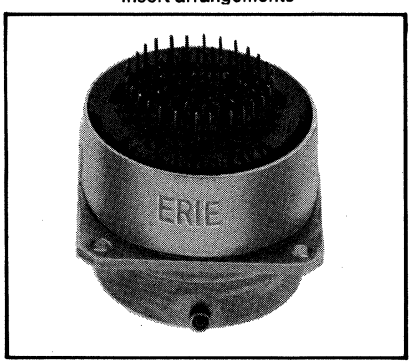


1255-080 Series to MIL-C-83723
Hermetically sealed, 2-61 line insert arrangements

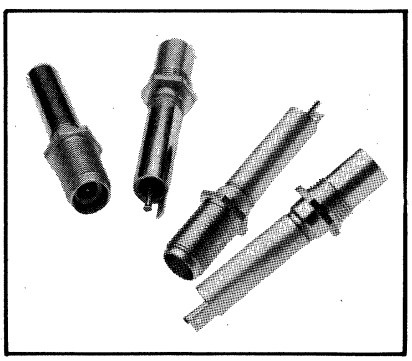
1255-100 Series to MIL-C-26482
Wide capacitance range. Directly replaces ITT "PVJ" and Bendix "FPT"



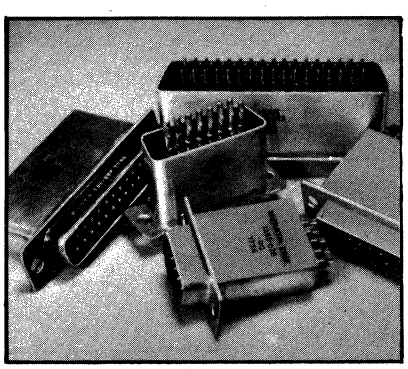
1255-070 Series to MIL-C-5015
Power connector with #12 or #16 contacts



1255-090 Series to MIL-C-38999
Low profile. 3-128 lines with from #12 to #22 contacts



1240-010 Series — UG/U Types
For audio lines. TNC/BNC compatible



"D" Connectors
1255-030 Series to MIL-C-24308

A complete line of high quality subminiature filtered connectors is available in 9, 15, 25, 37, and 50 contact arrangements, per MIL-C-24308. Capable of withstanding MIL-F-15733 testing including vibration and moisture resistance, these rugged assemblies are of a complete solder construction, thereby delivering the highest possible insertion loss at frequencies up to 10 GHz. The rear termination is available in solder-cup, .025" square wire wrap or .030" round PC board variations.

CUSTOM DESIGNS

Murata Erie specializes in developing sophisticated circuit designs and creating high component density packaged networks in-house. Our engineering design teams analyze individual customer problems, design specific components or networks to solve the problem, build prototypes and test the complete system. To support the high technological content of these custom networks, the engineering and test capabilities at our facility have become one of the most advanced in the industry today. The reliability of every component and network is assured by a comprehensive battery of tests performed under carefully controlled conditions. Then in-line prototype techniques further validate component performance prior to volume production. These technical support activities permit Murata Erie to respond to customer needs promptly and efficiently with positive performance engineered into the customer's system. If your requirements are unique, if you have a critical space, weight, or environmental problem, Murata Erie can help solve your specific requirements for you with a custom designed filter network.

EMI/RFI filters

MURATA ERIE NORTH AMERICA, INC.

Murata Erie manufactures a complete line of EMI/RFI suppression, low pass filters in C, LT, LB, Pi and T configurations.

These units, as well as a complete line of Power Line filters, are offered in both coaxial and bushing mount styles and to MIL-F-15733.

Long term reliability is assured through a quality assurance system meeting or exceeding the requirements of MIL-Q-9858 and DND-1015.

To complement this line of filters, Murata Erie has a complete Customer Service and Customer Engineering staff to provide specific application assistance and custom designs.

Illustrated are typical EMI/RFI filter configurations and their frequency/voltage capabilities.

Typical Filter Configurations vs Frequency

PICONICS

L/C FILTERS

PICONICS is a pioneer in the development of Magnetic Hybrid Components, circuits and Filters. Our 20,000 square foot facility features modern ultra clean production, inspection, and storage facilities. On site test and environmental laboratory, including x-ray, shock, vibration, hermeticity, etc. that satisfy all the necessary military and commercial testing requirements.
We will design and optimize your filter requirements using sophisticated computer programs. Our designs are computer analyzed and optimized prior to assembly. Tuning and testing are achieved with the latest precision equipment.

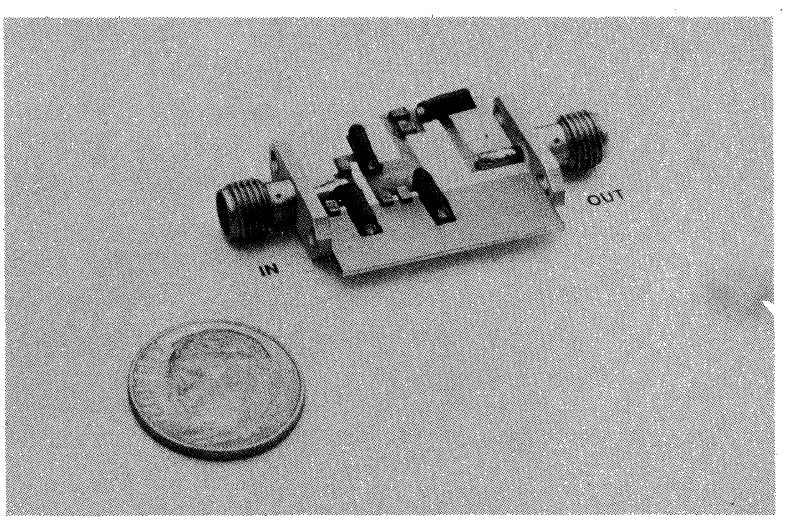
CONSTRUCTION

CHIP INDUCTORS
AND CAPACITORS
MOUNTED ON
AN ALUMINA SUBSTRATE



L/C filters are specified in either the Frequency or the Time Domain. Frequency Domain filters emphasize pass-band ripple and stop-band attenuation. Butterworth, Chebyshev, and Elliptic Function filters are included in this category. Time Domain filters emphasize the time-amplitude domain characterized by phase linearity and constant group delay. Bessel, Gaussian and other linear phase designs are included in this category.
Low-pass, Hi-pass, Band-pass, and Band-reject designs are available in the frequency range up to 800 MHz. Special Low-pass and Band-pass filters have been achieved featuring notches placed at desired frequencies in the stop-band to further attenuate undesired or spurious signals.
For those filter applications where size and weight are the prime consideration, PICONICS offers a line of chip inductor-capacitor designs. Low-pass, High-pass, and Band-pass types mounted on alumina substrates are available. Common substrate sizes are 1 x 1 inch and 2 x 1 inch. Overall package height is determined by orientation and size of the chip inductors.
To meet environmental military applications, filter networks are packaged in metal shielded cases with r.f. connectors. Printed circuit and end terminals are also available. Epoxy encapsulation is optional. For units assembled with chip inductors and capacitors on alumina/ceramic substrates, shield covers are optional. This is usually determined by the environment surrounding the device.

RELIABILITY / ENGINEERED ELECTRONICS / SINCE 1948

The information in this bulletin was organized to illustrate the wide range of our filter capability. As a "custom engineering house" our true capability lies in our unique ability to engineer solutions to specific filter problems.

Since 1948 Polyphase has built a reputation for high quality custom magnetic components and engineering excellence. We have solved many critical circuit problems. Engineering advice, custom designs and prototypes are available, to help you with *your* specific problem.

SPECIFICATIONS

Standard Interstage and Line Filters

Polyphase standard filters cover common mid-range frequencies and impedances. Designed to MIL-F-18327. Special filters to your specifications can be supplied. Filters available for transistor or tube circuits.

LOW PASS

LIM — Impedance 10KΩ in/out. Cut off frequencies from 25Hz to 100KHz available.

LLM — Impedance 600Ω in/out. Cut off frequency from 500Hz to 100KHz.

HIGH PASS

HIM — 10KΩ impedance in/out. Insertion Loss less than 5db at cut off frequency. Attenuation is more than 35db @ 66% of cut off frequency.

HLM — Impedance 600Ω in/out.

HIL — Step up or step down from 600Ω nominal to 10KΩ with a 4:1 voltage ratio.

BAND PASS

BIM — Impedance 10KΩ in/100KΩ or higher out. Gain is 1:2 at CF approx.; 3db bandwidth ±4% approx. of CF; slope 40db per octave.

BIT — As above except impedance is 10KΩ in/out.

BLM — As above except impedance is 600Ω in, 100KΩ out-1:9 gain approx. at CF.

Center frequency is ±1%; or better if specified.

CUSTOM ACTIVE FILTER NETWORKS — Some Examples

The design of these discrete networks is a combination of art and science. Polyphase has the special techniques and engineering experience to solve unique active filter circuit problems. Polyphase discrete filters are functionally complete, circuit-ready components.

LOW PASS FILTER AND GROUP DELAY EQUALIZER

The operating band 800 Hz to 3000 Hz is equalized for constant time delay.

Filter input and output circuits are capacitive coupled to be free from telephone line or other DC voltage interaction. A swept oscillator (OTO 5K Hz) drives the filter. Figure I shows the response curve at output terminal.

Application: For Vestigial Single Side Band Applications on Fax-simile transmitter unit.

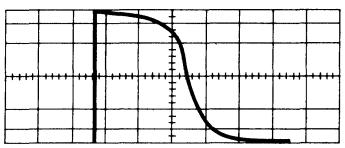

FIG I

NOTCH FILTER AND EQUALIZER

This active band pass unit has an amplitude response within ± 1 DB of the curve shown in Figure 2. The phase response is within ± 2°. The self-noise of the filter is −90 DB below 1 volt level (as measured on a wave analyzer with a 1 Hz band-width).

Application: Underwater Surveillance Network

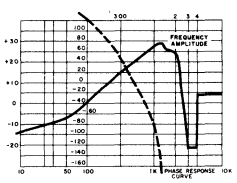

FIG 2

NARROW BAND FILTER

Typical specifications BPF104014

Center frequency 7500 Hertz

3 DB band width 180 Hertz (Q -41 66)

Center frequency stability ± 30 Hertz at room temperature.

Center frequency stability ± 60 Hertz over the temperature range of −30°C to +85°. Skirt band width at −90 DB (see response curve below) 5000 Hertz max. Filter gain 24 DB.

Input impedance 10 K OHM

Output impedance 1 OHM

Case Dimensions (1.2 × 1.4 × .68)

See Figure 3

Application: Military instrumentation.

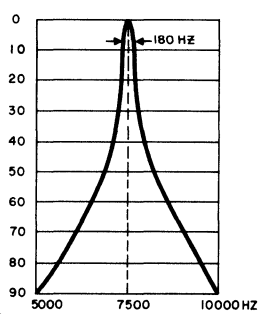

FIG 3

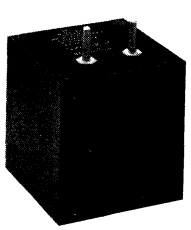
BYPASS POWER NOTCH-FILTER



These filters bypass the eleventh, the thirteenth, the twenty-third, and twenty-fifth harmonic currents, generated by a 12-phase rectification system using 400 Hz multiphase power source.

The impedance of this filter type is 0.1 OHM typical...linearity excellent. The bypass current exceeds 20 amperes. The resonance capacitance is 12 microfarad. Operation is continuous with good heat stability.

The filter operates in the "LOAD" — "NO LOAD" condition of the selected harmonic frequency.

Application: Mobile computer power supply. MI03872

LO-PAK FILTERS

for TRANSISTOR CIRCUITS

Flat packages for printed circuit board minimum spacing. Designed to meet MIL-F-18327 Grade 6 Class Q Life X. Other frequencies available.

polyphase... a closer view

engineering

Polyphase is that rare vendor who can help you with both effective engineering design and unique manufacturing techniques, involving magnetic components. A source a step beyond the commonplace in capability to serve you.

As all our products are custom designed to your specifications this Guide is formatted, as a discussion and illustration of some key magnetic components used in modern electronic circuits.

Our broad engineering capability has qualified us as a vendor on major space, defense. and industrial programs since 1948. The credibility Polyphase has earned with design engineers throughout the electronic industry, for effective answers to magnetic component circuit problems, insures your satisfaction. At Polyphase, authoritative, computer-aided engineering and prototype service is the heart of the company.

quality control

Polyphase manufactures MIL, NASA and U/L quality magnetic components—assured quality and reliability are a must. Our quality standards are governed by MIL-Q-9858, NHB 3400.4(1c). MIL-I-45208, MIL-T-27, MIL-T-21038 and MIL-F-18327. An approved Quality Control Manual blueprints procedures and standards to be followed. All products are monitored and controlled by this system from incoming materials through production tests, to the final Quality Assurance check at the time of shipment. The plant is completely equipped with the latest test instrumentation. Our calibration system conforms to MIL-C-45662. A DLA inspector is available.

production

Our concentration on quality-demanding programs dictates an efficient production department staffed by quality-minded people. Over 43,000 square feet of floor space is our plant area, with the balanced capability to handle large or small orders.

608 SERIES

HIGH PERFORMANCE INTERNATIONAL FILTERS

The 608 Series features the IEC international power line connector and is designed to provide superior insertion loss down to 10 KHz. This will help switching power supply manufacturers meet the new VDE low frequency conducted EMI requirements. Series 608 is designed to meet the requirements of IEC, CSA, BSI, VDE, SEV and UL. The series is UL recognized. CSA, VDE and SEV approvals are pending.

4	10	21	27	40	46	60	60
6	8	15	20	31	40	57	60

Tested in accordance with MIL-STD-220 with the unused circuit grounded on the load side.

609 SERIES

HIGH PERFORMANCE INTERNATIONAL FILTERS

The 609 Series was designed as a companion to our 610 Super Series. It also meets the requirements of VDE and features the IEC international power line connector. The compact construction complies with IEC, CSA, BSI, VDE and SEV. The series is UL recognized. CSA, VDE and SEV approvals are pending.

Ask for Bulletin 8102

Case styles G and H

PERFORMANCE CHARACTERISTICS:

RATED VOLTAGE: 115-250 VAC
OPERATING FREQUENCY RANGE: 50-60 Hz
MAXIMUM LEAKAGE CURRENT:
Applied Voltage — CURRENT
250 VAC @ 50 Hz — 0.5 mA
TEST VOLTAGE:
Line-to-ground — 2250 VDC
Line-to-line — 1500 VDC

TYPICAL INSERTION LOSS (dB):

	Frequency in MHz					
AMP	.15	.5	1	5	10	20

3	24	38	45	60	60	55
6	17	32	40	58	60	55

Tested in accordance with MIL-STD-220 with the unused circuit grounded on the load side.

610 SUPER SERIES

HIGH PERFORMANCE INTERNATIONAL FILTERS

The 610 Super Series was designed specifically to meet the low frequency requirements of the latest VDE EMI specifications and features the IEC international power line connector. Series 610 is designed to meet the requirements of IEC, BSI, VDE, and SEV. The series is UL recognized, and CSA approval is pending.

Ask for Bulletin 8103

Case styles G and H

PERFORMANCE CHARACTERISTICS:

RATED VOLTAGE: 115-250 VAC
OPERATING FREQUENCY RANGE: 50-60 Hz
MAXIMUM LEAKAGE CURRENT:
Applied Voltage — CURRENT
250 VAC @ 50 Hz — 0.5 mA
TEST VOLTAGE:
Line-to-ground — 2250 VDC

6	13	22	28	40	42	47

Tested in accordance with MIL-STD-220 with the unused circuit grounded on the load side.

625 SUPER SERIES

HIGH PERFORMANCE INTERNATIONAL FILTERS

The 625 Super Series provides additional insertion loss down to 10 KHz to meet the latest VDE EMI specifications. They are designed primarily for the effective reduction of line-to-ground (common mode) and line-to-line (differential mode) interference in equipment which must meet the requirements of FCC and VDE specifications. All models are UL recognized. Low leakage current models are available in all ratings. To order these, replace the "V" suffix with an "E."

Ask for Bulletin 8104

Case styles 625A3 and 625G3

PERFORMANCE CHARACTERISTICS:

RATED VOLTAGE: 115-250 VAC
OPERATING FREQUENCY RANGE: 50-60 Hz

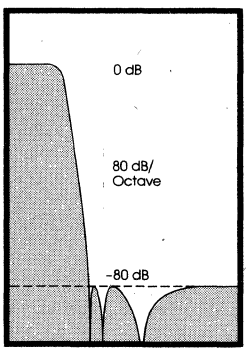
BEGONE CURSED ALIAS

FILTER SYSTEMS



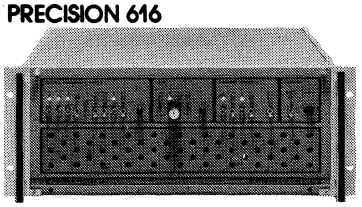
You want analog data to come clean before digital conversion.

We keep extending your choice of Precision systems for HP, LP, TD, BP, BR and anti-alias filters.

All are programmable. All offer time delay filters superior to Bessel. All offer elliptics with 80 dB/octave attenuation. All offer the option of fixed frequencies for economy. All have phase match of 1° or better. All can interface with mini or micro with serial, parallel or GPIB.

Individually, they provide different cost-performance parameters and options to provide the Precision Conditioners you need.

PRECISION 616



System offers our highest cutoff frequencies with exceptional phase match of 1°. Standard maximum frequency is 150 kHz; 300 kHz is available as a special. Four ranges with a resolution of 5 bits provide 124 programmable cutoff frequencies. Up to 16 programmable filter channels. Wide variety of options tailors this Precision Conditioner to your application.

PRECISION 616 AND 602 CUTOFF FREQUENCIES

E. Equi-ripple delay (±2.5° phase ripple) with 6 zeros.
F. 6 pole Bessel or 6 pole, 6 zero with Bessel poles.

A Filter For Every Need

All Precision Filter systems use the same high-performance filters.

For the frequency domain, there is a Cauer (elliptic) high-pass or low-pass filter with 0.1 dB peak-to-peak passband ripple and 80 dB stop-band attenuation. Compare its attenuation slope of 80dB/octave with an 8 pole Butterworth's 48 dB/octave.

For the time domain, there is the TD1, a 6 pole, 6 zero equi-ripple delay (linear phase) filter, which has less attenuation in the passband and more attenuation in the stop-band than an 8 pole Bessel. Yet, it maintains a linear phase response within ± 2.5°. There is also the TD2 which offers both a 6 pole Bessel and a 6 pole, 6 zero time delay filter.

In any case, you get a tightly controlled elliptic or linear phase filter with phase match better than 1° and usually better than 1/2°.

For bandpass operation, cascade a high-pass and low-pass filter to form a bandpass filter with 80 dB attenuation an octave above and below the center frequency.

For band-reject operation, parallel the inputs of a high-pass and low-pass filter and add their outputs through 1 k resistors to form a band-reject filter.

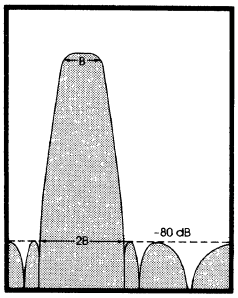
For tough anti-alias applications, cascade two LP2 filters to provide 90 dB of attenuation at 1.56 times the cutoff frequency.

For lowest cost solutions, we provide the option of fixed frequency filters.

THE PRECISION CONDITIONERS™

†See other products in Section 1100.

PRECISION 1776 FREQUENCY-BAND TRANSLATORS



Precision System 1776 is the industry's first multi-channel programmable frequency-band translator for signal conditioning.

It draws heavily on our advanced filter technology to provide usefulness not previously associated with frequency-band translators for applications like these:

- Super bandpass filter.
- Analog zoom for spectrum analysis, modal analysis and beam forming.

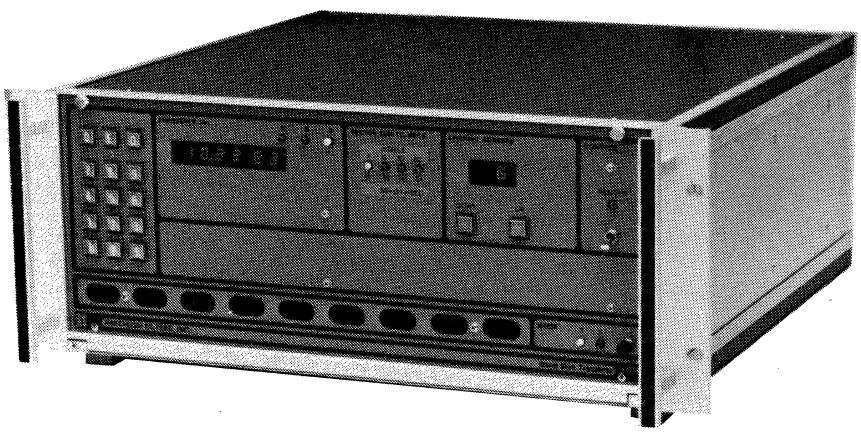
NEW SPECTRUM SLICER

The Precision 1776 cuts far more sharply than any conventional bandpass filter can.

In fact, it's nearly perfect. The system translates band center frequency to zero, passing the signal band through sharp low-pass filters to obtain 80 dB/*bandwidth-octave* skirts. Q's can go higher than 10,000.

From there, the instrument can translate back to the starting band, acting as a super bandpass filter. Or it can translate to any other part of the spectrum.

Configured as a super bandpass filter, the Precision 1776 can have up to eight channels.



NEW SUPER ZOOMER

The Precision 1776 translator also can zoom in to make existing equipment do more work.

Ahead of an FFT spectrum analyzer, the analog zoom extends frequency range while making possible much finer resolution.

For modal analysis and beam forming, the 1776 discards unwanted noise and lowers the sampling frequency. As a result, old limits for computer speed, memory and AD conversion rates are overcome. Sampling rates can be decreased. Dynamic range and signal-to-noise ratio are enhanced.

For analog zoom, a 16 channel configuration is available for this Precision Conditioner.

Precision 1776 Features:

- Programmable center frequency: 3.2 Hz—200 kHz.
- Programmable bandwidth: 1 Hz—25 kHz.
- Phase match: 2° maximum, 1° typical.
- Wide dynamic range.
- Low noise: 250 microvolts in 20 MHz BW.
- Interfaces: serial, parallel, GPIB.
- $\frac{\text{-80 dB bandwidth}}{\text{- 3 dB bandwidth}} < 2$
- Passband ripple: 0.15 dB pk-pk.
- Outband rejection: 80 dB minimum.
- Hum: < - 100 dB, re full-scale.
- Noise: < - 100 dB, re full-scale.
- Intermodulation: < - 80 dB, re full-scale.

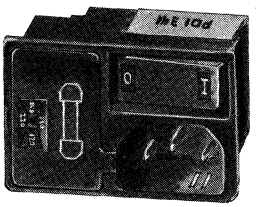
RFI/EMI Filtered Power Entry Modules

PDI-341

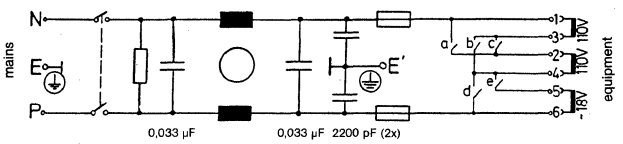


Line filters PDI 341 are especially designed for use in electronic devices to be exported to all countries. First time in the world PDI 341 offers a combination from IEC-plug, two-pole ON/OFF switch, fuse-holder that accepts two fuses 5 x 20 mm or 3AG and a voltage selector for **four different voltages**. This excellent power line filter saves costs and protects electronic equipment against malfunctions. Snap-in mounted.

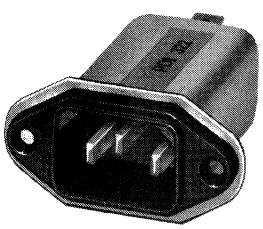
Technical data

Operating voltage	250 V / 50 Hz 110 V / 60 Hz
Rated current	1 A / 2 A / 3 A / 4 A / 6 A
Leakage current	<0,5 mA / 250 VAC
Temperature range	−25° C — +85° C
Test voltage (VDE 0565)	1,8 kV / 50 Hz — 2 s

Circuit



PDI-322

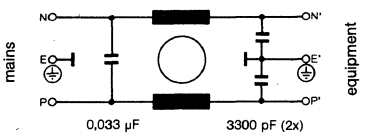


The filter series PDI 322 are designed for optimal results and have a short case-length. Common mode and differential mode noise is attenuated beginning at the low frequency range up to 30MHz. Among other uses these filters protect electronic devices with microprocessors against malfunction.

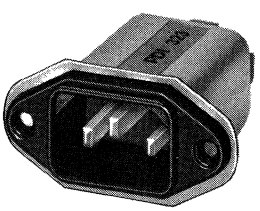
Technical data

Operating voltage	250 V / 50 Hz 110 V / 60 Hz
Rated current	1 A / 3 A / 6 A
Leakage current	<0,5 mA / 250 VAC
Temperature range	−25° C — +85° C
Test voltage (VDE 0565)	1,8 kV / 50 Hz — 2 s

Circuit



PDI-323

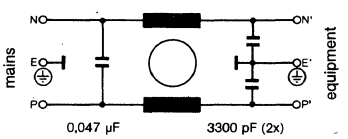


The line filters PDI 323 protect electronic devices such as computers, terminals and office equipment against line interference. 34.3 mm case-length and excellent attenuation identify this filter-series.

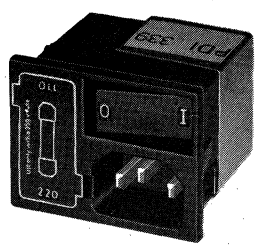
Technical data

Operating voltage	250 V / 50 Hz 110 V / 60 Hz
Rated current	1 A / 3 A / 6 A
Leakage current	<0,5 mA / 250 VAC
Temperature range	−25° C — +85° C
Test voltage (VDE 0565)	1,8 kV / 50 Hz — 2 s

Circuit



PDI-339



Line filters PDI 339 are especially designed for use in equipment intended for export. The additional voltage-selector enables the fast change to other mains-voltages. Snap-in mounted.

Technical data

Operating voltage	250 V / 50 Hz 110 V / 60 Hz
Rated current	1 A / 2 A / 3 A / 4 A / 6 A
Leakage current	<0,5 mA / 250 VAC
Temperature range	−25° C — +85° C
Test voltage (VDE0565)	1,8 kV / 50 Hz — 2 s

Circuit

MANUFACTURER OF RFI/EMC FILTERS.

We've got over 30,000 filter designs on file to meet your basic or most sophisticated needs ...

and more parts QPL listed to MIL-F-15733 than any other manufacturer.

The fact that we've got so many filter designs available is only one part of our success story.

Our 24 years of engineering experience and expertise in providing custom engineered filters is the other part.

Our technology has provided our customers with the golden edge in filter performance. We've helped plan and expedite efficient and economical filter systems ...from the simplest to the most intricate.

"Made by RFI" doesn't only tell you who made it, but how well it was made. After all, we sell more than just filters. We sell ideas.

FEED THRU CAPACITOR FILTERS

EPOXY AND HERMETICALLY SEALED AC AND DC APPLICATIONS

PERFORMANCE SPECICATIONS

Operating Temperature: –55°C to +125°C. • **Operating Voltage:** 50VDC, 100VDC, 200 VDC. • **Rated Current:** 10 Amperes maximum. • **Insulation Resistance:** At +25°C: 1000 megohm-microfarad or 100,000 megohms minimum, whichever is less. AT +25°C: 100 megohm-microfarad or 10,000 megohms minimum, whichever is less. • **Insertion Loss:** At –55°C and +125°C, the insertion loss will decrease a maximum of 3dB from the +25°C value. • **Military Specifications:** Meets or exceeds the applicable parameters of MIL-F-28861. • **Voltage Drop:** 0.1 Volts maximum. • **Housing (non-hermetically sealed):** Tin plated. Can be supplied with silver or gold plating. • **D.C. Resistance:** 0.01 ohms maximum. • **Temperature Rise:** 25°C maximum. • **Solderability of Terminals:** In accordance with MIL-F-28861.

BUTTON FILTERS

GENERAL PURPOSE DC APPLICATIONS

PERFORMANCE SPECIFICATIONS

Operating Temperature: –55°C to +125°C. • **Operating Voltage:** 50VDC. • **Peak Transient Voltage:** 150VDC (10μsec.) ↑ 25°C. • **Dielectric Strength:** 100VDC ↑ +25°C., 50 mA. maximum charging current. • **Insulation Resistance:** 100 megohms minimum with 50VDC, 50 mA. maximum charging current ↑ +25°C. after two minutes. • **Insertion Loss;** At –55°C and +125°C, the insertion loss will decrease a maximum of 12dB from the +25°C value. • **Military Specifications:** Meets or exceeds the applicable parameters of MIL-F-15733 and MIL-F-28861. • **Housing (hermetic or epoxy seal):** Tin plated. Can be supplied with silver or gold plating. Screw mount. • **Torque:** 48 inch oz. maximum. • **Marking:** West-Cap, part number.

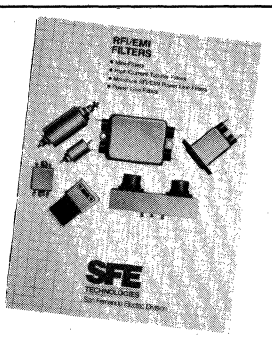
LOW PASS EMI FILTERS

HIGH PERFORMANCE, GENERAL PURPOSE EPOXY SEALED, NON AND HERMETICALLY SEALED, AC AND DC APPLICATIONS

PERFORMANCE SPECIFICATIONS

Operating Temperature: –55°C to +125°C. • **Operating Voltage:** 50VDC. • **Peak Transient Voltage:** 150VDC (10μsec.) ↑ +25°C. • **Dielectric Strength:** 100VDC ↑ +25°C., 50 mA. maximum charging current. • **Insulation Resistance:** 170 megohms minimum with 50VDC, 50 mA. maximum charging current, ↑ +25°C after two minutes. • **Insertion Loss:** At –55°C and +125°C, the insertion loss will decrease a maximum of 3dB from the +25°C value. • **Military Specifications:** Meets or exceeds the applicable parameters of MIL-F-15733. • **Housing (hermetically sealed):** Tin plated. Can be supplied with silver or gold plating. • **Torque:** 48 inch oz. maximum. • **Marking:** West-Cap, part number and Federal Code identification, voltage, current, circuitry, and date code.

Write or call for the complete 66 page catalog covering our full line of filters detailing performance specifications, mechanical dimensions, and options.



SFE TECHNOLOGIES

San Fernando Electric

1501 First Street, San Fernando, CA 91340-2793 • 818/365-9411 TWX 910-946-1535

MINIATURE POWER LINE FILTERS

For over thirty years, the San Fernando Electric Division of SFE Technologies has been a leader in the design and manufacture of a broad line of RFI/EMI filters. Innovative design approaches and close attention to quality have earned us this leadership position.

Our unique capabilities as a filter supplier stem from our vertically integrated manufacturing operations. Vertical integration offers benefits that other filter manufacturers cannot provide. As a leading manufacturer of both multi-layer ceramic (MLC) capacitors and a broad line of wound capacitor and inductor products (made at our West-Cap Arizona subsidiary), we incorporate many of these component parts into our filter products. This allows us to control the total quality process—from raw materials used to manufacture the electronic components to the assembled filter product. With 100% surveillance over total product quality, our customers are assured of the highest reliability levels.

EF SERIES

The EF international series is a low cost general purpose common mode filter supplied with an IEC powerline connector. These filters meet the very low leakage current requirements of SEV and VDE portable equipment as well as 120 volt UL544 nonpatient medical equipment.

EF series filters can be supplied with either solder lugs (1 and 2) or faston-type terminals (1F and 2F).

ED SERIES

ED series filters are unique in that they offer considerably higher performance than similarly sized filters. These filters are particularly more effective than general purpose filters in applications where it's desired to control line-to-line and low frequency line-to-ground noise.

EH SERIES

The EH series filters are designed for use in medical equipment and comply with UL544 Patient Health Care regulations.

B SERIES

The B series of RFI power line filters are low cost general purpose common mode filters for control of line-to-ground noise. These filters are supplied with current ratings from 1 to 30 amps with a variety of termination styles.

EB SERIES

The EB series of RFI power line filters are low cost general purpose common mode filters for control of line-to-ground noise. These filters are supplied with current ratings from 1 to 30 amps with a variety of termination styles.

EB series filters are very low leakage devices which meet the requirements of SEV and VDE portable equipment as well as 120 volt UL544 nonpatient medical equipment.

K SERIES

Line-to-line as well as line-to-ground RFI interference is effectively controlled by the K series RFI power line filters. These are general purpose common mode and differential mode filters. They are particularly suitable in applications where pulsed, continuous and/or intermittent RFI is present.

The EK series offers low leakage and conforms to the very low leakage requirements of SEV, VDE portable equipment and 120 volt UL544 nonpatient medical equipment.

R SERIES

These dual section RFI power line filters are suitable for low impedance loads in a noisy RFI environment. Pulsed, continuous and/or intermittent interference are controlled to protect your equipment from power line and equipment noise.

The ER models conform to the low leakage requirements of SEV, VDE portable equipment and 120 volt UL544 nonpatient medical equipment.

S SERIES

S series filters feature line-to-ground interference rejection capability with additional circuitry which reduces low frequency line-to-line noise and transients. These filters can provide needed noise suppresion to comply with FCC and VDE specifications for conducted emissions.

V SERIES

V series filters feature line-to-ground interference rejection capability with additional circuitry which reduces low frequency line-to-line noise and transients. These filters can provide needed noise suppression to comply with FCC and VDE specifications for conducted emissions.

W SERIES

W series filters feature line-to-ground interference rejection capability with additional circuitry which reduces low frequency line-to-line noise and transients. These filters can provide needed noise suppression to comply with FCC and VDE specifications for conducted emissions.

SK SERIES

These Super K (SK) series filters supply a higher insertion loss than the K series. SK series filters are suitable for use with equipment that has high line-to-line as well as line-to-ground conducted emissions.

The ESK models meet the very low leakage current requirements of SEV, VDE portable equipment and 120 volt UL544 nonpatient medical equipment.

These filters are designed to reduce conducted noise to acceptable limits for equipment that must comply with VDE 0871 in West Germany and with FCC regulations.

EP SERIES

EP series RFI filters reduce conducted noise for equipment that must comply with VDE 0871 in West Germany and applicable FCC specifications.

SP SERIES

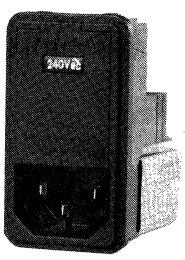
The SP series of RFI power line filters is effective in reducing the RFI noise generated by switching power supplies. This series is recommended for use with equipment that must comply with VDE 0875 and VDE 0871 in West Germany and Parts 15 and 18 of the FCC regulations in the United States.

Q SERIES

Q series RFI filters are designed to provide effective power line filtering for switching power supply applications. EQ type filters conform to the low leakage requirements of SEV, VDE portable equipment and UL544 nonpatient medical equipment.

Write or call for the complete 66 page catalog covering our full line of filters detailing performance specifications, mechanical dimensions, and options.

POWER LINE MODULE



F2-VSM SERIES

The F2-VSM series incorporates an international power line connector, line voltage selector/display, fuses, and EMI/RFI filter.

F2-PSM SERIES

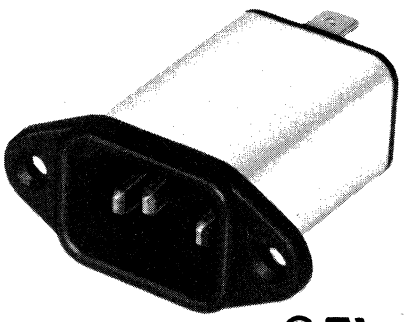
The F2-PSM series incorporates an international power line connector, line switch, fuse(s), and EMI/RFI filter. There are 72 standard configurations to select from to meet a broad range of electrical and mechanical requirements.

now available in U.S.A.

Made to Swiss Quality Standards (by Timonta)

SERIES FGA

Compact design with I.E.C. Connector
Short depth: 1.58 in (40mm) long
Wide attenuation bandwidth (0.1 - 100 MHz)
Provides protection against malfunction caused by power line interference
Nominal voltage: 250V 50/60 Hz
Leakage current: <0.5mA
Test voltage: 2kV - 50 Hz



approved
pending (file E 76360)

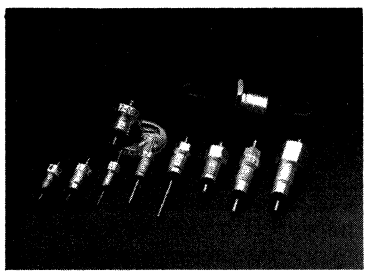
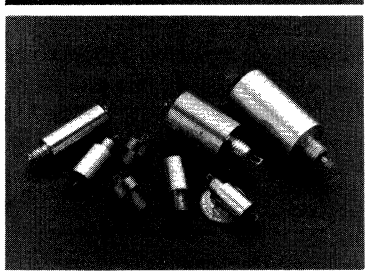
EMI/RFI FILTERS AND CAPACITORS





RESIN SEALED EMI/RFI FEED THROUGH CAPACITORS AND FILTERS

These filters and capacitors depend on ceramic capacitors and ferrite beads to achieve their high degree of miniaturization and volume efficiency. All bushings are suitably plated and supplied with lockwasher and nut or solder preforms as required. The capacitor elements are protected from the environment with a proprietary resin formulation.

Distributor stocked items are shown on page 2 of this catalog.

For a full line listing of Spectrum's resin seal filters and capacitors, request bulletins 27-0027-46 and 27-0027-47.

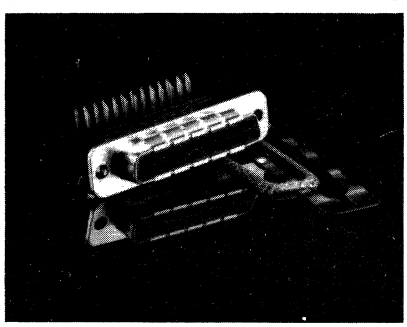
HERMETICALLY SEALED EMI/RFI FILTERS AND CAPACITORS

These hermetic seal styles of filters and feed-thru capacitors are intended for bulkhead mounting to prevent spurious signals from entering or leaving a chassis, compartment or equipment. The discoidal ceramic capacitors used in Spectrum's filters "self resonate" at much higher frequencies than other types of capacitors (mylar and foil, tantalum, electrolytic paper, etc.).

Distributor stocked items are shown on page 3 of this catalog.

For a full line listing of Spectrum's glass seal filters and feed-thru capacitors, request bulletins 27-0027-42 and 27-0027-43.

EMI FILTERED D SUBMINIATURE CONNECTORS



EMI FILTERED D SUBMINIATURE CONNECTORS

Spectrum D Subminiature filtered connectors feature a unique ground plane to effectively block bulkhead leakage of EMI. The design also provides line to line isolation to limit cross talk (line to line mutual coupling) to an absolute minimum. A most important feature is the coaxial spring contact* that provides proper electrical grounding when mating one connector to another connector. Spectrum connectors are designed to provide compatibility with EIA RS-232 and RS-449 and will mount in existing chassis hole patterns.

DISTRIBUTOR STOCKED FILTERED CONNECTORS ARE SHOWN ON PAGES **C**•1513 THROUGH **C**•1517 OF EEM SECTION 2100

For a full line listing of Spectrum's EMI D Subminiature Connectors, request bulletin 27-0027-53. *U.S. Patent 4516815

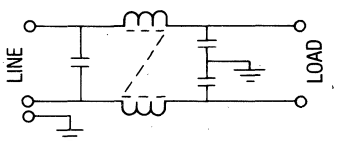
SERIES A GENERAL PURPOSE FILTERS

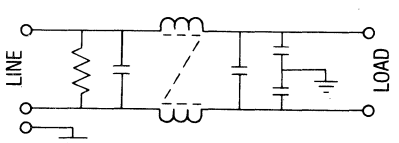
The A Series of EMI/RFI filters is a general purpose, common mode line. Available in a broad selection at lowest cost. **Rated Voltage:** 115/250 VAC, 50/60 Hz. **Max. Leakage Current (Line-to-case):** 0.5 mA at 115 VAC, 60 Hz. 1.0 mA at 250 VAC, 50 Hz. **Test Voltage:** Line-to-case 2250 VDC, line-to-line 1450 VDC.



Standex Number	Max. Line Current Amps	Size Inches L x W x H
F6000A101	1	2.50 x 2.11 x 0.63
F6000A102	2	2.50 x 2.11 x 0.63
F6000A103	3	2.50 x 2.50 x 0.75
F6000A105	5	2.50 x 2.50 x 0.75
F6000A110	10	2.50 x 2.50 x 1.13
F6000A120	20	3.23 x 2.78 x 1.13
F6000A301	1	2.50 x 0.94 x 0.63
F6000A302	2	2.50 x 0.94 x 0.63
F6000A303	3	2.50 x 1.31 x 0.75
F6000A305	5	2.50 x 1.31 x 0.75
F6000A310	10	2.50 x 1.31 x 1.13
F6000A610	10	2.50 x 2.60 x 1.13
F6000A620	20	3.35 x 2.78 x 1.13
F6000A630	30	5.22 x 4.12 x 1.50

SERIES B GENERAL PURPOSE FILTERS

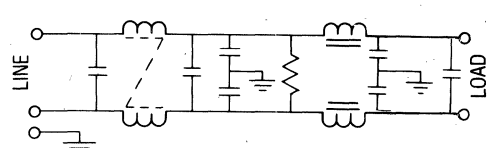
General purpose, common-mode and differential-mode filters. Effective where pulsed, continuous and/or intermittent interference is present. **Rated Voltage:** 115/250 VAC, 50/60 Hz. **Max. Leakage Current (Line-to-case)** 0.5 mA at 115 VAC, 60 Hz. 1.0 mA at 250 VAC, 50 Hz. **Test Voltage:** Line-to-case 2250 VDC, line-to-line 1450 VDC.



Standex Number	Max. Line Current Amps	Size Inches L x W x H
F6000B101	1	2.78 x 2.98 x 0.88
F6000B102	2	2.98 x 2.78 x 0.88
F6000B103	3	2.98 x 2.78 x 1.13
F6000B105	5	2.98 x 2.78 x 1.13
F6000B10	10	3.23 x 2.78 x 1.13
F6000B120	20	3.23 x 3.23 x 1.50
F6000B301	1	2.78 x 1.81 x 0.88
F6000B302	2	2.78 x 1.81 x 0.88
F6000B303	3	2.78 x 1.81 x 1.13
F6000B305	5	2.78 x 1.81 x 1.13
F6000B310	10	2.78 x 2.06 x 1.13
F6000B610	10	3.35 x 2.78 x 1.13
F6000B620	20	3.35 x 3.20 x 1.50
F6000B630	30	5.23 x 4.12 x 1.50
F6000B703	3	3.15 x 2.19 x 1.25
F6000B705	5	3.15 x 2.19 x 1.25
F6000B710	10	3.64 x 2.19 x 1.25

SERIES F SWITCHING TYPE POWER SUPPLY FILTERS

This series has been designed to protect equipment from malfunctions. Especially effective where switching type power supplies, SCR's and T^2L circuits are utilized. **Rated Voltage:** 115/250 VAC, 50/60 Hz. **Max. Leakage Current (Line-to-case):** 0.5 mA at 115 VAC, 60 Hz. 1.0 mA at 250 VAC, 50 Hz. **Test Voltage:** Line-to-case 2250 VDC, line-to-line 1450 VDC.



Standex Number	Max. Line Current Amps	Size Inches L x W x H
F6000F103	3	3.23 x 2.75 x 1.25
F6000F106	6	3.73 x 3.32 x 1.50
F6000F110	10	3.73 x 3.32 x 1.50
F6000F120	20	5.11 x 4.12 x 1.50

Standex Electronics manufactures a broad line of standard filters with direct cross reference to most major brands. Call or write for complete catalog.

Special filters are standard at Standex Electronics. Call (305) 863-7550 for engineering assistance.

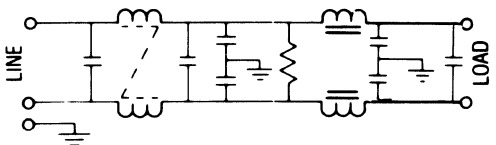
SERIES S HIGH PERFORMANCE POWER LINE FILTERS

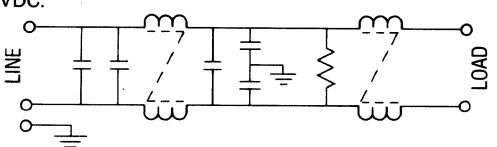
The Series S is particularly suited for equipment with high line-to-case as well as line-to-line emissions. **Rated Voltage:** 115/250 VAC, 50/60 Hz. **Max. Leakage Current (Line-to-case):** 0.25 mA at 115 VAC, 60 Hz. 0.40 mA at 250 VAC, 50 Hz. **Test Voltage:** Line-to-case 2250 VDC, line-to-line 1450 VDC.



Standex Number	Max. Line Current Amps	Size Inches L x W x H
F6000S103	3	3.68 x 3.32 x 1.13
F6000S106	6	4.16 x 3.80 x 1.25
F6000S110	10	4.80 x 4.44 x 1.25
F6000S303	3	3.32 x 2.51 x 1.13
F6000S306	6	3.80 x 2.99 x 1.25
F6000S310	10	4.44 x 3.63 x 1.75
F6000S203	3	3.09 x 2.19 x 1.50
F6000S706	6	3.09 x 2.19 x 1.75
F6000S710	10	4.21 x 2.19 x 1.75

SERIES J SWITCHING POWER SUPPLY NOISE SUPPRESSION FILTERS

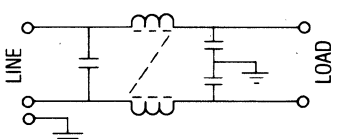
The Series J is well suited to meet VDE 0871, B level and FCC Part 15J, Class B. all models meet UL544 non-patient medical equipment requirements. **Rated Voltage:** 115/250 VAC, 50/60 Hz. **Max. Leakage Current (Line-to-case)**0.25 mA at 115 VAC, 0.40mA at 250 VAC, 50 Hz. **Test Voltage:** Line-to-case 2250 VDC, line-to-line 1450 VDC.



Standex Number	Max. Line Current Amps	Size Inches L x W x H
F6000J103	3	3.74 x 3.32 x 1.75
F6000J106	6	6.49 x 6.00 x 2.25
F6000J110	10	6.49 x 6.00 x 2.75
F6000J303	3	3.32 x 2.56 x 1.75
F6000J306	6	6.00 x 5.31 x 2.25
F6000J310	10	6.00 x 5.31 x 2.75
F6000J703	3	3.15 x 2.19 x 1.75

SERIES L HIGH PERFORMANCE FILTERS

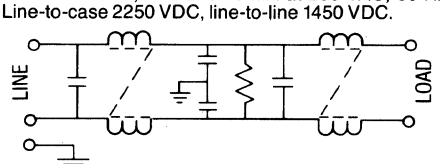
The Series L offers prime performance in controlling line-to-line and low-frequency line-to-line noise. It offers superior performance to comparable sized filters. All units incorporate an IEC power line connector. **Rated Voltage:** 115/250 VAC, 50/60 Hz. **Max. Leakage Current (Line-to-case):** 0.25 mA at 115 VAC, 60 Hz. 0.50 mA at 250 VAC, 50 Hz. **Test Voltage:** Line-to-case 2250 VDC, line-to-line 1450 VDC.



Standex Number	Max. Line Current Amps	Size Inches L x W x H
F6000L801	1	2.16 x 1.97 x 0.79
F6000L803	3	2.16 x 1.97 x 0.79
F6000L806	6	2.16 x 1.97 x 0.79
F6000L901	1	1.97 x 1.55 x 0.83
F6000L903	3	1.97 x 1.55 x 0.83
F6000L906	6	1.97 x 1.55 x 0.83

SERIES R LOW IMPEDENCE LOAD FILTERS

This series offers premium performance for low impedance loads. It protects equipment from power line noise as well as protecting the line from equipment noise. A further advantage is low leakage of current. All units meet VDE portable equipment requirements, as well UL544 nonpatient medical equipment requirements at 120V. **Rated Voltage:** 115/250 VAC, 50/60 Hz. **Max. Leakage Current (Line-to-case):** 0.25 mA at 115 VAC, 60 Hz. 0.40 mA at 250 VAC, 50 Hz. **Test Voltage:** Line-to-case 2250 VDC, line-to-line 1450 VDC.



Standex Number	Max. Line Current Amps	Size Inches L x W x H
F6000R101	1	3.23 x 2.75 x 1.13
F6000R102	2	3.23 x 2.75 x 1.13
F6000R103	3	3.73 x 3.32 x 1.13
F6000R105	5	3.73 x 3.32 x 1.13
F6000R10	10	3.73 x 3.32 x 1.50
F6000R120	20	5.11 x 4.12 x 1.50
F6000R301	1	2.75 x 2.06 x 1.13
F6000R302	2	2.75 x 2.06 x 1.13
F6000R303	3	3.32 x 2.56 x 1.13
F6000R305	5	3.32 x 2.56 x 1.13
F6000R310	10	3.32 x 2.56 x 1.50
F6000R203	3	4.28 x 2.19 x 1.25
F6000R205	5	4.28 x 2.19 x 1.25
F6000R210	10	4.28 x 2.19 x 1.50

All Standex EMI/RFI Filters are UL recognized and CSA Certified, with VDE approval in process.

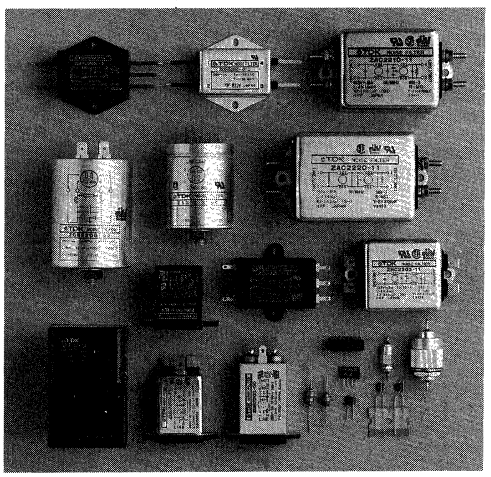
NOISE (EMI) FILTERS

TDK CORPORATION OF AMERICA 4711 West Golf Road, Suite 300, Skokie, Illinois 60076, U.S.A. Phone: (312) 679-8200 **CHICAGO SALES OFFICE** (312) 679-8200 **LOS ANGELES SALES OFFICE** (213) 539-6631 **SAN FRANCISCO SALES OFFICE** (408) 943-9325 **NEW YORK SALES OFFICE** (516) 625-0100 **INDIANAPOLIS SALES OFFICE** (317) 872-0370 **DETROIT BRANCH** (313) 353-9393 **ALABAMA BRANCH** (205) 539-4551 **TDK CORPORATION** Tokyo, Japan

The latest developments in electronics have caused more attention to be focused on problems concerning noise (EMI) due to incorrect operation as well as generated noise (EMI). TDK's noise (EMI) filters are the result of many years of research in ferrite cores, SF cores and ceramic capacitors. These filters are designed to meet a wide variety of demanding applications.

Features

1) Highly permeable ferrite cores and high saturation flux density cores are used in the inductors, the critical component in any noise (EMI) filter.
2) A high dielectric ceramic capacitor with low loss is used in these filters to reduce their size and ground the small leakage current.
3) A full series is available to permit selection based on characteristics, structure, dimensions and price.
4) Preparations to obtain UL, CSA, VDE and TÜV recognition/approval have been made.



Series name	Exterior view	Function	Type	Rated current (A)	Rated voltage (V.a.c.)	Test voltage (V.a.c.)	Leadkage current (mA)	Weight (g)
ZAC	 Metal cased Terminal: studs	Normal mode and common mode noise is prevented within a 0.2 to 30 MHz range. UL recognized, CSA certified TÜV approved	ZAC2205-00U	5	250	1500	<1.0 ($^{250V}_{60Hz}$)	240

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

TOKO AMERICA FILTERS

LC FILTERS

Temp. Range	−10° ~ +60°C	−10° ~ +60°C	−10° ~ +60°C	−10° ~ +60°C

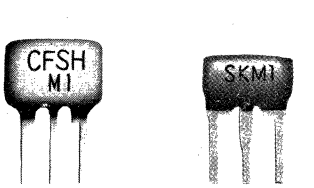
FM CERAMIC



Type	CFSK	CFSH
Freq.	10.7 MHz	10.7 MHz
Impedance	330Ω	330Ω
Ht/Lth/Wd	6/9/3.5	9/9/4
Temp. Range	−20° ~ +80°C	−20° ~ +80°C

~ Denotes: Numerous variations available between values listed.

Toko filters are available in a variety of types and sizes for use in a wide range of electronic equipment. Applications include: video cassette recorders, video disc players, radio and hi-fi equipment, cordless telephones and digital audio equipment.
We are interested in custom design for filters also. If you have trouble finding that right filter give Toko a call.

TTE® *miniature passive* FILTERS

Over 1,000,000 Standard Types

*Fast Prototype Service Available**

TTE, Inc. is a California Corporation, established in 1954 and incorporated in 1957. Housed in its facility in West Los Angeles, are the sales offices, R & D department and manufacturing operation. Since its' beginnings TTE® has designed and manufactured both Active and Passive Filters.

When using this catalog, please remember the graphs are intended as a visual aid, not as a specification. The guaranteed specification is the specification listed in the individual product tables.

TTE® has no minimum order. There are no set-up charges for standard filter types and no engineering costs are charged to TTE® customers.

The first eight pages of this listing are Passive Filters followed by the Active Filters, pages 9 through 12, the case and base dimensions for all types and the Passive Band Reject Filters are listed on page 12.

WIDE BAND FILTERS: A Bandwidth of ±20% or greater can be obtained by ordering TTE® standard Highpass and Lowpass filter sections as a composite network. Select the numbers from the Series H and J listing on pages 5-6 which give the desired attenuation slopes and combine these numbers. For example, to obtain a slope of 40dB at 0.65 of the lower frequency, Fc1, (Highpass section) and 40dB at 1.6 of the upper frequency, Fc2, (Lowpass section) use Highpass series H69 plus Lowpass series J59. The resulting Bandpass number is K6959. THE HIGHPASS SERIES NUMBER IS FIRST FOLLOWED BY THE LOWPASS SERIES NUMBER. Types with dissymmetrical attenuation can be combined.

Insertion losses for bandpass types between equal terminations are from 0.5dB to 12dB depending upon the bandwidth, frequency and size. K10 and K11 types typically have 12dB insertion loss and K12 types about 7dB flat loss. Specials are available for center frequencies from 10Hz upwards. Others are available with 60dB to 3dB bandwidth ratios of 2.0:1. Please contact us with your specification.

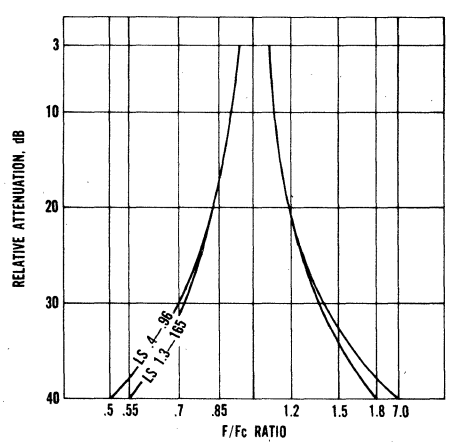
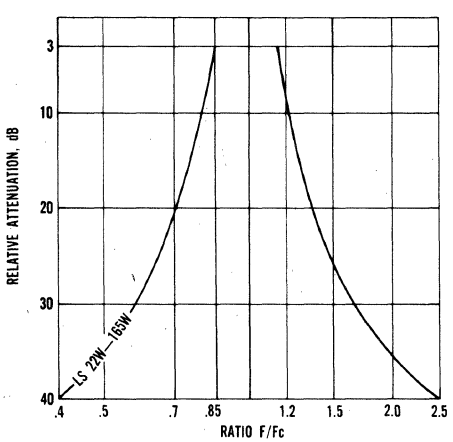
TO ORDER — specify the model number and channel needed. This series is a **STOCK ITEM**, however, the stock is limited to two of each frequency and are offered on a first come first served basis. There is a limit of two of each line item per customer if stock delivery is required. If T T E® is out of stock when your order is placed, T T E® will manufacture these networks and ship them to you within 7 working days; this service is provided at no additional charge. If you require sharper slopes the series Q bandpass filter may be specified. Shipment will be in accordance with the standard delivery schedule for that series. The series Q is available for IRIG channels in PCB cases even though PCB cases are not listed in the literature for that series. Please contact T T E® for exact dimensions.





Case and Mounting dimensions are listed on page 12.

The Lowpass Filters cataloged on this page may be specified for any frequency from 10Hz to 100MHz. Frequency range and the case selections are listed to the right of each group.

The passband ripple is 0.4dB peak to valley for most types. Exceptions include series J91 through J97. Typical passband ripple for this series is 0.6dB peak to valley. If the small PCB cases are specified for low frequency networks the passband ripple may increase to 1dB peak to valley.

Phase linearity is reasonable, phase matched sets of filters may be specified. If phase shift is critical in your application TTE® also manufactures Bessel, Gaussian and Butterworth designs. Specify from 2 to 10 poles. The frequency range offered is from 1000Hz to 100KHz.

The maximum power measured at the filter's output terminal is 20 milliwatts. Exceptions are, the Subminiature series and again the low frequency filters and particularly miniaturized low frequency types. Please remember that TTE® also offers Active Filters that are substantially smaller at low frequency and less expensive; please see pages 7 through 12.

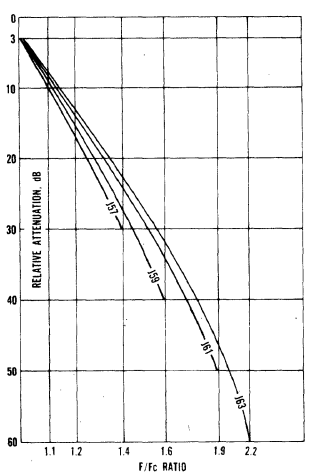
In the tables under the heading of chassis mounting cases are listed case 613, 718 and 720. These cases may be specified with either BNC or SMA connectors. Please note your choice when ordering by following the case number with B for BNC or A for SMA (i.e. 720A). The case dimensions and mounting information is listed on page 12. Please note that these networks should not be mounted near transformers or other strong magnetic fields.

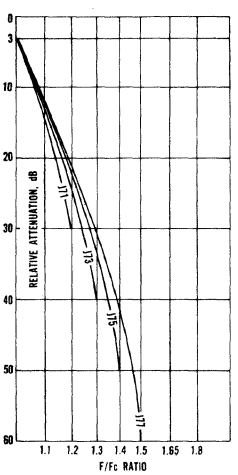
IMPEDANCE GUIDE FOR MINIATURE LOWPASS TYPES

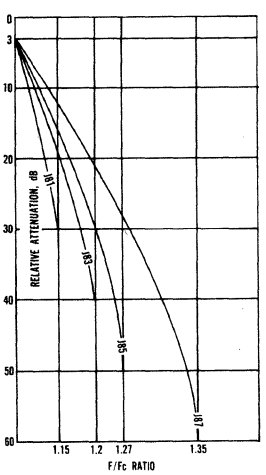
Fc −3dB		10Hz 50Hz	50Hz 100Hz	100Hz 500Hz	500Hz 5KHz	5KHz 10KHz	10KHz 100KHz	100KHz 500KHz	500KHz 1MHz	1MHz 5MHz	5MHz 20MHz
Z Min.	Ω	10K	10K	5K	1K	500	100	50	50	50	50
Z Max.	Ω	15K	39K	39K	39K	20K	3K	1K	500	300	75

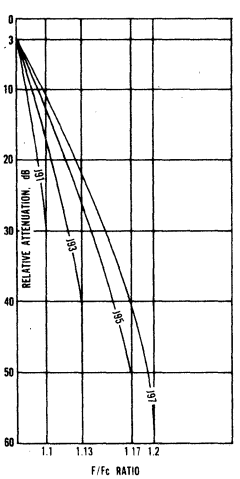
To Order: specify (1) the TTE® series number and; (2) the cut-off frequency and (3) the source and load inpedance (resistive), the impedance guide is below for your convenience. The approximate price range is $42 to $175 each in quantities of 1-4 units.

Individual response curves are plotted on the next page. These curves are intended to give the reader a fast comparison between groups. The 1dB location will move down to .7Fc at low frequency and/or low impedance levels. Again, these curves are "typical responses" not specifications.









Case and Mounting dimensions are listed on page 12.

Z min Ω	1K	500	250
Z max Ω	10K	10K	1K

GAUSSIAN LOWPASS FILTERS are frequently specified by designers of pulse communication systems. This design features low ringing or overshoot. If the designer requires sharper cut-off ratios and can tolerate greater ringing or overshoot, the **BUTTERWORTH LOWPASS FILTER** should be considered. This design, like the Gaussian, features passbands and stopbands that contain no ripple.

TO ORDER: specify (1) the **T T E®** series number, (2) the cut-off frequency (Fc), (3) the source and load impedance (resistive) and (4) the case number. Prices range from $39.00 to $152.00 each in quantities 1-4; there is a set-up charge for these series of lowpass filters.

Case and mounting dimensions are listed on page 12.

T T E, Inc., 11650 W. Olympic Blvd., Los Angeles, CA 90064, (213) 478-8224

TTE® *digitally programmable* FILTERS

digitally CONTROLLED CUT-OFF FREQUENCIES USING 3 BINIARY CODED SIGNALS.

- 128:1 TUNING RANGE IN EACH FREQUENCY BAND.
- 4 FREQUENCY BANDS UP TO128KHz.
- TTL COMPATIBLE.
- PRINTED CIRCUIT BOARD MOUNTING.

LOWPASS FILTERS

Model No.	Min. Attn (dB)	Cut-Off Ratio (F/Fc)	Tuning Range (Hz)
PALF 51	40	3	1 to 128

ABB66	±5.0%	50dB @ .3 & 3.3Fc	11.2mA	815

Active Filters are desirable at low frequencies as they are lighter and smaller than Passive Filters; impedance matching is not required and gains at the ouput may be specified.

This section of the catalog contains specifications and descriptions of T T E's Active Filter line. Individual product data pages will be available soon, please contact us with your specification.

When using this section of the catalog, please remember the graphs are visual aids, not specifications. The guaranteed specifications are (1) the attenuation of the passband edge (Fc) is — 3dB ± 0.5dB and (2) that the stopband attenuation listed in the catalog is the minimum attenuation that each filer type will develop.

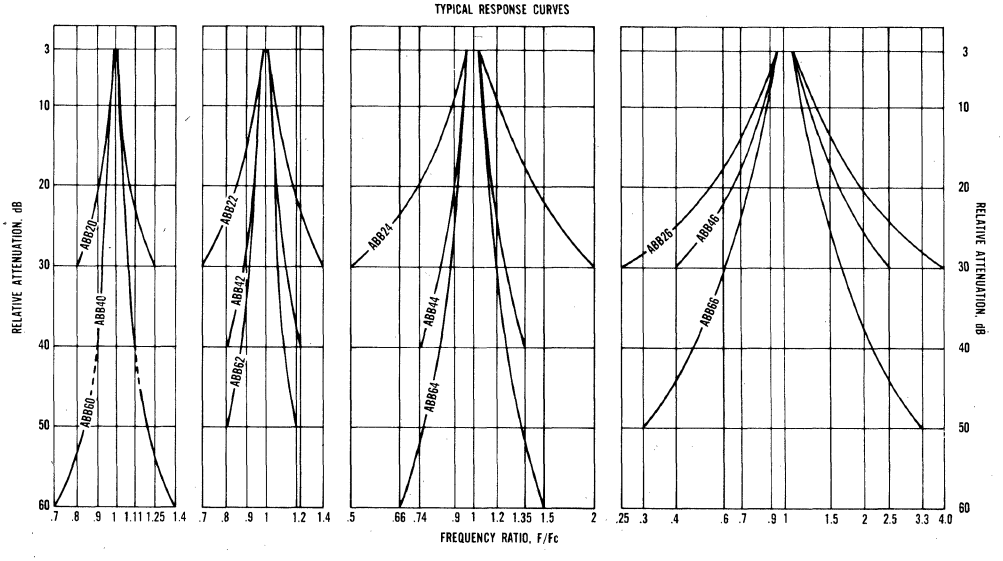
Now the designer is able to specify either Active or Passive Filters from one supplier, this saves time for both the designer and the purchasing agent. At T T E there is NO MINIMUM ORDER, and NO ENGINEERING CHARGE for any standard series filter.

GENERAL SPECIFICATIONS

Parameter	Voltage Supply		Units
	TYP	MAX	
Supply Voltage	±5	± 18	VDC
Input Offset Voltage (10Kr at 25 C)	2	5	mV
Input Offset Current (± 15V @ 25°C)	5	50	mA
Gain (Non-Inverting)	Unity ±0.2		dB
Operating Temperature	0 to + 70 C		
Storage Temperature	−30 to +120 C		

TO ORDER: (1) specify the T T E series number and (2) specify the center frequency and (3) specify option D or S. The prices range from $87 to $155 each in prototype quantities. Specials are available at standard prices. Please contact us with your specification.

TYPICAL RESPONSE CURVES



Case and Mounting dimensions are listed on page 12.

*SLC stands for Single-layer Ceramic Technology

NOTE: Bushing mount filters include nut and (internal tooth or split ring) washer.

TUSONIX SLC™*

Ceramic Capacitors—EMI Filters

TUSONIX ceramic filters are chosen to suppress undesired EMI in those applications where space is limited and small size is critical.

Popular applications include telecommunications, CATV, telemetry, radar, and other transmission equipment.

IMPORTANT:

Techniques for Solder connections to eyelet type filters

A. A 60/40 type solder preform is recommended.
B. Preheat filters and mounting assembly to 250°F.
C. Complete the solder joint by adding heat to the assembly, adjacent to the filter.
D. Allow assemblies to cool slowly.

Mounting torques for bushing type filters

12-32 UNEF - 6-8 lb. ins.
8-32 UNC - 3-5 lb. ins.

Techniques for solder connections to filter leads

A. Maximum solder temperatures should not exceed 450°F.
B. Whenever practical, employ a heat sink between soldering point and filter body.
C. Refrain from bending or twisting lead.

Solder Mount

LET US BE YOUR MANUFACTURING FACILITY

Do You Need Help To Get The End Product You Want?

After you have your design to meet your circuit performance requirements, ACC's Engineering Staff can assist you to package your circuit. We have a complete staff of electrical, mechanical, industrial, and chemical engineers to develop the most cost-effective assembly to compliment your product.

Custom Thick Film Hybrid?

If space is a problem, thick film hybrids are the answer to reduced manufacturing cost and component inventories. ACC can design and deliver a custom thick film hybrid to meet your performance, space, and cost requirements. For less stringent space requirements, formed discrete components or SOT packages are quite adequate. If space is tight or you have your own custom chip, a chip and wire hybrid may be the best approach.

The results to you are smaller size, improved reliability, and in most cases, better circuit performance due to the fact that thick film allows you to choose the exact resistor values and tolerances you want.

We have the capability to build your product to any stage of completion you desire. From a thick film print, fire, and trim, only, to a finished encased product, or any stage in between, by using custom thick film hybrids or printed circuit assemblies.

We will work with you during your development stage. We possess the capability to deliver into the millions, if necessary.

Automotive Controls Corporation (ACC) has over 200,000 square feet of production space. This facility, located in Southeast Kansas is staffed with a quality-conscious, dependable, rural and small-town work force. Our employees, to whom we owe our success, will build your product.

Printed Circuit Assembly?

If space is not a problem, then an automatically inserted printed circuit assembly is the most cost effective approach. ACC's printed circuit assembly area is equipped to insert components and wave solder boards up to 16 inches wide. Water washing is standard. Chlorinated cleaning solvents are available. The ACC facility is equipped and the personnel are trained to handle electrostatic sensitive components at all stages of production.

Packaging Support

In support of the electronic assembly, ACC can offer single-sided printed circuit boards, coil winding, transfer and injection molding, potting, metal and lead frame stampings, metal plating, and painting, if required.

Total Design Capability through manufacture, test and delivery

Hybrid Integrated Circuits for Military and Industrial Applications

Aeroflex designs, develops and manufactures custom hybrids for both military and industrial customers. We are qualified for use on B1, B52, F15, F16 and LAMPS MK III, plus numerous other ground and airborne systems and medical and communications equipment.

Will a custom hybrid do your job? Hybrid technology combines the quick-response design and manufacturing economies of the printed circuit assembly with the reliability and small size of the monolithic IC. To help you determine when the method will be cost effective, Aeroflex's experienced engineers will consider the circuit itself, manufacturing lead time, and the quantities involved.

Once the decision has been made, Aeroflex has the technical and manufacturing support to meet your most exacting requirements. Our circuit designers will put your parameters together into the smallest, lightest package consistent with effective performance.

We excel in designing active filters, sample and hold networks, low noise pre-amps, voltage regulators, drivers and receivers and digital interface circuits to meet MIL-STD-1553. Electrical performance is guaranteed by our automatic test systems.

In our complete manufacturing facility, Aeroflex has the skilled personnel and production equipment to meet every hybrid design and manufacturing requirement. For most designs, we use thick film deposition for its great flexibility. On occasion, however, we will utilize thin film chip components in conjunction with thick film resistors and conductors. Gold conductors and various silver alloys are often employed, as well as a variety of resistor inks to cover the full range of resistor values. We have and use both laser, for active trimming, and airbrasive trimming systems.

Packaging for all environments. Aeroflex commercial hybrids are often epoxy sealed in ceramic for industrial applications. Heavy duty packaging options include welded hermetically sealed all-metal cases including flat packs, dips, plug-ins and "TO" cans for military requirements.

Product Assurance, in and out. Our Product Assurance Department meets the requirements of MIL-Q-9858A. Quality Assurance, Quality Control, Qualification Testing and Equipment Calibration are its responsibilities. Incoming inspection is performed on semiconductors in accordance with MIL-STD-883, Method 2010.1 Level B. Similar criteria are applied to hybrid inspection. Screening and qualification testing to MIL-STD-883B, Method 5008 and MIL-M-38510 are also available.

HI-REL HYBRIDS

THICK & THIN FILM HYBRID TECHNOLOGY

CTS Microelectronics produces high quality thick film hybrid circuits. The modern 101,000 square foot manufacturing facility in West Lafayette, Indiana, specializes in volume production of "Hi-Rel" and commercial grade chip and wire hybrid circuits, quality discrete hybrids and custom resistor networks.

CUSTOM DESIGN/ QUALITY ASSURANCE.

CTS Microelectronics works directly with the customer to establish and maintain testing procedures that will insure the highest standards of quality and reliability. Specification reviews are a standard practice at CTS. Representatives from the quality assurance, sales and engineering departments met with the customer to establish the requirements of each designed circuit prior to any production run, following the general requirements of MIL-STD-883 and MIL-M-38510.

All incoming materials go through quality assurance. There, samples are taken, tested and quarantined until written approval is given to release them to stock.

The in-process inspection system checks circuits at all stages of manufacturing to insure highest quality workmanship and adherence to specifications. Finally, quality assurance inspectors thoroughly test the finished circuits. Records from each stage of design and manufacturing for all circuits assure complete traceability of a project.

CTS Microelectronics' in-house testing facilities include vibration, shock, centrifuge, thermal shock, temperature cycling, moisture resistance, leak testing, PIND, burn-in, life testing and moisture/gas analysis. These are applied as an effective check-and-balance system to assure consistent quality and reliability in circuit manufacturing.

WE'LL "SECOND SOURCE" STANDARD HYBRIDS **YOUR** WAY

STANDARD HI-REL HYBRIDS AVAILABLE TO YOUR SPECIFICATION FROM CTS MICROELECTRONICS, INC.

Now get standard pin-for-pin Hi-Rel Hybrid replacements with production extras like special screening, environmental testing, data logging and electrical testing.

For more than 20 years CTS Microelectronics has been a leading producer of Hi-Hel Hybrids that can withstand the harshest environments. These hybrids will meet test standards set out by MIL-STD 883. And now they are available for fast delivery in many pin-for-pin configurations.

When you need a reliable second source for Hi-Rel Hybrids, tested to your custom specifications, think first of CTS Microelectronics. For complete technical information, prices and delivery projection, get in touch with CTS Microelectronics, 1201 Cumberland Avenue, West Lafayette, IN 47906.

Or call (317) 463-2565.

CTS 0034	High Speed Dual Level Translator	National DH 0034/883B

AVAILABLE HOW YOU WANT THEM.

Others say — "Take-it-the-way-we-make-it." CTS will "second source" standard hybrids your way.

What a great alternate source for standard pin-for-pin Hi-Rel Hybrid replacements! When you are faced with the "take-it-or-leave-it" attitude that some major suppliers have adopted on Hi-Rel Hybrid standards — look to CTS Microelectronics. CTS will provide Hi-Rel Hybrids just as you want them. And, our prices are very competitive.

Don't settle for standard hybrids that don't meet your individual needs. Ask about the CTS-0002, 6, 8, 21, 32, 33, 34 and 41 as alternates for the LH and DH series. We'll make your standards to custom requirements.

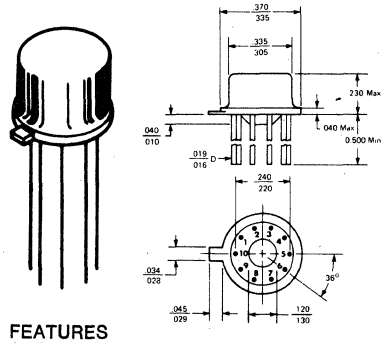
HIGH VOLTAGE HIGH CURRENT DRIVER/CTS 0008 IB



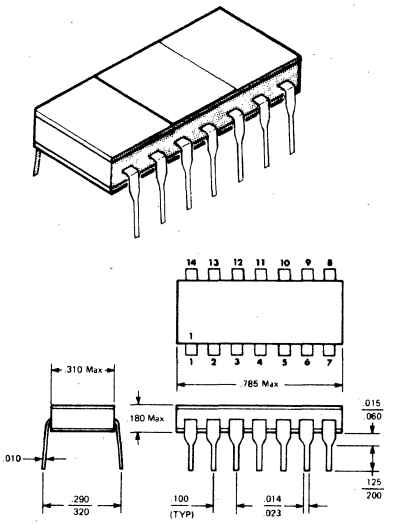
FEATURES
1. Operation from a single +10V to +45V power supply.
2. Low standby power dissipation of only 35MW for 28V power supply.
3. 3.0A, 50MS pulse current capability.

The CTS 0008 IB is a hybrid high voltage, high current driver, designed to accept standard DTL or TTL input levels and provide a pulsed load up to 3A from a continuous supply voltage up to 45V. AND inputs are provided with an EXPANDER connection, should additional gating be required.

Since one side of the load is grounded, there is less likelihood of false turn-on due to an inadvertant short in the drive line.

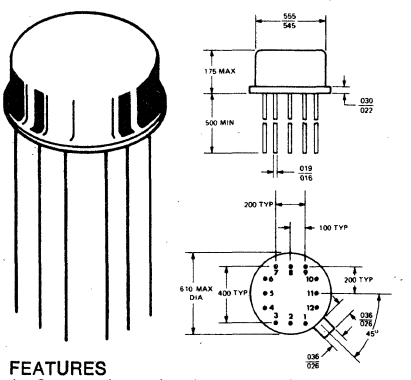
The high pulse current capability makes the CTS 0008 IB ideal for driving nonlinear resistive loads such as incandescent lamps. The circuit also requires only one power supply for functional operation.

DUAL HIGH SPEED LEVER SHIFTER/CTS 0034 CB



The Model CTS 0034 CB Dual High Speed Level Shifter is used to provide an interface between TTL/DTL, and MOS/JFET, voltages. The circuit features large output swings to 25 volts, output currents to 100 mA and high-speed operation.

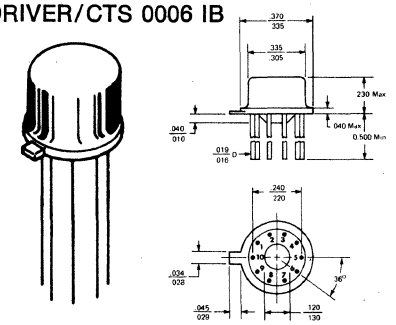
SAMPLE AND HOLD CIRCUIT/ CTS 0023 ZB



FEATURES
1. Output short circuit protected.
2. Extremely low drift rate: .5 mV/sec typ. with .01 μF teflon capacitor.
3. TTL or DTL compatible logic input.
4. Operates with just ±15V or with ±15V and a separate +5V logic supply for improved noise immunity.
5. Voltage offset adjustable to zero using a 10K pot with wiper at V−.
6. Military grade processing per MIL-STD-883.
7. Pin-for-pin replacement for LH 0023.

The CTS 0023 ZB is a high performance sample and hold circuit that exhibits an extremely low drift rate. Some typical applications include: Sampled Data Systems, D/A Deglitchers, Analog De-Multiplexers and A/D inputs.

HIGH VOLTAGE CURRENT DRIVER/CTS 0006 IB



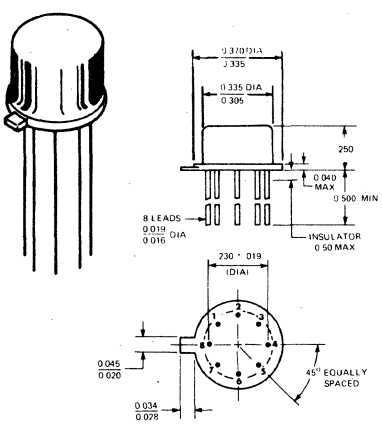
FEATURES
1. Operation from a single +10V to +45V power supply.
2. Low standby power dissipation of only 35MW for 28V power supply
3. 1.5A, 50MS pulse current capability.

The CTS 0006 IB is a hybrid high voltage, high current driver, designed to accept standard DTL or TTL input levels and provide a pulsed load up to 1.5A from a continuous supply voltage up to 45V. AND inputs are provided with an EXPANDER connection, should additional gating be required.

Since one side of the load is grounded, there is less likelihood of false turn-on due to an inadvertant short in the drive line.

The high pulse current capability makes the CTS 0006 IB ideal for driving nonlinear resistive loads such as incandescent lamps. The circuit also requires only one power supply for functional operation.

LOG INTERMEDIATE FREQUENCY AMPLIFIER/ CTS 861 GB



The CTS 861 GB is a cermet hybrid integrated circuit. This wideband amplifier is intended primarily for use as one stage of a log IF amplifier, with midband frequency of 10 MHz to 100 MHz. It has a voltage gain of typically 12 dB, which is flat to within .6 dB typically from 30 to 100 MHz. These units have RF output which is limited to .5V typical and can be directly coupled to the following stage. The detector has current output which makes possible the direct summing of several output stages.

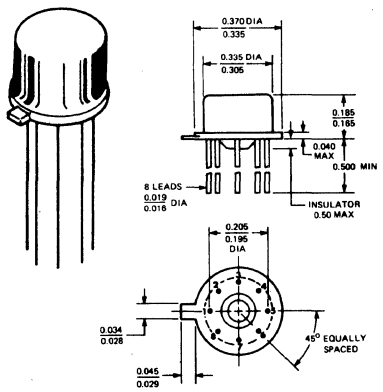
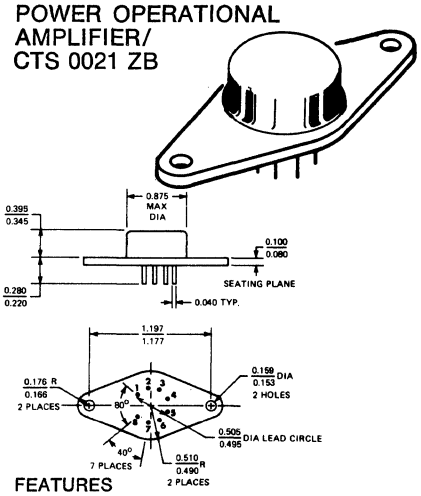
OPERATIONAL AMPLIFIERS

HIGH SLEW RATE OPERATIONAL AMPLIFIER/CTS 0024 GB



The CTS 0024 GB is a very wide bandwidth, high slew rate operational amplifier intended to fulfill a wide variety of high speed applications such as buffers to A to D and D to A converters and high speed comparators. The device exhibits useful gain in excess of 50 MHz making it possible to use in video applications requiring higher gain accuracy than is usually associated with such amplifiers. It is plug-in compatible with LH 0024.

POWER OPERATIONAL AMPLIFIER/ CTS 0021 ZB

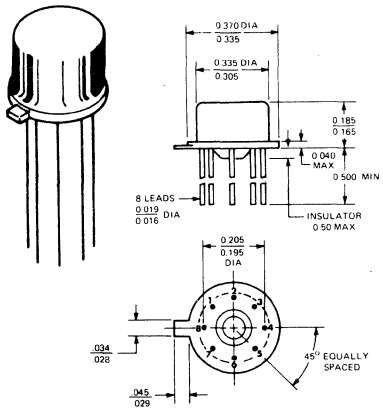


FEATURES

1. Output current 1.0 Amp.
2. Low input offset voltage and current.
3. Output voltage swing ±12V into 10 ohms.
4. Options on high reliability processing.
5. Moisture less than 1000 PPM.
6. Solderability shall conform to MIL-STD-883B, Method 2003.

The CTS 0021 ZB is a general purpose operational amplifier featuring an output current in excess of one ampere at voltage levels of ±12V and is compensated with a single external capacitor.

BUFFER AMPLIFIER/ CTS 0002 GB

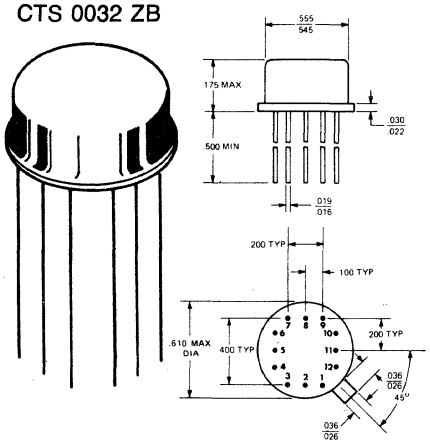


FEATURES

1. Slew rate 200 V/μsec.
2. Bandwidth 300 MHz.
3. Output current (pulsed) 400 mA.
4. Output voltage swing approaches supply voltages.
5. Input impedance 400 KΩ.
6. Output impedance 6Ω.
7. AC current gain 20 A/mA.

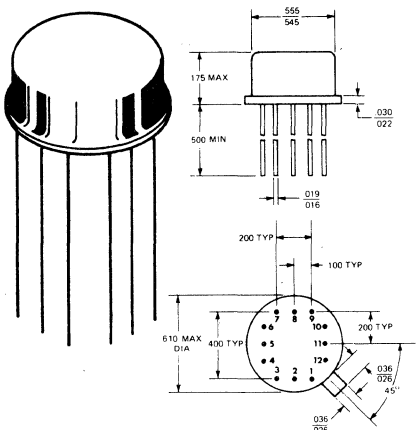
The CTS 0002 GB Buffer Amplifier is a high speed, high impedance follower used with operational amplifiers to increase the current output drive. Other applications include line driving, and high speed D/A conversion.

HIGH SLEW RATE FET OPERATIONAL AMPLIFIER/ CTS 0032 ZB



The Model CTS 0032 ZB FET Operation Amplifier is a high speed device capable of 500 V/μsec, slew rates and band widths of 70 MHz. The JFET input provides input impedances of 10^{12} ohms. The high speed, high impedance performance lends itself for use in D-A summing amplifiers, sample and hold circuits, integrators and video amplifiers.

BUFFER AMPLIFIER/ CTS 0033 ZB

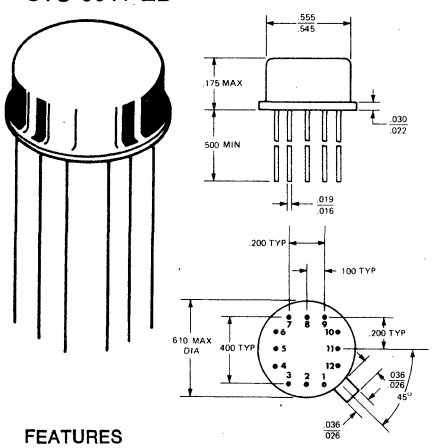


FEATURES

1. Slew rate 1500 V/μsec.
2. Propagation delay 1.2 nsec.
3. Input impedance 10^{11} ohm.
4. Input bias current 50 pa.
5. Output impedance 6 ohm.
6. Output voltage swings ±13V.
7. Bandwidth 100 MHz.

The Model CTS 0033 ZB Voltage Follower is a high-speed buffer used to provide high input impedance and low output impedance for interfacing and line driving requirements. Typical performance specifications permit wide-range usage in many applications.

0.2 AMP POWER OPERATIONAL AMPLIFIER/ CTS 0041 ZB



FEATURES

1. Output current 0.2 amp.
2. Offset null capability.
3. Low input offset voltage and current.
4. Output voltage swing ±14V into 100 ohms.
5. Options on high reliability processing.
6. Moisture less than 1000 PPM.
7. Solderability shall conform to MIL-STD-883B, Method 2003.

The CTS 0041 ZB is a general purpose operational amplifier featuring an output current in excess of 200 mA at voltage levels of ±12V and is compensated with a single external capacitor.

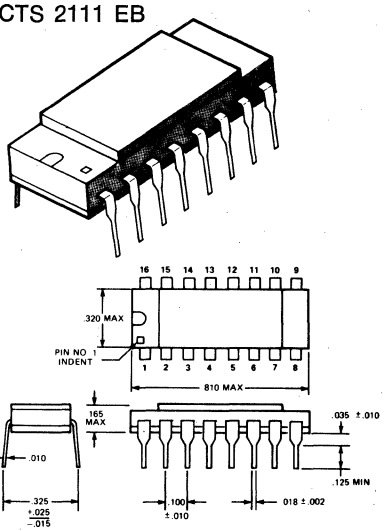
WE'LL "SECOND SOURCE" STANDARD HYBRIDS **YOUR** WAY

OPERATIONAL AMPLIFIERS

DUAL VOLTAGE COMPARATOR/ CTS 2111 EB



FEATURES

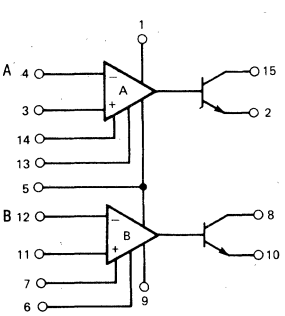
1. Short circuit protection.
2. Offset null capability.
3. Large common-mode and differential voltage range.
4. Low power consumption
5. Options on high reliability processing.
7. Moisture less than 1000 ppm.
8. Solderability shall conform to MIL-STD-883B, Method 2003.

The CTS 2111 EB Dual Voltage Comparator consists of two 111 type voltage comparators in a single hermetic package. The 111 voltage comparator has input currents approximately a hundred times lower than devices like the uA710. They are designed to operate over a wider range of supply voltages; from standard ±15V Op Amp supplies down to the single 5V supply used for IC logic. The output is compatible to RTL, DTL, and TTL as well as MOS circuits. Further, it can drive lamps or relays, switching voltages up to 50V at currents as high as 50 mA.

SCHEMATIC DIAGRAM

PIN CONFIGURATION

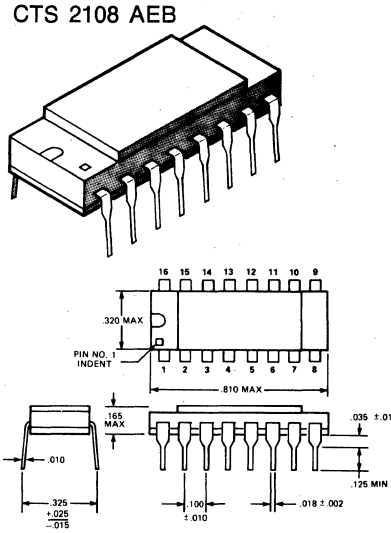
1. V+ A
2. GND (Emitter) A
3. Non-Inverting Input A
4. Inverting Input A
5. V− A and B
6. Balance B
7. Balance/Strobe B
8. Output B
9. V+ B
10. GND (Emitter) B
11. Non-Inverting Input B
12. Inverting Input B
13. Balance A
14. Balance/Strobe A
15. Output A
16. NC



NOTE 1: The Dual-In-Line package must be derated based on a thermal resistance of 100°C/W, junction to ambient.

NOTE 2: This rating applies for ±15V supplies. The positive input voltage limit is 30V above the negative supply. The negative input voltage limit is equal to the negative supply, whichever is less.

DUAL OPERATIONAL AMPLIFIER/ CTS 2108 AEB



FEATURES

1. Maximum input bias current of 3.0 nA over temperature.
2. Offset voltage less than .5 mV.
3. Offset current less than 400 pA over temperature.
4. Low supply current.
5. Drift 5 μV/°C.
6. Options on high reliability processing.
7. Moisture less than 1000 ppm.
8. Solderability shall conform to MIL-STD-883B, Method 2003.

The CTS 2108 AEB Dual Operational Amplifier consists of two 108A type Op Amps in a single hermetic package. The 108A Op Amp is a precision operational amplifier featuring low input currents and extremely low offset voltage, making it possible in most cases, to eliminate offset adjustments.

SCHEMATIC DIAGRAM

PIN CONFIGURATION

1. V+ A
2. Freq. Comp. A
3. Freq. Comp. A
4. Inverting Input A
5. Non-Inverting Input A
6. V− A and B
7. NC

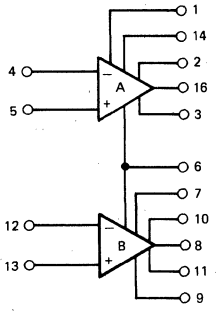
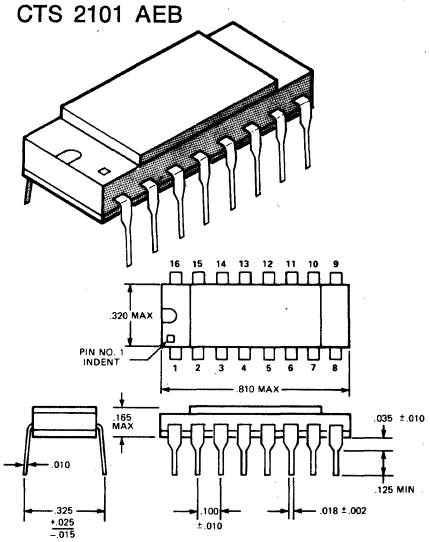
11. Freq. Comp. B
12. Inverting Input B
13. Non-Inverting Input B
14. NC
15. NC
16. Output A



NOTE 1: The Dual-In-Line package must be derated based on a thermal resistance of 100°C/W, junction to ambient.
NOTE 2: The inputs are shunted with back-to-back diodes for overvoltage protection. Therefore, excessive current will flow if a differential input voltage in excess of 1V is applied between the inputs unless some limiting resistance is used.
NOTE 3: For supply voltage less than ±15V, the absolute maximum input voltage is equal to the supply voltage.

DUAL OPERATIONAL AMPLIFIER/ CTS 2101 AEB



FEATURES

1. Short circuit protection.
2. Offset null capability.
3. Large common-mode and differential voltage range.
4. Low power consumption.
5. No latch up.
6. Options on high reliability processing.
7. Moisture less than 1000 ppm.
8. Solderability shall conform to MIL-STD-883B, Method 2003.

The CTS 2101 AEB Dual Operational Amplifier consists of two 101A type Op Amps in a single hermetic package. The 101A Op Amp is a general purpose operational amplifier featuring high gain, short circuit protection, simplified compensation and excellent temperature stability.

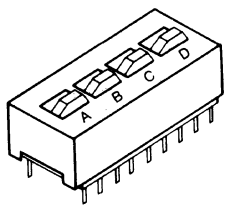
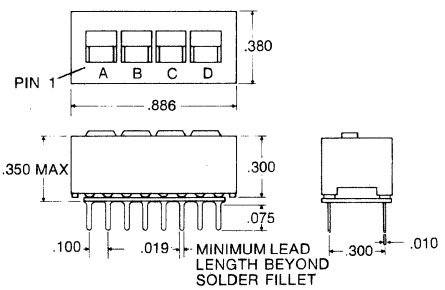
ATTENUATORS

DIP ATTENUATOR/SERIES 196



NOTES:
1. Refer to drawing above and to schematic below
2. Switch positions as shown have all attenuators in.
3. Dimensions shown are nominal.

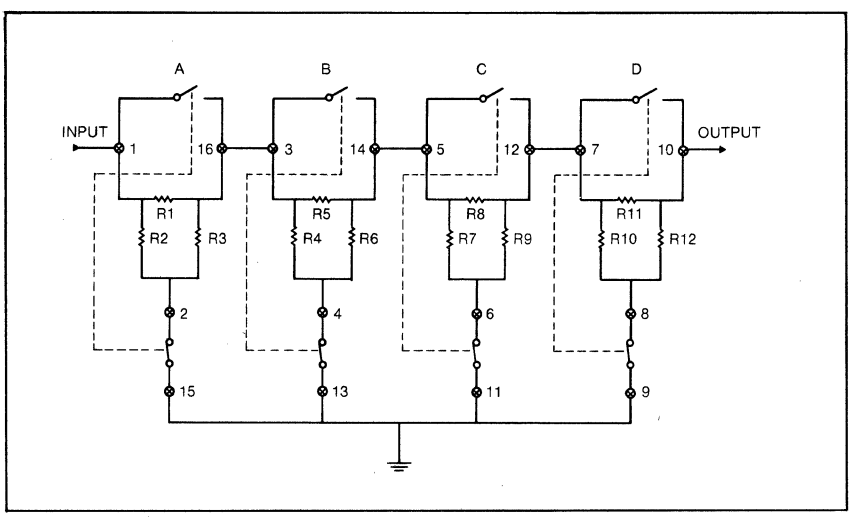


The 196 Series is a very reliable replacement for thumbwheel switch-type attenuators providing substantial cost savings. It is available with a bottom-seal or both top and bottom sealed switch. When ordering or requesting pricing please specify seal type, part number, and attenuation option required. For example:
"196600-02 top and bottom seal" is a totally sealed 600 ohm 1, 2, 4, and 8 dB attenuator.
"196075-04 bottom seal" is a 75 ohm attenuator with bottom seal and 2, 4, 8, and 16 dB attenuation values.

The 196 Series Switchable Attenuator is available in 75 Ohm and 600 Ohms and is in a standard DIP package. Attenuators are 600 Ohm or 75 Ohm unbalanced PI or T configuration networks. Standard attenuators are available in values ranging from .1 dB to 16 dB in increments of .1 dB to 2 dB. This product can be designed to meet your attenuation characteristics. The following are some popular attenuation values:

OPTION VAR.	ATTENUATOR SECTION			
	A	B	C	D
-01-	.1	.2	.4	.8
-02-	1	2	4	8
-03-	1.6	3.2	6.4	12.8
-04-	2	4	8	16
-05-	.25	.5	1	2
-06-	1.5	3	6	12

UNBALANCED "PI" ATTENUATOR



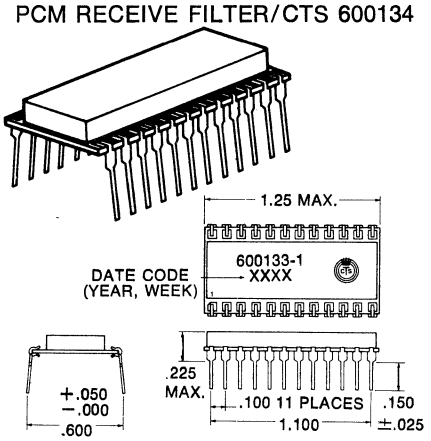
NOTE 1: Switch positions are with all attenuators in.
NOTE 2: X indicates switch terminals.
NOTE 3: Interconnections shown by heavy lines are typical.

Attenuation Range (see note 1)	Individual Attenuation Tolerance dB		Attenuation Range (see note 1)	Individual Attenuation Tolerance dB		Attenuation Range (see note 1)	Individual Attenuation Tolerance dB	
	75 ohm	600 ohm		75 ohm	600 ohm		75 ohm	600 ohm
≤.8 dB	±.0125	±.0125	4 dB	±.040	±.025	12 dB	±.090	±.050
≤2 dB	±.025	±.025	6 dB	±.054	±.025	16 dB	±.105	±.050
3 dB	±.029	±.025	8 dB	±.070	±.025	20 dB	±.115	±.050

NOTE 1: Please consult the factory for other attenuation values available between .1 dB and 20 dB.
NOTE 2: The maximum cumulative tolerance for any combination of attenuations from different ranges may be calculated by summing the individual attenuator tolerances.

PCM TRANSMIT FILTER/ CTS 600133

PCM RECEIVE FILTER/CTS 600134

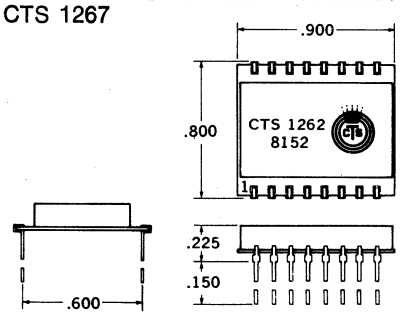


The 600133 is a modified fifth order elliptic lowpass filter which passes frequencies to 3.2 kHz and attenuates all stopband frequencies above 4.5 kHz. The 600133 is a plug in replacement for the National AF133.

The 600134 is a modified fifth order elliptic lowpass filter which passes frequencies to 3.2 kHz while compensating for the (SIN X) /X response and attenuates stopband frequencies above 4.5 kHz. The 600134 is a plug in replacement for the National AF134.

300 BAUD FSK TRANSMIT HYBRID/ CTS 1262

300 BAUD FSK RECEIVE HYBRID/ CTS 1267



The CTS 1262 is a switchable bandpass transmit filter which includes a duplexer (two-to-four wire converter) and a voltage-controlled squelch. The part is fully electrically compatible (pin-for-pin) with Cermetek's CH 1262. It is intended for use between an FSK modulator and the telephone line in 103/113-type modems.

The CTS 1267 is a switchable bandpass/ bandreject filter and a soft-limiter/amplifier. The part is fully electrically compatible (pin-for-pin) with Cermetek's CH 1267. It is intended for use between a telephone line, data coupler, or line hybrid and an FSK demodulator in 103/113-type modems.

Exar... Innovation and Reliability For Surface-Mount ICs

Pick from Exar's family of surface mount devices and reap the benefits, lower assembly costs, smaller boards, higher performance...

Floppy Disk Read Amplifier — XR-3470A/XR-3470B — Performs the complete readback function, converts readback signal from magnetic head to a digital pulse. Features low peak shift and low input amplifier gain variation...from device to device.

Floppy Disk Write Amplifier — XR-2247/XR-2247A — Provides the complete interface function between write data signals and a tunnel-erase magnet head. Incorporates diode switching for read/write transfer, eliminating the need for external diodes.

Pulse-Width Modulating Regulator — XR-494/XR-495 — Provides the functions necessary to configure a pulse-width modulating regulator. Includes 5-volt regulator, error detectors, an oscillator, dead-time control comparator and necessary control circuits.

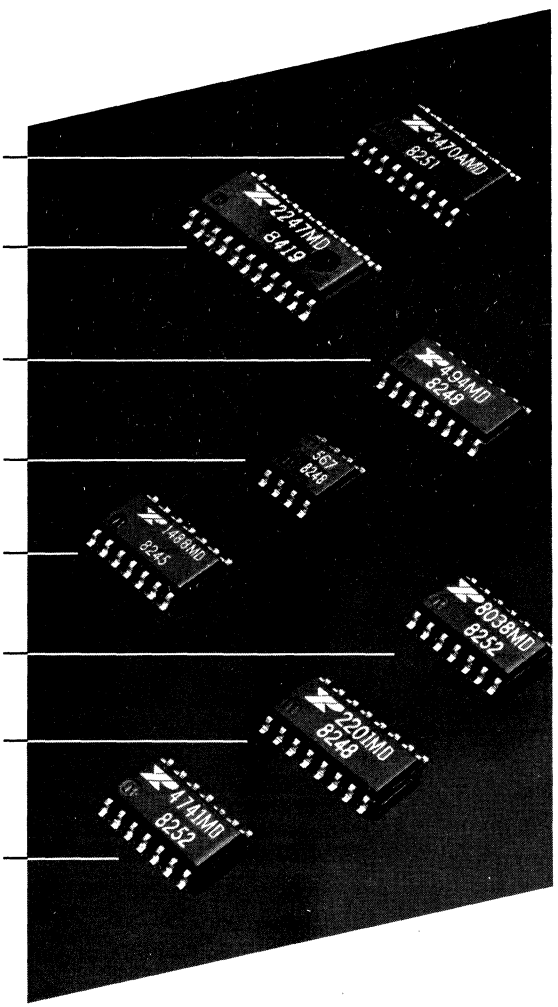
Monolithic Tone Decoder — XR-567 — A monolithic single chip phase-locked loop ideal for Touch-Tone® decoding, sequential tone decoding, communications paging, ultrasonic remote control and telemetry decoding.

Quad Line Driver/Receiver — XR-1488/XR-1489A — The Exar XR-1488 Quad Line Driver and 1489A Quad Line Receiver devices enable interfacing with data terminal TTL levels to RS-232C compatible systems. Both devices feature output current limiting.

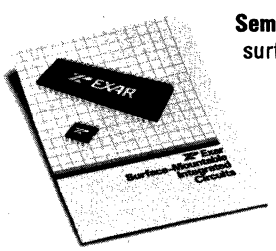
Precision Waveform Generator — XR-8038/XR-8038A — The XR-8038 is a precision waveform generator in a single IC package. It produces sine, square, triangular, sawtooth and pulse waveforms with distortion of 0.5%, or less, and operates to 1 MHz.

High-Voltage, High-Current Darlington Transistor Arrays — XR-2201, XR-2202, XR-2203, XR-2204 — Each IC comprises 7 NPN Darlington pairs. All feature open-collector outputs and protection diodes for driving inductive loads and other high-current drive applications.

Quad and Dual Operational Amplifiers — XR-4741/XR-3403; XR-4558 — XR-4741 is a quad op amp, similar to the popular 741 but superior in slew rate, bandwidth and noise level. It's fine for audio amplifiers and active filters.



Semi-custom and Custom ICs — Exar can also supply surface-mount ICs in up to 40 pin packages for semi-custom and custom requirements.



Exar has the Answer! To order your free copy of Exar's Surface-Mounted Devices Brochure, write or call Exar.

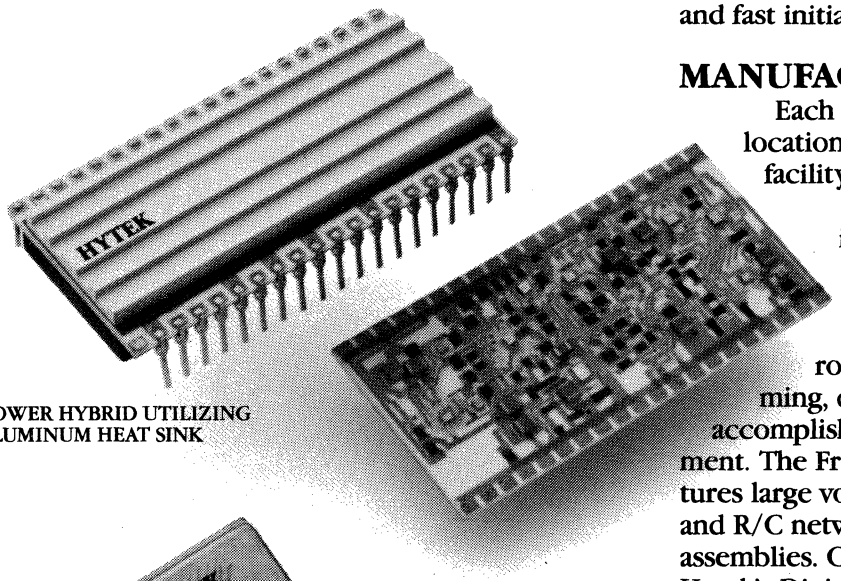
COMMERCIAL HYBRID
PACKAGED FOR SURFACE MOUNT

EXPERIENCE

Hytek has over ten years experience in the design and production of hybrid circuits and has earned a reputation as a high quality manufacturer. Currently Hytek's circuits service the Medical, Networking, Computer, Military, Automatic Test Equipment, Telecommunications and other fields of electronics.

ENGINEERING

Hytek's engineering capabilities include Circuit Design, Gate Array Design and Hybrid Design. Hytek's Calma and Hewlett Packard CAD Systems allow Hytek to provide accurate and fast initial designs.



POWER HYBRID UTILIZING
ALUMINUM HEAT SINK

MANUFACTURING

Each of Hytek's three manufacturing locations is a modern, well equipped facility.

The Los Gatos, California facility is designed to produce large volumes of complex chip and wire hybrid circuits. The thick film is produced in a new, clean room environment and laser trimming, die attach and wire bonding are accomplished with new automatic equipment. The Fremont, California plant manufactures large volumes of custom molded resistor and R/C networks as well as surface mounted assemblies. Carson City, Nevada produces Hytek's Digital Delay Lines.

Hytek's Quality Assurance program incorporates the applicable requirements of MIL-Q-9858, MIL-I-45208 and calibration certification of MIL-STD-45662 traceable to the National Bureau of Standards. Furthermore, it's Hytek's intention to have in place in 1985, a facility certified to MIL-STD-883C, MIL-STD-38510 Appendix G and MIL-STD-1772.

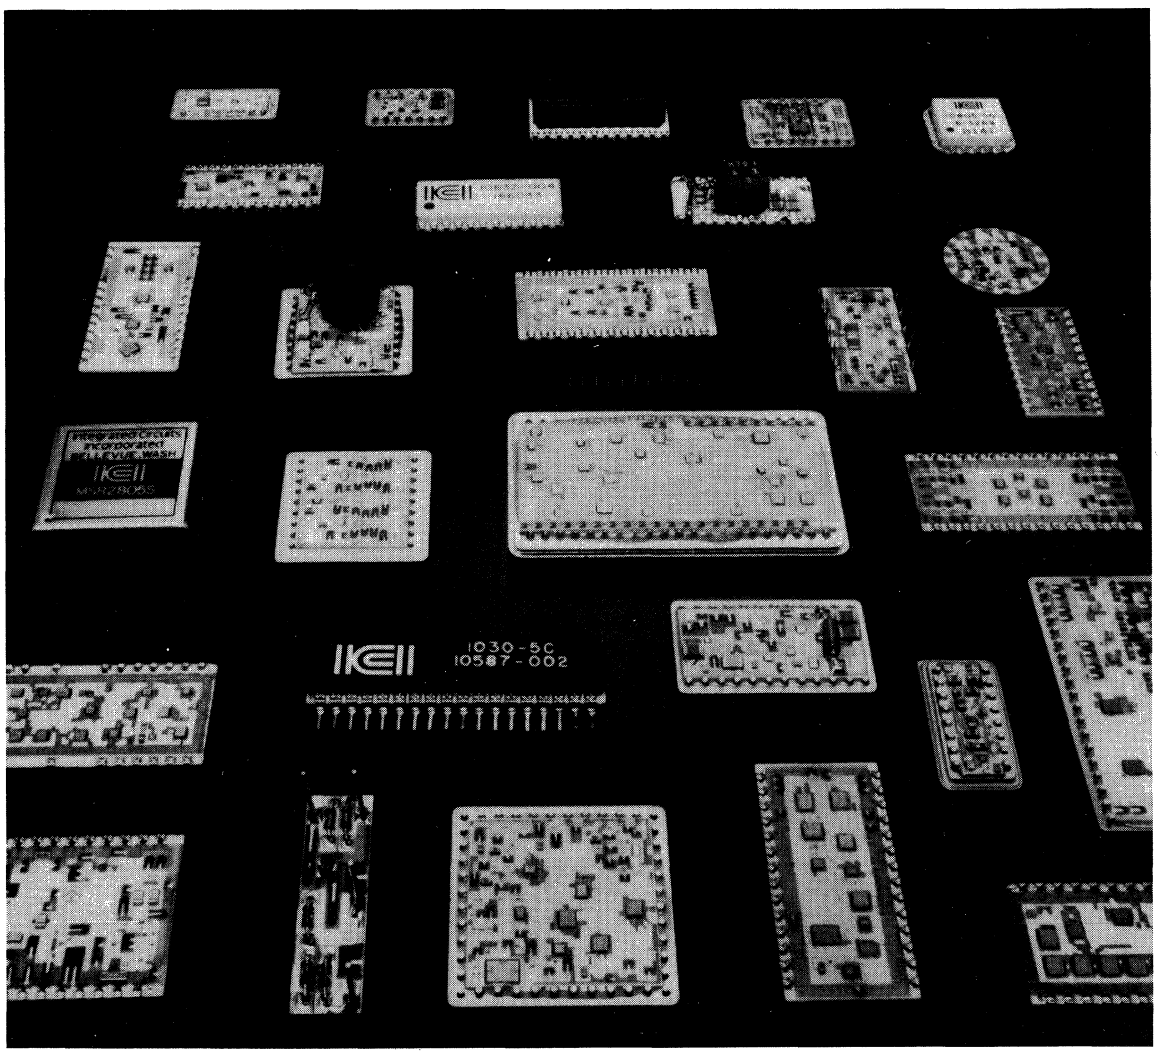
Integrated Circuits Incorporated

CUSTOM HYBRID CIRCUITS



Producing high quality custom hybrid circuits is an art no one learns overnight. And producing circuitry consistently recognized as the finest in the industry takes years.

That's the secret behind the success of Integrated Circuits Incorporated. Building custom thick-film hybrid circuits has been our specialty since 1969. And we've used all of that experience to perfect our expertise in not only technical capabilities and quality, but also in program management and customer coordination.

We can design a circuit to your specification, or convert your circuit to a miniature hybrid design. Either way, it must pass the rigid quality assurance requirements basic at ICI - MIL-I-45208, MIL-STD-883, MIL-M-38510, and MIL-Q-9858 as applicable.

For military, airborne or industrial requirements, you'll find ICI to be responsive, capable and reliable.

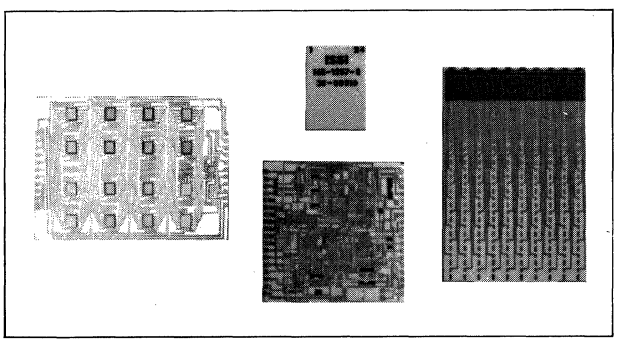
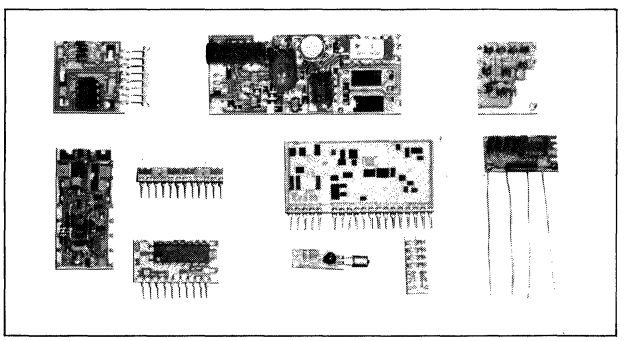
HYBRID THICK FILM TECHNOLOGY

FEATURES

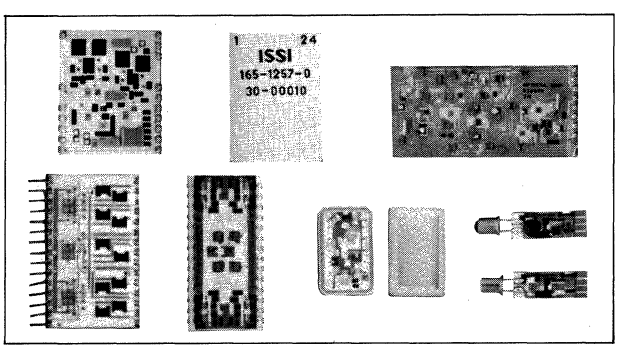
- one time insertion costs
- functional modularity
- high quality components
- compact
- low profile
- low mass
- high performance
- small
- extreme temperature operating range
- military specification capabilities



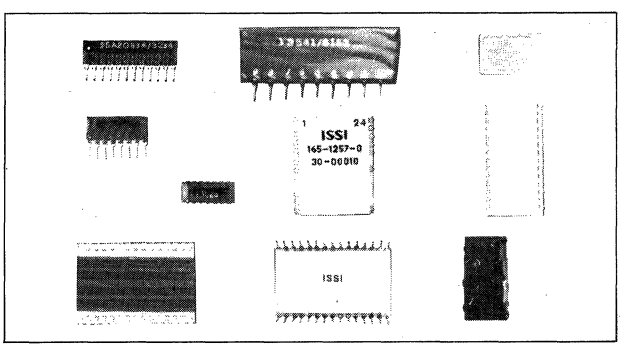
METALIZED SUBSTRATES — Simple or complex, single or multi-layer conductor patterns with Pd. Ag (Palladium Silver), Pt. Ag. (Platinum Silver), Au, (Gold), Pt. Au. (Platinum Gold) inks. Insulation with high temperature glass dielectric or low temperature glaze. Film Resistors from 1 ohm to 150 megohm, tolerances to ±0.1%, T.C.R. to 50 ppm, 1/10 w to 10 watt power dissipation, laser or abrasive trimming.



SOLDER REFLOW TECHNOLOGY — Compact networks with thick film resistors, IC packages, chip capacitors, inductors, discrete components, SOT package, diode bridge assembly, high and low temperature solder, standard or custom pinouts. Special devices with photo-transistors, LED's and functional sub-assemblies.



CHIP AND WIRE TECHNOLOGY — Microcircuit assembly of functional thin film integrated circuit or component chips into operational devices. All available IC & component chips assembled to a thick film circuit by solder or epoxy bonding. Chips wired into circuit with either gold or aluminum wire. (Thermocompression or thermosonic wire bonding). Special handling for static control. Components actively or passively trimmed to guarantee functional specifications.



CUSTOM PACKAGES — Single-in-line or Dual-in-line pinout packages, conformally coated, metal can, plastic or ceramic covered and sealed. Customer markings as well as manufacturer's identification for traceability. Leak tested, temperature cycling and burn-in before final test to insure reliability. Heat sink attached to either alumina or beryllium oxide to obtain maximum power dissipation.

TECHNICAL SERVICES

• Circuit design • layout (including conversion of existing circuitry to thick film technology) • material selection • rubylith production • screen fabrication • product tooling • product testing • and building to print. Testing includes functional electrical and mechanical parameters • burn-in • leak testing • and temperature cycling.

APPLICATIONS

• Memory • logic • linear circuits • A-D • D-A • timing • filters • isolation • pulse shaping • impedance matching • signal generation • switching • sequencing • and many other medium range energy dissipation functions or a combination thereof.

LEACH® CONTROL PRODUCTS DIVISION — HYBRID CIRCUITS

65 YEARS OF EXCELLENCE . . . . .

LEACH, CPD has consistently demonstrated its excellence in the design, development and manufacture of high quality, thick film hybrid microcircuits for aerospace, military and industrial applications. These high reliability hybrids are currently used on the Space Shuttle, B-1B, navigation satellites, missiles, numerous airborne systems and other demanding applications.

LEACH continues its committment to excellence thru:

DESIGN: ..... Proven excellence in the design of multi-layer hybrids using both analog and digital integrated circuits, with "State of the Art" products for 1553B Data Bus requirements, crystal controlled programmable timing arrays, low noise pre-amps, and line drivers satisfy the most exacting applications. Customers are provided with engineering assistance for hybrid circuit applications, specification requirements, and circuit design.

MANUFACTURE: .... Fabrication to the most exacting NASA and military specifications. Production can handle both high volume commercial and high reliability space and military projects.

QUALITY ASSURANCE ..... Established to a MIL-Q-9858 level, the quality program is upgraded to meet or exceed those requirements relative to MIL-M-38510.

TESTING ..... Testing capabilities include complete automated electrical testing from chip probing to computerized functional device testing. In addition, LEACH has the ability to perform shock, vibration, thermal cycling and other appropriate screens to meet MIL spec requirements.

FOR MILITARY/ AEROSPACE AND HIGH RELIABILITY INDUSTRIAL APPLICATIONS

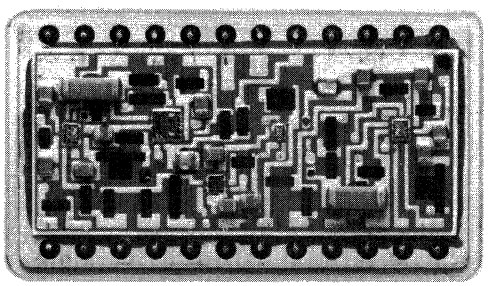
LEACH® CONTROL PRODUCTS DIVISION — HYBRID CIRCUITS

LEACH Control Products Division — a complete hybrid micro-electronics manufacturer dedicated to forwarding advances in custom hybrid circuits, crystal clock oscillators, and frequency related products.

EXPERIENCE

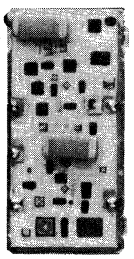
We're a hybrid ourselves, an organization built on more than 65 years of electronic experience and performance in major programs like the Space Shuttle and the B-1B, and for tomorrow's sophisticated industrial, military and aerospace applications.

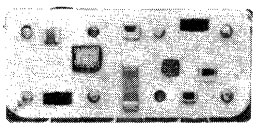


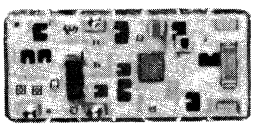
We represent progress — the kind of progress that makes reliability second nature. Progress that produces MIL-approved quality second to none.

CAPABILITY

One of the secrets to our success is our in-depth house design and manufacturing capability — a state-of-the-industry capability that has kept LEACH on the forefront of advanced microelectronics technology for more than a decade. Our 110,000 square foot facility houses a full complement of services: Design, Engineering, Manufacturing, Production, Environmental Testing, Quality Assurance and Program Management. Each coordinated for optimum quality and efficiency. Each integrated to guarantee project control. With certified clean room, inspection, and manufacturing capability, automatic testing, automatic wire bonding, auto laser trim, beam welding, and computerized production and inventory control.







DESIGN

We've designed circuits with seven metalization layers — with package density as high as 40 components per square inch. Metal and ceramic packages, TTL, MOS, ECL, CCD, bi-polar, and gate array technologies. Digital and analog frequencies. Thick and thin film.

RELIABILITY

LEACH CPD custom hybrid group has continued to demonstrate our ability to design and produce custom circuits to our customers' exact requirements. Manufactured to MIL-M-38510, our custom hybrids have satisfied the vigorous demands of companies like Rockwell, Hughes, General Dynamics, Martin Marietta and more — in numerous military and aerospace programs. On time within budget. Within specications.

RESPONSIVE

For military / aerospace or industrial requirements, you'll find LEACH CPD will be responsive to your needs. Call Us.

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

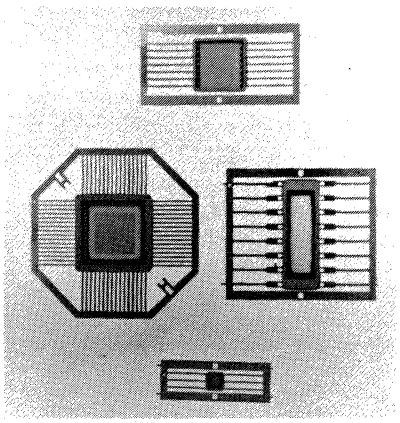
HERMETIC PACKAGES FOR HYBRID MICROCIRCUITS

MINI-SYSTEMS, INC.
Electronic Package Division, 168 East Bacon St., P.O. Box 1597, Plainville, MA 02762
Telephone: (617) 695-2000 • Telex: 710-348-0564

GLASS FLATPACKS & CHIP-CARRIERS



- Most economical means of hermetically enclosing small hybrids
- Easily and economically customized to your needs
- Meet MIL-M-38510 requirements
- Sealed by reflow soldering with combination lids

SELECTION GUIDE

Case Size: Flatpack — case sizes ⅛″ x ⅛″ to 1″ x 1″; Dual-In-Line — case size ¼″ x ¾″

Glass Free Area: Flatpack — .040″ x .070″ to .810″ x .810″

Number of Leads: 1 to 84, depending on case size

Lead Centers: .050″, .040″, .030″, or as specified

Configuration: Leads and pads on 2 sides; Leads on 2 sides; Pads on 4 sides; Leads and pads on 4 sides

Base Material: Metal, ceramic, or beryllia

Plating: Gold or Nickel, all over or selective

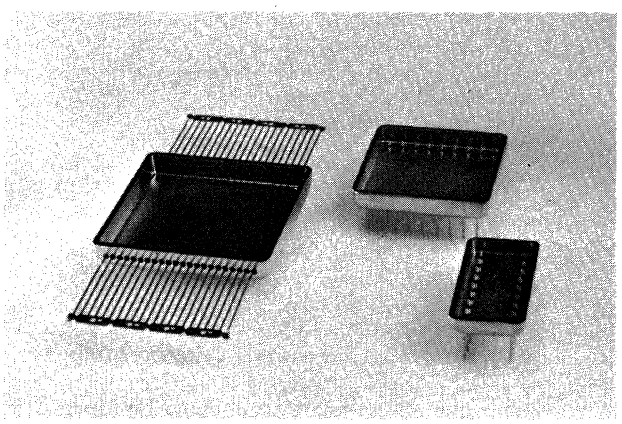
AVAILABILITY

Popular Packages — 2 weeks

Custom Packages — 8 weeks

WRITE FOR OUR DETAILED CATALOG

METAL PLUG-INS AND FLATPACKS



- Strongest and most reliable means of enclosing all size hybrids
- Package variations available built to your requirements
- Meet MIL-M-38510 Class S and all highest reliability requirements
- Sealed by seam welding with stepped lids or reflow combination lids

SELECTION GUIDE

Case Size: Plug-In and Flatpack case sizes ranging from .380″ x .625″ to 1.970″ x 2.970″

Number Pins/Leads: 1 to 188, depending on case size

Pin/Lead Centers: .100″ Plug-In; .050″ Flatpack

Configuration: Pins/Leads on 1, 2, 3, or 4 sides

Plating: Gold or Nickel, all over or selective

AVAILABILITY

Tooled Packages — 4 weeks

Custom Packages — 10 weeks

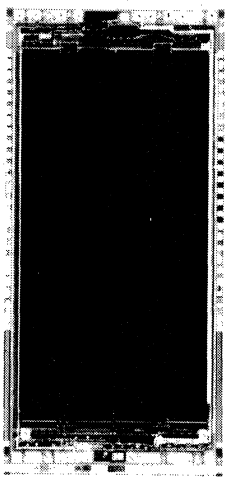
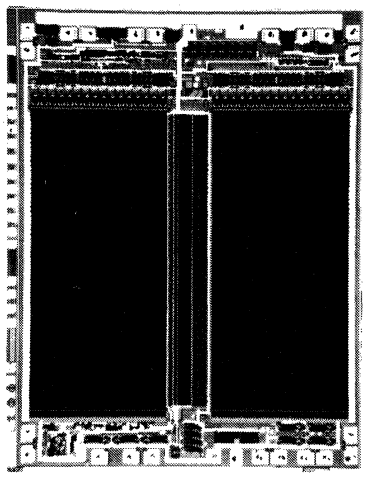
MEMORIES

MCM6257
256K Dynamic RAM



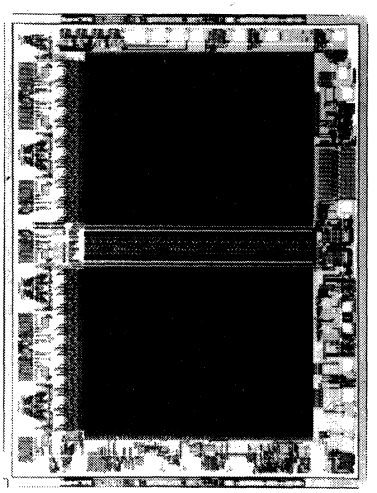
Organization — 262,144 x 1
Access Times — 100, 120 or 150 ns (Max)
Nibble Mode Access Time — 20 ns
Supply Current — 70 mA (Max) Active

MCM2016H
16K Static RAM



Organization — 2048 x 8
Access Time — 45, 55, or 70 ns (Max)
Supply Current — 150 mA (Max) Active

MCM2833
32K EEPROM



Organization — 4096 x 8
Access Time — 150 and 200 ns
Supply Current — 125 mA (Max) Active

As one of the foremost manufacturers of microcomputer components, Motorola also serves the industry with memory products that satisfy the entire spectrum of potential applications requirements.

Random Access Memories (RAMs)

NMOS — Dynamic

High speed, high density and low cost have made N-Channel HMOS dynamic Random Access Memories the cornerstones of the expanding computer industries. Motorola HMOS RAMs combine high performance with excellent reliability and offer state-of-the-art chip densities. The basic memory chips defined below, together with their variations, represent the leading edge of today's memory capabilities.

Organization	Part Number	Available Access Time (ns Max.)
16K x 1	MCM4517	100, 120, 150
64K x 1	MCM6665B	150, 200
	MCM4164B	150
256K x 1	MCM6256/ MCM6257	100, 120, 150

NMOS — Static

Fabricated with Motorola's high-performance silicon-gate MOS (HMOS) technology, these static RAMs offer the most popular memory organizations with RAM capacity up to 16K bytes. All operate from a single 5.0 V supply and are TTL compatible.

Organization	Part Number	Available Access Time (ns Max.)
128 x 8	MCM6810,A10,B10	450, 360, 250
1K x 4	MCM2114/21L14	200, 250, 300, 350
2K x 8	MCM2016H	45, 55, 70
16K x 1	MCM2167H	35, 45, 55
2K x 8	MCM2018	35, 45
	MCM2128	100, 120, 150

CMOS — Static

Motorola CMOS memories are fabricated with a high-performance silicon-gate CMOS technology and designed with chip-enable circuitry which reduces the inherent low power dissipation of CMOS still further during standby operation.

Organization	Part Numbers	Available Access Time (ns Max.)	Power Diss. Active/Standby (mA Max.)
4K x 1	MCM6147/ MCM61L47	55, 70	35/12
4K x 4	MCM6168 MCM6169 MCM6178	45, 55, 70	80/20
8K x 8	MCM6164	45, 55, 70	80-70-60/20
16K x 4	MCM6288	35, 45, 55	50/5
64K x 1	MCM6287	35, 45, 55	50/5

Bipolar Dynamic — ECL10K/10KH

Emitter-coupled logic (ECL) represents today's fastest logic form; ECL memories complement this characteristic. Motorola ECL RAMs are available to match the speed capabilities of the ECL10K and 10KH logic families, the two most pervasive ECL lines available.

Organization	Part Numbers	Access Time (ns Max.)
8 x 2 Multiport Register File	MCM10143	15
16 x 4 Register File	MC10H145	6.0
64 x 1	MCM10148	15
128 x 1	MCM10147	15
256 x 1	MCM10144	26
1K x 1	MCM10415-15/-20	15, 20
256 x 4	MCM10422-10/-15	10, 15
4K x 1	MCM10470-15/-25	15, 25
1K x 4	MCM10474-15/-25	15, 25

TTL

Fully compatible with all standard TTL logic families.

Organization	Device Type	Access Time (ns Max.)	Power Dissipation (mW Typ)
1K x 1	MCM93415/25	45	775
256 x 4	MCM93422	45	775
	MCM93422A	35	
	MCM93L422	60	
	MCM93L422A	45	

Read Only Memories (ROMs)

NMOS Mask Programmable ROMs — Factory programmed to user specifications, except (*) preprogrammed as indicated and MCM68768 which is programmed electrically at the test site.

Organization	Part Numbers	Access Time (ns Max.)
2K x 8	MCM68A316E	350
4K x 8	MCM68A332	350
8K x 8	MCM68364/65/66 MCM68369/70	200, 250, 300, 350
	MCM68768	300, 350
16K x 8	MCM63128	150, 175, 200
32K x 8	MCM63256	150, 175, 200

CMOS Mask Programmable ROMs

High capacity and low power consumption are typical of complementary MOS Read Only Memories. Single 5.0 V supply operation. Available with 2K x 8 and 32K x 8 organization.

Special Purpose Memories

NMOS ROM/EEPROMS — MCM6836E16/R16

Nonvolatile N-Channel 114K x 8 MOS Read Only Memory combines with a 2K x 8 EEPROM offering user reprogrammability of a portion of the memory during use. Electrically erasable, the unit can be in-system reprogrammed. Industry standard pinout makes the device compatible with 128K bit ROMs and EPROMs.

HMOS EEPROM — MCM2833

An Electrically Erasable 4K x 8 Programmable Read Only Memory (EEPROM) designed for applications requiring both nonvolatile memory and in-system reprogramming. This device is fabricated using Motorola's FET MOS (Floating-gate Electron Tunneling MOS) technology.

CMOS EPROM — MCM67256

Erasable and reprogrammable ROM designed for systems requiring high speed and low power consumption. It is organized in a 32K x 8 configuration with access times of 150 and 200 ns.

NMOS EPROMS — MCM68764/766

Erasable (ultraviolet light) and reprogrammable Read Only Memory designed for system prototyping, debug and similar applications requiring nonvolatile memory that can be reprogrammed periodically. 8K x 8 organization.

MOS PROM — MCM68769

This One-Time Programmable ROM is designed for high volume productions requiring non-volatile memory. The 8K x 8 PROM is available with access times of 300 and 350 ns.

MOS DUAL-PORT RAM — MCM68HC34

Dual port RAM enables two microprocessors operating on separate buses to exchange information without interfering with other devices on the bus. 256 x 8 organization.

Available Literature

DL113 — This data book on memories offers complete specifications for Motorola's extensive line of MOS, MECL, TTL and bubble memories.

This Literature is available free from your nearest Motorola Sales Office or Distributor. With new memory products being introduced continually, the reader is advised to contact a Motorola Sales Office or Distributor for possible additional product offerings.

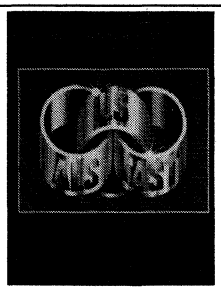
STANDARD LOGIC PRODUCTS

LSTTL:	SN54/74LS Series	**MECL10K:**	MC10000 Series	**Standard CMOS:**	MC14000 Series
ALSTTL:	SN54/74ALS Series	**MECL10KH:**	MC10H000 Series	**High-Speed CMOS:**	MC54/74HC Series
FAST™:	MC54/74F Series	**MECL III:**	MC1600 Series		

The variety of established and newly introduced logic families challenges the system designer with choosing the best available technology for each design. Each family offers distinct advantages and limitations.

The three most often used characteristics for determining family selection are propagation delay, operating frequency, and power consumption. For Motorola logic families, these characteristics are defined and compared in the information below. And for each logic family Motorola offers a large selection of components ranging from simple SSI gates to complex MSI and LSI circuits.



DL121R1

Schottky TTL

For many years, Transistor-Transistor Logic (TTL), specifically the 54/74 TTL series, has been the dominant logic family for general-purpose applications. Within the last few years, low-power Schottky (LSTTL) has taken over, replacing the original 54/74 series with lower power and higher speed. The latest in this progressive logic series are the Advanced Low-Power Schottky (ALSTTL) family and the FAST™ Schottky TTL series.

The **Low Power Schottky (LSTTL)** family combines a current and power reduction improvement over standard 54/7400 TTL by a factor of 5. This is accomplished by advanced processing and by using Schottky diode clamping to prevent saturation.

The **Advanced Low Power Schottky TTL** family (ALSTTL) provides a 50% power reduction compared to standard 54/74 LSTTL and yet offers improved circuit performance over standard LS due to Motorola's state-of-the-art oxide isolated process (MOSAIC). ALS also differs from LS in that PNP transistors on the input stage are utilized to lower input currents and raise thresholds.

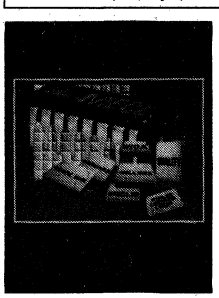
The **FAST Schottky TTL** family provides a 75–80% power reduction compared to standard Schottky (54/74S) TTL and yet offers a 20–40% improvement in circuit performance over the standard Schottky due to the MOSAIC process. Also, FAST circuits contain additional circuitry to provide a flatter power/frequency curve. The input configuration of FAST uses a lower input current which translates into higher fanout.

Speed/Power comparisons between these three families are as follows:

SPEED/POWER CHARACTERISTICS FOR SCHOTTKY TTL LOGIC

(ALL TYPICAL RATINGS)

Characteristic	LS	ALS	FAST
Quiescent Supply Current/Gate (mA)	0.4	0.2	1.1
Power/Gate (Quiescent) (mW)	2.0	1.0	5.5
Propagation Delay (ns)	9.0	7.0	3.7
Speed Power Product (pJ)	18	7.0	19.2
Clock Frequency (D-F/F) (MHz)	33	35	125
Clock Frequency (Counter) (MHz)	40	45	125



DL122R1

MECL (ECL)

Motorola's Emitter Coupled Logic (MECL) is a nonsaturating form of digital logic which eliminates transistor storage time as a speed limiting characteristic, permitting very high speed operation.

There are three versions of MECL: MECL 10K, MECL 10KH, and MECL III.

The *MECL 10K* series has become the industry standard for high-speed applications. In order to make the circuits comparatively easy to use, edge speed was slowed to 2.0 ns while the important propagation delay was held to 2.0 ns. The slow edge speed permits use of wire-wrap and standard printed circuit lines; however, the circuits are specified to drive transmission lines for optimum performance.

The newer *MECL 10KH* family features 100% improvement in propagation delay and clock speeds while maintaining power supply current equal to MECL 10K. This new MECL family is voltage compensated which allows guaranteed dc and switching parameters over a ±5% power supply range. Noise margins of MECL 10KH are 75% better than the MECL 10K series. MECL 10KH is compatible with MECL 10K and MECL III, a key element in allowing users to enhance existing systems by increasing the speed in critical timing areas.

MECL III, with its 1 ns gate propagation delays and greater than 1 GHz flip-flop toggle rates, remains the industry speed leader. The 1 ns rise and fall times require a transmission line environment for all but the smallest systems. For this reason, all circuit outputs are designed to drive transmission lines and all output logic levels are specified when driving 50-ohm loads. Because of MECL III's fast edge speeds, multilayer boards are recommended above 200 MHz. MECL III's popularity is with high-speed test and communications equipment.

Speed/power comparisons for Motorola ECL families are as follows:

SPEED/POWER CHARACTERISTICS FOR (MECL)

(ALL TYPICAL RATINGS)	MECL 10K				10KH	III
Characteristic	**MC101xx**	**MC102xx**	**MC105xx**	**MC106xx**	**MC10H1xx**	**MC16xx**
Quiescent Supply Current/Gate (mA)	5.0	5.0	5.0	5.0	5.0	10
Power/Gate (Quiescent) (mW)	26	26	26	26	26	54
Propagation Delay (ns)	2.0	1.5	2.0	1.5	1.0	1.1
Speed Power Product (pJ)	52	39	52	39	26	59
Clock Frequency (D-F/F) (MHz)	150	225	150	225	300	550
Clock Frequency (Counter) (MHz)	150	—	150	—	300	1200

DL130

CMOS

Complementary MOS (CMOS) technology provides the lowest power consumption logic circuits available in the industry.

Motorola offers two versions of CMOS logic circuits: *Standard CMOS* in metal gate technology, and *High-Speed CMOS* in silicon gate technology.

Standard CMOS logic is best suited for systems which require low power and low-to-medium speed (1 MHz) operation. Some devices are available in both B and UB series, as designated by EIA/JEDEC specifications. UB series gates and inverters are constructed with a single inverting stage between input and output, as opposed to multiple gain stages in the B series. The subsequent decreased gain in the UB series results in less noise immunity; however, these UB devices are useful when CMOS gates and inverters are used in a "Linear" mode to form oscillators, monostables, or amplifiers. These devices also exhibit higher speed since only a single stage is involved.

SPEED/POWER CHARACTERISTICS FOR CMOS LOGIC

(ALL TYPICAL RATINGS)

Characteristic	Standard CMOS	Hi-Speed CMOS
Quiescent Supply Current/Gate (mA)	.0001	.0003
Power/Gate (Quiescent) (mW)	.0006	.001
Propagation Delay (ns)	125	8.0
Speed Power Product (pJ)	.075	.01
Clock Frequency (D-F/F) (MHz)	4.0	40
Clock Frequency (Counter) (MHz)	5.0	40

The new High-Speed CMOS family consists of a full-line of products that are pinout compatible with the most popular LSTTL and MC14000B Standard CMOS series parts. The latest silicon-gate processing technology allows the High-Speed CMOS family to combine the switching speeds and operating frequencies of LSTTL with the low power-consumption advantages of CMOS. The devices feature the high noise immunity that is characteristic of CMOS, and a wide power-supply operating range (2 to 6 volts).

High-Speed CMOS logic circuits may interface with LSTTL circuits directly when driving, and through a level shifter when being driven. The latter is due to the selection of slightly different threshold voltages for the High-Speed CMOS than those of LSTTL to provide higher DC Noise Margins.

Speed/power comparisons between the two CMOS families are as follows:

Available Literature

DL121R1/D — The Schottky TTL Data Book provides complete data sheets on Motorola's TTL devices while functioning selector guides provide an overview of all available devices, plus an advanced look at new products.

DL122R1/D — The MECL Device Data Book contains technical data on Motorola's high-speed ECL ICs in the form of data sheets, selector guides and quality and reliability chapters.

HB205R1/D — The MECL System Design Handbook contains information on the special design considerations needed when utilizing MECL digital logic. This handbook introduces all the MECL digital logic. This handbook introduces all the MECL Families, the design rules, printed circuit considerations, system interconnections, power distribution, thermal characteristics, transmission line theory, and a variety of MECL applications.

DL131/D — The MOS Metal Gate Logic Data Book (due 3Q '85) contains technical data in the form of complete data sheets and mechanical data.

DL129/D — The High-Speed CMOS Logic Data Book provides complete technical information on Motorola's High-Speed silicon-gate CMOS Logic Family.

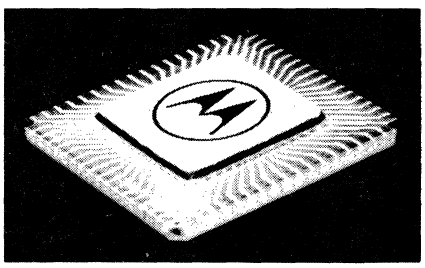
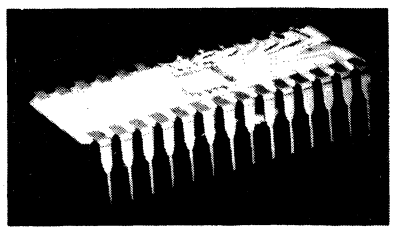
SEMICUSTOM LOGIC MACROCELL ARRAYS

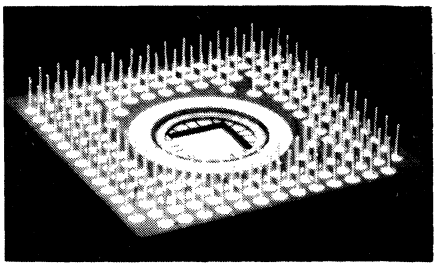
Typical Array Packages



Leadless chip carriers



Dual in line packages



Pin-arrays

The Practical Way To (Semi) Custom VLSI Designs . . . In Three Uniquely Compatible Technologies.

Motorola Macrocell Arrays represent a practical means for gaining the benefits of custom VLSI designs without the accompanying quantity and time constraints.

The Macrocell Array is an advanced form of gate array in which a computer-stored library of optimized logic circuits such as gates, flip-flops, counters, etc. take the place of simple gates as building blocks for VLSI circuit design. The ingredients (transistors, resistors, etc.) for fashioning the basic circuits are prediffused into selective regions of the silicon chip. By assigning a circuit function from the library to each of these selective regions, the designer can request the computer to convert these ingredients into the desired functions and, subsequently, to produce a mask set that will connect these functions into a working VLSI circuit.

To the user, the benefits of semi-custom VLSI designs with Macrocell Arrays are impressive:

Compared to equivalent designs made of standard SSI/MSI circuits, the Macrocell approach results in improved performance due to the reduction of propagation delays, and an improvement in reliability because of the lowered package count.

Compared with custom VLSI circuits, the Macrocell approach, with its proven computer-aided design system, considerably reduces product development time and tooling costs. This allows the profitable manufacturing of small quantities of end-use products rather than the tens-of-thousands of end-use products required to justify travelling the full custom route.

Motorola Macrocell Arrays give the designer the same choice of process technologies that are available for discrete-logic designs.

- For very high speed requirements, there is ECL technology.
- For the pervasive TTL market, there is ALS-TTL technology.
- And for applications demanding very low power consumption, there is high-speed, high-density CMOS (HCMOS) with its current 2 and 3 micron silicon-gate technology.

To permit cost-effective implementation, Motorola Macrocells are stocked in a variety of prediffused array sizes to permit the optimized utilization of die space for varying VLSI circuit complexities.

INTERFACE CIRCUITS

The economics of semiconductors prohibits the specific tailoring of integrated circuits — except custom and semi-custom circuits — to the vast variety of potential end uses. Most commonly, off-the-shelf circuits, even MSI and LSI circuits, are designed to perform a major generic function that can be adapted to numerous applications. Direct adaptation to specific peripherals or ancillary circuits is then performed by appropriate interface circuits.

A few potential interface requirements may demand custom interface designs. Most, however, are served adequately by a variety of standardized interface ICs.

Motorola's line of off-the-shelf interface circuits marries peripherals and memories to microcomputers, and instruments and microprocessors to their respective bus systems. It provides the matching and level translation between various logic families and technologies, and the conversion from digital-to-analog signal requirements. In short, by satisfying these requirements with standard, off-the-shelf components, it offers time- and cost-saving alternatives to custom interface circuit designs.

MOTOROLA INTERFACE CIRCUITS . . . IN BRIEF

Memory Interface

Floppy Disk Write Controller/Head Driver System provides the entire interface between floppy disk heads and the head control signals.

For Straddle Erase Heads — MC3469P
For Tunnel or Straddle Erase System — MC3471P

Floppy Disk Read Amplifier System for obtaining digital information from floppy disk storage. Provides all active circuitry to perform the read amplifier function on a single chip.
MC3470

Sense Amplifier for Magnetic Tape Memories provides three independent preamplifiers with individual electronic gain control. Optimized for 9-track magnetic tape memory systems where low noise and low distortion are paramount objectives.
MC3467

Microprocessor Bus Extenders

Address Bus Extender expands the drive capabilities of today's standard 8-bit microprocessors. Provides six unidirectional buffers to interface between the MPU and its address and control bus. High impedance input prevents bus loading; 40 mA output increases driving power.
MC6885 Series

Data Bus Extender consists of four bidirectional transceivers which provide 48 mA driver and 20 mA receiver outputs. Input current requirement of 200 μA maximum at any pin assures proper operation despite limited drive capability of the MPU.

Line Drivers and Receivers

A variety of drivers, receivers and transceivers provide from two to eight circuits per package for applications including:

IEEE Standard 488, GPIB Instrumentation Bus
IBM 360/370 Computer Interface
EIA Standards
Current Mode Applications
Peripheral Interface

Data Conversion Circuits

Motorola's line of data conversion products spans a wide spectrum of speed and accuracy. Utilization of CMOS and bipolar technologies provide speed-power trade offs. A-D and D-A converters are available in both processes.

Available Literature

DL128/D — The Linear and Interface Integrated Circuits Data Book provides the designer with nine chapters of data sheets on Motorola's extensive line of linear and interface ICs divided by product type for easy reference. Also included in this text are selector guides, package outlines, mounting hardware drawings and abstracts of other available applications literature.

SG96/D — The Linear and Interface Selector Guide and Cross Reference offers complete technical data in the form of an easy-to-use selector guide. The guide is divided by product type for ease of use and contains an extensive industry cross reference.

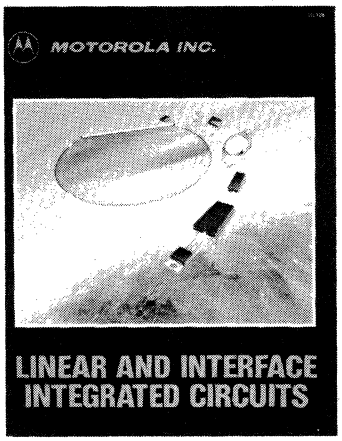
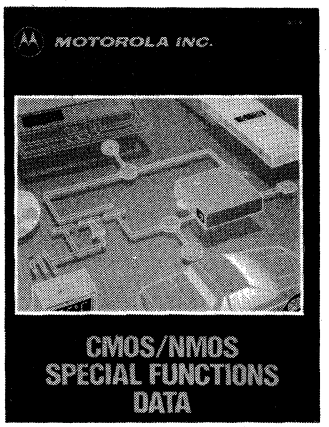
ANALOG CIRCUITS



DL128



DL130

Starting with the now all-pervasive operational amplifiers, linear integrated circuit technology currently influences the design and architecture of equipment for all major markets. Motorola offers analog functions including amplifier circuits, data conversion circuits, comparators, and a host of special-purpose circuits for communications and power control markets.

Operational Amplifiers

From low-cost industry-standard types to high precision circuits, the span of operational amplifiers encompasses a large range of performance capabilities including I_{IB} ranges from 50 pA to 30 μA and open-loop gains from 1.0 to 1000 V/mV min. These linear integrated circuits are available as single, dual, and quad monolithic devices in a variety of temperature ranges and package styles. Most of the devices can be obtained in unencapsulated "chip" form as well.

Analog Amplifiers

Multifunction CMOS amplifiers are available for applications such as active filters, voltage reference circuits, function generators, oscillators, and limit set alarms.

A variety of high-frequency circuits with features ranging from low-cost simplicity to multifunction versatility marks Motorola's line of integrated amplifiers. **AGC amplifiers** include wide-band general purpose and gated 2-channel input amplifiers with gains ranging from 4 dB to 44 dB at bandwidths from 10 MHz to 100 MHz. **Non-AGC amplifiers** are also available.

Consumer Circuits

Also included in Motorola's broad line of analog circuits is an assortment of circuits for consumer applications. These applications include Television, Audio, Radio, and Automotive entertainment applications, and are also involved in RF Modems and Personal Communications.

Data Converters

A line of A/D and D/A converters spans a wide spectrum of speed and resolution/accuracy. Bus compatability minimizes external parts count and provide easy interface to microprocessor systems. Bipolar and CMOS technologies are utilized to achieve functional capability, accuracy and production repeatability. Bipolar technology generally results in higher speed, while CMOS devices offer greatly reduced power consumption.

Analog-to-Digital converters are available with conversion times as low as 50 ns up to 40 ms with resolutions of 7, 8, and 8–10 bits and also 3-1/2 digits. The accuracy ranges from $\pm$1/2 LSB for the 7, 8, and 8–10 bit devices to $\pm$0.05% for the device with a resolution of 3-1/2 digits.

Digital-to-Analog converters range from 6 to 12 bit resolutions with settling times ranging from 10 ns to 1.2 μs. These devices have accuracy ratings from 1/4 LSB to 2.0 LSB. They come with a variety of functions including hex outputs, quad outputs, multiplying, and high speed.

Available Literature

DL128 — The Linear and Interface Integrated Circuits Data book provides the designer with nine chapters of data sheets on Motorola's extensive line of linear and interface ICs divided by product type for easy reference. Also included in this text are selector guides, package outlines, mounting hardware drawings, and abstracts of other available literature.

DL130 — The CMOS/NMOS Special Functions Data book offers technical information on Motorola products that do not lend themselves to inclusion into specific product families. Complete data sheets and various other chapters on handling and design guidelines, reliability, and packaging provide the designer with a handy reference to Motorola's line of special function devices.

SG99 — The CMOS Special Functions selector guide offers a quick reference for designers of systems requiring converters, PLL/frequency synthesizers, drivers or other various control circuits.

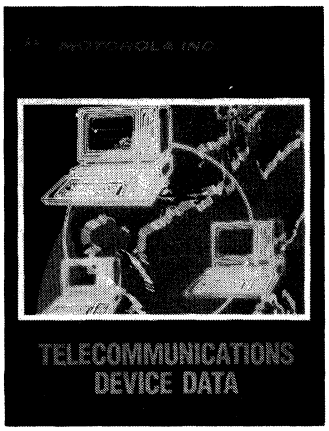
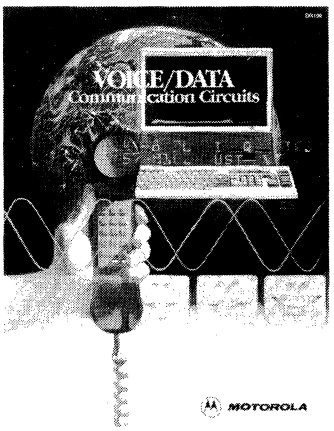
COMMUNICATIONS CIRCUITS

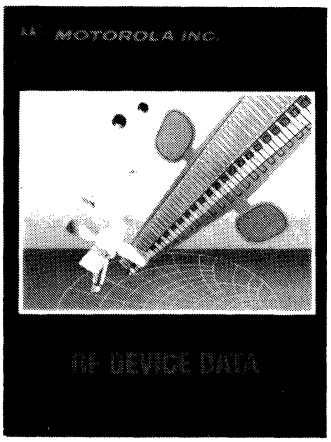


DL136



MOTOROLA BR188

DL110



VOICE/DATA CIRCUITS

An inexpensive family of CMOS ICs provide simultaneous and independent voice/data service over one twisted pair for a distance of up to 2 kilometers (1.3 miles). The MC145422/26 (master and slave Universal Digital-Loop Transceiver) pair operates at 80,000 bits-per-second full-duplex ping-pong in the office or factory environment. A more economical solution, the MC145418/19 (Digital-Loop Transceiver) pair, provides the same service up to one kilometer in distance. The DLT and UDLT solutions are complemented by a family of single-chip PCM codec/filters, the MC14400 series mono-circuits. Also available from Motorola now — the MC145428 (Data Set Interface) and the MC145429 (Telset Audio Interface Circuit). The DSI provides conversion of various asynchronous data rates to the synchronous equivalent, and vice versa. The TAIC provides enhanced digital phone features including volume adjustment for the ringer and earpiece, as well as an external speaker option. All of these ICs are fabricated in the CMOS technology and are available now.

TELEPHONE CIRCUITS

The conventional transformer-driven telephone handset is being replaced with integrated circuits that perform all the major handset functions simply, reliably, and inexpensively.

The MC34010/11 Complete Electronic Telephone Circuits reliably and inexpensively replace such functions as 2-to-4 wire conversion, DTMF dialing, tone ringing and a variety of related activities. All of these capabilities have been placed on a single monolithic chip.

These telephone circuits utilize advanced bipolar linear (I^2L) technology and provide all the necessary elements of a modern tone dialing interface. The MC34010 even incorporates an MPU interface circuit for the potential inclusion of automatic dialing in the final system.

Motorola also offers a broad selection of additional telephone components for customizing systems design . . . from ringer circuits to audio control circuits and dialers.

A two-chip switchable hands-free telephone system — is available, consisting of the **MC34018 Speakerphone** integrated circuit and the **MC34014 Speech Network** with Dialer Interface. This system features adjustable transmit, receive and sidetone gains, loop length equalization for transmit and receive, and an adjustable DTMF output level. The system is also compatible with 150–300 ohm receivers and two terminal electret microphones. The MC34014 offers all necessary level detection and attenuation controls in a single integrated circuit and includes an equalization circuit to compensate for various line lengths. Conversion from 2-to-4 wire is accomplished with line voltages as low as 1.4 volts. Together these two components facilitate the design of a completely hands-free (dialing and speech) telephone system.

PBX Circuits

MC14400 Series PCM Mono-Circuit (Single-Chip Codec/Filter)

Motorola offers five variations of the mono-circuit. These devices provide serial coding and decoding of voiceband and PCM signals which meet Bell and CCITT specifications. The MC14402 is the "top-of-the-line" mono-circuit offering all mono-circuit capabilities in a 22-pin package. The MC14401 is an 18-pin device that simplifies SLIC Interface on the linecard. Additional variations of the mono-circuit include the MC14400, MC14403, and the MC14405 each cased in 16-pin packages.

The Subscriber Loop Interface Circuit (SLIC) family — performs 2-to-4 wire conversion while providing suppression of longitudinal signals at the two-wire input and dc line current for powering the telset. The SLIC family also provides overvoltage protection, ring trip detection and supervisory features such as hook status and dial pulsing.

Modem Circuits

Motorola offers a wide variety of low speed modems, a videotext modem, and a limited distance modem solution.

MC14412/MC14544xx Bell 103 or CCITT V.21 Compatible Modem/Filter Chip-Set — provides low cost 300 baud capability. Implementation of these complementary Motorola filters meet both Bell 103 (MC145440) and CCITT V.21 (MC145441) specifications.

MOTOROLA
SEMICONDUCTORS
P.O. BOX 20912 • PHOENIX, ARIZONA 85036

COMMUNICATIONS CIRCUITS (CONT)

The MC145445/MC14544x Bell 103 or CCITT V.21 Compatible Modem/Filter Chip-Set — is similar to the MC14412, but offers higher performance characteristics. The MC145445 modem includes Request-to-Send and Clear-to-Send handshake functions with eight selectable variations. To meet Bell 103 specifications, the MC145440 filter must be used; whereas CCITT specifications require the MC145441 filter.

The MC145450 Bell 202 or CCITT V.23 1200 Baud Modem — provides the user with Bell 202 or CCITT V.23 video-text capability. In certain applications, the MC145415 (Linear Phase Filter) may be used in conjunction with the MC145450 to achieve a cost effective, two-chip solution.

MC145418/19 Digital-Loop Transceivers MC145422/26 Universal Digital-Loop Transceivers

In addition to the voice/data features, the DLT and UDLT are capable of offering one and two kilometers, respectively, point-to-point or limited distance modem capabilities for private premise applications; that is, office or factory environments. When teamed with the MC145428 (DSI), the DLT or UDLT pair can multiplex up to eight 9600 baud channels per transceiver pair.

MC145406 RS232-C or V.28 Driver/ Receivers

A new product for 1985 is Motorola's MC145406. This device houses three driver and three receiver pairs in a single-chip CMOS solution. The drivers can operate at ±5 volts to ±12 volts and the receivers at ±25 volts.

The MC145411 Bit Rate Generator — employs a frequency divider network, which in turn provides a wide range of output frequencies. The internal oscillator crystal is the clock source for the network and maintains stability up to four megahertz. This CMOS device provides sixteen different output clock rate options. This device is a 16-pin version of the MC14411, 22-pin package and was designed to optimize customer costs.

RF COMMUNICATIONS CIRCUITS

Recent advances in RF communications include both the proliferation of cordless telephones and the development of cellular radio networks. In addition to these new product lines, Motorola offers the circuits for the traditional communication bands. These products range from applications-dedicated components to a wide assortment of integrated circuits for phase lock loop tuning systems.

Applications-Dedicated Circuits

Many different components are dedicated for specific applications. Among these are three hybrid amplifier modules fully characterized for **800 MHz cellular mobile radio** applications. The MHW808 series has a typical output power of 7.5 W, a typical power gain of 25 dB, and an automatic gain control over a 35 dB range in output power.

The MC1376 is a **voltage-controlled oscillator/ modulator** circuit designed for the base station of a **cordless telephone** operating at 1.76 MHz. Its frequency range of 1.4 to 14 MHz makes it equally suitable as a 4.5 or 5.5 MHz intercarrier sound modulator for TV signal generation.

The MC3357/3359/3361 are FM IF circuits used principally in **noise-activated band-scanning receivers.** The input frequency is mixed with an oscillator signal to provide a 455 kHz IF. The audio is recovered with a conventional quadrature FM detector and the "noise," which indicates the absence of an input signal, is used to control scanning.

Motorola also offers analog mixers, balanced modulator-demodulators, and a wideband FSK receiver to round out the selection.

Phase-Locked-Loop Frequency Synthesizers

A choice of phase-lock-loop components ranging from complete, functional PLL circuits for dedicated applications to a wide selection of basic PLL circuit elements is available. **Full functional phase-locked-loops** include devices having serial and parallel inputs, as well as 4-bit data inputs for MPU data-bus interfacing. Options include single or dual-modulus capability, transmit/receive offsets, choice of phase detectors and choice of reference/divider integer values. **Basic PLL building-block circuits** include a large variety of counters and prescalers and other integral functions such as oscillators, phase detectors and control circuits.

General purpose PLLs are available for applications including CATV, AM/FM Radio, Two-Way Radio, TV Tuning, Scanning Receivers, and Amateur Radio. Common characteristics for this family of PLLs include 3.0 to 9.0 Vdc Supply Range, On- or Off-chip Reference Oscillator Operation, Lock Detect Signal, and Single-Ended or Double-Ended Error Signal Option. These devices utilize CMOS technology for very low power consumption and are available with a wide range of inputs and divider options that make each device uniquely qualified for a specific end use.

Available Literature

DL136 — The Telecommunications Device Data book pulls together all data sheets concerning Motorola CMOS and Bipolar ICs which are dedicated to applications in telecommunications. The product data sheets are supplemented by over 100 pages of applications information and additional chapters on reliability, handling and design guidelines, and mechanical data.

DL110 — The RF Device Data book provides the specifications on over 500 of Motorola's RF products, including telecommunications devices, along with 19 applications notes, 22 engineering bulletins, and chapters on reliability and general technical information.

BR188 — The Voice/Data Communications Circuits brochure offers a more complete look at Motorola's voice/data ICs with block diagrams of basic circuits, and circuit features and specifications.

POWER SUPPLY/ POWER CONTROL CIRCUITS

POWER SUPPLY CIRCUITS

Power Supplies have changed . . . and are still changing. Today's sophisticated computing equipment no longer tolerates the output voltage and current swings that were acceptable to the less demanding applications of yesteryear. The shrinking space requirements for electronic equipment, made possible by LSI and VLSI circuitry, demand equivalent size and weight reductions for power supplies, and the ever-present pressure on costs poses a continual challenge to circuit designers and component suppliers. The development and rapid penetration of switching power supplies attest to the success of designers in meeting the challenge. The increased component complement for these designs indicates that component suppliers are keeping pace.

Since the inception of solid-state technology, Motorola's product portfolio supported the advance of power-supply design trends. From the first pressfit rectifiers (whose low cost precipitated the switch from the generator to the alternator in automotive applications) to the SMARTpower concept implemented first in power-supply regulator and supervisory components, Motorola has provided the means with which to implement the designer's plans. The wealth of integrated circuits dedicated to power-supply applications include ***voltage regulators*** *and* ***voltage references*** *as well as power supply* ***supervisory and control circuits.*** *These are detailed in the literature indicated here.*

Accompanying rectifiers, zeners, power and small-signal transistors that round out the requirements for today's designs are described in the Discrete Components section of this catalog. Together, these products represent the most complete and most competitive power-supply component lines available from the industry.

Voltage Regulators

Fixed Output Voltage Regulators — are offered as low-cost, monolithic circuits for positive and/or negative regulation of output voltage from 2 volts to 24 volts, at currents from 100 mA to 3.0 A. SOP-8 and D-pack versions are ideal for on-card regulation of subsystems.

Adjustable Output Voltage Regulators — are available for regulation of positive and/or negative voltages ranging from 1.2 V to 37 V, at currents from 100 mA to 3.0 A.

Switching Regulators — are used as control circuits in pulse-width modulated, push-pull, bridge and series type switchmode supplies. These devices include the reference oscillator, pulse width modulator, phase splitter and output sections. Frequency and duty cycle are also independently adjustable. Current range — 40 mA to 1.5 A; VCC range — 1 V to 40 V; Frequency range — 0.1 to 400 kHz.

Floating Voltage and Current Regulators and Dual ±15 V Tracking Regulators. The Floating Voltage and Current Regulator's voltage is limited only by the break down voltage of associated external, series-pass transistors. The Dual ±15 V Tracking Regulator, designed for laboratory power supplies, is set internally for ±15 V, but an external adjustment can change both outputs simultaneously, from 8.0 V to 20 V.

Voltage References

A family of low-voltage bandgap voltage reference devices is also available for applications requiring low temperature drift. These devices offer output voltage ratings from 1.235 V ±12 mV to 37 V and output currents of 20 mA, ±10 mA and 100 mA.

Supervisory Circuits

MPC2000 Series of SMARTpower™ Overvoltage/ Overtemperature Protection Circuits. SMARTpower is the combination of IC logic with discrete power processing to yield high-density integrated circuits with significant on-chip power capability.

Typical of Motorola's SMARTpower devices is this series of overvoltage/overtemperature protection circuits designed to protect 5-, 12- and 15-volt bus systems by shunting the bus system if either voltage or temperature exceeds preset levels. Devices are available with 7.5 A, 15 A and 35 A (continuous) current ratings.

The TCA5600/TCF5600 Universal Microprocessor Power Supply Controller is a versatile circuit for microprocessor-based systems and is mainly intended for automotive applications and battery powered instruments. This device offers high circuit flexibility with a minimum of external components. The chip boasts a temperature compensated voltage reference, on-chip dc-dc converter, programmable and remote controlled voltage regulator, fixed 5.0 V supply voltage regulator with external PNP power device, under-voltage detection circuit, power-on RESET delay and watchdog feature for orderly microprocessor operations.

The TDA4600 Control IC for Line Isolated Free-Running Flyback Converters regulates and monitors the switching transistor in power supplies based on the free oscillating flyback converter principle.

Other Power Supply Over/Under Voltage Protection Circuits requiring external SCRs are also available.

POWER CONTROL CIRCUITS

Circuits for the control of electric motors and for driving and controlling the operation of thyristors for power switching applications.

Motor Controllers

. . . for Servo Motors. A Complete Controller In One Package. This dc servo motor controller/driver has all the active functions necessary for the control of a complete closed-loop fractional horsepower system.

The new MC33030 circuit is powerful enough to handle the sophisticated requirements of robotics and inexpensive enough to be used in consumer applications such as antenna rotators and toys. It contains:

- An error amplifier and window detector.
- Drive and brake logic with motor direction memory.
- A 1 ampere power H switch.
- Programmable over-current protector and shutdown delay.
- Over-voltage shutdown.

POWER SUPPLY/ POWER CONTROL CIRCUITS (CONT)

. . . for Stepper Motors. This driver provides up to 500 mA of drive per coil for two-phase 6.0 V to 24 V motors. Control logic accepts commands for clockwise and counterclockwise, half or full-step operation. Output impedance control and phase A drive state indicator is provided on one MC3479 of two models available.

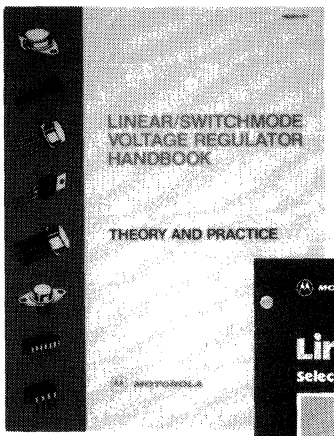
. . . for Universal Motor Speed Control. All the necessary functions for ac/dc motors in open or closed loop configuration. This TDA1285AD circuit has facilities for defining the initial speed/time characteristic and provides a phase angle varied trigger pulse to the motor control triac.

Triac Drivers

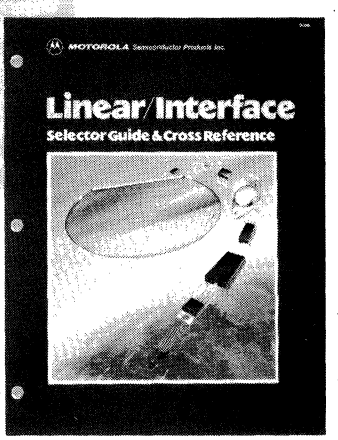
Zero-voltage controllers and switches incorporate detectors that synchronize triac gate pulses with zero crossing of the ac line voltage to eliminate RFI when used with resistive loads.

- Direct ac line operation
- Sensor fail-safe
- High current pulses for control of external thyristor

A variety of devices of varying complexity are available under type numbers MC3370, CA3079 and UAA1016B.



HB206R1



SG96

Available Literature

HB206R1 — The Linear/Switchmode Voltage Regulator handbook covers basic linear regulator theory, switching regulator topologies, and includes several practical design examples. Complete data sheets for all Motorola voltage regulator ICs are provided along with an industrial cross reference and a supplementary transistor and rectifier selector guide for switching regulators of various configurations and power levels.

SG96 — The Linear/Interface Selector Guide and Cross Reference contains information on many of Motorola's devices including Voltage Regulators. For this group of devices, specifications and packaging information provide a means for making quick design decisions for optimum design performance.

This literature is available free from your local Motorola Sales Office or Distributor.

EEM PRODUCT SELECTION GUIDES

Use the EEM Product Selection Guides. There are 34 Guides in this edition of EEM. See page 2 (A•2, B•2, C•2, D•2) of each volume to locate the Product Selection Guides that pertain to your needs.

PICONICS®

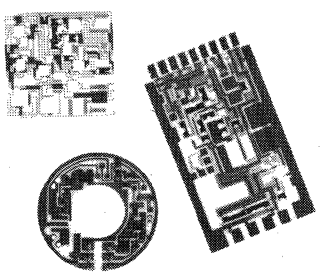
HYBRID MICROCIRCUITS
THICK FILM — THIN FILM — HYBRIDS

Piconics, an innovative microtechnology company has developed an extensive in-house hybrid capability. This capability encompasses hybrid microcircuit design and layout, thick film processing, thin film precision resistor technology and assembly. The assembly area utilizes both chip and wire as well as SMD reflow techniques in both hermetic (parallel seam seal welding) as well as non-hermetic packaging.

Our *in house* Quality Assurance test capability covers hermeticity (gross and fine), shock, vibration, moisture, burn-in, x-ray and most other common military screening tests. Documentation can be provided if necessary.

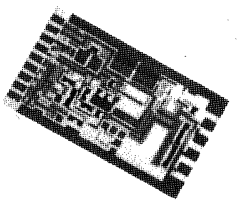
With Piconics full technology in-house options, we can select your hybrid circuit to the most advantageous cost effective production methods.

Our full source capability provides a choice by combining the best features of thick film, thin film and hybrid assembly technologies.



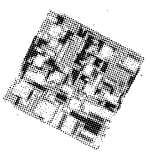
CALL OR WRITE FOR COMPLETE CATALOG AND FOR DESIGN/APPLICATION ENGINEERING SUPPORT.

THICK FILM



FEATURES:
Gold, Platinum Gold, Palladium Silver, Silver Conductors
Solderable, Wire Bondable Conductor
Multi-Layer Capability
Resistor Range: 1 ohm to 100 megohm
Tolerance ta: ± .5% Absolute
Adaptable to Standard Assembly Methods
Glazed or Unglazed Resistor Films
Beryllia Subtrates for Higher Power Available

THIN FILM
PRECISION NICHROME THIN FILM



FEATURES:
Gold Conductors
Passivated or non-passivated
TCR: ± 25 ppm — can be tailored to ± 5 ppm within this range
TC Tracking: 1-2 ppm
Tolerance: ta ± .1% Absolute
(Value Dependent) Ratio to 12 Bit accuracy (.005%)
Noise: <– 35 dB Johnson Noise
Stability: Absolute < .1% with 150°C Bake
< .2% with 200°C Bake
Value Range: 2 ohm to 10 megohm

HYBRID

FEATURES:
Thermosonic Automatic Gold Ball Bonds
Eutectic or Epoxy Chip Mount
SMD Solder Capability
Parallel Seam Seal Welding (Hermetic)
Laser Trim Capability
Full In-House Environmental Lab
Hermeticity, Shock, Vibration, Moisture, X-Ray, etc.

See section 1800 pg. **A•1273** for your INDUCTOR requirements and section 2700 pg. **A•1618** for FILTERS.

MOTOR CONTROL DESIGNERS' GUIDE

Motor Control Integrated Circuits

UNITRODE

TYPE	DESCRIPTION	TYPICAL APPLICATION	Vc	Vss	IOUT	PD	PACKAGE
L292	H-Bridge Transconductance Amplifier with PWM Current Control.	DC Motors, Torque Control, Stepping Motors, Microstepping, Solenoid Controlled Valves.	18V to 36V		2.0A Cont.	25W Max.	15 Pin Power Tab
L293	Four Totem-Pole Drivers.	DC Motors Stepping Motors Solenoids Other Inductive or Resistive Loads.	36V Max.	4.5V to 36V	1.0A Cont.	2.0W Max.	16 Pin Dip "Batwing"
L293D	L293 with Eight Bridge Diodes; Reduced IOUT.		36V Max.	4.5V to 36V	0.6A Cont.	2.0W Max.	
L295	Dual Solenoid Driver with Current Control.	Hammer Driver in Matrix Printers Solenoid Driver Motor Driver	12V to 46V	4.5V to 10V	2.0A Cont.	25W Max.	15 Pin Power Tab
L298	Dual Full-Bridge with Individual Logic Inputs for Each Bridge.	Power Stage for Motor and Solenoid Drivers. Low Standby Power Drain makes it Ideal for Battery Operated Equipment.	Vss to 46V	4.5V to 7.0V	2.0A Cont.	25W Max.	15 Pin Power Tab
UC1610 UC3610	Dual Diode Bridge with Eight Schottky Diodes (V_f = 1V @ 2A)	Use as Circulating Diodes with Motor or Solenoid Drivers.	40V Max.		3.0A Max.	1.0W Max.	8 Pin Dip
UC3620	Brushless DC Motor with Switching Current Control.	Drive Brushless DC Motors with 60 Mechanical Degree Hall Devices. Other Decoding Options available.	40V Max.		2.0A Cont.	25W Max.	15 Pin Power Tab
UC1637 UC2637 UC3637	PWM Driver for DC Servomotors; Current Limit, Under-Voltage Lock-Out.	Drive Bipolar or MOSFET Power H-Bridge in DC Velocity and Position Servo-Loops.	40V Max.		500mA Peak	2.0W Max.	18 Pin Dip
UC1706 UC2706 UC1707 UC2707	Dual Driver for Power MOSFETs; 50nsec into 1000pF, 1.5A Peak. TTL Compatible Inputs.	Interface between Low-Level Functions and High Power Control Devices, Particularly Power MOSFETs.	40V Max.	40V Max.	1.5A Peak	2.0W Max.	16 Pin Dip "Batwing"
UC1717 UC2717 UC3717	Stepping Motor Phase Driver; TTL Compatible Inputs. Pulse-by-Pulse Current Control, and Full Output H-Bridge with Diodes	Stepping Motor Driver in Full-Step, Half-Step, or Microstep Mode. Separate Digital Control Sets Current at 100%, 60%, 19%. Bipolar Operation.	10V to 40V	4.75V to 5.25V	1.0A Peak	2.0W Max.	16 Pin Dip "Batwing"
UC3517	Stepping Motor Driver Unipolar, Bilevel. Minimal RFI. Activates Both Motor Phases.	Driver for Stepping Motor in Applications Requiring Least Possible RFI. Internal Logic for Full-Step/Half-Step. High Voltage Pulse Width Set by Single RC.	10V to 40V	4.75V to 5.25V	350mA Cont.	1.6W Max.	16 Pin Dip
UC3770	Stepping Motor Phase Driver Pin Compatible with UC3717, but with Higher Output Current and No Circulating Diodes.	See UC3717 Application	10V to 40V	4.75V to 5.25V	1.5A Peak	2.0W Max.	16 Pin Dip "Batwing"

APPLIED RESEARCH Inc.

DEPT. EM, 160 DUPONT STREET, PLAINVIEW, NEW YORK 11803, (516) 349-9200

Over 30 Years as a Supplier to the Military/Industrial RF Markets.

RF FILTERS, MULTIPLEXERS, CONVERTERS, POWER AMPLIFIERS, MULTIPLIERS, SIGNAL SOURCES, MULTICOUPLERS and COMPLETE RF SYSTEMS.

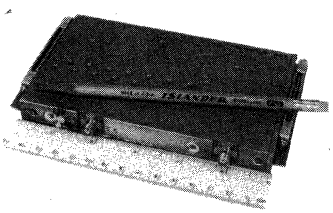
MULTIPLIERS

FREQUENCY GENERATION THROUGH MULTIPLICATION OR PHASE-LOCK TECHNIQUES/VHF to Ku-Band (10 MHz to 1.5 GHz)

Applied Research offers many proven designs using either technique or combinations. And we're capable of meeting your exact requirements, precisely.

Our Phase-lock loops, comprised of I.C. components, together with RF devices, yield outputs of up to 10 watts at microwave frequencies. And our multipliers are available as passive devices or in combination with amplifiers having multiplication factors of from 2 to 2000. In combination with varactor multiplier devices output in Ku-band can be obtained.

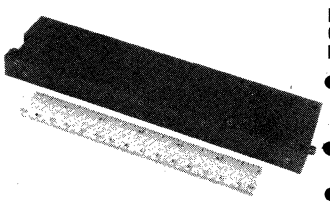
What's more, we can supply crystal oscillators or internal drivers to provide a self-contained source.



Frequency sources with mutiplication up to 29 and multiples thereof are available deriving signals in the L, S, and C-bands.

ELECTRICAL CHARACTERISTICS (TYPICAL)

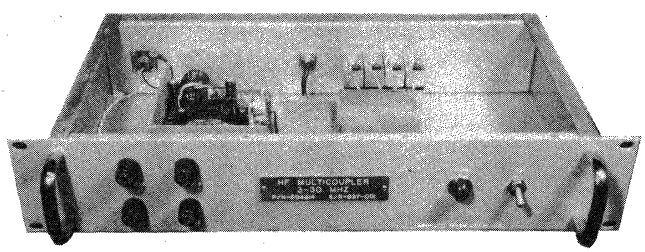
- Input Frequency: 100 MHz ±10 MHz
- Output Frequency:
  Type-1, 6400 MHz (X64)
  Type 2, 5800 MHz (X58)
- RF Power
  Input Power: +5 dBm, ±3 dB
  Output Power: +5 dBm, ±2 dBm over temperature
- Discrete spurious outputs: Harmonics below −60 dBc, others at a maximum of −60 dBc.
- Temperature: −54°C to +85°C



ELECTRICAL CHARACTERISTICS
C-BAND PASSIVE BROADBAND HIGH POWER MULTIPLIERS

- Input Power: +40 dBm
  Output Power: +32.6 dBm ±0.5 dB
- Spurious Response: >−70 dBc inband
- Bandwidth: 5.9 to 6.4 GHz

MULTICOUPLERS



Multicoupler Model HFM-2 (TX)-230-8-40 is one of a series of multicouplers designed and manufactured by Applied Research Inc. This model, operating over a frequency range of 2 to 32 MHz, has 8 to 32 independent outputs for inputs of up to +20 dBm.

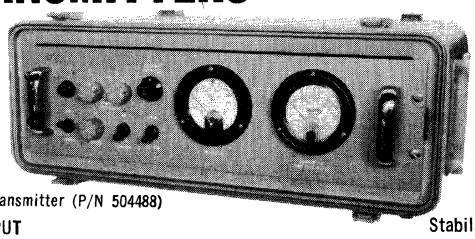
PERFORMANCE SPECIFICATIONS
Frequency Range: 0.5 to 32 MHz
Number of Outputs: Up to 32
Isolation Between Outputs: To be specified by customer — Up to 70 db.
Overall Gain (Input to Output): 0 dB
Connectors: To be specified by customer.

The HFM Series covers the frequency range of 0.5 MHz to the Telemetery Bands, and has been designed for applications where weight and space are critical such as submarine, shipboard, or mobile installations.

MODEL	NO. OF OUTPUTS	FREQUENCY RANGE
HFM-2(TX)0532 8/40	6 to 32	500 KHz-32 MHz
HFM-2(TX)232 8/40	6 to 32	2 MHz-32 MHz
HFM-2(TX)140 12/40	6 to 32	10 MHz-400 MHz
HFM-2(TX)2410 8/40	6 to 32	20 MHz-1100 MHz
HFM-2(TX)1415 6/50	6 to 32	1400 MHz-1600 MHz
HFM-2(TX)2223 8/50	6 to 32	2200 MHz-2300 MHz
HFM-2(TX)1423 8/50	6 to 32	1400 MHz-2300 MHz

SOLID STATE TRANSMITTERS and POWER AMPLIFIERS in P, L, S and C BANDS.

TRANSMITTERS



Transmitter (P/N 504488)

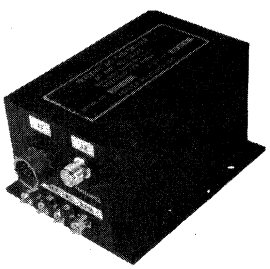
RF OUTPUT
Range: 400-550 MHz
Control: Field Tuneable in 0.5 MHz increments
DC/AC Power: 24-30 volts at 9 amperes/115/230 VAC 5/2 Amps
Stability: ±0.005%
Power: 30 watts, minimum
MODULATION: Frequency Modulation

POWER AMPLIFIERS

200 Watt RF Power Amplifier (P/N 504495)

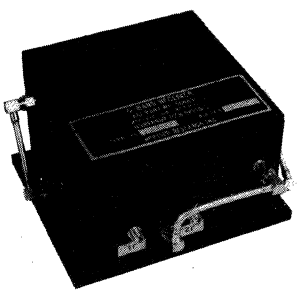
Frequency Range: 400 to 550 MHz

AEROSPACE COMPONENTS



L-BAND TRANSMITTER

Frequency: Tunable, 1650-1670 MHz
Power Output: +28 dBm min.
Modulation: FM; 1-35 KHz
Stability: ±3 MHz
Power Input: +22 to +34 VDC, .75A max.
Weight: 1 kg max.

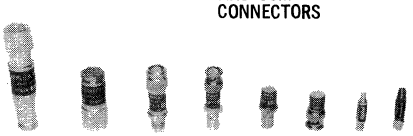


G-BAND RECEIVER

Frequency: 4.4 to 5.0 GHz*
Stability: ±.005%
Sensitivity: −90 dBm for 10 dB S/N and ±250 KHz deviation
IF Bandwidth: 1 MHz nominal
Power Input: +21 to 30 volts, .75A max.
Weight: 3.5 lbs. max.
* Factory set

FIXED PAD ATTENTUATORS & TERMINATIONS (DC-2GHz)

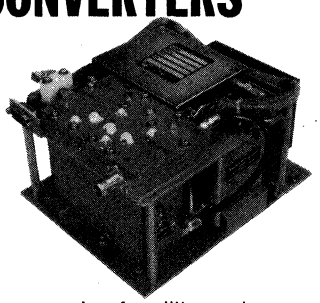
FOR TYPES BNC, TNC, C, N, AND OSM CONNECTORS



Integrated line of fixed pad attenuators, terminations, and impedance-matching transformers provides means for rapid and accurate division of voltages over the frequency range of DC-2 GHz, and for the matching of different impedances with minimum loss over a broad frequency band. The unit cost is within the practical price range of the large and small equipment user, as well as the research and experimental user.

GENERAL CHARACTERICTICS
Frequency Range: DC-2 GHz
VSWR: 1.25:1
Attenuation Accuracy:
−0.1 dB +0.3 dB for values of 1 to 12 dB
−0.2 dB +0.5 dB for values of 15 to 20 dB
Impedances (Nominal): 50, 75 90 ohms
Attenuation Values:
1, 2, 3, 4, 6, 10, 12, 15, 20 dB (standard).
Other values up to 30 dB Special

TELEMETRY CONVERTERS



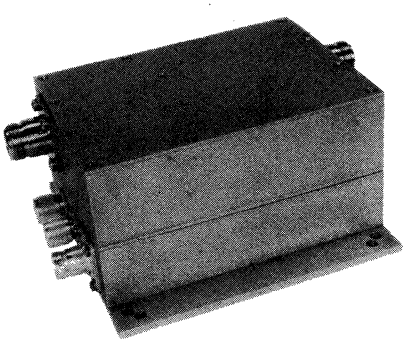
Down converters for military and commercial application are available throughout the frequency range from VHF to K-band. Applied Research manufacturers the filters, oscillator sources, the IF amplifiers, and complete packages that are associated with down converters.

These units permit the ready adapting of existing UHF telemetry receiving equipment for use in the 1435 to 1540 and 2200 to 2300 MHz telemetry band with high conversion gain.

GENERAL CHARACTERISTICS
Long Term Stability: Better than ±.1 PPM over temperature range
Image Rejection: >50 dB
Noise Figure: Better than 5 dB for 100 mc bandwidth (2.2 to 2.3 GHz)

Converters meeting special requirements which include group delay or phase and amplitude characteristics can be designed to meet special needs.

MULTIPLEXERS



State of the Art Multiplexers, applying Applied Research Inc.'s experience in the design and manufacture of NOTCH FILTERS, BANDPASS FILTERS, and BAND REJECT FILTERS allows for the ultimate in performance.

TYPICAL TRIPLEXER CHARACTERISTICS
Frequency Range: 5 kHz to 500 MHz
Frequency Breaks: 500 kHz and 32 MHz
Passband Attenuation: 1.5 dB maximum
Crossover Losses: 4.5 dB maximum
Reject Characteristics: 42 dB minimum, other bands
Ripple: 0.5 dB peak to peak maximum
Impedance: All ports shall be 50 ohms unbalanced
VSWR: 1.5:1 maximum, 2:1 through crossover

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

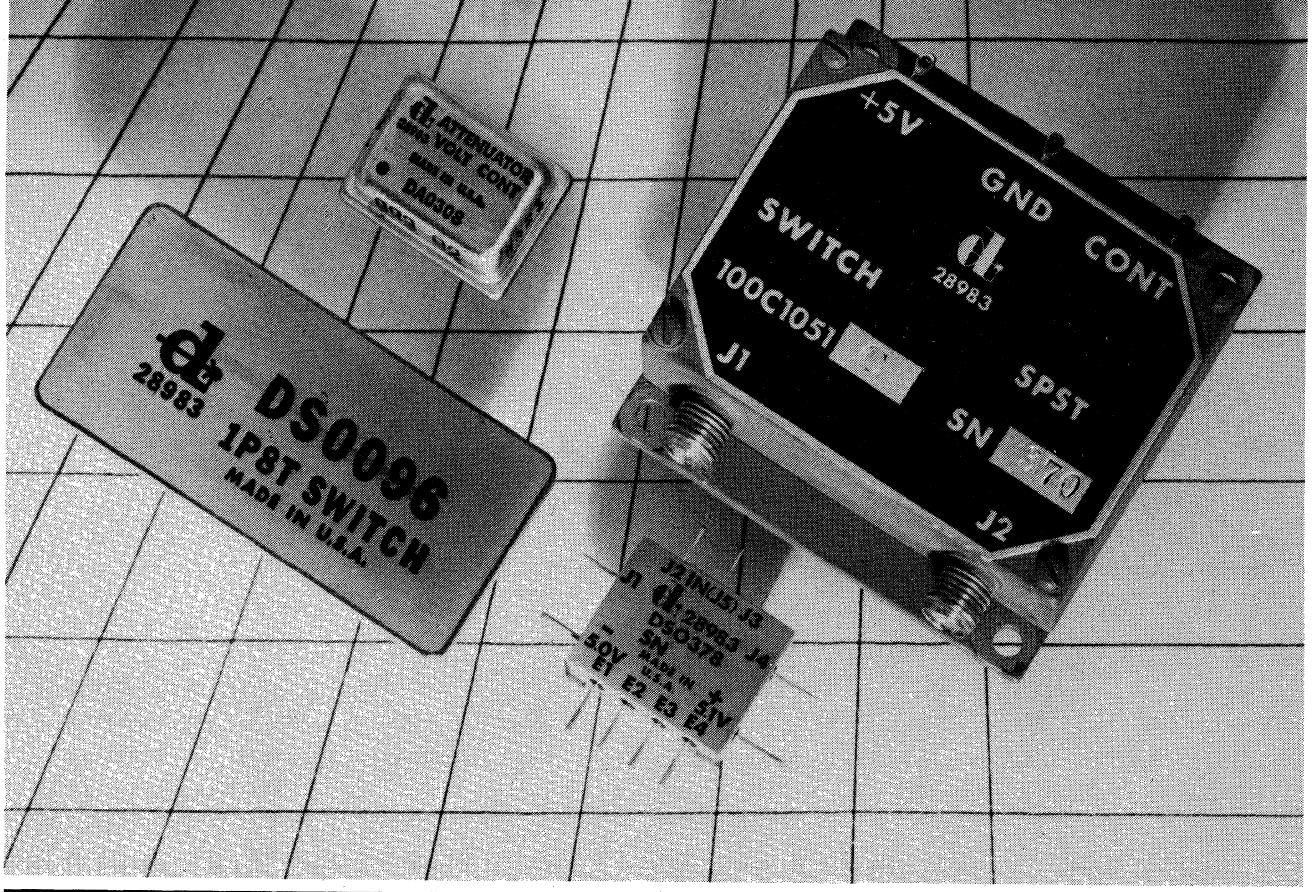
DAICO IF/RF SOLID-STATE MIL-SPEC DEVICES

SWITCHES ☐ ATTENUATORS ☐ PHASE SHIFTERS ☐ SUBSYSTEMS



Designing and manufacturing solid-state switches, attenuators, phase shifters and sub-systems to meet the MIL-Spec requirements of the defense oriented, communications, radar and countermeasures system companies have been our specialty since 1967.

More than 2,400 different field proven part types have been engineered and manufactured during the past two-decades.

Frequency ranges from DC to 6GH$_Z$ and switching speeds as low as 5 nanoseconds (RF transition time) are currently being supplied.

Phase and amplitude critical devices are supplied maintaining specified parameters over −55°C to +125°C.

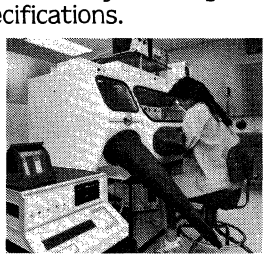
One of our many standard devices may solve a design problem for you with little or no modification.

If your application requires a special device not met by one of our standard units, our technical staff will welcome your call. You can depend upon Daico for a prompt, realistic response.

At the three Daico manufacturing facilities, totaling 46,000 square feet, IF/RF solid-state components in three construction types are produced.

- ☐ **THIN-FILM:** Our in-house high-reliability thin-film manufacturing facility produces MIC (Microwave Integrated Circuits) in line with MIL-STD-883C for surface mounted applications. Products include switches, analog as well as step attenuators, and phase shifters.
- ☐ **DISCRETE:** The discrete connectorized devices are built utilizing our in-house circuit board manufacturing facility. Products are built in accordance with MIL-E-5400 and MIL-STD-454.
- ☐ **CONNECTORIZED MIC:** To take advantage of the small MIC size, but with the convenience of connectors, Daico offers a combination MIC with connectors. The MIC is built in line with MIL-STD-883C with the connectorized body meeting the appropriate discrete specifications.

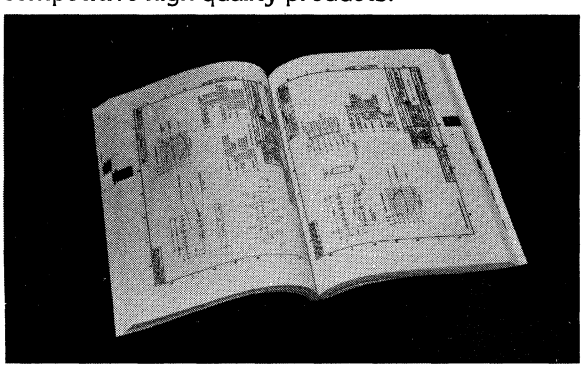
Our Quality Assurance Program is designed around MIL-Q-9858, MIL-I-45208, as well as engineering design and Quality Controls based on MIL-M-38510F Appendices A and G.



Electrical, mechanical and environmental tests are performed in-house, many on computer controlled equipment; thus assuring accuracy and saving time and money.

MIC case sealing is performed in one of the computer controlled seam welding environmental chambers.

State-of-the-art equipment includes: Computer aided design optimization; computer controlled pattern recognition ultrasonic wire bonder; HP 8510 and 8505 Network Analyzers along with other IEEE bus interface test equipment controlled by HP 9825 computers. The results are competitive high quality products.



The Daico 292-page Engineering Handbook and Reference Drawings contains detailed engineering data for the most popular proven standard devices. Daico engineering drawings for each product include specifications, performance curves, pin-outs, connector, and outline-drawing details. Logic tables are provided where appropriate,

In addition the handbook contains Quality Assurance information, design aids, nomographs, and transmission-line relationships. The Engineering Handbook may be obtained by qualified persons directly from Daico or from your Daico representative listed in the yellow pages of EEM.

Write, phone or TWX for your free copy of the Daico Engineering Handbook: P.O. Box 5225, Compton, CA 90224, Telephone 213/631-1143, TWX 910-346-6741.

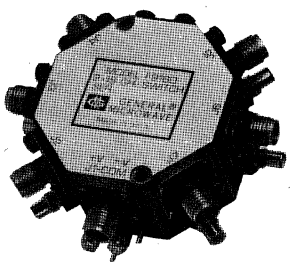
PIN DIODE CONTROL DEVICES FROM GENERAL MICROWAVE

PIN Diode Switches

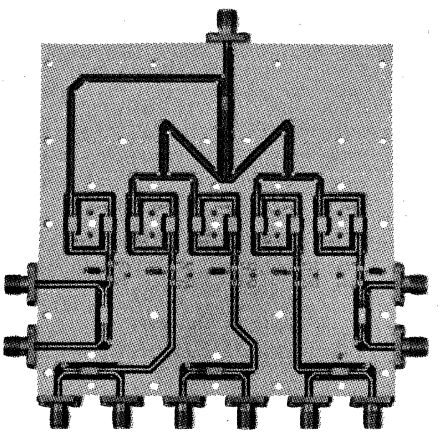


General Microwave's complete line of high performance broadband switches, with and without integral drivers, are available in three basic series.

- Ultra Broadband Series: 0.2 to 18 GHz, SPST to SP5T
- Multi Octave Band - Miniature Series: 0.2 to 4 GHz (Series 92) 2-18 GHz (Series 91); SPST TO SP7T
- Octave Band - High Speed Series: 10 nsec switching speed, 2-18 GHz; SP2T

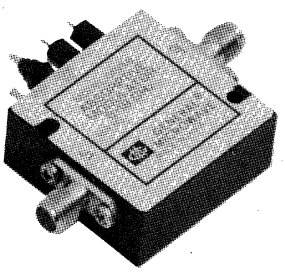
Many models of each type are available to satisfy most requirements. Non-reflective switches, space qualified units and other special designs are also available.

MIC Assemblies



General Microwave MIC assemblies can combine: • Frequency Translators • High Speed Digitally Controlled Attenuators • Power Combiners and Dividers • High Speed Switches • Mixers • Amplifiers • Isolators • Directional Couplers • Phase Modulators • Filters and other signal conditioning and processing devices.

PIN Diode Modulators/ Attenuators



General Microwave's Series of PIN diode modulators/attenuators provide octave-band and greater than octave-band performance from 0.5 to 18 GHz. All at low cost.

Series	Bandwidth	Atten. Range (dB)	Control
D195	Octave	60	Linear Voltage
D196	Multi-octave	60	Linear Voltage
195	Octave	60	Current
M180	Ultra-broadband	60	Linear Voltage

Digitally Programmable PIN Diode Attenuators

General Microwave's Series of Digitally Programmable PIN Diode Attenuators provide octave-band and greater than octave-band performance from 0.2 to 18 GHz with wide programming flexibility. All at low cost. Their compact, rugged packages are well suited to military applications. They are available in drop-in module type configurations and hermetically sealed packages. Nanosecond switching speed modules are also available.

Series	Bandwidth	Atten. Range (dB)	LSB (dB)
329	Octave	80&120	0.1
345	Octave	60	0.25
346	Multi-octave	60	0.25
325	Ultra-broadband	120	1.0

HIGH QUALITY ATTENUATORS!

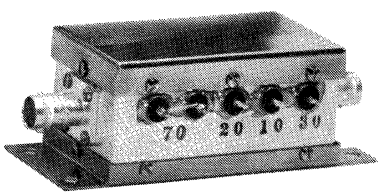
Kay Elemetrics Corp offers a complete line of Programmable, Toggle Switch, Rotary and Continuously Variable attenuators. All Kay attenuators are equipped with precision, field replaceable resistors. Kay is able to produce durable toggle switch attenuators with superior specifications by using teflon, gold and silver components in our custom developed and in-house manufactured switches. Our Rotary attenuators use dual gold plated printed circuit contacts at each connector for superior electrical contact.

If you don't see an attenuator that fits your requirements call us. Kay can design an attenuator to fit your specific OEM needs. We have designed over 250 different special attenuators in the past.

Please call or write to the address listed below for our complete attenuator catalog and price sheet. Our quantity discounts start as low as two (2) units!

OEM PROGRAMMABLE ATTENUATORS

- LOGIC ADAPTORS AVAILABLE



4000 SERIES

IMP. Ω	MODEL	FREQ. RANGE	ATTEN. RANGE

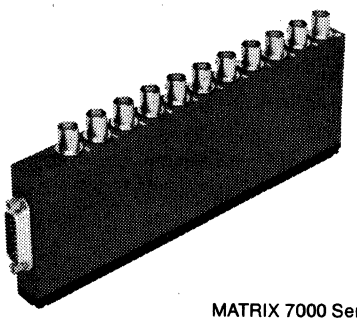
COAXIAL RELAY MODULE



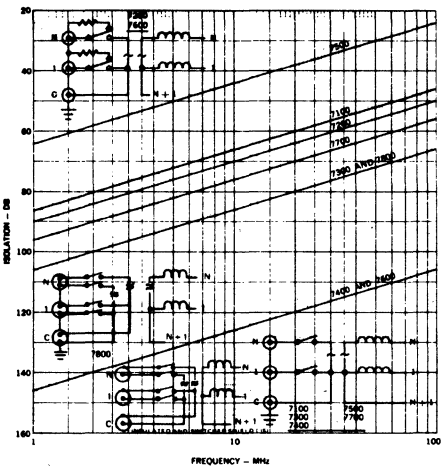
FEATURES

- Two to twenty four throws
- Continuous shield continuity
- Rugged machined aluminum housing
- Crosstalk always less than isolation
- Switchpoints individually field replaceable
- Extremely low EMI
- Low VSWR
- Maitrix configuration easily assembled using 9000 series cross straps
- Signal circuits isolated from control circuitry

MATRIX 7000 Series Switch Modules are designed to maintain coaxial switching continuity over a wide range of critical and high environmental applications. The switch housings are constructed on precision machined aluminum alloy for structural integrity and hard anodized for durability.All signal shield paths are silver plated with covers gasketed for maximum EMI protection. The basic reed switch elements are hermetically sealed in nitrogen filled gas envelopes and employ rhodium plated contacts to insure non-stick operation. Applications for MATRIX 7000 Series include:

— R.F. and I.F. switching where a low VSWR is required .
— CCTV, base band video and pulse switching where low phase distortion and high pulse fidelity are required.
— Applications requiring a high degree of shielding integrity and low contact and induced noise such as pre amp input switching or the switching of high impedance operational amplifier inputs.

Matrix and hybrid switching systems are easily constructed by using Series 9000 (no output), 9100 (one output) or 9200 (two output) push-on cross straps which mate with the BNC connectors on the switch modules. The cross strap output connectors are BNC female type UG 1094/U. The model number of the cross strap is assigned by replacing the two zeros of the series number with the number of inputs desired. For example, a Model 9108 has eight inputs and one output.



SERIES 7000

7100— Standard
7200— Self-terminating
7300— High isolation
7400— Highest isolation
7500— High power
7600— Highest isolation self-terminating
7700— Mercury wetted contacts
7800— Twinax
7900— Triax

MODEL NUMBER ASSIGNMENT

7 X XX -X

Series — 7 — XX — -X — T

Number of throws — XX

Coil suppression diodes — DR
TNC connectors — T
Self-terminating resistance — ohms
Insulated shield — I
Insulated and switched shield — IS
Expander output — E
Chassis mount — C

SPECIFICATIONS

FREQUENCY RANGE:	0 - 300MHz
CHARACTERISTIC IMPEDANCE:	50 ohms - 75 ohm optional
SWITCHING CONFIGURATION:	Single or double pole, two thru twenty four throws
SWITCHING SPEED:	Less than one millisecond
ISOLATION:	See graph
CONTROL - CONNECTOR:	28 VDC,30 MA D type - subminiature connector
SIGNAL CONNECTOR:	BNC - UG1094/U, TNC and SMA optional
OPERATING TEMPERATURE AND HUMIDITY RANGE: −30°F to + 150°F, 0 to 98 percent R.H.	
OPERATING SHOCK AND VIBRATION:	50 G's -1MS,2G's p-p 20-2000 Hz
DIMENSIONS:	.625″ W × 3.25″ H × 1.44″ + .625″ × Number of throws
MOUNTING:	Three 6-32 tapped holes in base

Mini-Circuits

at Mini-Circuits, we're dedicated to pursue product innovations and improvements to satisfy our customers' current and future needs.

finding new ways...
such as a proprietary HTRB diode-screening technique, computer-automated performance data (CAPD) documentation and off-the-shelf TX mixers.

setting higher standards
with the industry's only 3-year guaranteed mixers, −55 dB guaranteed third-order IM mixers, highest output (1000 mv) phase detectors, widest bandwidth directional couplers ...just to name a few.

Our committment to the customer never ends.

how to order

Your local representative or distributor is the contact for both sales and service assistance for products listed in this catalog. These local offices have the latest price and delivery information on all models. They can also provide details on ordering procedures, service information and application engineering data.
Your order may be sent directly to Mini-Circuits or to any of the local sales offices listed.
Prices listed in this catalog are domestic F.O.B. Brooklyn, New York. Mini-Circuits reserves the right to change specifications, models, prices or designs without prior notice and without liability for such changes.

shipping instructions

Shipments can be made by either air or surface carriers. If specific shipping instructions do not accompany the order, Mini-Circuits will specify the carrier to be used.

terms

Net 30 days from date of invoice. If credit is not established with Mini-Circuits, shipments will be made C.O.D. (cash on delivery) or prepaid. When sending prepayments, please include freight.

warranty

Scientific Components Corporation, Mini-Circuits division, warrants each product manufactured by Mini-Circuits to meet all published specifications and to be free from defects in material and workmanship. The Company's liability under this warranty is limited to repair, adjustment and/or replacement of defective parts returned, freight paid by Buyer, to the factory within a period of one year from date of shipment from the factory unless a shorter period is specified. International customers may ship to the Company's nearest Distributor.
Damage by misuse or abnormal conditions of operation, or evidence of partial or complete disassembly voids this warranty.
SINCE MINI-CIRCUITS HAS NO CONTROL OVER CONDITIONS OF USE, NO WARRANTY IS MADE OR IMPLIED AS TO SUITABILITY FOR CUSTOMER'S INTENDED USE, BEYOND SUCH PERFORMANCE SPECIFICATIONS AS ARE MADE A PART OF THE PURCHASE ORDER. Equipment shipped F.O.B. Mini-Circuits' plant shall become the property of the Buyer upon delivery to carrier. Damage in shipment should be handled by the Buyer directly with the carrier by immediately requesting carrier's inspection upon evidence of damage in shipment.
A fee will be charged to the Buyer to cover the costs of inspection and test of units returned under this warranty and subsequently found to meet specifications or to be faulty for reasons which are not Mini-Circuits' responsibility. This warranty excludes all other warranties expressed or implied. Mini-Circuits shall not be liable for any special, indirect or consequential damages.

Mini-Circuits

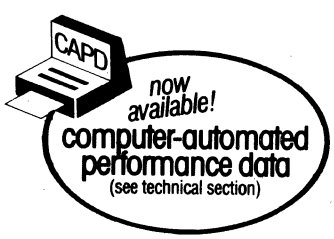
how to use this catalog

Over 1,000 RF/microwave signal-processing components are available to the design engineer from Mini-Circuits. This catalog has been organized to simplify the process of selecting the component best suited to your application and need, to speed location of specs for a particular model, and to provide helpful application assistance.

A complete listing of all the product family groups — from frequency mixers to power splitters to RF transformers — plus warranty and ordering details are found on page 3.

Looking for data on a specific model? Page 4 contains a list of all models in alphabetical/numerical order, available from Mini-Circuits with reference to specific data pages.

For a concise production/test flow diagram illustrating Mini-Circuits quality-control procedures. Turn to pages 6 and 7. Also detailed information on our Hi-Rel, HTRB and TX products for your military, space or rugged industrial applications.



Computer-automated-performance data (CAPD) is a Mini-Circuits' innovation offering the most complete data base for catalog RF signal-processing components. What's involved in CAPD and its benefits towards your new designs are described on pages 8-13.

"Mastering the Mixer Maze"...
Mixer selection, with hundreds of models to choose from, can be confusing. The penalty for improper selection? Overspecify and pay extra; underspecify and face marginal performance. Read pages 14-15 for a clearly-detailed procedure for choosing the optimum mixer for your needs.

Data pages are grouped by product line. Each data page is organized by series within the product line and by models within the series.

Information given includes CAPD data, National Stock Numbers (NSN), equivalent MIL — part numbers, pin connection designations, case styles, and notes to the tables.

Full technical data for each model is given in table form. The tables are arranged by sequence of model number for each series. The various models within a series differentiate from each other by the frequency range they cover. Frequency range is defined in the tables by the lowest frequency fL to the highest frequency fu. For most models, the frequency range is further subdivided into three segments; L = low range, M = mid range, and U = upper range. Each range L, M, U is defined at the bottom of each table in terms of fL and fu.

Mixer selection is primarily determined by selecting a mixer level suitable for the application. Therefore, to aid the designer, frequency mixers are organized in sequence of mixer level — Level 7, 10, 13, 17, 17S, 23, 23S and 27. A Level 7 mixer operates with +7 dBm LO drive, a Level 13 mixer operates with +13 dBm LO drive, etc. For each level mixer, a maximum RF input level for linear operation is specified.

Power splitters are organized in numerical sequence of power split; from 2 way 0°, 2 way 90°, 2 way 180°, 3-, 4-, 5-, 6-, 8-, 12-, 24-, to 48 way 0°.

Case style and dimensions are easy to find... each data page includes a photo of the particular case style for each series and, within the data, there is reference to case style number and outline drawing letter. Turn to pages 58 to 62 for case style dimensions, tolerances and bracket options where applicable.

For example, the SRA-1 mixer detailed on page 16 calls for case A 01. The dimensions and outline drawing are given in the table on page 58 and figure A on page 59.

Need Mini-Circuits components in a hurry? Refer to page 63 for a listing of our world-wide network of sales representatives and distributors ready to serve your needs, supply your orders, and answer your questions promptly and courteously.

reliability and

All Mini-Circuits' RF signal-processing components are subjected to rigid quality control procedures starting from raw material procurement through product production and final inspection; the objective—to supply our customers with the finest RF signal-processing components available. Here's a list of some of the procedures taken to insure high-quality performance and product reliability:

A. 100% testing of each diode.

B. 100% testing of each unit.

C. 100% inspection of every solder connection.

D. All transformers bonded to the header for protection against severe shock and vibration.

E. All diodes, resistors and capacitors bonded to the header for protection against severe shock and vibration conditions.

F. Diode and resistor power dissipation derated greater than 50%.

G. All components rated for greater than + 125°C.

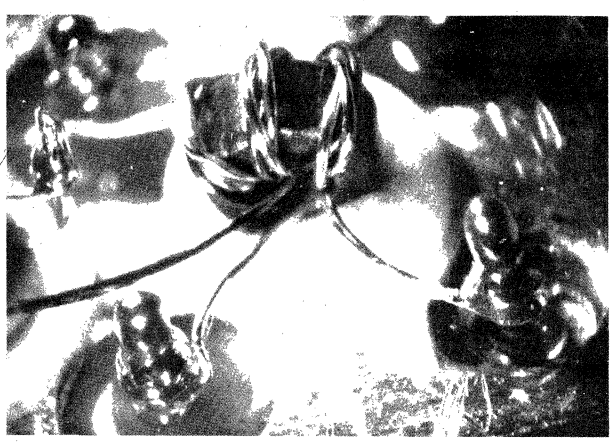
H. All transformer leads double wrapped.

I. Heavy coated wire insulation for HiPot/altitude.

J. Completely encapsulated for protection against mechanical shock and vibration as well as temperature shock.

K. Permanent case marking of model number cannot be removed by cleaning agents.

L. Cupro-Nickel case for long-lasting finish especially under salt atmosphere conditions.



Every unit shipped from Mini-Circuits carries a full-year guarantee; in fact, our industry-standard SRA-1 mixer offers an exclusive three-year guarantee.

hi-rel components

High-temperature, Reverse-bias (HTRB) testing is an accelerated-life screening test generally reserved for space applications. Here the Schottky and PIN diodes are subjected to a one-volt negative bias at 150°C for 168 hours. The objective of this accelerated aging stress is to force time/temperature-related failures and thus screen out potentially unreliable devices; in conventional "baking" processes, the diode does not experience anywhere near the stress imposed by the HTRB program. The result: highly-reliable Schottky and PIN diodes ready for wiring into assemblies.

Next, the assembled units are subjected to additional testing procedures including
(1) burn-in for 96 hours at 100°C with 8 ma at 1 KHz
(2) thermal shock per MIL-STD 202, Method 107
(3) Gross and fine leak tests according to MIL-STD 202, Test Method 112B, Conditions A and C

As a consequence of the above HTRB, final seal, and burn-in testing, Mini-Circuits components offer an unprecedented high level of reliability. In fact, Mini-Circuits' industry-standard SRA-1 is the only double-balanced mixer in the world to be offered with an exclusive *three-year* guarantee.

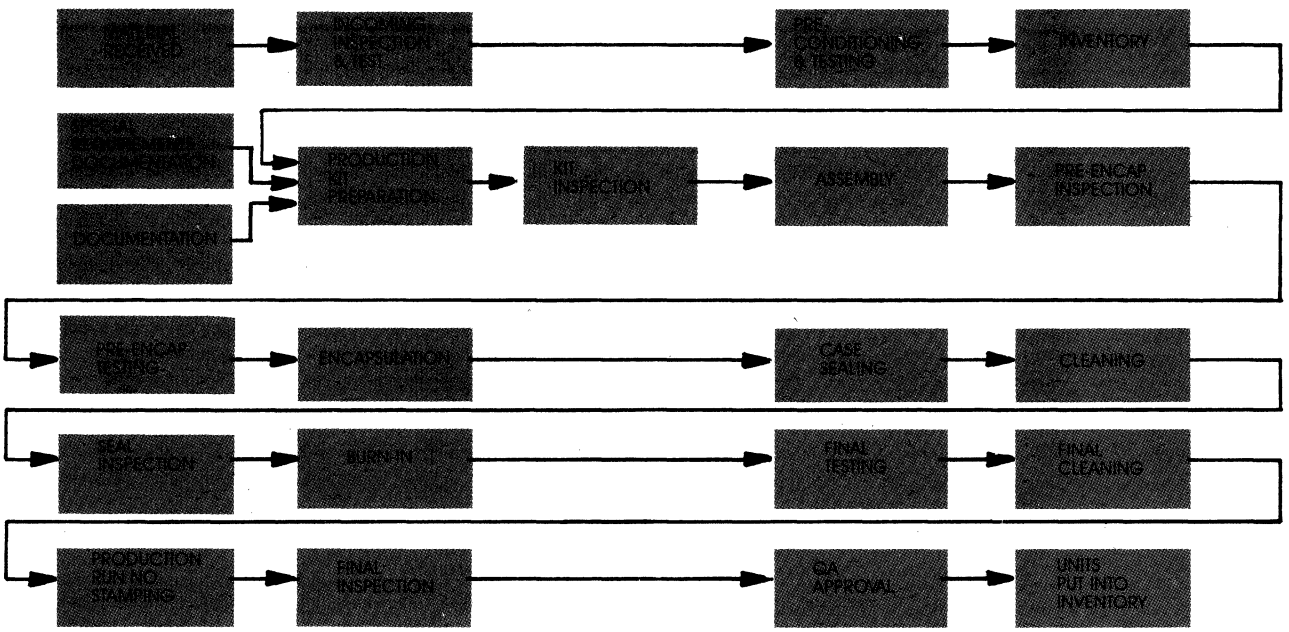
TX mixers

For the most critical space, military or industrial applications in hostile environments, Mini-Circuits offers TX mixers. Stringent screening and stressing are applied to the TX mixers which employ TX hermetically-sealed diodes that have passed the following tests per MIL-STD-750:
(1) high-temperature storage for 340 hours at 150°C, Method 1032; (2) thermal shock, Method 1051, Test Condition C (−65°C to +150°C, 10 cycles); (3) constant acceleration, Method 2006, Y1 orientation, 20,000 G's; (4) fine leak, Method 1071, Condition H; (5) gross leak, Method 1071, Condition C; (6) burn-in for 96 hours at 25°C, 75mW/junction at 60 Hz, Method 1038, Condition B.
Those diodes that pass these rigid tests are then electrically tested to ensure that they meet specifications. They are then assembled into TX mixers which are then further exposed to these stress tests: (1)thermal shock, MIL-STD 202, Method 107; (2) burn-in for 96 hours at 100°C, with 8 ma at 1 KHz; (3) gross and fine leak, MIL-STD 202, Method 112B, Conditions A and C
The SRA-1TX is the first off-the-shelf TX mixer in the industry available for immediate delivery. All other Mini-Circuits' mixers are available with TX screening and testing.

Mini-Circuits P.O. BOX 166, Brooklyn, New York 11235 (718) 934-4500

quality control

how Mini-Circuits achieves high reliability



environmental specifications

All MCL components are manufactured under exacting quality assurance and control standards. They will meet or exceed published specifications over the operating temperature range of −54° to +100°C, and after being subjected to any or all of the following physical or environmental tests of MIL-STD 202E which are applicable.

	TEMPERATURE CYCLING: −65° to +125°C	102 C
	ALTITUDE: 656,000 feet	105 G
(2)	HUMIDITY: 90% RH, 65°C	106
	THERMAL SHOCK: −65°C to +125°C	107 B
(1) (2)	SEAL: Less than 10^5 Atm. cc/sec	112 A
	DROP: Random, 45 min.	203
	VIBRATION: 2 to 2,000 cps, 20g, 12 hrs.	204 D
	SOLDER HEAT: 260°C, 10 sec.	210 B
(1)	SOLDERABILITY: 95% coverage	208
	TERMINAL TENSILE STRENGTH: 4½ lbs., 10 sec.	211 A
(1)	TERMINAL FATIGUE: 2 lbs., 3 cycles	211 C
	MECHANICAL SHOCK: 100g, 6ms	213 I
	SOLVENT RESISTANCE: Alcohol, Trichloroethan, Freon	215

NOTE:
(1) These specifications do not apply to coaxial connector models.
(2) Exceptions are non-hermetic case styles 6, 38, 46.

absolute maximum ratings

OPERATING AND STORAGE TEMPERATURE −55°C to +100°C

eliminating guesswork in systems design

CAPD (computer-automated performance data)

Today, RF and Microwave subsystem and system designs must be more precisely detailed as performance demands become more stringent. Radars must be more accurate, communications systems must be more noise-free, and guidance systems must be more rigorous, and all are required to meet quality and reliability levels considered unattainable a decade ago. These new demands place a heavy burden on the design engineer, the project manager, the quality assurance group...and the suppliers of the components to be assembled into these systems. In addition to the stricter performance and reliability specs, the designer faces escalating costs if, at the last stages before system delivery, unexpected surprises occur in the form of spurious signals, high VSWR or other pitfalls not anticipated.

Until now, the designer selected his RF/Microwave components, such as mixers, power splitters, and amplifiers, using manufacturers' data sheets to provide detailed specs, performance curves, and environmental ratings. Indeed, the design engineer did receive a workable package of information to see how his design might proceed...but it was not a detailed, close-up look. The reason is simple—it has just been too expensive to take an enormous number of test points, at a considerable number of specific frequencies, tabulate the results and then repeat at other input levels.

As an example, a two-tone intermodulation distortion chart for mixer performance would require at least 100 measurement points plus 10 additional calibration points and would take an experienced technician at least a half-day to complete.

For those customers who required their data at specific frequencies or under conditions other than is offered on the manufacturers' data sheets, extra charges were justifiably added to offset the additional labor costs.

Now, a new computer-automated performance data (CAPD) service offered exclusively by Mini-Circuits to its customers at no additional charge. Based on over 20 years of RF test experience and six years of engineering manpower-hours, the CAPD service provides detailed specs never available previously on mixer conversion loss, isolation, VSWR and intermod; for directional couplers and power splitters, details on insertion loss, isolation, phase unbalance and VSWR vs. frequency; for amplifiers, VSWR, gain changes and compression point vs frequency. In fact, all Mini-Circuits' products are available with CAPD specs.

test setup is self checking

The heavy investment in CAPD, using a Hewlett-Packard Model 85 computer and HP8566A spectrum analyzer as key elements, allows the previously-mentioned, two-tone IM test to be completed in less than ten minutes compared with the manually performed sequence requiring 4-5 hours. Here's how stringent the computer-automated set up dictates each measurement: each point is measured three times, with a maximum allowable deviation of less than 0.05 dB between the three; otherwise the test is repeated. Before each measurement is taken, the computer checks the reference voltage level for any variation due to line voltage, temperature, etc., changes and compensates as required. Similarly, frequency is monitored before each test and any drift is automatically corrected. Such continuous and rapid inspection and correction ensure highly-reliable CAPD data. And, by using a large number of closely-spaced frequency points for component measurement, effects of narrow-band suck-outs or resonances (often missed with manual test procedures) are immediately identified.

Mini-Circuits P.O. BOX 166, Brooklyn, New York 11235 (718) 934-4500

Mini-Circuits

a close-up view of performance

What's the significance of CAPD to the designer? Is it a sales "gimmick" or is it truly a design tool? Review these points and judge for yourself.

A competent RF/Microwave design engineer, drawing on his experience and expertise over years of varied projects, still must be concerned with unforeseen problems when the prototype is first turned on. Generation of spurious signals, changes in dc offset level, affects of LO drive variations and other vexing problems often become evident to extend delivery time and escalate costs. In many instance, a more precise definition of the component specs could have pinpointed the potential problem areas; with CAPD, it's now possible.

Let's assume you are specifying a double-balanced mixer for a wideband front-end design. Here are a number of profound questions you face:

- In a wideband design, the local oscillator (LO) output might vary over the band and could fall below the level required by the mixer spec. Should you spend additional money to flatten LO output or do you boost LO output if it is not sufficient?... Wouldn't it be valuable to know exactly how performance will be affected since you might find performance acceptable without any additional investment? with CAPD, a close point-by-point printout of key parameters as a function of LO level is available (fig. 1) — now you can make your decision based on a close-up, view of LO drive effects on mixer performance.
- How about VSWR over the full range of receiver specs? Generally, mixer VSWR specs are given at one particular frequency. With manual-test procedures, it's a time-consuming task for the components manufacturer or systems house; with CAPD it's available at no extra charge (fig. 2).
- How does the filter in the design match the mixer IF output and what is the impedance match in-band as well as out-of-band where spurious responses become a threat? CAPD VSWR data tells it all. How will the mixer conversion loss affect receiver sensitivity over the full frequency range? And, how will flatness of conversion loss affect the degree of image rejection in an image-reject mixer? CAPD data (fig. 1) will pinpoint these details.

If the mixer is being used as a phase detector, it may be critical to know how dc offset voltage varies with frequency. Most mixer specs list dc offset at only one frequency; with CAPD, this parameter is given over the full range of frequency (fig 4).

- Harmonic and intermod signals invariably plague your final design. The effects of, for example, a 4th harmonic of the LO mixing with the 5th harmonic of the RF is given on many spec sheets, but at a specific LO and RF level. The effects of LO level changes might be crucial to your design; with manual point-by-point testing, extensive and costly technician test time would be demanded or, more likely, such tests just won't be performed. With CAPD capabilities, such intricate interactions are quickly run, and made available to the designer (fig. 3).

If you are specifying directional couplers and/or power splitter/combiners in your systems, you can now closely examine how VSWR, insertion loss, isolation and amplitude/phase unbalance vary at closely-spaced points over the frequency range of interest, (fig. 5). You can now evaluate the effects of the VSWR of the termination at the S-port and, another industry-first, inspect intermod data of a power splitter caused by saturation of the cores within the unit.

Amplifier performance is clearly shown with CAPD data as a function of dc power supply changes, (fig. 6). You'll be able to closely examine how VSWR, compression point and gain are influenced by dc supply fluctuations; this could reduce your power-supply costs, since it will conveniently point to the degree of voltage regulation required to meet the amplifier performance needed. Also, it's common to furnish amplifier specs over the frequency band of interest, but CAPD testing offers an opportunity to examine the amplifier characteristics, outside the band to foresee the effects of harmonic and spurious signals; for example, an amplifier that is flat to 1200 MHz offers what gain and what VSWR for second-harmonic 2400 MHz signals? Knowing these details can thwart potential systems problems.

Even a relatively common component such as an RF transformer is now available with CAPD data, (fig. 7). The significance...previously insertion loss vs frequency was considered flat over a specified frequency range. With closely spaced CAPD test prints, even slight variations which could affect systems performance become apparent.

CAPD is your microscope

Look at CAPD as a microscope, revealing the "real world" details affecting your design decisions. Most important, CAPD was involved with one uppermost objective—to assist you, the design engineer, in producing a more effective end product. To accomplish this, you may require CAPD data at very specific frequency points not provided by our programmed steps. Not to worry...just furnish us with precise needs for your specific application. Be assured we'll do our best to comply.

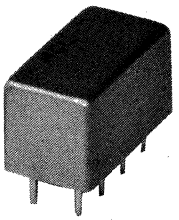
FIG. 6



mastering the mixer maze...

or selecting the right model for your application.

Mixers are abundant in electronic systems ranging from inexpensive consumer products to sophisticated military hardware. You'll find them in video games, TV sets and video cassette recorders as well as communications gear, test instruments, radar units and countermeasure systems. Mini-circuits offers well over a hundred different off-the-shelf models with thousands of variations. Different connector configurations, tighter specs, Hi-Rel options are available on request. Improper mixer selection bears a penalty—underspecify and face marginal performance; overspecify and pay extra for unnecessary performance characteristics.

making the right choice

Simply stated, there are three basic steps—
(1) deciding on a printed-circuit (PC) or connector version, (2) selecting the mixer level required in the applications, and (3) picking a model that extends over the frequency range involved. Sounds simple enough so let's examine some of the details.
The first step involves the decision on whether the mixer will be mounted to a PC board or be connected by cable to other subsystem components. The next two steps require understanding your specific needs; so it is strongly recommended that you organize the requirements for your application and put it in writing. Decide what frequency range is involved, the LO drive available, the level of harmonic and two-tone, third-order intermodulation (IM) distortion you can tolerate and other dynamic range factors, see Fig. 1.

1 dB compression point key to mixer level

What does the 1 dB compression point signify? As RF input level is increased, IF output should follow in a linear manner. However, after a certain point, IF output increases at a lower rate until mixer output becomes fairly constant. The point at which IF output deviates from linearity with RF input 1 dB is termed the 1 dB compression point. This figure is useful in comparing dynamic range, maximum output and two-tone performance of various mixers. It is a basis on which mixer level is established.

The 1 dB compression point, which defines the linearity of a mixer at high RF input levels, is relatively simple to test and thus this parameter is included on data sheets supplied by all mixer manufacturers. But, in real life, mixer linearity may be specified in accordance with the intended application. For example, in a receiver application, two-tone, third-order intermod may be the critical parameter; for TV applications, percent distortion or intercept point may be specified; and in an attenuator measurement system, compression point may be important for a given RF input level. With this in mind, the engineer needs a convenient means to relate the particular parameter for his application with the published spec, the 1 dB compression point.

Fig. 1 lists the various ways mixer linearity might be specified.

FIG. 1

Dynamic range parameters affecting mixer selection

1. maximum RF input level anticipated
2. percent distortion acceptable
3. intercept point
4. Two-tone, 3rd order IM _____dB at _____dBm, RF input
5. 1 dB RF input compression level
6. LO power available
7. none of the above specified

Let's convert every parameter with the published 1 dB compression point and then show how simple it is to select the proper mixer level, *see Fig. 2 for Mini-Circuits' mixer level/1 dB compression point chart.*

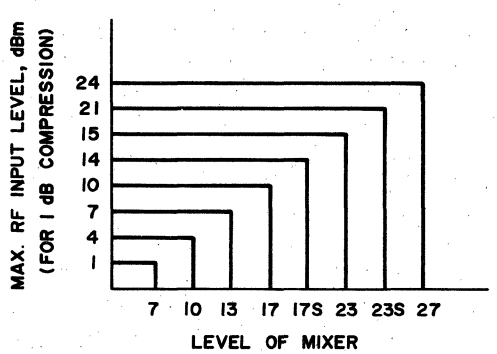


FIG. 2 THE 1 dB COMPRESSION POINT AS A FUNCTION OF THE LEVEL OF MIXER.

Mini-Circuits P.O. BOX 166, Brooklyn, New York 11235 (718) 934-4500

1. Maximum RF input level anticipated. If you know this parameter, simply select the lowest level mixer whose maximum RF input level exceeds your requirement. For example, if the maximum encountered RF level is +5 dBm, select a Level 13 mixer, rated at +7 dBm maximum RF input for 1 dB compression point.

2. Percent distortion. The percent distortion is usually specified in voltage. Thus, a 0.1% distortion figure means 0.999 of the input voltage appears at the mixer output. Next, convert this voltage ratio to a power ratio in dB by squaring and taking ten times the log. The resultant figure is the amount of compression for the specified RF input level. Now this must be extrapolated to 1 dB compression for a corresponding RF input level. As a rule of thumb, extrapolation may be achieved by assuming a linear relationship, in dB, between compression and RF input level. So a ten-times increase in compression corresponds to a ten-times increase in RF input level.

Let's illustrate with an example using a 0.1 percent distortion spec at −10 dBm RF input level. The 0.1 percent corresponds to a 0.999 voltage output; squaring this yields 0.998 power ratio or 0.009 dB. We, therefore, know that 0.1% distortion at −10 dBm input means the maximum allowable compression is 0.009 dB. Extrapolating, using the rule-of-thumb relationship, states that 0.09 dB compression corresponds to an allowable RF of 0 dBm, and further extrapolating results in 0.9 dB compression at a maximum allowable RF input level of 10 dBm. So which mixer level is appropriate? A Level 17S, with +13 dBm RF Input level at the 1 dB compression point, see Fig. 2.

3. Intercept point.

This parameter is a figure of merit corresponding to the amount of intermodulation products generated relative to the desired IF output. An intercept point can be defined for a second order, third order, fifth order, product, etc. As a rule-of-thumb, two-tone third order intercept point is approximately 15 dB above the 1 dB compression point. So, if the intercept point figure is given, merely subtract 15 dB from this figure and pick a mixer which meets the 1 dB compression point spec, see Fig. 2.

4. Two-tone, third-order intermodulation (IM).

When a two-tone, third-order IM spec is given, the intercept point can be calculated. Remember that for each 10 dB increase in signal level, there is a 20 dB degradation in two-tone, third-order product. Once the intercept point is calculated, simply subtract 15 dB from the figure to find the 1 dB compression point and select the appropriate mixer.

5. 1dB Rf input compression level.

This key parameter is listed on mixer spec sheets so merely choose the lowest level mixer that will meet the requirement.

6. LO drive.

The LO dirve is critical since the function of the LO drive is to switch the mixer diodes fully on and off for lowest distortion. So, for optimum performance, select the mixer level to match the LO drive. Mini-Circuits conveniently identifies its mixer levels by the LO drive requirement; thus a Level 7 mixer refers to a LO drive level of +7 dBm. If there are constraints on the LO power available, select the lowest level mixer closest to the available LO power. For example, if +12 dBm LO drive is available, select a Level 10 mixer.

7. No particular spec to meet.

Choose a Level 7 mixer. Why? Because it is the most popular and it offers the widest choice of models at lowest cost.

Freq. range last deciding factor

Once the mixer level has been decided, you may find a wide variety of models to exercise your decision making. You may notice models within a series with overlapping frequency ranges. Why? So you can choose the optimum mixer for your requirement. Each model within a series has a different low-frequency limit. Select a mixer with the highest low frequency limit and whose mid-band range best covers your application.

Specs on the data sheets are given in three ranges. The lower frequency range, L, covers the lowest specified frequency to one decade higher; the upper frequency range, U, covers the highest frequency to one octave lower and mid-range, M, covers the frequency between L and U. Thus, a mixer specified from 0.5 to 500 MHz could offer a low-frequency range of 0.5 to 5 MHz, an upper frequency range of 250 to 500 MHz, and a mid-range of 5 MHz to 250 MHz.

What about "Specials"?

Although most Mini-Circuits mixers are 50 ohm devices, models are available in 75 ohms. Need connector types different than those listed for standard models? No problem. Some applications require matched mixer pairs that must be amplitude (conversion loss) and phase matched. Most Mini-Circuits mixers are tested to within 0.2 dB for the entire production run. Not tight enough? Let us know your exact requirement and we'll screen and test to meet it.

In summary, contact us about "specials" and we'll do our best to satisfy your needs without excessive cost or delivery date extensions. Sometimes, "special" means shipping a quantity of mixers within a very short time span; since Mini-Circuits is the largest manufacturer of mixers in the world, this may hardly be considered "special" and you may be pleasantly surprised. Try us.

Harmonic LO Order

Model: TFM-15 S/N: sample band-width: 0-99999 MHz
999.100 MHZ input P. −.06 dBm
969.010 MHz input P. +9.96 dBm

IF = 30.090 MHz | LO = +10 dBm, 969.01 MHz
IF amplit. −7.14 dBm | RF = 0 dBm, 999.1 MHz

Final Spectrum Analyzer HP-8566A Parameters:
RES BW 1KHz VBW 3kHz
SWP 300 msec ATTEN 10 dB 5 dB/ div SPAN 100 kHz

LO drive adjusted with 19.75db Weinschel S/N:G4047 RF,IF attenuator
10.0dB Tektronix S/N:011-0085-00

NOTES:

* Below 10 MHz IF, conversion loss increases up to 6dB higher as frequency decreases to DC.
1. For typical characteristics, compression level, phase detection and electronic attenuation, see "Mixer Technical Section."
2. For Quality Control procedures, see page 6.
3. For environmental specifications see page 7.
4. For High-Rel and TX description, see page 6.
5. Absolute Maximum Ratings, RF power 50 mW level 10, 200mW level 13, peak IF current 40 mA, see pg. 7.
6. For connector types and case mounting options, see case style outline drawings.
7. Prices and specifications subject to change without notice.

NOTES:

■ Denotes 75 ohm models, 75 ohm BNC connectors are standard.
● Model PSC-3-1 manufactured under license protected by patent 3,428,920.
▲ On Model ZFSC-4-2-75-1, up to 15V and 15mA DC may be passed from input to all outputs.

1. For quality control procedures, see page 6.
2. For environmental specifications see page 7.
3. Absolute Maximum Ratings;
   Matched power rating ZA3PD, ZA4PD, ZB4PD(10W.)
   all other models (1W)
   Internal load dissipation
   all 3-way models (0.375W) all 4-way models (0.25W), see page 7.
3. For connector types and case mounting options, see case style outline drawing.
4. Prices and specifications subject to change without notice.
5. All 3-way power dividers with exception of ZA3PD are licensed under U.S. Patent 3,428,920; reissued as RE 27,299.

description

These new high efficiency phase detectors are the only units in the world offering a figure-of-merit greater than 125 for only $15.95.

The figure-of-merit M or efficiency of a phase detector can be defined as the ratio of maximum DC output voltage (in mV) divided by the RF power (in dBm). The maximum DC output from these units is 1000 mV with +7 dBm applied to the LO and RF ports, and DC offset is typically 400 micro-volts. Thus, its figure-of-merit M is 143, which indicates a highly efficient phase detector. For comparison, a double-balanced mixer used as a phase detector offers 350 mV DC output with the same LO and RF inputs for a figure-of-merit M of 50.

Both the RPD-1 and MPD-1 are packaged in a hermetically-sealed EMI-shielded metal case. The miniature RPD-1 measures 0.4 x 0.8 x 0.4 in. and the micromin MPD-1 is only 0.2 x 0.5 x 0.25 in.

So when your system requires a high output phase detector, specify the new RPD or MPD series.

applications

- Radar
- ECM Systems
- Test Instruments
- Phase-lock loops

cost (5-24)

RPD-1 $15.95 MPD-1 $18.95

For PC applications, select from the low-cost, plastic-case T series (small enough to be inserted into a standard 1/3 DIP socket), or the hermetically-sealed RFI shielded TMO metal-case series (requiring less PC area than a flatpack or TO-5 can), or the plastic-case T-H series designed to handle up to 100 mA in the primary winding without appreciable saturation or change in RF characteristics.

Transformer core saturation is influenced by (1) dc current through the winding, (2) RF input power, and (3) frequency of operation. These three variables interact to affect the point at which saturation occurs, see Figs. (1) and (2). These curves show the point where distortion occurs, by visual observation, and illustrate how saturation is influenced by dc current through the winding, RF input power level and frequency of operation: See that (1) if the dc current through the winding increases, the allowable RF input power decreases and the minimum frequency of operation will increase, (2) if RF input power increases, the maximum allowable dc current through the winding will decrease and the minimum frequency of operation will increase, (3) if the frequency of operation increases, then the RF input power can be increased and the dc current through the winding can also be increased.

Now comparing the T-H series to the conventional T-series in Figs. (1) and (2), note that saturation effects are negligible with the T16-1H; so for wide dynamic range applications, specify the T-H series.

Coaxial connector models are available from 10 KHz to 500 MHz and are offered with 50 ohm and 75 ohm impedances; 75 ohm connectors are used at 75 ohm ports. The FT 1.5-1, with unbalanced input and output, is especially useful for 50 ohm to 75 ohm matching applications. The FTB series with unbalanced output and balanced input (connector ground insulated from the case) helps eliminate ground loop problems, especially when long cable runs are involved.

As shown in the data chart on the following page, models are available in five basic configurations.

These transformers may be operated as low as 12.5 ohms at the primary with essentially the same impedance matching ratio and only a slight change in frequency response.

For each RF transformer model, the minimum and maximum frequency is given for the insertion loss at the 3 dB, 2 dB and 1 dB points, as shown in Fig. (3) and listed in the data chart. For example, the T1-1 insertion loss is 1 dB from 2 to 50 MHz and 3 dB from 0.15 to 400 MHz.

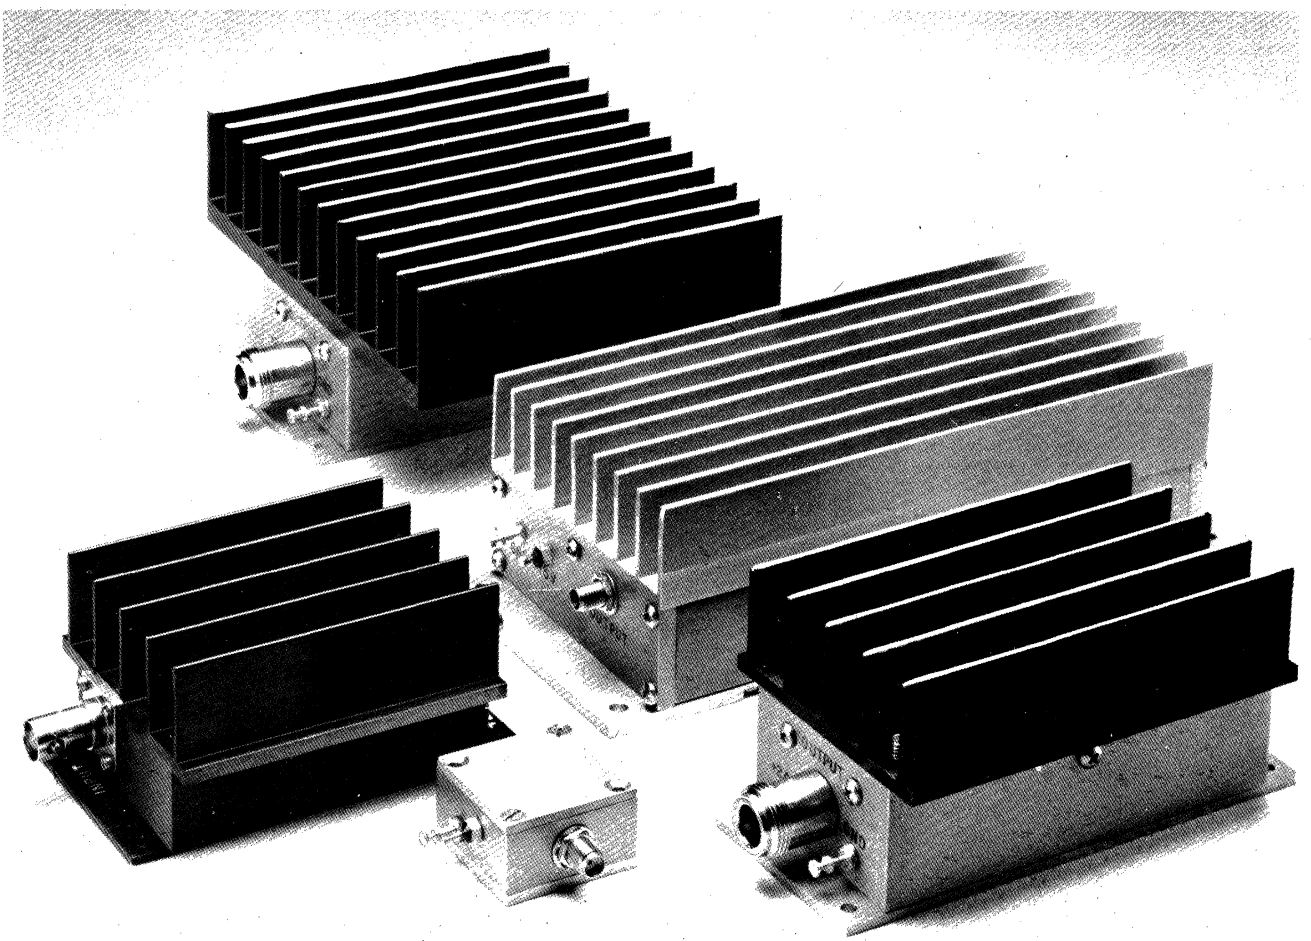
broadband linear

Power Amplifiers

up to 2 Watts (+33 dBm)

50 KHz to 4.2 GHz



Up to 1 watt linear output at 4.2 GHz, 2 watts at 800 MHz are now available at exceptionally low prices with Mini-Circuits' line of broadband amplifiers. Ultra-linear Class A design provides unconditional stability so any load impedance may be connected without concern for damage or oscilation. These amplifiers are ideally suited for TACAN, mobile radio, telemetry, anti-collision and satellite communications systems. Use these amplifiers to boost signal/sweep generator output to achieve broadband isolation, and to provide four test setups, using only one generator with a 4-way splitter...to name just a few applications.

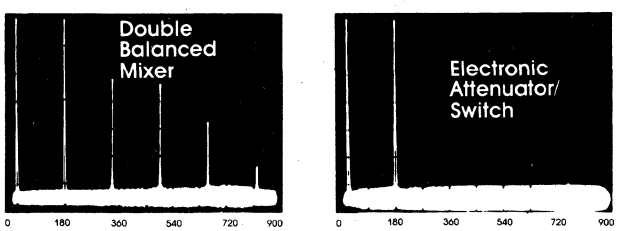
m = mid band (2f_L to f_U/2)

typical harmonic spectrum comparing attenuators

Double Balanced Mixer Vs. Electronic Attenuator



NOTES: (both pages)

1. Maximum RF input power, 1 watt. Maximum control current, 40 mA.
2. Refer to table of contents for quality control procedures, environmental specifications, absolute maximum ratings, and hi-rel testing.
3. For connector types and case mounting options, see case style outline drawings.
4. For PSW and ZMSW models
   a) VSWR 1.5 max. ("on" state)
   b) Switching speed 1μ sec. max.
   c) Maximum RF input +20 dBm
   d) Control voltage +5V (5mA max.) on condition
      0V off condition
5. Prices and specifications subject to change without notice.

*Harmonic Output below power of F2.

NOTES:
1. Maximum RF input power, 200mW.
2. Refer to table of contents for quality control procedures; environmental specifications, absolute maximum ratings, and hi-rel testing.
3. For connector types and case mounting options, see case style outline drawings.
4. Prices and specifications subject to change without notice.

pin connections

see case style outline drawing

*pins must be connected together externally

applications

- Wideband frequency multiplier chains
- Low spurious frequency multiplier chains
- FM, PM modulation chains
- Double frequency range of signal generators

*NOTES:

MATERIAL & FINISH

A1. Header material CRS; Pin material; #52 alloy.
Finish: electro tin hot-oil flowed, Cover material; cupro-nickel.

A4. Case material aluminum. Finish; iridite.

A5. Case material CRS. Finish; baked grey enamel over hot-tin dip.

A6. Case material aluminum. Finish; blue baked enamel over phosphoric etch per MIL-C-15328.

MOUNTING

B1. Mounting bracket available on request. Add suffix B to part number.

B2. Mounting bracket available on request. Add suffix B to part number. Add $1.50 to unit cost.

MARKING

C1. For port markings 1, 2, and 3 see specification data sheet.

CONNECTORS

D1. Connectors: SMA Standard. BNC on request (no charge). Male SMA on request (add $5.00 to unit cost).

D2. Connectors: please specify, unless otherwise noted; BNC is standard, TNC no charge, SMA and Type N add $5.00 per unit. (ZAPD only, Dash −4 units not available with BNC).

D3. For Type N or TNC connectors this dimension, "C"', changes from 0.75 to 0.94 inches.

D4. Isolated BNC connectors are standard, FTB models only.

D5. Connectors: BNC standard, TNC on request (no charge).

D6. Connectors: Female SMA only. Male SMA available on request, consult factory.

D7. Connectors: BNC only.

D8. Connectors: BNC standard, TNC on request (add $10.00 to unit cost), Female SMA on request (add $15.00 to unit cost).

D9. Male BNC, Male N available:
(add $2.00 to unit price. Specify ports for Male connectors).

*NOTES:

MATERIAL & FINISH

A1. Header material CRS; Pin material; #52 alloy.
Finish: electro tin hot-oil flowed, Cover material; cupro-nickel.

A2. Case material CRS; Pin material; #52 alloy; Covers stainless steel.
Finish; gold flash per MIL-G-45204.

A3. Case material plastic. Pin material; iron-nickel alloy.
Finish; bright tin-plate per MIL-T-10727.

A4. Case material aluminum. Finish; iridite.

A5. Case material CRS. Finish; baked grey enamel over hot-tin dip.

A7. Case material aluminum. Finish; black enamel. Heat Sink; black anodize.

A8. Case material aluminum. Finish; iridite. Heat sink; black anodize.

A9. Case material brass. Finish; nickel plate.

MOUNTING

B1. Mounting bracket available on request. Add suffix B to part number.

MARKING

C1. For port markings 1, 2, and 3 see specification data sheet.

C2. Consecutive marking, n = no. of way power splitter.

CONNECTORS

D6. Connectors: Female SMA only. Male SMA available on request, consult factory.

D9. Connectors: BNC standard, TNC on request (add $10.00 to unit cost), Female SMA on request (add $25.00 to unit cost).

D10. Connectors: BNC standard, TNC on request (add $20.00 to unit cost), SMA on request (add $45.00 to unit cost).

D11. Connectors: BNC standard, TNC on request (add $35.00 to unit cost), SMA on request (add $65.00 to unit cost).

D12. Connectors: BNC standard, TNC on request (add $15.00 to unit cost), SMA on request (add $35.00 to unit cost).

D14. Connectors: Please specify: Type N or SMA

D15. Connectors: male BNC, female BNC standard. Other combinations with SMA available on request (add $2.00 to unit cost).

D16. Connectors: male SMA, Female SMA only.

D17. Connectors: male N, female N standard. Combinations with BNC, SMA, TNC available on request (add $3.00 to unit cost).

D18. Connectors: male TNC, Female TNC only.

D20. Connectors: please specify, unless otherwise noted. BNC is standard, TNC, SMA or Type N (add $10.00 to unit cost).

We Guarantee Quality

Many manufacturers talk about quality rarely defining specific terms or numbers.

Mini-Circuits guarantees quality . . . clearly defined. Some manufacturers are content, and even boast, of their 1.0% Acceptable Quality Level (AQL). But a 1.0% AQL means it is o.k. to pass a 1,000 lot size even if 3 rejects are found in a sample lot of 125 units. Mini-Circuits considers 1.0% AQL dangerously inadequate for today's systems designers. Just one defective mixer or coupler appearing at the final test of a system can cause extensive delays and excess costs.

So we at Mini-Circuits guarantee our customers 0.1% AQL; no rejects ... not even one ... on every order shipped. If you encounter one failure, repack the entire lot and ship it back to us, collect. We will 100% retest every unit and return the entire order promply, postage prepaid.

It could cost us a lot of money. But we are not worried. We ship millions of RF signal-processing components, for thousands of military programs in the U.S. and over 20 foreign countries, to tight quality-control specs.

We have utmost confidence in our automated assembly system, our practice of 100% screening each diode, microscopic inspection of all solder connections, screening (burn-in, thermal shock, and gross/fine leak tests), complete encapsulation for shock and vibration, and thorough testing of each completed unit.

We encourage you to add a 0.1% AQL on all of your specs, drawings and purchase orders. You are entitled to such quality. Mini-Circuits will meet the 0.1% AQL spec now. And we will continue our quest to even further improve quality.

finding new ways ...
setting higher standards

CUSTOM INTEGRATED COMPONENT SUBASSEMBLIES*

North Hills

North Hills' custom-engineered, integrated-component subassemblies are used by many microwave systems manufacturers to provide a compact, high-performance alternative to circuits fabricated from discrete components. The benefits of our custom engineering and fabrication approach include:

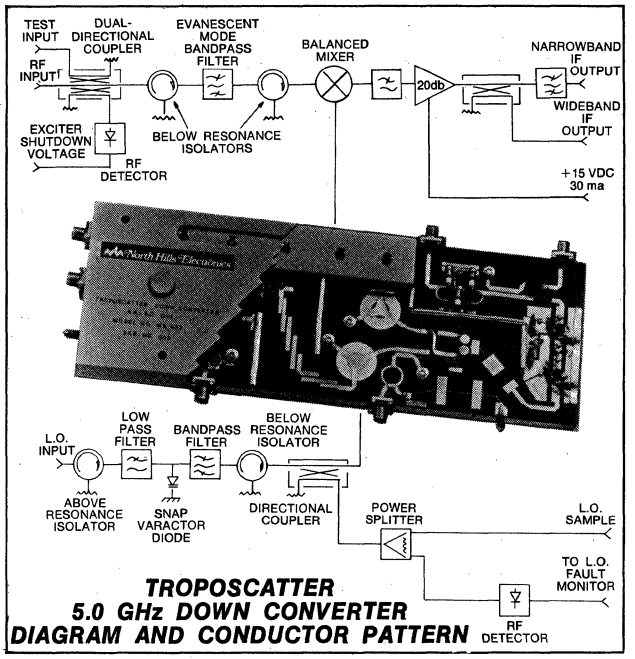
TECHNICAL BENEFITS

- Better electrical performance by eliminating mechanical component interconnections
- Reduced sensitivity to environmental extremes
- Reduced mechanical complexity, size and weight since there are no cables, connectors or support brackets for separate components
- A large choice of transmission line configurations yields optimal performance of each component element
- Improved reliability (better MTBF)

ECONOMIC BENEFITS

- Lower cost-per-unit
  Our cost will usually be lower than the aggregated cost of discrete components.
- Lower down time (reduced MTTR)
  Testing is quick and easy because there is only one suspect unit — one item to replace.
- Easier vendor communication
  You have only one company to contact for after-the-sale support.
- THREE YEAR WARRANTY ON ALL MICROWAVE PRODUCTS!

* DEFINITION: Custom-engineered, integrated-component microwave subassemblies are "supercomponents" such as receiver front ends, which are designed and fabricated as a single unit, permitting optimization of electrical performance within stringent size, weight and environmental restrictions.



TROPOSCATTER 5.0 GHz DOWN CONVERTER DIAGRAM AND CONDUCTOR PATTERN

THIS MICROWAVE DOWNCONVERTER IS JUST ONE EXAMPLE OF OUR CUSTOM INTEGRATED-COMPONENT SUBASSEMBLIES:

Downconverters • Multicouplers • Low-Noise Amplifiers • Phase Detectors
Mixer-Preamplifiers • Receiver Front Ends • RF Switch Matrices • Upconverters
RF Amplifiers • Filters • Antenna Systems • Power Dividers

STANDARD MICROWAVE COMPONENTS

North Hills

LAMINATED BANDPASS FILTERS ENCAPSULATED CONFIGURATION

SERIES FL-1000CE

FEATURES

- Rugged
- Highly stable over environmental extremes
- Inexpensive
- Readily available in both standard and custom passbands

The series FL-1000CE bandpass stripline filters are connectorized, encapsulated devices consisting of photo-etched conductor patterns thermally laminated within a low loss, dimensionally stable dielectric medium. They are particularly attractive for use in equipment that operates under extreme temperature, humidity, shock and vibration stresses. These units are small size, lightweight, have moderately low insertion loss, and are virtually immune to long-term electrical performance degradations.

TYPICAL PERFORMANCE

Model No.	No. of Sections	Passband (MHz)	Loss @ fo (dB)	Rejection From fo
FL-1832CE	3	860-900	0.95	34 dB @ ±140 MHz
FL-1608CE	8	2840-3300	1.05	66 dB @ ±630 MHz
FL-1691CE	5	3540-4300	0.80	32 dB @ ±880 MHz
FL-1868CE	5	4275-4980	0.35	29 dB @ ±749 MHz
FL-1713CE	8	5910-6480	1.60	65 dB @ ±850 MHz
FL-1582CE	7	6455-7140	1.20	68 dB @ ±1065 MHz
FL-1496CE	6	7425-8085	1.30	55 dB @ ±1250 MHz
FL-1541CE	7	8300-9050	1.50	69 dB @ ±1075 MHz
FL-1656CE	7	10000-10650	1.90	68 dB @ ±1250 MHz
FL-1263CE	6	10000-11680	1.85	72 dB @ ±1540 MHz
FL-1724CE	6	12120-12640	2.10	67 dB @ ±1300 MHz

SPECIFICATIONS

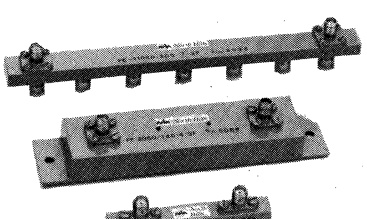
2 to 15
Nominal impedance level:
50 ohms input and output
VSWR at F_o:
1.35:1 typically
Connectors:
Type SMA

MINIATURE GHz BP FILTERS

SERIES FE-

The series FE- Bandpass Filters are of the Evanescent TE Mode type. Because this filter is realized in channel structures operating below cutoff, high "Q" low-loss filters can be obtained. These filters are less complex and usually smaller in size than other filters of similar electrical characteristics; e.g., combline, interdigital or waveguide.

These filters can be provided with either Chebyshev or Butterworth characteristics. Typically, 2 to 15 sections offer passbands of 2 to 24 percent.



Some examples of the Series FE-

See our Wideband POWER DIVIDER/COMBINER, HYBRID TRANSFORMER and TERMINATION advertisement in SECTION 5600.

*Specify center frequency when ordering. Model designation will be completed by TRAK.

NOTE: Circulators are also available.

µicropuck® Circulators & Isolators

The Micropuck™ family of circulators and isolators was designed to maximize the use of isolators and circulators in stripline and microstrip applications. They are easy-to-mount devices with magnetic shielding which prevents detuning or changes in performance when operating in magnetic fields or in close proximity to ferrous metals. The round design and tab lead configuration allow installation at a reduced cost, replacing milling operations with a simple drilled hole.

The Micropuck™ isolator is also available in a flange mount similar to the mounting used on some power transistors. This construction has input and output tabs located 180° from each other as opposed to the 120° separation of the round version. This provides an alternative choice for system designers who prefer the screw-down mounting and can allow the extra space it requires.

Specifications for these microminiature ferrite devices are as good as you'll find anywhere. Look at the data and call our ferrite sales group or local representative.

* Mil. Spec.

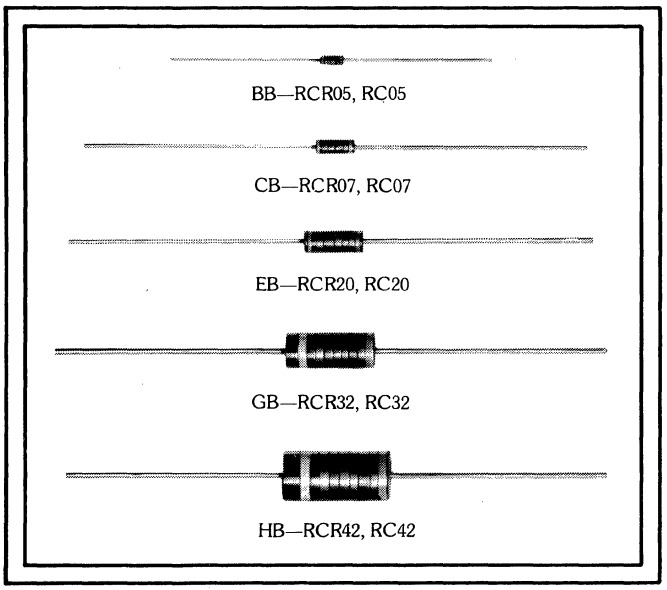
Types BB, CB, EB, GB, HB, GM, HM Hot-Molded Fixed Resistors



Allen-Bradley hot-molded composition resistors are high quality units intended for general purpose use in the electronics industry.

Allen-Bradley Style RCR resistors not only meet all requirements of MIL-R-39008 but also exceed the S level (best level) of Established Reliability of 0.001% failure rate per 1000 hours. And only Allen-Bradley resistors are available in S level reliability in all five wattage sizes over the entire resistance range. The S reliability level is indicated by a yellow 5th color band on the resistor body.

Metal-clad hot-molded resistors (Types GM and HM) are fitted with metal clamps which surround the major portion of the resistor. The metal clamps provide rigid mounting and efficient heat transfer from the resistors to the metal chassis or panels on which they are mounted.

For more information request Publication EC5021-2.1.

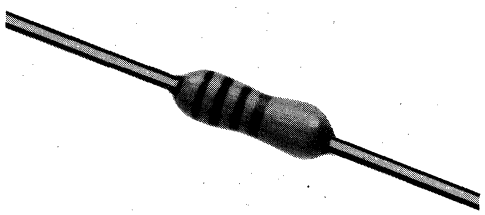
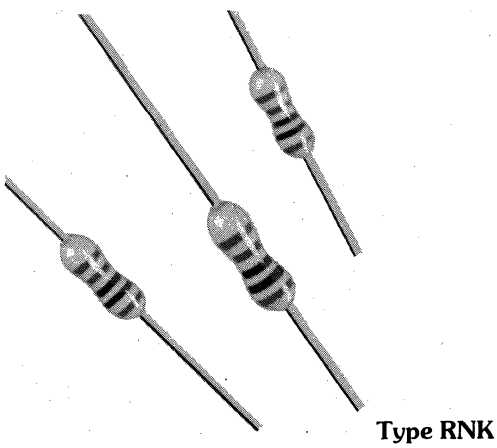
ALLEN-BRADLEY

El Paso, Texas 79935

Types RN, RNK
Metal Film Fixed Resistors



Type RN



Type RNK

1/4 Watt at 70° C
10 Ohms to 1 Megohm
±1% Tolerance, ±5% Tolerance
±100 PPM/° C, ±200 PPM/° C

FEATURES

- Highly Stable Metal Film
- Tight TCR
- Laser Trimmed Element
- High Quality Performance
- Standard Tape Reel Packaging
- Box Packaging
- Automatically Insertable

Allen-Bradley metal film resistors are high quality units intended for general purpose use in the electronics industry.

Nichrome resistance element provides stable performance under load, in various environments, and on the shelf. Type RN performance characteristics are better than MIL-R-22684 (RL07) requirements. Type RNK performance characteristics are better than MIL-R-10509 (RN55D) requirements.

For more information request Publication EC5030-2.1 (Type RN) or Publication EC5032-2.1 (Type RNK).

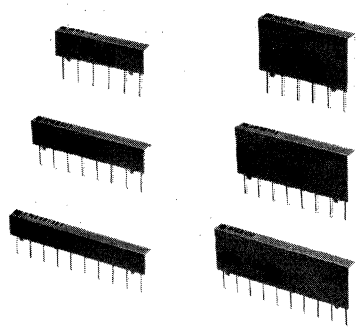
ALLEN-BRADLEY

El Paso, Texas 79935



I-SIP
Single In-Line Package

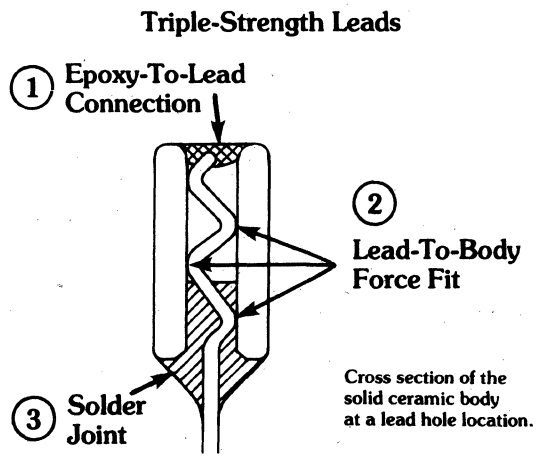
Series 100 400 Cermet Resistor Networks

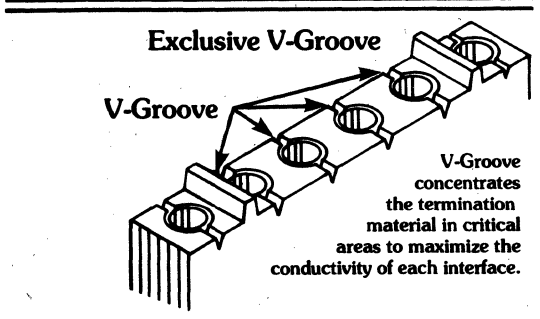
FEATURES

- Solid Ceramic Body, with V-Groove
- Triple-Strength Leads
- 0.100 Inch (2,54mm) Lead Spacing
- Two Package Heights: 0.190 Inch (4,83mm), 0.350 Inch (8,89mm)
- 6, 8 and 10 Pins
- Automatically Insertable
- Permanent Laser Marking
- Part Markings — Side and Top

For more information request Publication EC5420-2.1

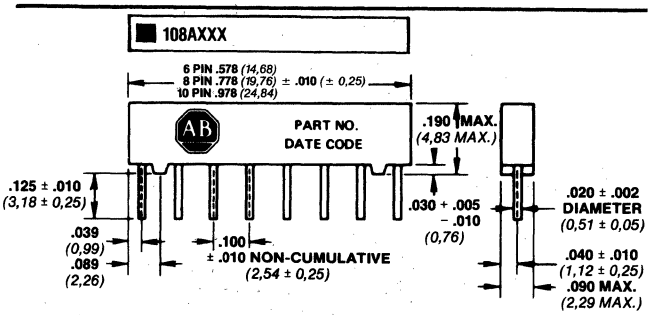
Tough new package



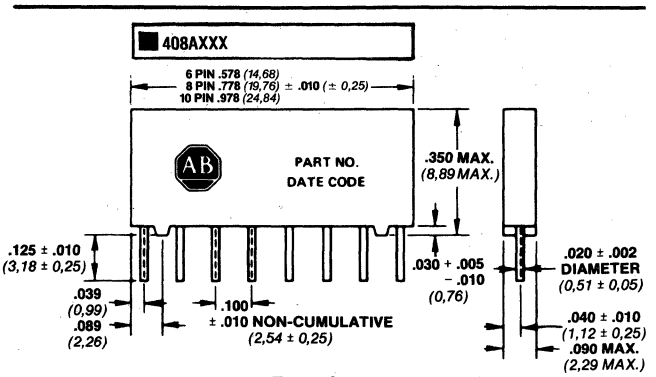


DIMENSIONS

Low profile 100 series



High profile 400 series



Basic dimensions in inches.
Dimensions shown in parentheses are in millimeters.

TOLERANCES
Dimensional Tolerance ±.005 (0,13)
Angular Tolerance ±5° Except as Specified.

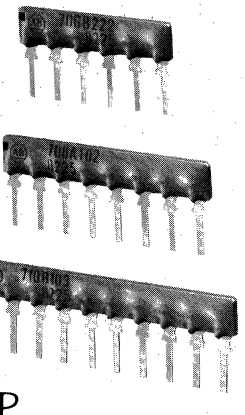
NOT TO SCALE

Applications

- Pull-up and pull-down arrays
- Transmission line terminators
- Current limiting resistors
- ECL terminating networks
- A wide array of custom designs

ALLEN-BRADLEY

Greensboro, North Carolina 27405

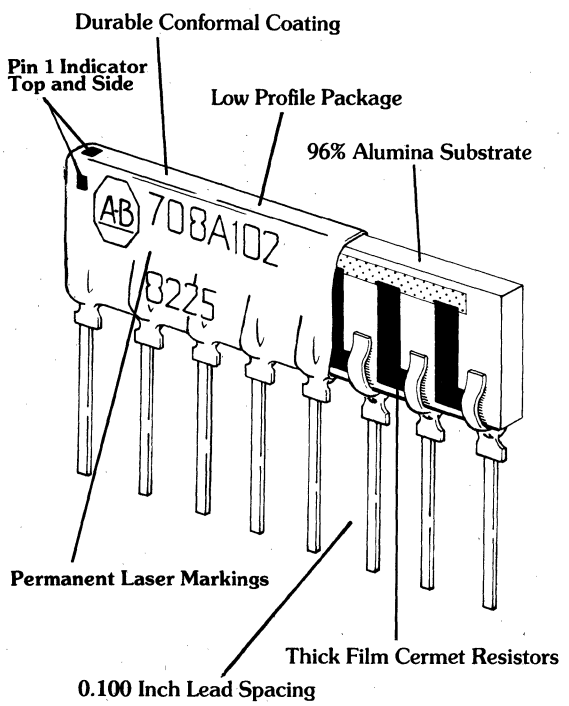


C-SIP
Single In-Line Package

Series 700 Conformal Coated Cermet Resistor Networks

FEATURES

- 96% Alumina Substrate
- Permanently Laser Marked, Top and Side
- 0.100 Inch (2,54mm) Lead Spacing
- Low Package Height
  0.190 Inch (4,83mm)
- 6, 8 and 10 Pins
- Durable Conformal Coating
- Standard Circuits
- High Quality



For more information request Publication EC5440-2.1

Precision Thin Film Custom Resistor Networks

FEATURES

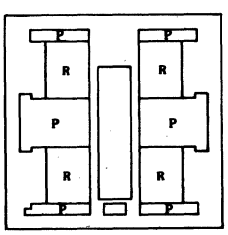
- 1K Ohms to 10 Megohms
- ± 0.015% Tolerance
- ± 0.015% Ratio
- ± 25 ppm/°C TCR
- ± 5 ppm/°C TCR Tracking
- SIP Package (ceramic)
- DIP Packages (molded and ceramic)
- Chip Resistor Networks (alumina or glass)
- Hybrid Network Substrates (alumina or glass)

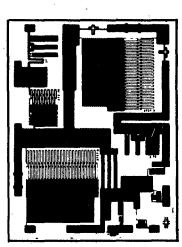
For more information request Publication EC5510-2.1.

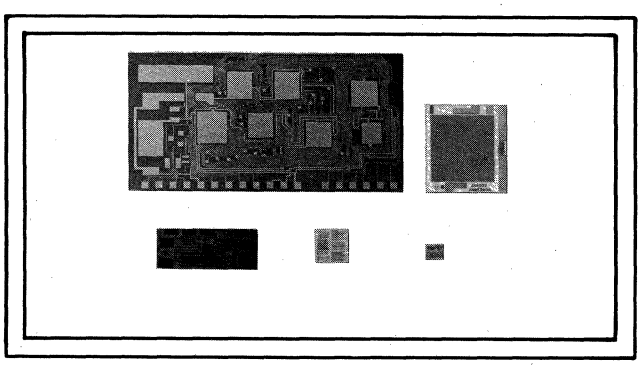
Applications

These precision networks are ideally suited for use on any electronic equipment requiring close tolerances and/or low temperature coefficient resistors. Some of these applications are listed below.

— Ladder networks
— Digital multimeters
— Current summing applications
— Precision attenuators
— A/D and D/A converters
— Communication equipment
— Precision voltage dividers
— Telemetry equipment
— Coding and decoding circuitry
— Measurement bridges
— Paging systems







Hybrid network substrates — Allen-Bradley hybrid network substrates contain resistors, bonding pads and interconnections used in producing hybrid networks. Allen-Bradley does not manufacture complete hybrid circuits, but does manufacture the basic hybrid network substrates.

Termination and bonding pad material — Gold, with a minimum thickness of 5000A, is used for all termination pads, bonding pads and interconnections. This material is compatible with ultrasonic and thermocompression bonding methods for attaching gold or aluminum wire, integrated circuit dice, LID's or beam leaded IC's. Chip capacitors can be attached by reflow solder methods.

Substrate material — Glass: Corning 7059 glass (Barium Alumino Silicate - electrically inert [Alkali-free]) .032 ± .005 inch (0,81 ± 0,13mm) thick. Ceramic: 99.5% Alumina, .010 ± .001 inch (2,54 ± 0,3mm) thick.

User trimmable option — Chip and hybrid network resistors can be trimmed to tolerance by Allen-Bradley or, if needed, resistors can be

ALLEN-BRADLEY
Greensboro, North Carolina 27405

designed for active trimming by the user during final hybrid assembly operations to meet predetermined functional requirements. The amount of adjustment available is dependent on the initial resistance value, resolution, final value and available substrate area. The active trimming results in a positive resistance change only and can be done by mechanical methods or a laser. These networks are referred to as user trimmable resistor networks.

Standard substrate sizes (in inches) —

.150 x .150	.350 x .150	.200 x .200	.600 x .200
.250 x .150	.450 x .150	.400 x .200	.250 x .250

Bonding pad sizes — 5 mils x 5 mils minimum.

Resistance range — 1K ohms to 10 megohms.

Tolerances — Absolute: as low as ± 0.015% at + 25°C. Ratio: as low as ± 0.015% at + 25°C.

TCR — ± 25 ppm/°C
TCRT — ± 5 ppm/°C

Temperature ranges of operation — −55°C to +125°C or 0°C to +70°C. Other ranges available.

Power rating — Up to 50mw per resistor.

Series 800 SARA Surface Attachable Resistor Arrays

125mW at 70°C
10 Ohms to 10 Megohms
± 2% Tolerance
± 200 ppm/°C TCR
± 100 ppm/°C TCR Tracking

FEATURES

- Alumina Substrate
- Thick Film Resistor Element
- Environmental Protection Layer
- Surface Mount
- Standard and Custom Circuitry
- User Trimmable
- Standard and Custom Substrate
- Footprints Compatible with DIP and SOIC

For more information request Publication EC5450-2.1.

Outstanding characteristics

Surface mountable — Solder bumped termination pads allow surface mount to alumina, glass epoxy PWB's or porcelainized metal. Compatible with automatic placement equipment.

Proven technology — Thick film resistance elements on 96% minimum alumina substrate. Over 20 years of technological and manufacturing experience.

Precision performance — Tight performance characteristics provided by the thick film resistance material resulting in tight tolerance and tight TCR.

Cost effective — Enables size and weight reduction with lower assembly cost.

Electrical specifications

Nominal resistance range — 10 Ohms to 10 Megohms

Resistor tolerance — Absolute ± 2% Standard
± 1% Available
Ratio ± 1% Standard
±.5% Available

Temperature coefficient of resistance (TCR) — ± 200 ppm/°C Standard
± 100 ppm/°C Available

TCR tracking — ± 100 ppm/°C Standard
± 50 ppm/°C Available

Power dissipation rating individual resistors — 125mW at 70°C

Temperature range of operation —

Industrial	0° to 70°C
Automotive	-40°C to 85°C
Military	-55°C to 125°C

Package power [1] ratings —

SARA Footprint	Package Power on Glass Epoxy PWB to 70°C
8 pin SOIC	.25W
14 pin SOIC	.40W
16 pin SOIC	.50W
8 pin DIP	.30W
14 pin DIP	.50W
16 pin DIP	.60W

(Ratings apply to devices meeting standard DIP and SOIC footprints.)

[1] At 70°C power derates linearly from full rated power to 0 wattage at +125°C.

Rated continuous working voltage (RCWV) — Based on nominal resistance (R) in ohms is individual Resistor $\sqrt{\text{Power Rating} \times R}$ or 100 volts, whichever is less.

Temperature range of storage — -65°C to 150°C.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

High Performance Film Resistors

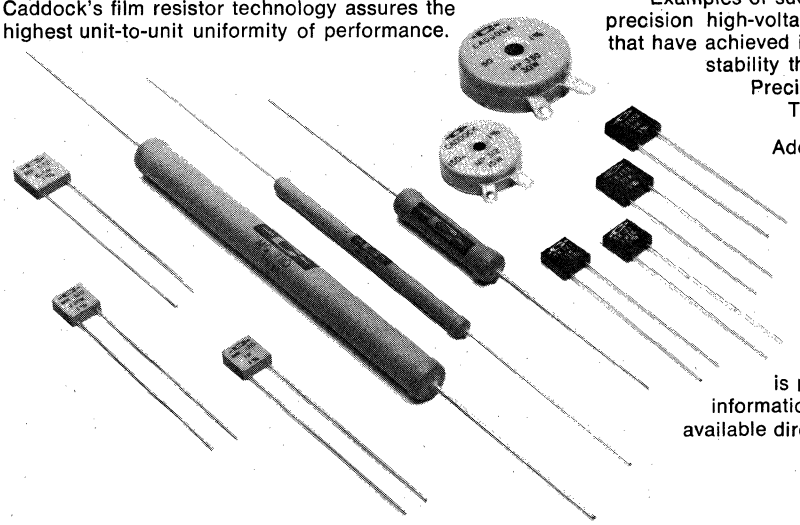
This 20th Edition of the Caddock Electronics General Catalog describes over 150 in-production models of precision discrete resistors and resistors networks that utilize Caddock's high-stability, extended-life Micronox® and Tetrinox™ resistance films. With 20 years of experience and an exceptional record of in-circuit performance and reliability, Caddock Electronics continues to lead the industry in the development, production and on-time delivery of high performance film resistors.

Caddock's Advanced Resistor Technology Provides Many Exceptional Performance Advantages:

Caddock's advanced resistor technology began in 1962 with the introduction of Micronox® harsh-environment high-power and high-voltage resistors. The Caddock technology was further extended in 1975 with the development of the Tetrinox™ resistance system that made possible the introduction of low TC, ultra-stable resistors and resistor networks.

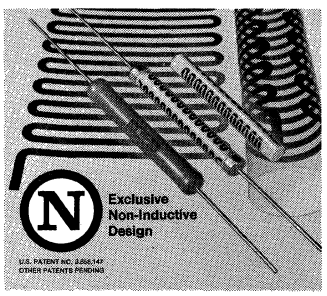
These technological advances have provided the electronics industry with a selection of precision resistor types that achieve many high-performance advantages:

- **Precision** — Tolerances as close as 0.01%.
- **Long-Term Stability** — Better than 0.005% per 1000 hours of operation under full load operating conditions.
- **Higher Power Ratings** — Up to five times higher than other resistor technologies.
- **High Operating Temperatures** — Up to +275°C.
- **Ultra-Low Temperature Coefficients** — Standard to less than 10 PPM/°C and custom values as low as 2 PPM/°C.
- **Unit-to-Unit Uniformity** — The inherent consistency of Caddock's film resistor technology assures the highest unit-to-unit uniformity of performance.



Caddock's Exclusive Non-Inductive Performance Is Available in Both High-Power and High-Voltage Micronox® Film Resistors.

For wide-band, high frequency applications, the advantages of Caddock's Exclusive Non-Inductive Design are available in most models of Micronox® resistors. This special serpentine pattern provides for neighboring lines to carry currents in opposite directions, thereby achieving maximum cancellation of flux fields over the entire length of the resistor.



The result is a truly non-inductive resistor that is about as inductive as a straight piece of wire the length of the resistor body. This efficient design means faster settling times and minimum distortion in all types of high frequency circuits.

The High-Performance Capabilities of Caddock Film Resistors Can Provide Improved Accuracy and Stability to Precision Circuitry:

Because of the special advantages of Caddock's resistance film technology, Caddock High Performance Film Resistors are often specified in the precision circuits that ultimately establish the overall accuracy and stability of the equipment.

Examples of such applications include many types of precision high-voltage supplies and voltage references that have achieved improved accuracy and extended-life stability through the use of Caddock Type MG Precision High-Voltage Resistors and Type T912 Precision Resistor Networks.

Additional examples of the application of this advanced resistor technology include the industry-wide use of Caddock Type 1776 and Type 1787 Precision Decade Divider Resistors in the signal input circuits of laboratory and bench-type digital voltage and current measuring instruments.

An introduction and index to these Caddock resistor technologies is provided on the next page. Additional information and technical assistance is also available directly from our technical staff.

We welcome your call.

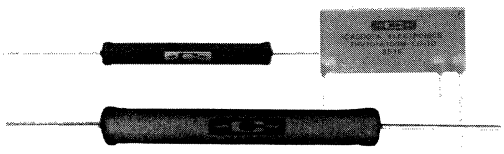
Index to Caddock High Performance Film Resistors

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Precision High Voltage Resistors and High Voltage Divider Networks

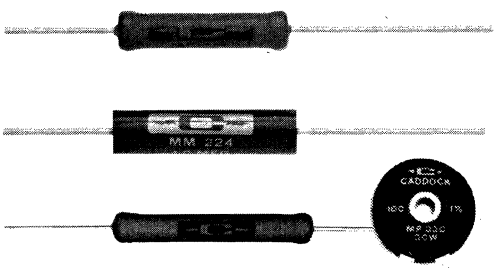


Type MG Precision High Volage Resistors
Tolerances of 1.0% to 0.1%, TC of 80 PPM/°C — Pages C3 and C4

Type TG Precision Low TC High Voltage Resistors
TC of 25 PPM/°C from -55°C to +125°C — Page C5

Type THV Precision High Voltage Divider Networks
Ratio TC to 10 PPM/°C, Ratio Tolerances to 0.25% — Page C6

Power Film and Precision Film Resistors



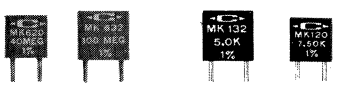
Type MS and MR Power Film Resistors
Operating Temp. to +275°C, Power Ratings to 15 Watts — Pages C7 and C8

Type MM and ML Precision Film Resistors
High Temperature Resistors for Geophysical, Aerospace and Industrial Requirements. — Page C9

Type MV Low Resistance Power Film Resistors
Values from 1 ohm to 50 ohms, Power to 10 Watts, Operating Temp. to +275°C and Non-Inductive Design — Page C10

Type MP Chassis Mounted Power Film Resistors
15 Watt and 30 Watt Rating with Center Screw Chassis Mounting — Page C23

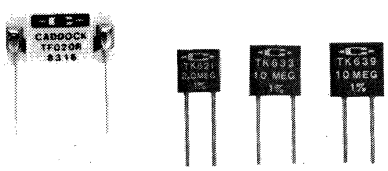
Power Radial Lead and Extended Resistance Range Radial Lead Resistors



Type MK 132 and MK 120 Precision Film Resistors
3/4 Watt Rating at +125°C, 10 Ohms to 5 Meg. — Pages C11 and C12

Type MK632 and MK620 Extended Resistance Range
Resistance Range from 2 Meg. to 100 Meg. — Pages C11 and C12

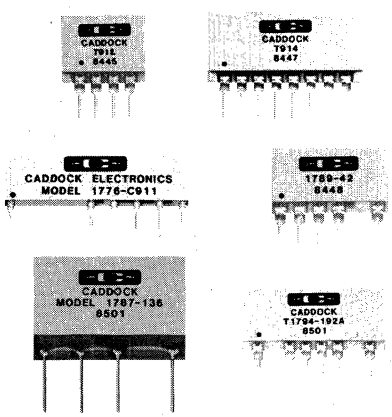
Low Temperature Coefficient Precision and Ultra-Precision Film Resistors



Type TK Temp-Stable Precision Film Resistors
Resistance Range of 1 kohm to 10 Megohms, TC of 10 PPM/°C, Operating Temp. from -55°C to +125°C, Tolerances to 0.05% — Pages C13 and C14

Type TF Low TC Ultra-Precision Film Resistors
Resistance Range from 1 kohm to 125 Megohms, TC to 5 PPM/°C, Tolerances to 0.01% — Page C15

Precision and Ultra-Precision Standard Networks and Custom Resistor Networks



Type T912 and T914 Precision and Ultra-Precision Networks
2 Resistor and 4 Resistor Networks with Matched Characteristics, Ratio Tolerances to 0.01%, Ratio TC to 2 PPM/°C — Page C16

Type 1776 Precision Decade Resistor Voltage Dividers
Input Voltage Dividers for Digital Multimeters and other Range-Switching Circuits, 32 Models — Pages C17 and C18

Type 1787 Precision Current Shunt Resistor Networks
2-, 3-, and 4-step Current Shunt Networks for Current Sensing in Multi-Range Instrumentation — Pages C19 and C20

Type 1794 Custom Low TC Precision SIP Resistors Networks
Ratio TC to 5PPM/°C, Ratio Tolerance to 0.025%, Resistance Range from 500 ohm to 50 Meg. — Page C21

Type 1789 Custom Precision SIP Resistors Networks
Ratio TC to 15PPM/°C, Ratio Tolerance to 0.05%, 6 Resistance Ranges from 1 ohm to 10 Kohm — Page C22

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Type MG Precision High-Voltage Resistors

Highest Long-Term Stability Combined with Precision Tolerances and TC of 80 PPM/°C.

Caddock's Micronox® resistance films are the source of the Type MG Precision High Voltage Resistors' outstanding combination of performance features:

- Single-resistor values as high as 2000 Megohms.
- Maximum continuous operating voltages as high as 30,000 volts.
- Overvoltage capabilities of 150% of the standard working voltages for all models and values.
- Resistance Tolerances from ± 1.0% to ± 0.1%.
- Standard temperature coefficient of 80 PPM/°C in combination with resistance tolerances as tight as ±0.1%.

- plus

- Typical extended life stability of 0.02% per 1000 hours as demonstrated by reliability testing.

This exceptional performance has been proven through many years of use in equipment that demands the highest reliability and stability, including TWT amplifiers, X-ray systems, geophysical instruments and medical electronics.

Special High-Voltage Pulse Performance

All power ratings and maximum working voltage ratings are for continuous duty. These ratings are based on pre-stress voltage levels applied during the manufacturing process to provide for stable resistor performance even under momentary overload conditions.

Maximum working voltages up to 60% higher than the values listed in the table can be achieved through special factory conditioning, provided the power ratings are not exceeded. To specify maximum working voltages above the values listed in the table, add a "-15" to the model number (Example: MG750-15) and identify the overvoltage value with the initial order. (Note that the standard overload and overvoltage ratings do not apply to the "-15" resistors.)

Non-Inductive Performance

Caddock's patented Exclusive Non-Inductive Design uses a serpentine resistive pattern that provides for neighboring lines to carry currents in opposite directions, thereby achieving maximum cancellation of flux fields over the entire length of the resistor. This efficient non-inductive construction is accomplished without derating of any performance advantages.

Most models are available with Caddock's Patented Non-Inductive Design. To specify this performance, add an "N" to the standard model number. (Example: MG750N)

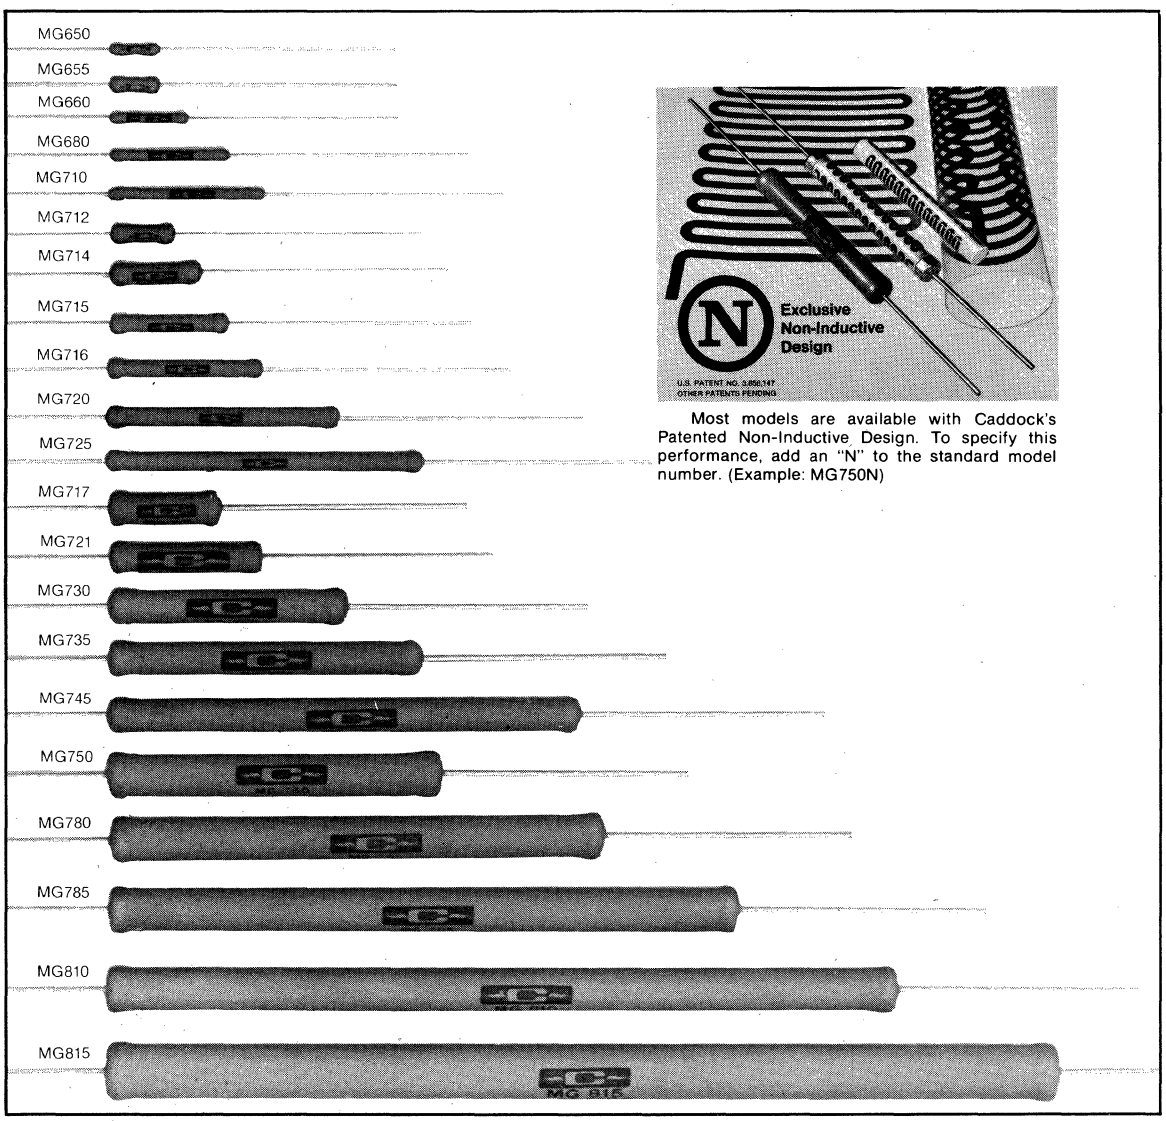
Type MG Precision High-Voltage Resistors

CADDOCK
HIGH PERFORMANCE FILM RESISTORS



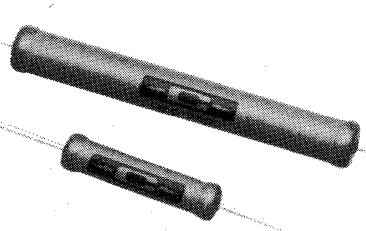
Most models are available with Caddock's Patented Non-Inductive Design. To specify this performance, add an "N" to the standard model number. (Example: MG750N)

Matched Type MG Resistor Sets with Tight Ratio Tolerances and Ratio TC Tracking.

The temperature coefficients of Caddock Micronox® resistance films can be controlled to provide matched sets of Type MG resistors with tight ratio TC from -55° C to +105° C.

For high voltage divider applications, ±2% ratio tolerance and 25 PPM/° C ratio tracking is available.

For low voltage, high resistance applications - such as electrometer circuits or high-gain amplifiers - ±0.1% ratio tolerance and 10 PPM/° C ratio tracking is available.



CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Type TG Precision Low TC High Voltage Resistors

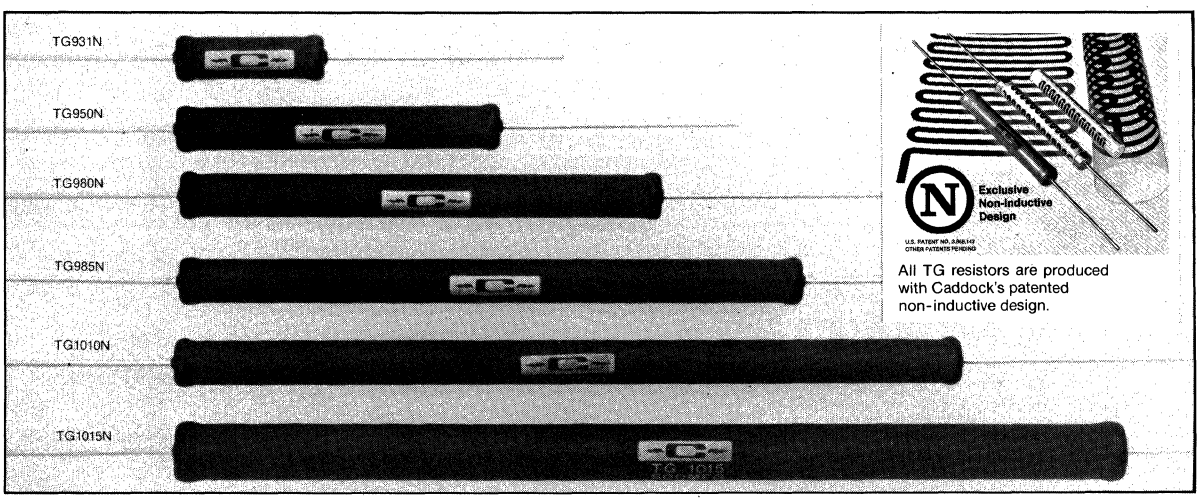
TC of 25 PPM/°C from −55°C to +125°C, Resistance Range from 1 Meg to 600 Meg.

To meet the precise temperature stability requirements of high accuracy high voltage systems, Caddock introduces the Type TG Precision Low TC High Voltage Resistors. These axial-lead precision high voltage resistors utilize our proven Tetrinox® resistance system to achieve this unique combination of low temperature coefficient with high stability performance at high operating voltages.

The Type TG Precision High Voltage resistors are designed to meet the demanding stability requirements of advanced TWT power supplies, electron microscopes, X-ray systems, high resolution CRT displays, and geophysical instruments.

The features of the TG Precision High Voltage Resistors are:

- Temperature Coefficient: 25PPM/°C from -55°C to +125°C.
- Resistance Tolerance: From ±1.0% to ±0.1%.
- Resistance Range: From 1 Megohm to 600 Megohms.
- Maximum Continuous Operating Temperature of +225°C.
- Loadlife Stability of 0.25% per 1000 hours.
- The low temperature coefficient minimizes the self-heating drift due to power dissipation warm-up.



All TG resistors are produced with Caddock's patented non-inductive design.

Model No.	Wattage	Max. Continuous Oper. Volt	Oper. Temp. (Max.)	Dielect. Str'gth	TC ppm/°C	Resistance Min.	Resistance Max.	Dimensions A	B	C

Combine Type TG and Type TK Resistors for Low Ratio TC Tracking Performance.

The low TC Type TG Precision High Voltage Resistor can be used in combination with the low TC of the Type TK Temp-Stable Precision Resistors to achieve 30 PPM/°C Ratio TC without special matching.

The low temperature coefficient for both the Type TG and TK Resistors will also minimize ratio drift due to power dissipation warm-up.

Type THV Precision High Voltage Divider Networks

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

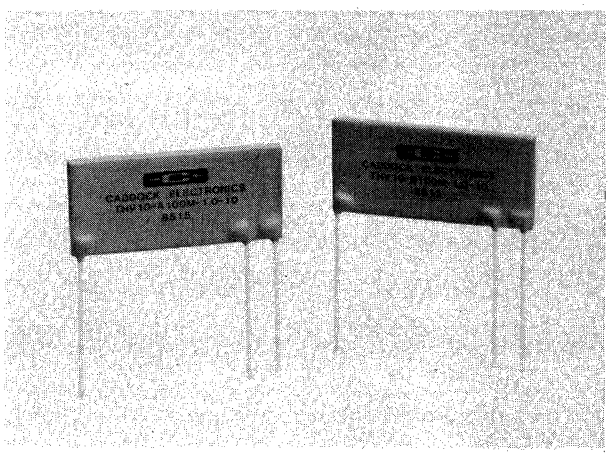
Ratio TC to 10 PPM/°C, Ratio Tolerance to 0.25%, Operating Voltage of 10KV

Type THV Precision High Voltage Divider Networks utilize Caddock's Tetrinox® resistance films to achieve the tight ratio temperature coefficients, ratio tolerance and ratio stability which is required by high performance TWT power supplies, X-ray systems, radar systems, analytical equipment and high resolution CRT displays.

Features of the THV Precision High Voltage Divider Network are:

- **Ratio Temperature Coefficient:** 10 PPM/°C or 25 PPM/°C
- **Ratio Tolerance:** 0.25%, 0.5%, 1.0% and 2.0%.
- **Operating Voltage:** 10 KVDC at 125°C.
- **Standard Voltage Division of 1000:1 or 100:1 with custom ratios available.**
- **Standard Input Resistance of 100Meg with custom resistances available**

For complete information on quantity price, and delivery call our main offices in Riverside, California.



Standard THV 10 Precision High Voltage Divider Networks

Ordering Information

THV10 - A 100M - 1.0 - 10

Model No.

Ratio Code Letter:

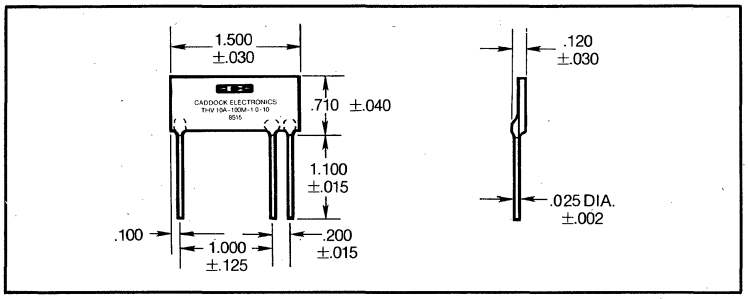
A - 100:1 Voltage Division
R_1 = 99.9 Meg
R_2 = 100K

B - 100:1 Voltage Division
R_1 = 99 Meg
R_2 = 1 Meg

Total Resistance Value of the Divider:
Standard Total Resistance of Model THV 10 is 100 Meg.

Standard Ratio Tolerance:
-2.0 = 2.0%
-1.0 = 1.0%
-0.5 = 0.5%
-0.25 = 0.25%

Ratio Temperature Coefficient:
(55°C to +125°C)
-25 = 25 PPM/°C
-10 = 10 PPM/°C

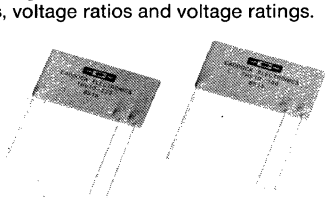


Custom Type THV Precision High Voltage Divider Networks

Custom Type THV Precision High Voltage Divider Networks can be produced with a broad range of resistance values, voltage ratios and voltage ratings.

Custom ratio tolerances and ratio temperature coefficients can also be produced.

Contact Caddock's Applications Engineering Group about your high voltage divider requirement.



Specifications

Ratio Tolerance: See ordering information per sample.

Absolute Tolerance: 1.0% for all resistors.

Ratio Temperature Coefficient: See ordering information.

Absolute Temperature Coefficient: 30 PPM/°C. Referenced to 25°C, ΔR taken at -55°C and +125°C.

Voltage Rating: 10 KVDC or RMS AC applied to R_1 and R_2 in series.

Load Life: Ratio change with 10 KVDC applied to the divider for 1000 Hrs at +125°C, 0.4% max.

Overvoltage: 1.5 times maximum continuous operating voltage for 5 seconds, ratio change 0.5% max.

Thermal Shock: Mil-Std-202 Method 107, Cond. B, ratio change 0.25% max.

Moisture Resistance: Mil-Std-202 Method 106, ratio change 0.5% max.

Lead Material: Gold Plated

Encapsulation: Silicone Conformal with Dielectric Withstanding Voltage of 750 volts.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Type MR & MS Power Film Resistors

Power Film Resistor Family with Wide Resistance Range and +275° C Maximum Temperature.

With power ratings to 15 watts and voltage ratings as high as 6000 volts in an axial-lead resistor with values to 30 Megohms, the Type MS Power Film Resistors deliver the performance capabilities that can simplify circuit design and reduce equipment cost and complexity.

Type MS Power Film Resistors provide all these features in a single resistor:

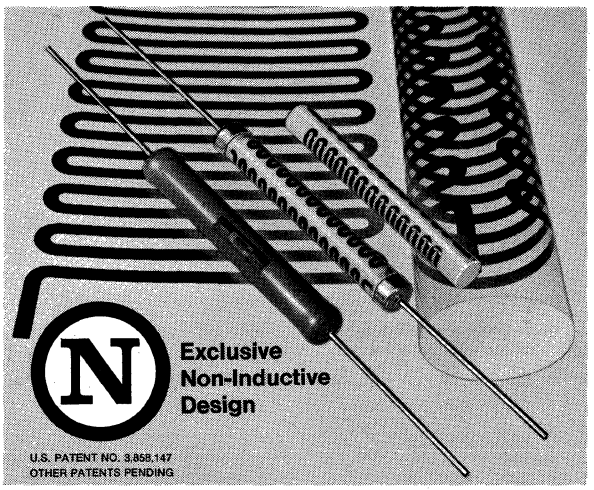
- Full power and voltage ratings, without derating —
  - for non-inductive performance.
  - for high resistance values that extend the critical resistance value up to 10 times.
- Higher voltage ratings without the limitations of minimum wire size and spacing.
- Excellent long-term stability.
  Tests demonstrate typical stability of 0.05% per 1000 hours over extended life.

Micronox® Resistance Films

Type MS performance begins with Micronox® resistance films, the basic element in every Caddock resistor. Produced exclusively by Caddock Electronics, these proven complex oxide films have been used reliably for 20 years in Caddock's precision power resistor products.

Micronox® resistance films are fired directly onto a ceramic core, in air, at 1400° F. These resistance films have demonstrated outstanding stability when exposed to a high ambient temperature, thermal shock and high power densities.

This unique approach to precision power resistors opens new design possibilities by providing wider resistance range, precise temperature characteristics, and higher temperature and power handling capability.



There's no derating of performance when you specify Caddock's Exclusive Non-Inductive Design.

When non-inductive performance is specified, we produce these power film resistors with a serpentine resistive pattern that provides for neighboring lines to carry currents in opposite directions, thereby achieving maximum cancellation of flux fields over the entire length of the resistor.

The result is a truly non-inductive resistor that is about as inductive as a straight piece of wire the length of the resistor body. This efficient design means faster settling times and minimum distortion in all types of high frequency circuits.

Non-inductive construction is available in most models. Specify by adding "N" suffix to Model Number. (Example: MS 310N)

Carefully Controlled Manufacturing and Test Procedures Assure Compliance with Strict Quality Control Requirements

Manufacturing Control

In addition to these procedures, all Type MS Resistors are produced under strict manufacturing controls with processes which include power conditioning, overvoltage conditioning and maximum temperature conditioning.

Quality Control

From the certification and testing of all materials to the supervision of manufacturing processes, all Caddock Type MS and MR Power Film Resistors are produced under procedures that have been approved for conformance to the requirements of NASA NHB5300.4(1C) and MIL-I-45208 in many recent surveys.

Reliability Verification

Type MS Resistors are included in the Caddock Reliability Testing Program. Conformance to specification parameters including Extended Life, Shock, Vibration and Humidity are verified on a periodic basis. Data from MS resistors can be compared by similarity to other Caddock resistor types, since Type ML, MM, MS, MP, MG and MK represent an identical combination of materials —aluminum oxide substrate, Micronox® resistance film and silicone insulating coating.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

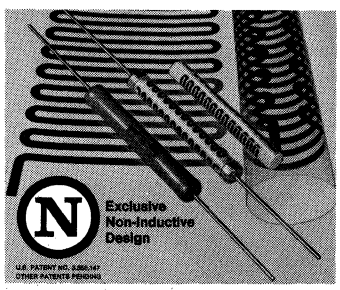
Type ML & MM Precision Film Resistors

High-Temperature Resistors for Geophysical, Aerospace and Industrial Requirements.

Type MM and ML resistors have a proven performance history in industrial, computer, military and space applications. With power ratings up to 3 watts and resistance values to 15 megohms, these outstanding resistors are ideal for applications requiring tolerances as close as 0.1% and extended life stability of 0.1% per 1000 hours.

The Type MM Precision Film Resistors provide a maximum operating temperature range of +275°C and both the Type MM and the Type ML have temperature coefficients of only 50 PPM/°C over the range from −15°C to +105°C.



Construction includes Micronox® resistance films fired onto a high strength solid ceramic core. End cap construction and a molded case completes the resistor assembly and provides increased resistance to abrasion and solvents.

Caddock's Exclusive Non-Inductive Performance can also be specified for most of these resistors by adding the "N" suffix to the model number. (Example: MM 236N)

Type MV Low Resistance Power Film Resistors

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Values from 1 Ohm to 50 Ohms with Exclusive Non-Inductive Design

Type MV Low Resistance Power Film Resistors combine Caddock's Exclusive Non-Inductive Design with the many high performance capabilities of Micronox® resistance films to achieve these special advantages:

- Low Resistance - from 1 Ohm to 50 Ohms.
- Maximum Operating Temperature up to +275°C.
- Four Sizes and Power Ratings.
- Full Power Ratings without derating for Non-Inductive Performance.

The interdigitated terminations in the Type MV resistors provide a multiple-path distribution of the current into parallel resistance sections, which provides low resistance values and non-inductive performance. This Exclusive Non-Inductive Performance has provided significant improvements in performance to many types of electronic equipment, including wide-band power amplifiers, high-speed data transmission systems, current switching circuits and current sensing circuits.

For complete information quantity price and delivery for the Type MV resistors, call or write to our main offices in Riverside, California.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

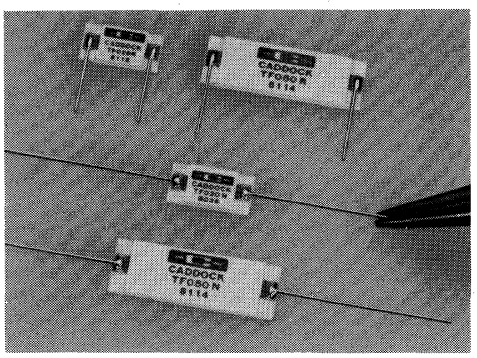
Type TF Low TC Ultra-Precision Film Resistors

Absolute TC to 5 PPM/°C — Values from 1 kohm to 125 Megohms — Absolute Tolerance to ±0.01%.

Type TF precision resistors employ the Caddock Tetrinox® resistance films — the resistance system that sets a new standard for high value, ultra-stable precision resistors that provide an exceptional combination of performance characteristics:

- **Ultra-Precision** – Seven standard resistance tolerances from ±1% to ±0.01%
- **A Wide Range of Resistance Values** – from 1 kohm to 125 Megohms.
- **Low Temperature Coefficients** – 5 PPM/°C, 10 PPM/°C and 15 PPM/°C.
- **Long-Term Stability** - to 0.01% per 1000 hours.

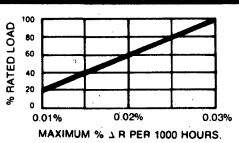
This completely new approach to quantity production of ultra-precision resistors is the result of combining our unique complex-oxide technology with an advanced high thru-put laser manufacturing capability.



Type TF - Standard Resistance Range - 1 kohm to 10 Megohms.

Model Number		Wattage @ +70°C.	Maximum Continuous Oper. Voltage	Resistance		Dimensions	
Axial Leads	Radial Leads			Min.	Max.	A	B
TF 020 N	TF 020 R	.33	300	1 K	2 Meg	.75 ±.020	.375 ±.020
TF 050 N	TF 050 R	.75	1400	10 K	10 Meg	1.5 ±.020	.50 ±.020

Load Stability:



Shelf Life: Typically 0.005% per year.

Type TF - Extended Resistance Range - 2 Megohms to 125 Megohms.

Model Number		Wattage @ +70°C.	Maximum Continuous Oper. Voltage	Resistance		Dimensions	
Axial Leads	Radial Leads			Min.	Max.	A	B
TF 626 N	TF 626 R	.33	300	2.01 Meg	35 Meg	.75 ±.020	.375 ±.020
TF 656 N	TF 656 R	.75	1400	10.01 Meg	125 Meg	1.5 ±.020	.50 ±.020

Load Stability: 1000 hours at rated voltage at +70°C, maximum ΔR 0.03%.

Shelf Life: Typically 0.010% per year.

Specifications

Apply to all Type TF resistor models

Absolute Temperature Coefficient: 5 PPM/°C, 10 PPM/°C or 15 PPM/°C. Referenced to 25°C, ΔR taken at -15°C and +105°C.

Resistance Tolerance: ±0.01%, ±0.025%, ±0.05%, ±0.10%, ±0.25%, ±0.50%, ±1.0%.

Storage Temperature: -55°C to +105°C.

Leadwire: Tinned Copper.

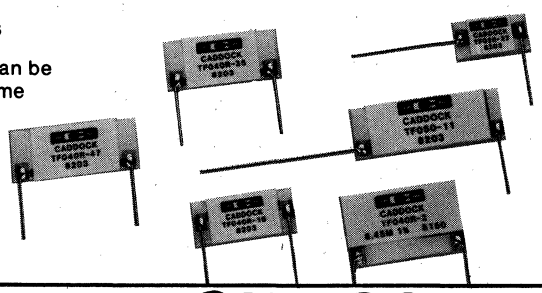
Custom Type TF Resistors

Additional cost savings can be realized when your high volume ultra-precision Type TF resistor is optimized for:

- Voltage rating.
- Power rating.
- Mechanical configuration.
- Ratio matched sets.



And for special requirements, custom Type TF resistors are available with:

- TCs of 5 ppm/°C, 10 ppm/°C 15 ppm/°C or 25 ppm/°C.
- Shelf stability of 0.0025% per year.

Type TF resistors can also be produced with custom-spaced radial leads that will plug directly into your existing circuit layouts.

Type T912 and T914 Precision Resistor Networks

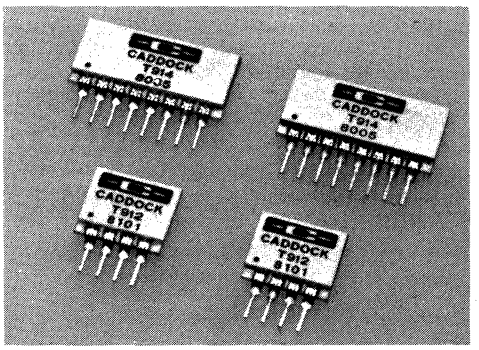
CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Resistor Pairs and Quads with Matched Characteristics for Precision Analog Circuits.

Type T912 and T914 Precision Resistor Networks are constructed with Caddock Tetrinox® resistance films to achieve the matched resistor characteristics and stability required by highly accurate amplifier circuits, voltage reference circuits and precision bridge circuits.

- **Ratio Tolerances** – from ±0.1% to ±0.01%.
- **Ratio Temperature Coefficients** – 10 PPM/°C, 5 PPM/°C or 2 PPM/°C.
- **Absolute Temperature Coefficient** – 25 PPM/°C.
- **Ratio Stability of Resistance at Full Load for 2000 hours** – Within ±0.01%.
- **Shelf Life Stability of Ratio for 6 Months** – Within ±0.005%.

Both the T912 and T914 are available in 14 standard resistance values between 1000 ohms and 1 Megohm. Caddock's high thru-put manufacturing capability assures delivery of prototype and large-volume production quantities from stock to within 6 weeks after receipt of order.



Standard Type T912 and T914 Precision Resistor Networks

In addition to the 14 standard **equal value** models of the Type T912 and T914, the Type T912 can also be ordered with —

- **10:1 resistance ratio** — for use with gain-setting amplifiers.
- **9:1 resistance ratio** — for use in voltage reference dividers.

T912 - A 10K - 010 - 02

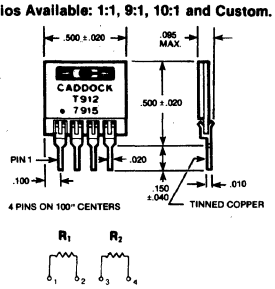
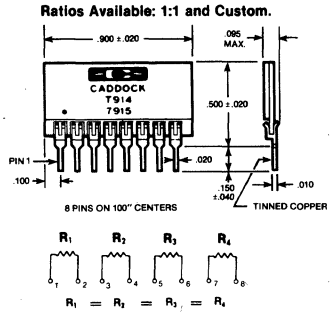
Type T912

Ratios Available: 1:1, 9:1, 10:1 and Custom.



Type T914

Ratios Available: 1:1 and Custom.



Specifications

Absolute Tolerance: 0.1% for all resistors.

Absolute Temperature Coefficient: ±25 PPM/°C. Referenced to 25°C, ΔR taken at 0°C and 70°C.

Voltage Rating: 30 Volts DC or RMS AC applied to R_1, R_2, R_3, or R_4.

Power Rating: 0.10 watt applied to R_1, R_2, R_3, R_4 (not to exceed rated voltage).

Package Power Rating: Type T912, 0.200 watt. Type T914, 0.400 watt.

Storage Temperature: -55°C to +105°C.

Insulation Resistance Between Isolated Pins: Pin 2 to Pin 3, Pin 4 to Pin 5, or Pin 6 to Pin 7, 1000 Megohms, minimum.

Dielectric Strength Between Isolated Pins: 50 volts RMS AC.

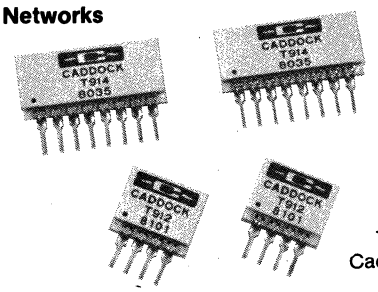
Ratio Stability Under Load: Ratio change between any two resistors in the network under full load for 2000 hours at 70°C, 0.01% maximum.

Shelf Stability of Ratio: Six months at shelf conditions, 50 PPM.

Custom Model T912 and T914 Precision Resistor Networks

For applications requiring non-standard resistance values, the T912 and T914 custom configurations can include these special features:

- Mixed resistance values with a maximum ratio of 250-to-1. (Example: 1.0 Megohm and 4K)
- Absolute TC as low as 15 PPM/°C.
- Ratio TC as low as 2 PPM/°C.
- Custom voltage ratings.
- Matched resistors of any special value between 1K and 2 Megohms.



Identification of the electrical characteristics of each T912 and T914 resistor network is included on the back side of the network.

For performance, price and availability of custom T912 and T914 resistor networks, contact Caddock Electronics' main offices in Riverside, California.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Type MK Low Cost Precision Film Resistors

Radial-Lead Resistors with Resistance Range from 10 ohms to 100 Megohms.

Here are the low cost precision resistors that provide high density packaging in large volume printed circuit applications. Available in two miniature rectangular package configurations with standard lead spacings, Type MK Precision Film Resistors now cover the entire resistance range from 10 ohms to 100 Megohms.

Constructed with Caddock Micronox® resistance films fired onto a solid ceramic substrate, Type MK Precision Film Resistors combine all of these outstanding advantages:

- ±1% resistance tolerance is standard and tolerances to ±0.1% are available on special order.
- Operating temperatures are from -55° C to +175° C.
- Full power rating at +125° C.
- Temperature Coefficient is only 50 PPM/° C up to 10 Megohms and 80 PPM/° C up to 100 Megohms, referenced to 25° C with the ΔR taken at -15° C and +105° C.
- Extended life stability is typically better than 0.1% per 1000 hours.
- Caddock's Non-Inductive Performance provides greater pulse fidelity and wider bandwidths in high frequency circuits.

This combination of performance advantages in a small, standardized case can simplify many engineering and production problems:

One size of Type MK resistor can replace many sizes of axial lead resistors.

This table of "RN" style axial lead resistors shows the many sizes and power ratings that can be replaced with either of the two models of Type MK Precision Film Resistors within the maximum allowable voltage ratings.

Comparison of Type MK and "RN" Ratings and Dimensions

Resistor Type	Power Rating	Maximum Resistance	Mounting Hole Spacing	
MK 120 or MK 620	**.50 WT.**	**40 Megohms**	**.150**	 Even the smallest Type MK resistor can replace all of these RN type resistors.
MK 132 or MK 632	**.75 WT.**	**100 Megohms**	**.200**	
RN50	.05 WT	1 Megohm	.400	
RN 55	.10 WT	5 Megohms	.500	RN60	.125 WT	10 Megohms	.625	RN65	.25 WT	20 Megohms	.875	RN70	.50 WT	40 Megohms	1.000	
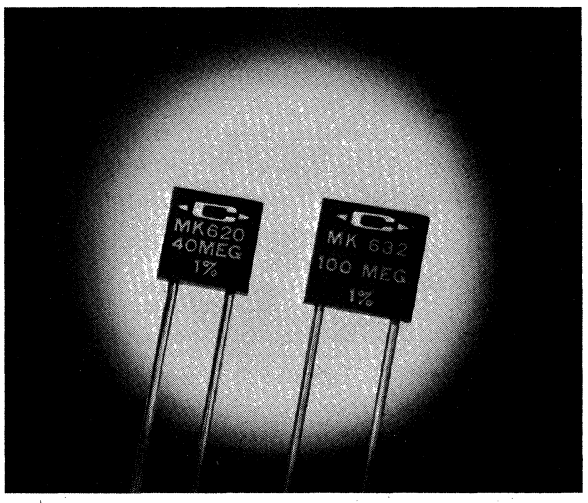
All outline drawings full size — dimensions in inches.

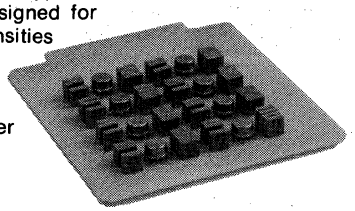
The largest Type MK — rated at .75 watt — requires less board space than even the 1/20th watt RN50.

The smallest Type MK — rated at .5 watt — provides power dissipation **equal** to the RN70 resistor. The RN70 resistor requires a mounting hole spacing of 1" and a side-to-side spacing of .250 inches, resulting in a total mounting area of .25 square inches — **10 times the area required for a .75 watt Type MK resistor!**



One standard resistor configuration can simplify board layouts.

With the exceptionally wide range of resistances that are available in each model of Type MK Precision Film Resistors, circuits can now be designed for maximum packaging densities without the need for leaving extra space where resistor value changes can require larger resistors or non-uniform lead spacings.



Standardization of resistor size can speed assembly procedures and reduce procurement costs.

The standardization of resistor size can pay additional dividends by simplifying assembly procedures. The radial leads do not require additional bending prior to insertion, and the standard lead spacing can reduce the time required for assembly.

The combination of higher power rating and smaller size can also lower procurement costs. By reducing the wide variety of sizes and types of axial lead resistors to a single, 'standardized' resistor type, unit prices can be lowered and inventory problems simplified.

Low Quantity Prices — Fast Delivery

Quantity prices for Type MK Precision Film Resistors are low, with many values priced under 60 cents each in medium-to-large production orders.

A pricing schedule for all values and models of Type MK Precision Film Resistors is available upon request. For specific price and delivery information, call or write to the main offices of Caddock Electronics in Riverside, California.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

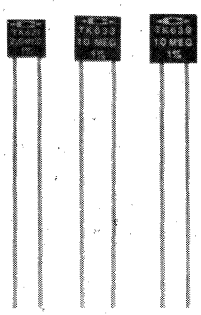
Type TK Temp-Stable Precision Film Resistors

Small Package with Low TC of 10 PPM/°C and Resistance Range from 1 kohm to 10 Megohms.

Caddock introduces a new design element for precision electronic circuitry — an advanced technology breakthrough that solves many critical circuit stability problems — the **Type TK Temp-Stable Precision Film Resistors with the Tetrinox® resistance system.**

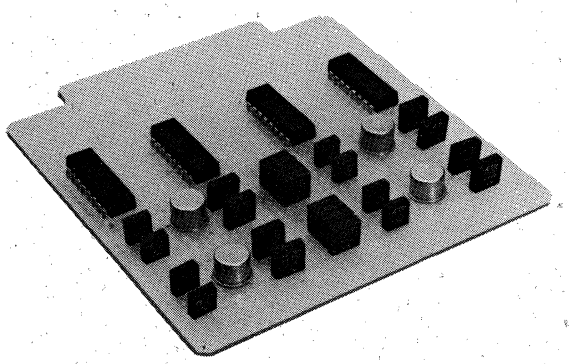
Type TK Temp-Stable Precision Film Resistors provide a combination of performance advantages never before available in a resistive component:

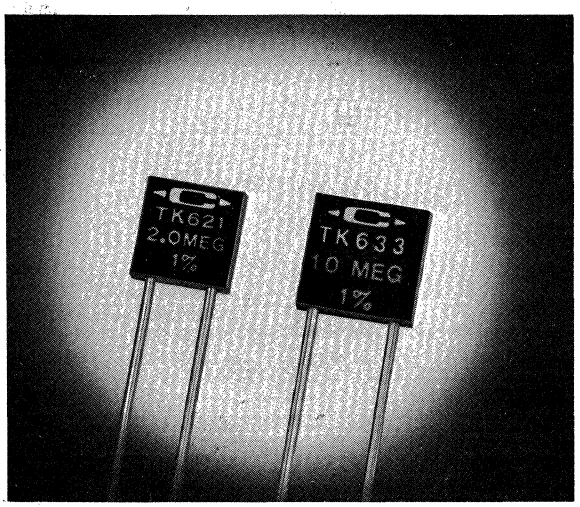
- **Temperature Stability** — better than 10 PPM/°C over the entire temperature range from −55°C to +125°C!
- **Long-Term Absolute Stability** — better than ±0.05% per 2000 hours of operation.
- **Extended Resistance Range** — from 1000 ohms to 10 Megohms.
- **Precision Tolerances** — ±1% is standard, and tolerances as close as ±0.05% are available.
- **Wide Operating Temperature Range**—from −55°C to +175°C.
- **Small Size** — with two miniature rectangular cases for maximum packaging density and minimum mounting area.
- **High Power Density** — with power ratings of .2 watt and .3 watt in molded cases, the largest of which is a standard CK 06 package.
- **Highest Performance-to-Cost Ratio** — with many values priced below $2.00 each in 1000 lot quantities.



(Photos show resistors full size)

Building on 20 years of experience with our unique complex-oxide technology, Caddock has perfected the Tetrinox® resistance system — the first high resistance system to provide a TC that is well within 10 PPM/°C and that is also essentially linear over the entire temperature range from −55°C to +125°C.





The exceptional performance of Type TK resistors can achieve improvements in many circuit applications:

Low TC "Matched-Pair" Voltage Dividers Can be Assembled Without Pre-Selection of Resistors.

An important application for Type TK resistors is in "matched-pair" voltage dividers where the low 5 PPM/°C temperature coefficient provides ratio tracking of less than 10 PPM/°C without resistor pre-selection or special testing.

With factory selection, Type TK resistor pairs can be matched to within 1 PPM/°C.

Extended Resistance Range Reduces Power Requirements

Because the Type TK resistors provide resistance values as high as 10 Megohms — values that are up to 100 times higher than other types of ultra-low TC resistors — engineers can now design precision circuits with lower current drain and lower power requirements.

High Density Packaging

The radial lead mounting and small rectangular case of Type TK resistors permits high packaging densities in low profile electronic circuitry. And because both models of Type TK resistors are available in an exceptionally wide range of resistances, lead spacing and mounting space can be standardized.

For additional information on the Type TK resistors for your high stability circuits, contact the engineering staff of Caddock Electronics in Riverside, California. They can assist you in determining the exact temperature coefficient and tolerances your application requires, and will provide both evaluation and production quantities of these new resistors on fast-delivery schedules.

HIGH PERFORMANCE FILM RESISTORS

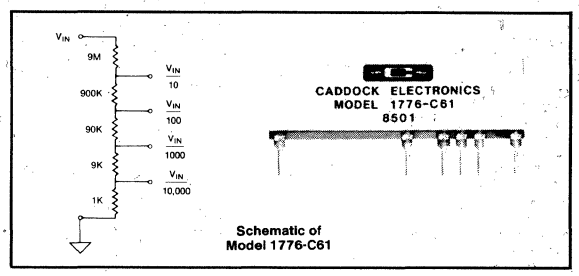
Type 1776 Precision Decade Resistor Voltage Dividers

Input Voltage Dividers for Digital Multimeters and Range-Switching Instruments.

The exceptional performance of this extensive 'family' of Type 1776 Precision Decade Resistor Voltage Dividers has been achieved through the special combination of advantages provided by Caddock's Tetrinox® resistance films. This advanced film resistor technology provides the performance characteristics required by the precision input signal circuits of both bench-type and laboratory digital instruments.

In addition to requiring less board space, these compact precision resistor networks deliver higher performance than selected discrete resistor sets and thin-film networks.



Schematic of Model 1776-C61

There are now 32 standard models in the expanded 'family' of Type 1776 precision resistor networks that include -

- 3-, 4- and 5-decade voltage dividers with ratios from 10:1 to 10,000:1.
- 1,200 volts continuous ratings and overvoltage to 2,000 volts.
- Many combinations of Ratio and Absolute Tolerances and Ratio and Absolute Temperature Coefficients.

For complete information on quantity price and delivery for any model of these Type 1776 Precision Decade Resistor Voltage Divider Networks, call or write to our main offices in Riverside, California.

Specifications

(Numbers inside circles reference columns in Model No. table.)

① **Ratio Tolerance:** Maximum ratio difference between two resistors in the network. (See the specific Figures for the definition of Ratio Difference.)

② **Ratio Temperature Coefficient:** Ratio track from 0°C to +70°C.

③ **Voltage Coefficient of Ratio (ppm/volt):** R_1 in series with any combination of R_2, R_3, R_4 and R_5, 100 volts to rated voltage.

④ **Load Life:** Ratio stability of resistance under full load, rated voltage applied to R_1 in series with any combination of R_2, R_3, R_4 and R_5.

⑤ **Shelf Stability of Ratio:** Six months at shelf conditions.

⑥ **Overvoltage:** Maximum voltage of 1.67 times rated DC voltage. Volts DC or peak AC applied to R_1 and any combination of R_2, R_3, R_4 and R_5 in series with R_1 for 10 seconds.

⑦ **Voltage Rating:** DC or MRS Ac voltage applied to R_1 in series with any combination of R_2, R_3, R_4 and R_5.

Storage Temperature: -55°C to +85°C.

HIGH PERFORMANCE FILM RESISTORS

Type 1787 Current Shunt Resistor Networks

For Accurate Current Sensing in Multi-Range Instrumentation

Type 1787 Current Shunt Resistor Networks utilize Caddock's Micronox® resistance films and advanced high thru-put laser manufacturing capabilities to achieve many vital advantages in precision current measurement circuits, including laboratory and bench-type digital instrumentation:

- The thin-profile single-package configuration replaces as many as four discrete current shunt resistors.
- The monolythic construction and standardized lead spacing simplifies installation.
- Caddock Micronox® resistance films provide exceptional stability for improved long-term measurement accuracy.

Thirteen standard models in five network arrangements provide the specific accuracy and resistance values required for a wide range of current measuring instruments and circuits.

Prototype quantities of most models of the Type 1787 Current Shunt Resistor Networks can be delivered from stock to within 6 weeks ARO.

HIGH PERFORMANCE FILM RESISTORS

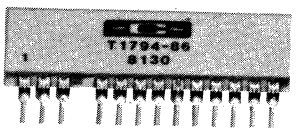
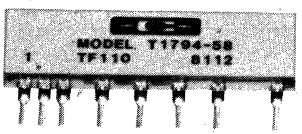
Type T1794 Custom Precision SIP Resistor Networks

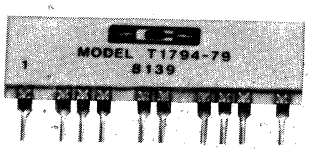
Resistor Networks with Custom Package Size and Custom Performance.

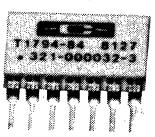
For precision analog designs with special circuit requirements Caddock Type T1794 Custom Precision SIP Resistor Networks can include from 2 to 15 resistors per assembly and are available with performance that includes -

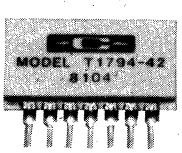
- Absolute tolerances from 1.0% to 0.1% - to as close as 0.025%.
- Ratio tolerances from 1.0% to 0.1% - to as close as 0.025%.
- Resistance values from 500 ohms to 50 Megohms.
- Absolute temperature coefficients of 50 PPM/°C, 25 PPM/°C and 15 PPM/°C.
- Ratio temperature coefficients from 25 PPM/°C to 10 PPM/°C - to as close as 5 PPM/°C.
- Ratio stability of resistance at full load for 2000 hours to within ±0.02%.
- Shelf life stability of ratio for six months to within ±0.005%.
- Custom voltage and power ratings.

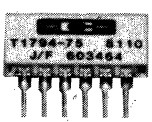












The unique thin-profile, single-in-line edge-mount package design allows the wide range of flexibility necessary to blend the performance of Tetrinox® resistance technology with particular circuit specifications to arrive at the final network package size, pin spacing and pin style.

In addition to the normal upright configuration with SIP-socket pin spacing, special low-profile packages with extended leads and right-angle leads are also available.

By optimizing both performance and configuration many designers find that these precision networks can achieve savings in both component cost and insertion costs — even in production-lot quantities as low as 1000 units.

A large part of our high thru-put manufacturing capacity is now committed to the production of these custom precision resistor networks. Custom network designs for requirements that range from 500 networks per year to over 400,000 networks per year are now in production.

For immediate engineering information on the custom precision resistor network configuration that can best meet your needs, call or write to our Applications Engineering Group in Riverside, California, and we will be pleased to provide both technical performance and pricing information.

Type 1789 Custom Low Resistance Value Precision Resistor Networks

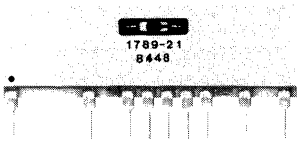
CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Low Resistance Custom Resistor Networks for Precision Analog Circuit Designs.

The design flexibility achieved by Caddock's advanced resistance film technology is extended to low resistance networks through the application of Caddock Micronox® resistance films.

By applying this technology to the thin-profile single-in-line package configuration, the Type 1789 Custom Precision Low Resistance Value Networks can provide a combination of performance specifications that are exclusive with Micronox® resistance films:

- **Resistance Values** - from 1.0 Ohm to 10,000 Ohms.
- **Absolute Tolerances** - 1.0%, 0.50%, 0.25%, 0.20%, 0.10%, and 0.05%.
- **Ratio Tolerances** - 1.0%, 0.50%, 0.25%, 0.20%, 0.10% and 0.05%.
- **Absolute Temperature Coefficients** - 100 PPM/°C, 80 PPM/°C and 50 PPM/°C from 0°C to +70°C.
- **Ratio Temperature Coefficients** - 80 PPM/°C, 50 PPM/°C, 25 PPM/°C and 15 PPM/°C.
- **Power Rating** - 100 mW to 2 Watts per resistor.



Current Summing Network.

Current Sensing Network.

The optimum design of a Type 1789 Custom resistor network is best achieved when all of the circuit requirements and specification limits are carefully balanced.

To assist you in achieving the goal of optimum performance and maximum cost effectiveness, the resistor network specialists in the Network Product Engineering Group at Caddock's main offices will be pleased to provide any information you may need.

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

Type MP Chassis Mounted Power Film Resistors

Type MP Chassis Mounted Power Film Resistors are made with Micronox® resistance films fired onto a ceramic substrate which is thermally bonded to an anodized aluminum base. By mounting this assembly directly to a metal surface for improved heat transfer, the high power capabilities of these unique resistors can provide increased packaging densities in many types of electronic equipment.

The special performance features of the Type MP Power Film Resistors include:

- Two case sizes that provide 15 watt and 30 watt ratings.
- Single-screw mounting to simplify attachment to the chassis or other heat conducting surface.
- A molded silicone case that encapsulates the resistor assembly to meet stringent environmental specifications.
- Extended-life stability better than 0.01% per 1000 hours has been demonstrated through a 5½ year, 50,000 hour program of continuous load-life testing.

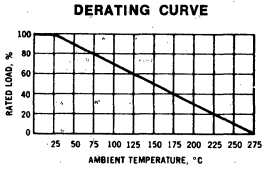
Detailed information on power ratings versus ambient temperature and chassis area has been provided on this page. A detailed report on the results of extended-life stability tests is available from the applications engineering group at Caddock Electronics, Inc.

Model No.	Power Rating†	Max. Voltage	Diel. Str.	High Temp. TC‡	Resistance Range		Dimensions				Terminals
					Min.	Max.	A	B	C	D	
MP312	15 Watts	300	600	50	10Ω	200 K	.600	.188	.185	.092	Gold Plated Solder Lugs
MP330	30 Watts	450	1000	50	10Ω	200 K	.850	.250	.250	.142	Gold Plated Solder Lugs

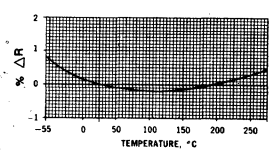
† Power rating based on chassis mounting with MP 312 on a 6" x 4" x 2" x .040" aluminum chassis and MP 330 on a 5" x 7" x 2" x .040" aluminum chassis.

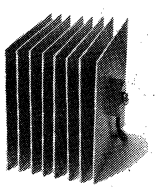
‡ TC: 50 ppm referenced to 25°C, ΔR taken at +150°C and +275°C. (Low temp. TC will be nominally −85 ppm/°C at −55°C. See typical R-T curve.)

DERATING CURVE



TYPICAL R-T CURVE





Stacked Type MP assemblies — constructed by bolting resistors between aluminum heat dissipating plates — provide a simple means of further improving packaging densities.

These charts of power ratings versus ambient temperature and chassis area show the high power levels that can be achieved with forced air cooling and with convection cooling in either vertical or horizontal orientation.

SPECIFICATIONS

Resistance Tolerance: ±1% standard (Other tolerances on special order.)

Insulation Resistance: 10,000 Megohms, dry. Method — Mil-R-18546D, para. 4.6.8.

Solderability: Per Mil-R-18546D, para. 3.7, para. 4.6.4.

Terminal Strength: Per Mil-Std-202, Method 211, Cond. A (Pull Test), 5 lbs., and Cond. B (Bend Test). Max. ΔR, .2% or .2Ω, whichever is greater.

Thermal Shock: Per Mil-R-18546D, para. 4.6.9, max. ΔR, .5% or .2Ω, whichever is greater.

Momentary Overload: 2 times rated power or 1.5 times max. allowable working voltage, whichever gives the lower power, for 5 seconds. Max. ΔR, .5% or .2Ω, whichever is greater.

Moisture Resistance: Mil-Std-202, Method 106B, less steps 7a and 7b, max. ΔR, .5% or .2Ω, whichever is greater.

Life: Per Mil-R-18546D, para. 4.6.12, 1,000 hrs., Max. ΔR, 1% or .2Ω, whichever is greater.

Shock, Medium Impact: 50G, per Mil-Std-202, Method 205, Cond. C.

Vibration, High Frequency: Per Mil-Std-202, Method 204, Cond. B, Max. ΔR .2% or .2Ω, whichever is greater, through shock and vibration sequence.

High Performance Film Resistors

CADDOCK
HIGH PERFORMANCE FILM RESISTORS

The outstanding levels of performance and reliability that Caddock resistors provide is maintained through a continuous program of testing and process control that includes every step in the production process.

Manufacturing Control

Our manufacturing controls include processes for power conditioning, over-voltage conditioning and maximum temperature conditioning. We also perform many in-process tests to verify the performance levels and consistency of all of our resistor types, and to screen out defects not detectable by visual inspection.

Quality Control

The Caddock Quality Control System covers every step in the manufacturing process from the examination of incoming raw materials to the final testing and packaging of each resistor.

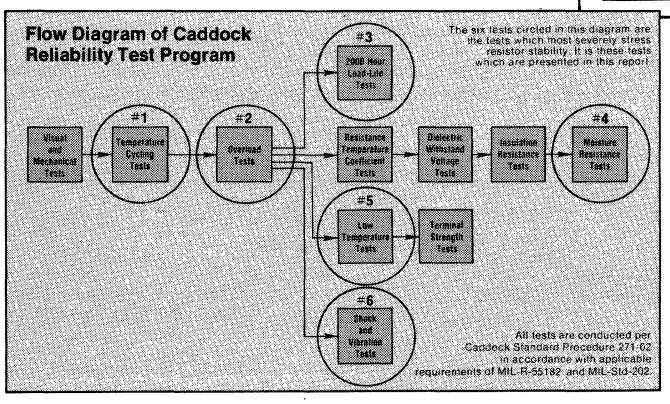
To meet the most stringent QC requirements, Caddock's Quality Control Procedures have been approved as being in conformance to the requirements of NASA NHB5300.4(1C) and MIL-1-45208 in recent surveys.

Reliability Verification

In addition to the tests for tolerance, stability and temperature characteristics that are part of our normal manufacturing procedures, we also perform semi-annual reliability tests to confirm compliance to our exacting product specifications.

The flow diagram of the Caddock Reliability Test Program illustrates the sequence of the eleven tests in this program.

The test procedures in the Caddock Reliability Testing Specification 271-02 generally follow the format of MIL-R-55182 and MIL-Std-202. The results of these tests may be used to qualify Caddock resistors for substitution in existing designs.



Reliability Test Summary — "Caddock Report No. 1".

To provide electronic engineers with actual stability data — data that can be used to determine actual improvements in circuit performance — we have compiled test results taken since 1972 from our continuing reliability program.

Of the eleven tests in this program, we have graphically summarized data from the six tests that measure resistor stability under conditions most important to circuit designers:

1 — Temperature Cycling Tests

2 — Overload Tests

3 — 2000 Hour Load-Life Tests

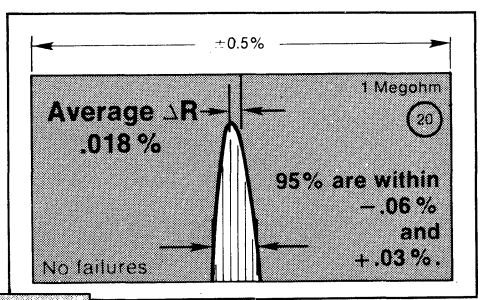
4 — Moisture Resistance Tests

5 — Low Temperature Operation

6 — Shock and Vibration Tests

This stability data appears in a series of 96 graphs that show the actual stability of 740 Caddock High Performance Film Resistors.

The individual and average resistance change is also shown in these graphs for the low, high and 'critical' values, to provide data that can be used to pre-determine actual circuit performance and long-term equipment specifications.



A copy of the 12-page brochure describing the results of these reliability and stability tests is available from the main offices of Caddock Electronics, Inc. in Riverside, California.

PRECISION THICK FILM NETWORKS

Cal-R thick Film Passive Systems develops and produces, to customer requirements, packaged resistor networks including digital to analog A-D binary ladders (through 12 bits), BCD bipolar ladders and custom precision resistor networks.

Cal-R manufactures ceramic substrates for the Digital Watch market and custom R-C networks for hi-rel and commercial applications.

Cal-R thick film resistor compositions fused to a high purity 96% aluminum substrate insure low thermal gradients, high thermal stability and matched electrical characteristics.

CAL-R®, INC. WIRE WOUND RESISTORS

PRECISION POWER RESISTORS

FEATURES

1. Copperweld leads standard. Nickel A or Alloy 180 available.
2. Core-alumina and steatite ceramics.
3. Silicone coating to give maximum wire protection and extra high resistance to moisture.
4. Failure rates of less than .006% per 1000 hours @ +25°C with 60% confidence.

ELECTRICAL CHARACTERISTICS

A. TOLERANCES: 5.0% to .01%. 1% standard for off-shelf delivery. Special matching available to .001% tolerance.
B. TEMPERATURE COEFFICIENT: 20 ppm/degree C standard. Special T.C.'s to 5 ppm/degree C available.
C. Dielectric strength greater than 1000 V.A.C.
D. Special configurations available on request.
E. SA (X) Types Thermal shock proof from 275°C to —55°C.
F. SAV (X) Types Thermal shock proof from 350°C to —55°C.
G. STABILITY: consistent with tolerances, all parts stabilized in production. Less than 0.1% drift in 2000 hours operation at full Cal-R wattage rating for 1% tolerance parts.
H. RESISTANCE RANGES: .05 ohms to 250K ohms.
I. INDUCTIVE TYPES: Single layer space wound with largest wire permissible.
J. Non-inductive Types feature dual balanced windings for minimum inductance.

ENVIRONMENTAL

Meet or exceed applicable paragraphs of MIL-R-26E and MIL-R-39007.

POWER RESISTORS

FOUR STANDARD MC TYPE RESISTOR SPECIFICATIONS IN MIL-R SIZES

OUTSTANDING FEATURES

1. Copperweld leads hot tin dipped for maximum solderability.
2. Completely welded construction terminal to terminal.
3. High density extruded aluminum housing provides superior heat conduction.
4. Housing deep finned for maximum heat dissipation under natural and forced convection.
5. Windings—High uniformity single layer space wound, designed to give maximum core coverage for even heat dissipation. MCX (non-inductive) types have dual balanced windings for minimum inductance.
6. Core—Steatite ceramic, centerless ground for uniformity.
7. Silicone coated resistance element to give maximum wire protection and extra high resistance to moisture.

ELECTRICAL CHARACTERISTICS

Tolerances—5.0% to .05%, 1% standard for off-shelf delivery.

Temperature Coefficient—20 ppm/degree C standard. Special T.C.'s to 5 ppm/degree C available.

Dielectric strength greater than 1000 V.A.C. on MC-100 and MC-250, and greater than 2000 V.A.C. on MC-500.

Dielectric Test—performed on 100% basis.

Stability—consistent with tolerances, all parts stabilized in production. Less than 0.5% drift in 1000 hours operation at full Cal-R wattage rating for 1% tolerance parts. Resistance ranges—.05 ohms to 210K ohms.

ENVIRONMENTAL

Meet or exceed all requirements of MIL-R-18546D, including "N" characteristic and MIL-R-39009.

T-5 (5 WATTS) OUTSTANDING FEATURES

1. Copperweld leads hot tin dipped — Gold plated DUMET or "A" nickel available.
2. High density extruded aluminum housing provides superior heat conduction.
3. Housing deep finned for maximum heat dissipation.
4. Windings — high uniformity single layer space wound, designed to give maximum core coverage for even heat dissipation. T5X (non-inductive) types have dual balanced windings for minimum inductance.
5. Core — Alumina ceramic, centerless ground for uniformity.

T-3 (3 WATTS) OUTSTANDING FEATURES

1. Windings — Reverse pie wound — all pies filled for maximum heat dissipation.
2. Unique recessed end cap designed to isolate winding termination from all lead stress.
3. Protective overcoating covering entire resistor before molding insures maximum protection and secures winding without introducing stress.
4. Resistor element encased in nonburning epoxy by transfer molding techniques.
5. Copperweld leads hot tin dipped standard — Gold plated DUMET or "A" nickel available.

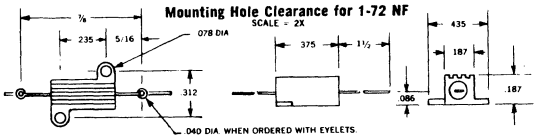
T-5 ELECTRICAL CHARACTERISTICS

TOLERANCES: 5.0% to .05%. 1% standard for off-shelf delivery.
TEMPERATURE COEFFICIENT: 30 ppm/°C standard. Special T.C.'s to 5 ppm/°C available.
STABILITY: consistent with tolerances, all parts stabilized in production. Less than 0.5% drift in 1000 hours operation at full CAL-R wattage rating for 1% tolerance parts.
RESISTANCE RANGES: .5 ohms to 3 K ohms.
DIELECTRIC STRENGTH: greater than 500 V.A.C.
DIELECTRIC TEST: performed on 100% basis.

T-3 ELECTRICAL CHARACTERISTICS

TOLERANCE: 1 to .005% absolute. To .002% matching tolerance for matched sets.
TEMPERATURE COEFFICIENT: 10 ppm/°C is standard. Special TCs in ranges from +6000 ppm to 2 ppm/°C available.
STABILITY: consistent with tolerances. All parts stabilized in production, including 1% parts. Components available with stability of .002% per year.
WINDINGS: multiple pie reversed type to minimized inductance. Special windings available to provide fast rise times.
RESISTANCE: Ranges 3 K ohms to 300 K ohms.
MAXIMUM WORKING VOLTAGE: 200V.



PRECISION RESISTORS

OUTSTANDING FEATURES

1. All pies filled for maximum heat dissipation.
2. Unique recessed end cap designed to isolate winding termination from all lead stress.
3. Terminals welded to end cap for maximum strength — will withstand 15 lbs. linear pull.
4. Double slots tangent to mandrel to prevent shorting between pie windings eliminating space-wasting construction features or the need for insulating tape.
5. Protective overcoating covering entire resistor before molding insures maximum moisture protection and secures winding without introducing stress.
6. Standard leads — copperweld hot tin dipped or annealed Dumet gold plated.
7. Special matching available to .001% tolerance.

ELECTRICAL CHARACTERISTICS

TOLERANCE: 1 to .005% absolute. To .002% matching tolerance for matched sets.

TEMPERATURE COEFFICIENT: 10 ppm/°C is standard. Special TCs in ranges from +6000 ppm to 2 ppm/°C available.

STABILITY: consistent with tolerances. All parts stabilized in production, including 1% parts. Components available with stability of .002% per year.

WINDINGS: multiple pie reversed type to minimized inductance (except on Miniature Series). Special windings available to provide low rise times.

RESISTANCE: Ranges 1 ohm to 10 megohms.

PHYSICAL CHARACTERISTICS

MATERIAL: Hi-Temp epoxy with matching coefficient of expansion between core and case. Leads are gold over Dumet.

ENVIRONMENTAL

Meet or exceed all requirements of MIL-R-93C and MIL-R-39005.

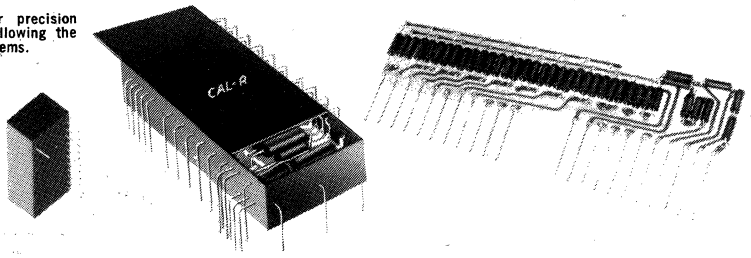
PRECISION RESISTOR NETWORKS

Cal-R engineers, specialists in advanced network design, offer precision assemblies, packaged to meet the most exacting specifications, allowing the circuit designer maximum freedom without costly packaging problems.

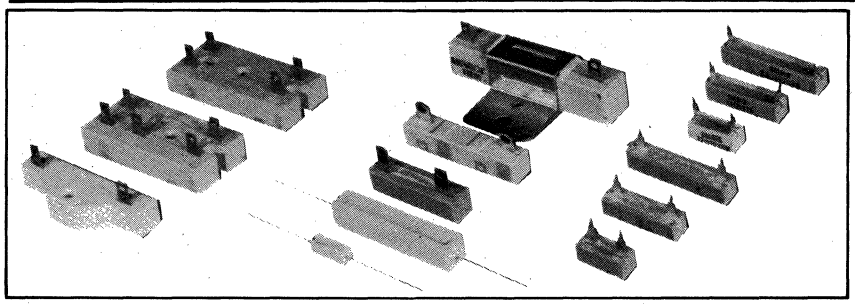
GENERAL SPECIFICATIONS

RESISTOR VALUES: From 1 ohm thru 5 megohms
FULL SCALE ACCURACY: to .005%.
TEMPERATURE COEFFICIENT TRACKING: to 1 PPM/°C.
TEMPERATURE COEFFICIENT ABSOLUTE: to 2 PPM/°C.
AMBIENT TEMPERATURE RANGE: —55°C to +125°C.
STANDARD TEMPERATURE COEFFICIENT: 0 to ±10 PPM.
STABILITY: to 10 PPM per year.
FAST RECOVERY TIME: to within .02% of final value within 100 ns.



COLBER RESISTORS

WIRE WOUND / TEMPERATURE SENSITIVE / CERAMIC ENCAPSULATED / CARBON & METAL FILM / FUSISTORS (FUSEABLE RESISTORS)



The resistance elements of the Colber resistors are uniformly and tightly wound on glass fiber cores using premium quality wires. Tinned steel or brass terminals are secured to the element by automatic assembly equipment. The high degree of automation used in manufacturing this resistor allows you to use a high quality wire wound unit at a cost of approximately two cents.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

CORNING
Your Quality Partner

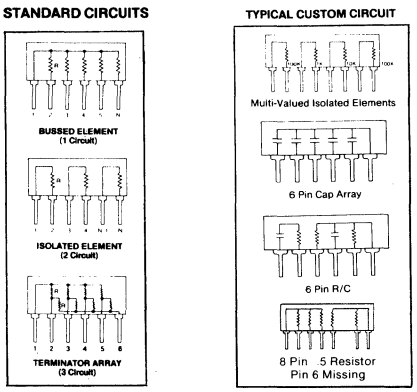
Customize Your Circuits With Corning Components

SIP Resistor Networks

Corning SIP Resistor Networks include 6- through 12-pin products with low (.200″), medium (.250″), and high (.350″) profiles. These conformally coated networks are rated at 70°C and meet all the environmental requirements of MIL-R-83401. Bussed element, isolated element, and terminator circuits are available.

Corning's expanded custom circuit capabilities now include custom resistor, resistor-capacitor, and capacitor array networks in the SIP configuration. Substrate packages up to 2″ x 2″ are available.

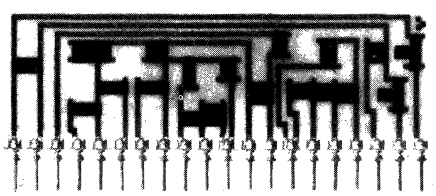
Special power and voltage requirements can also be provided.



Pulse Withstanding Resistors

These resistors provide protection against a variety of electrical hazards which can change or destroy sensitive electronic equipment. In particular:

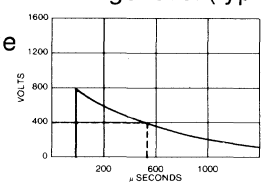
1. High voltage, short duration pulses from lightning strokes (attenuated direct or inductively coupled discharges).
2. High energy voltage surges caused by power line anomalies (direct power crosses or inductively coupled effects).
3. Other momentary over-voltages.



Lightning Pulse Wave Forms

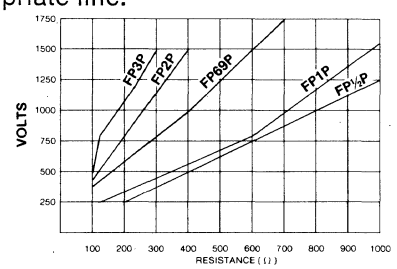
Lightning pulse wave forms are defined by three numbers:

- Maximum time to reach peak voltage level (typically 10 micro-seconds).
- Minimum time for voltage to decrease to half value.
- The peak voltage level.



10 by 560 — 800 Volts
FCC — Metallic Surge

This graph shows the relationship between resistance value and pulse withstanding voltage for FP1/2P thru FP3P using a 0.1% resistance shift after 10 pulses as the figure of merit. The stable operating region of each package is on the right hand side of the appropriate line.



Standard Products

Standard Corning Resistors for the Electronics Industry are segmented by stability, application and market. The products are:

MIL-R-55182	Commercial equivalents
MIL-R-39017	to the MIL Specs
MIL-R-10509	O OHM resistors
MIL-R-22684	Flameproof Power Resistors

Capitalize on Quality

"Quality" is a corporate byword at Corning where our extensive controls, built into component production processes, have proven effectiveness levels measured in parts per million. The many employee-generated productivity programs at Corning reflect the pride Corning employees take in their products.

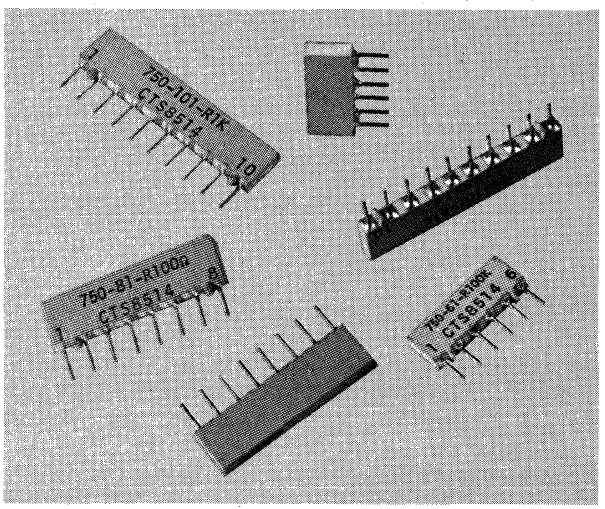
SINGLE-IN-LINE CERMET RESISTOR NETWORKS

750 SERIES SINGLE-IN-LINE SOLID CERAMIC CERMET RESISTOR NETWORKS

- Compact edge mount modules
- Ultra high stability and reliability
- Automatic insertion capabilities
- Available with capacitors
- Exclusive patented lead wire termination
- .100″ lead spacing
- Alumina substrate
- Machine insertable R/C package



A limited number of substrates are available with .125″ lead centers.

ELECTRICAL SPECIFICATIONS

Temperature Range:
−55°C to +125°C (operating)

Resistance Range:
Standard — 33Ω thru 1 MegΩ
Special — below 33Ω and above 1 MegΩ

Resistance Tolerance:
Standard ±2%
Special ±0.5% or 0.5Ω (whichever is greater)

Matching: (2 like resistors)
50Ω to 100 KΩ — 0.5% or 0.5Ω
(whichever is greater)
100 KΩ to 500 KΩ — 1%
500 KΩ to 3 MegΩ — 2.5%

Ratio Matching:
50Ω to 100Ω — ±1%
100Ω to 100 KΩ — ±0.5%
100 KΩ to 1 MegΩ — ±2%
Note: Multiple matches available upon engineering approval

Temperature Coefficient*:
Standard ±300 PPM/°C
Special ±100 PPM/°C
Tracking available to 50 PPM/°C with same formulation on same side of substrate

Max. Operating Voltage*:
100V not to exceed rated power

Dielectric Strength:
200V

MECHANICAL SPECIFICATIONS

Substrate Material:
Alumina

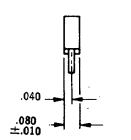
Resistor Material:
Cermet — thick film

Insulation Coating:
Organic — epoxy phenolic

Lead Material:
Solder coated copper alloy

Solder:
60/40 tin/lead

NO. OF PINS	"A" DIMENSION
4	.378
5	.478
6	.578
8	.778
9	.878
10	.978



NOTE
INSULATION COATING APPLIED ON THE TWO FACES ONLY

* Custom networks can usually be designed to exceed resistance range, individual resistor power, maximum operating temperature and maximum operating voltage standards. TCR may be affected by some custom network requirements.

RESISTOR/CAPACITOR NETWORKS

750 Series R/C single-in-line resistor networks suitable for automatic insertion

750 R/C is available with 6 pins 2 capacitors, 8 pins 3 capacitors or 10 pins 4 capacitors.

SINGLE-IN-LINE CERMET RESISTOR NETWORKS

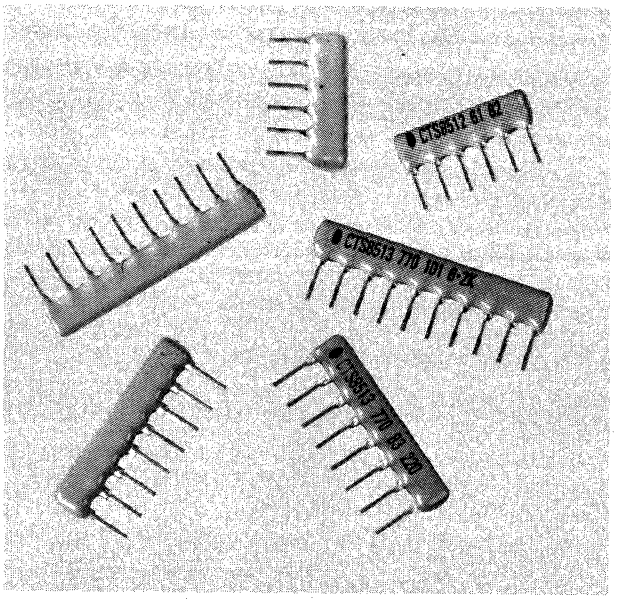
770 SERIES SINGLE-IN-LINE CONFORMAL COATED CERMET RESISTOR NETWORKS



- High reliability cermet resistors
- Space saving over individual resistors
- Available in odd or even number of pins up to 20 leads maximum
- Available at 4.95 mm/.195 in. or 8.89 mm/.350 in. high
- 2.54 mm/.100 in. pin spacing

ELECTRICAL AND MECHANICAL SPECIFICATIONS

Resistance Range:	Standard 33Ω to 1.0 MegΩ
Resistance Tolerance:	Standard: ±2% Special: ±1% or 0.5Ω (whichever is greater)
Maximum Operating Voltage:	Series 770: 50V not to exceed rated power Series 771: 100V not to exceed rated power
Temperature Coefficient:	±100 PPM 33Ω to 220 KΩ ±175 PPM above 220 KΩ to 1.0 MegΩ @ −55° to +125°C
Temp. Range:	−55° to +125°C (operating)
Storage Temp. Range:	−55° to +125°C
Dielectric Strength:	100V
Lead Material:	Solder coated copper alloy

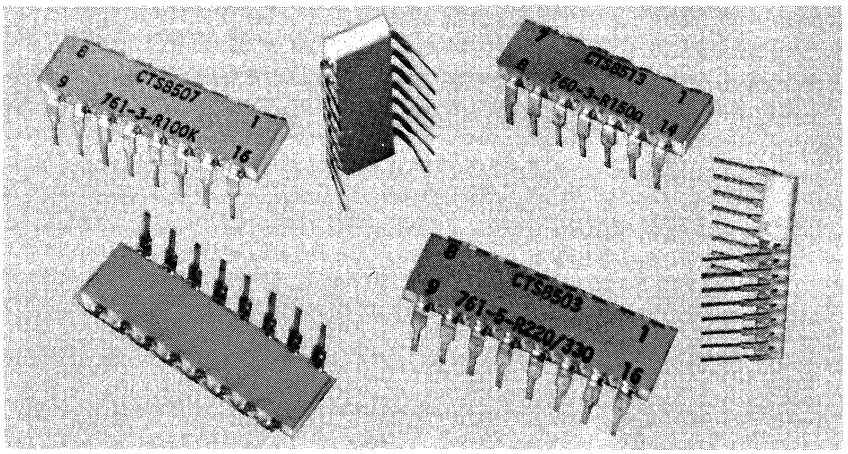
DUAL-IN-LINE CERMET RESISTOR NETWORKS

760 SERIES DUAL-IN-LINE SOLID CERAMIC CERMET RESISTOR NETWORKS

- Solid ceramic substrate
- Low height profile
- .100″ lead spacing
- High overload capabilities
- 8, 14, 16 and 18 pin constructions
- Compatible with automatic insertion equipment
- High power capabilities
- Reduced insertion time
- Available with capacitors



ELECTRICAL SPECIFICATIONS

Temperature Range:
−55°C to +125°C (operating)

Resistance Range:
Standard — 22Ω through 1 MegΩ
Special — Below 22Ω and above 1 MegΩ

Resistance Tolerance:
Standard — ±2%
Special — ±0.5% or ½Ω (whichever is greater)

Resistance Matching:
(2 like resistors)
50Ω to 100 KΩ — 0.5% or 0.5Ω whichever is greater)
100 KΩ to 500 KΩ — 1%
500 KΩ to 3 MegΩ — 2.5%

Ratio Matching:
50Ω to 100Ω — ±1%
100Ω to 100K — ±0.5%
100K to 1 Meg — ±2%
Multiple ratio matching available upon engineering approval

Temperature Coefficient:
Standard — ±300 PPM/°C
Special — ±100 PPM/°C
Tracking — Available to 50 PPM/°C with same formulation and on same side of substrate

Maximum Operating Voltage*:
100V not to exceed rated power

Dielectric Strength:
200V

TOTAL NETWORK POWER @ 25°C				
Resistor Power	Number of Pins			
.15	8	14	16	18
	1.1	2.2	2.6	3.0
TOTAL NETWORK POWER @ 70°C				
.10	.75	1.5	1.75	2.0

MECHANICAL SPECIFICATIONS

Substrate Material: Alumina

Resistor Material: Cermet — thick film

Insulation Coating: Organic — epoxy phenolic

Lead Material: Solder coated copper alloy

Solder: 60/40 tin/lead

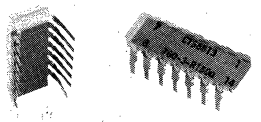
DUAL-IN-LINE CERMET RESISTOR NETWORKS

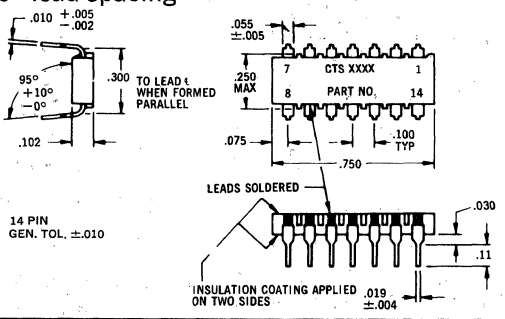
760 SERIES 14 LEAD, DUAL-IN-LINE SOLID CERAMIC CERMET RESISTOR NETWORKS

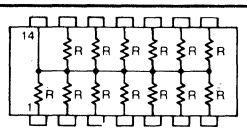


CTS Series	Description	Element Type	Resistance Range & Tol.	Power Rating (Watts)	TC
760-3	14 Pin Module on .100" x .300" DIP Centers	Cermet	22Ω-220KΩ* ±2%	1.5 @ 70°C per module	±100 ppm/°C typical
760-1					
760-5					

FEATURES:

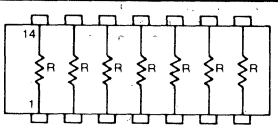
- Low cost automatic insertion and handling
- High overload capabilities
- Low height profile
- Package compatibility with monolithic packages
- .100" lead spacing





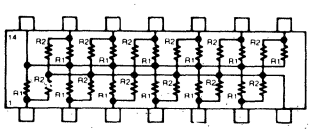
14 PIN-13 RESISTORS PART NUMBER 760-1-R + VALUE

APPLICATIONS: "Wired OR" pull-up; Power driver pull-up; Power gate pull-up; Line termination; Long-line impedance balancing; LED current limiting; ECL output pull-down resistors; TTL input pull-down.



14 PIN-7 RESISTORS PART NUMBER 760-3-R + VALUE

APPLICATIONS: MOS/ROM pull-up/pull-down; Open collector pull-up; "Wired OR" pull-up; Power driver pull-up; High speed parallel pull-up; TTL unused gate pull-up; TTL input pull-down; Digital pulse squaring.



14 PIN-24 RESISTORS PART NUMBER 760-5-R + VALUES

Pulse Squaring TTL Terminators

CTS 760-5 networks consist of two resistor pairs of the above value combinations. The resistors are connected together in series with a common line for power and a common line for ground. The junction of each pair is brought out to a separate terminal.

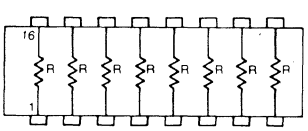
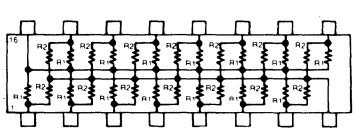
16 PIN-15 RESISTORS PART NUMBER 761-1-R + VALUE

APPLICATIONS: "Wired OR" pull-up; Power driver pull-up; Power gate pull-up; Line termination; Long-line impedance balancing; LED current limiting; ECL output pull-down resistors; TTL input pull-down.



16 PIN-8 RESISTORS PART NUMBER 761-3-R + VALUE

APPLICATIONS: MOS/ROM pull-up/pull-down; Open collector pull-up; "Wired OR" pull-up; Power driver pull-up; High speed parallel pull-up; TTL unused gate pull-up; TTL input pull-down; Digital pulse squaring.



16 PIN-28 RESISTORS PART NUMBER 761-5-R + VALUES

Pulse Squaring TTL Terminators
CTS 761-5 networks consist of two resistor pairs of the above value combinations. The resistors are connected together in series with a common line for power and a common line for ground. The junction of each pair is brought out to a separate terminal.

FEATURES:

- Low cost automatic insertion and handling
- High overload capabilities
- Low height profile
- Package compatibility with monolithic packages
- .100" lead spacing

SURFACE MOUNT RESISTOR NETWORK

SPECIFICATIONS

***Resistance Range:** Standard 22 ohm to 1.0 Megohm
Resistance Tolerance: Standard: ±2%
Special: 0.5% or 0.5 ohm (whichever greater)
***Max. Operating Voltage:** 50V not to exceed rated power
***Temp. Coefficient:** ±100 PPM @ −55°C to +125°C
***Operating Temp. Range:** −55°C to +125°C
Storage Temp. Range: −55°C to +125°C
Dielectric Strength: 100V
***Power Rating:**

	Resistor Power	Total Network Power			
		8P	14P	16P	18P
@ 70°C	.07 w	.25w	.4w	.5w	.62w
@ 25°C	.1 w	.38w	.6w	.75w	.9w

* Custom networks can usually be designed to exceed resistance range, individual resistor power, maximum operating temperature and maximum operating voltage standards. TCR may be affected by some custom network requirements.

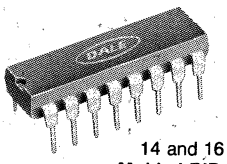
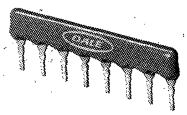
DUAL & SINGLE-IN-LINE PACKAGES
RESISTOR/CAPACITOR NETWORKS



14 and 16 Pin
Molded DIP styles



4 thru 12 Pin
Coated SIP styles

R/C Networks

FEATURES

- Ideal where repetitive circuits are required.
- Wide range of R/C values for special applications.
- High density packaging for reduced assembly costs, improved performance and simplified board layout.
- Utilize same thick film circuit materials as those qualified to MIL-R-83401.
- Capacitors available to EIA RS 198 or MIL-C-55681.

DUAL-IN-LINE
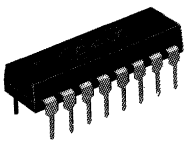
THIN FILM RESISTOR NETWORKS

MODELS TDP14 and TDP16



SPECIFICATIONS

Resistance Range: 100Ω to 100KΩ

Resistance Tolerance: 1%, .5%, .1%

Ratio Match: .05%, .1%, .5%

Resistance Temperature Coefficient: ±25 PPM/°C; ±10 PPM/°C available (−55°C to +125°C)

Resistor Power Rating:
01 Circuit = .05 watt/resistor at 25°C
03 Circuit = .1 watt/resistor at 25°C

Package Power Rating: .7 watt/package at 25°C

Maximum Operating Voltage: 100 VDC

Voltage Coefficient of Resistance: < 5 PPM/V typical

T.C. Tracking: ±5 PPM/°C (−55°C to +125°C)

Operating Temperature Range: −55°C to +125°C

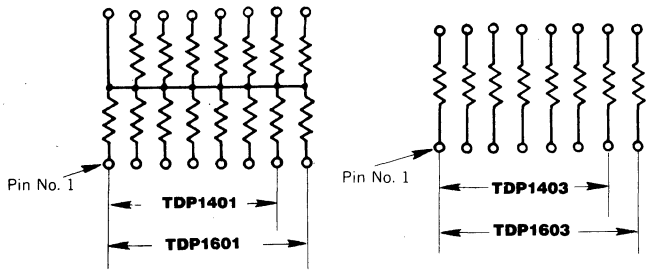
Storage Temperature Range: −55°C to +150°C

Terminals: Solder Coated Copper Alloy

Body: Molded Epoxy

Resistive Material: Nichrome film

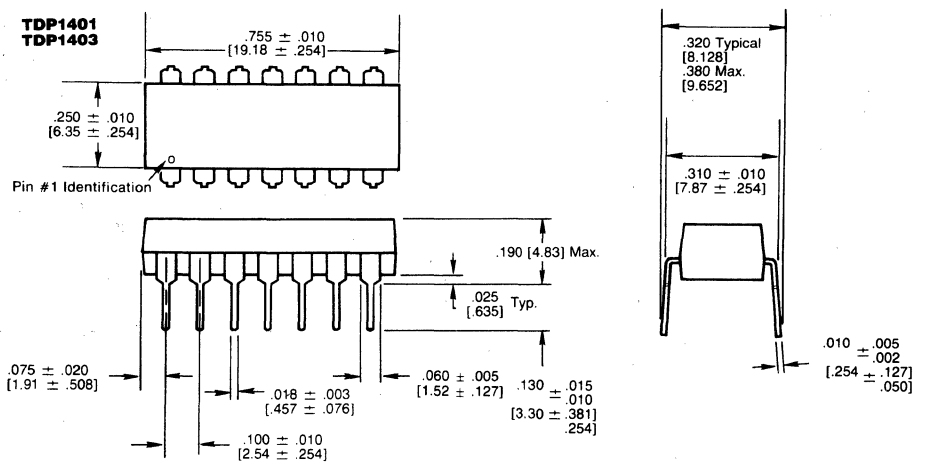
STANDARD SCHEMATICS

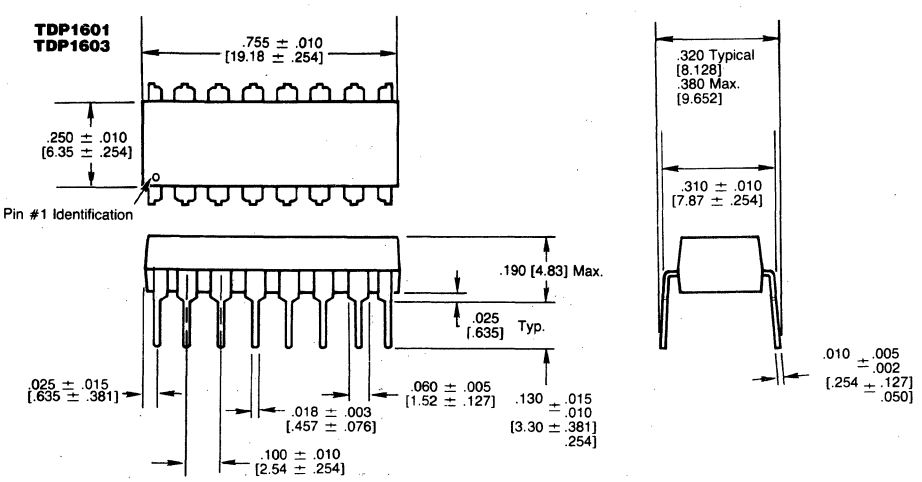


DIMENSIONS [Numbers in brackets indicate millimeters]

APPLICATIONS

- Precision voltage/current dividers
- Differential, instrumentation and summing amplifiers
- Converter ladder, scaling and range setting
- Oscillators and active filters





NOTE:
Other Dale thin film products include thin film chips, including styles compatible with chip carrier and custom packages. Consult factory.

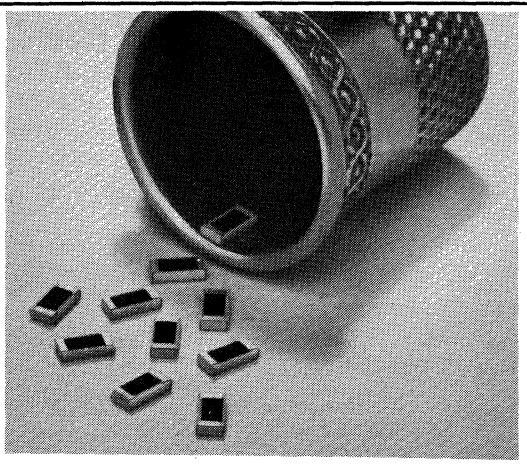
DALE®

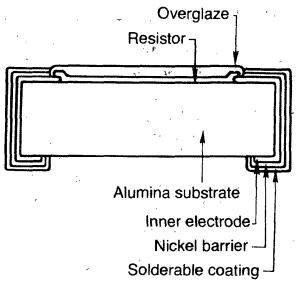
COMMERCIAL
THICK FILM CHIP RESISTORS



MODEL CRCW

FEATURES

- Internationally standardized size
- Automatic placement compatibility
- Flow solderable
- Thick film resistance element
- Wraparound termination
- Inner electrode protection



ELECTRICAL SPECIFICATIONS

Resistance Tolerance and Temperature Coefficient Range:

CRCW 0805: 20Ω to 150K, ±1%, ±100 PPM/°C
10Ω to 1 Meg., ±1%, ±2% and ±5%, ±200 PPM/°C
Zero ohm jumper (0.05Ω max., 1 amp max.)

CRCW 1206: 20Ω to 300K, ±1%, ±100 PPM/°C
10Ω to 2.2 Meg., ±1%, ±2% and ±5%, ±200 PPM/°C
Zero ohm jumper (0.05Ω max., 2 amp max.)

CRCW 1210: 20Ω to 220K, ±1%, ±100 PPM/°C
10Ω to 1.5 Meg., ±1%, ±2% and ±5%, ±200 PPM/°C
Zero ohm jumper (0.05 max., 4 amp max.)

Power Rating and Maximum Operating Voltage: (@70°C)
CRCW 0805: 62.5MW, 100V
CRCW 1206: 125MW, 200V
CRCW 1210: 250MW, 200V

Maximum Ambient Temperature: 125°C (see derating curve)

Temperature Range: −55°C to +125°C

DIMENSIONAL SPECIFICATIONS:

FEATURES

- Allows wide design flexibility for use with hybrid circuitry
- One-surface and wrap-around teminations
- Choices of sizes and power ratings
- Dale has complete capability to develop specific reliability programs designed to customer requirements
- Custom sizes can be designed for special applications

RCM and RCWM SPECIFICATIONS

ELECTRICAL

Resistance and Tolerance Range:
RCM/RCWM550: 10Ω to 500K, ±1%, 2%, 5% and 10%
10Ω to 500K, ±5% and 10%
RCM/RCWM575 and 5100:
10Ω to 1 Meg., ±1%, 2%, 5% and 10%
10Ω to 1 Meg., ±5% and 10%
RCM/RCWM5150 10Ω to 1 Meg., ±1%, 2%, 5% and 10%

Resistance Temperature Coefficient:
(−55°C to +125°C) "M" = ± 300 PPM/°C
"K" = ± 100 PPM/°C

Power Rating: Maximum at +70°C
RCM/RCWM550 = 50 MW
RCM/RCWM575 = 100 MW
RCM/RCWM5100 = 100 MW
RCM/RCWM5150 = 150 MW

RC and RCW SPECIFICATIONS

ELECTRICAL

Resistance Range:
RC/RCW550: 5Ω to 2 Meg.
RC/RCW575: 5Ω to 5 Meg.
RC/RCW5100: 10Ω to 10 Meg.
RC/RCW5150: 10Ω to 15 Meg.
RC/RCW1100: 5Ω to 5 Meg.
RC/RCW7225: 10Ω to 15 Meg.
RC/RCW2010: 10Ω to 15 Meg.
RC/RCW2512: 10Ω to 15 Meg.
RC/RCW1206: 10Ω to 1 Meg.

Resistance Tolerance: ±1%, ±2%, ±5%, ±10%, ±20%

Resistance Temperature Coefficient:
(−55°C to +125°C) ±200 PPM/°C

Power Rating (@ 70°C) and Maximum Operating Voltage:
RC/RCW550 = 100 MW, 50 VDC
RC/RCW575 = 150 MW, 70 VDC
RC/RCW5100 = 200 MW, 100 VDC
RC/RCW5150 = 350 MW, 125 VDC
RC/RCW1100 = 400 MW, 100 VDC
RC/RCW7225 = 600 MW, 200 VDC
RC/RCW2010 = 800 MW, 200 VDC
RC/RCW2512 = 1000 MW, 200 VDC
RC/RCW1206 = 250 MW, 100 VDC

Operating Temperature Range: −55°C to +125°C

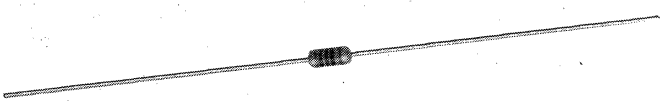
DALE®

COMMERCIAL METAL FILM RESISTORS

MODELS CCF-07, CCF-50 and CCF-55, COATED

1%, 2%, 5% Tolerance

TAPE AND REEL PACKAGING



FEATURES

- 1/4 watt at 70°C power rating
- Superior electrical performance. CCF-50 meets or exceeds MIL-R-10509. CCF-55 meets or exceeds MIL-R-22684 (RL07) and MIL-R-10509 (RN55D). CCF-07 meets electrical requirements of MIL-R-22684 (RL07) and MIL-R-11
- Flame retardant epoxy conformal coating
- Color band marking for ease of identification after mounting

SPECIFICATIONS

ELECTRICAL

Resistance Range: 10Ω to 1 Megohm, ±1%, ±2%
10Ω to 2 Megohms, ±5%

Resistance Tolerance: ±1% (CCF-50, CCF-55) ±2%, ±5% (CCF-07)

Resistance Temperature Coefficient: ±100 PPM/°C = CCF-07, 2% tolerance (−65°C to +150°C); CCF-50, CCF-55 (−65°C to +165°C). ±200 PPM/°C = CCF-07, 5% tolerance (−65°C to + 150°C)

Resistor Power Rating: 1/4 watt at +70°C

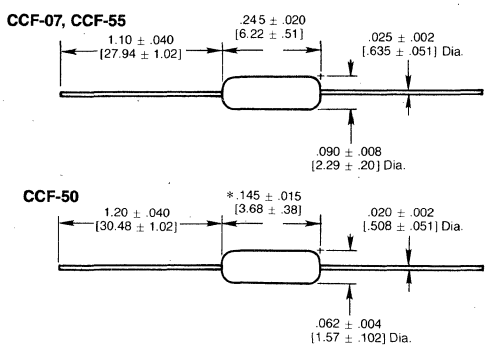
Maximum Working Voltage: 250 VRMS = CCF-07 and CCF-55
200 VRMS = CCF-50

Insulation Resistance: 10,000 Megohms

Operating Temperature Range: CCF-07 = −65°C to +150°C; CCF-50 and CCF-55 = −65°C to +165°C

PHYSICAL CONFIGURATION

[Numbers in brackets indicate millimeters]



*Leads solderable to within .062 [1.57] of the ends of the body.

RESISTANCE VALUES

CCF-07 is available in the standard 24 resistance values per decade. **CCF-50** and **CCF-55** are available in the standard 96 resistance values per decade. Values are obtained from the appropriate decade table by multiplying by powers of 10. Example: 24 = 24 ohms, 240 ohms, 2.4K, 24K or 240K.

CCF-07			CCF-50 and CCF-55										
10	22	47	10.0	12.1	14.7	17.8	21.5	26.1	31.6	38.3	46.4	56.2	68.1	82.5
11	24	51	10.2	12.4	15.0	18.2	22.1	26.7	32.4	39.2	47.5	57.6	69.8	84.5
12	27	56	10.5	12.7	15.4	18.7	22.6	27.4	33.2	40.2	48.7	59.0	71.5	86.6

DALE®

SPECIAL PURPOSE PRECISION THIN FILM RESISTORS

MODEL PTF, COATED
Low T.C.—Tight Tolerance

FEATURES

- Performance exceeds MIL-R-55182 requirements
- Extremely low temperature coefficients of resistance
- Very low noise and voltage coefficient
- Wide precision resistance range in small package
- 100% laser spiralled
- Very good high frequency characteristics
- Proprietary epoxy coating provides superior moisture protection
- Acceptance testing available
- Can replace wirewound bobbins

MATERIAL

Element: Precision deposited nickel-chrome alloy with controlled annealing

Core: Fire-cleaned high purity ceramic

Encapsulant: Specially formulated epoxy compounds. Coated construction.

Termination: Standard lead material is solder-coated copper. Solderable and weldable per MIL-STD-1276, Type C.

STANDARD ELECTRICAL SPECIFICATIONS

DALE TYPE	85°C RATING	MAX. WT. (Grams)	MAX. WORKING VOLTAGE	RESISTANCE RANGE
PTF 51	1/20 W	.11	200	50Ω to 100K
PTF 56	1/8 W	.35	300	50Ω to 499K
PTF 65	1/4 W	.75	500	50Ω to 1 Meg.

Standard tolerances from 1% to .01%.

PHYSICAL CONFIGURATIONS

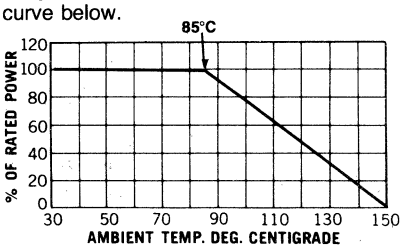
DERATING

Dale PTF resistors have an operating temperature range of −55°C to +150°C. They must be derated according to the curve below.



MATCHED SETS — NETWORKS

Dale's many years of experience in matching resistors for sets and networks, combined with the superb performance of the PTF product, provide the best and most economical solution to your precision resistor requirements. Why? Because most applications for precision resistors depend on two or more discretes having an initial tolerance ratio and a resistance tracking capability over temperature rather than each discrete resistor meeting the absolute requirements of the application.

Cost savings approaching 50% can be realized when relatively tight matching requirements are specified while permitting the absolute parameters of the discrete resistors to have more relaxed specifications.

Dale application engineers are available to assist you in specifying your requirements in the most economical way possible.

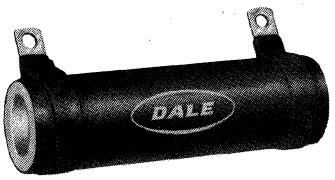
INDUSTRIAL POWER WIREWOUND RESISTORS

(Includes coating and terminal band.)



MODEL HL
TUBULAR

For inexpensively dissipating larger amounts of power in DC or low frequency AC circuits.

Applications include:

- Grid resistor
- High voltage bleeder resistors in power supplies
- Voltage divider networks
- Load resistor
- Voltage dropping resistor
- Bias supply resistor
- Filament dropping resistor
- Shunt resistor

*Minimum resistance is .1 ohm for all models. **Contact factory for optional, non-standard terminals, including quick disconnect types.

5% tolerance is standard on values 1 ohm and above, 10% on values below 1 ohm. Lower tolerances available.

MODEL HL
FLAT

FEATURES

- High power-to-size ratio
- Mounting accommodations ideally suited to high density packaging
- Self-stacking hardware for horizontal or vertical placement
- Withstand high vibration without loosening
- Mountings function as heat sinks allowing greater heat dissipation and less derating of stacked units

*Contact factory for optional non-standard terminals including quick disconnect types.

Tolerance: ±10% standard. Also available in ±5%.

Temperature Rise: 375°C at full power. Slightly higher temperatures will occur in maximum resistance units.

Dielectric: 1000 V from terminals to mounting hardware.

Construction: A ribbon element is edgewound onto a ceramic tube and is coated with silicone. Silicone coating holds ribbon wire firmly against core while allowing maximum exposure of wire surface for heat transfer by radiation.

ALSO AVAILABLE:

Dale Type NHL, Non-Inductive, Tubular Resistors. 12W, 20W, 25W, 50W, 100W, 175W and 225W.

Dale Type HLM, Miniature Flat Resistors. 10W and 20W.

Dale Type HLA, Adjustable Resistors. 12W, 20W, 25W, 50W, 100W, 175W and 225W.

Dale Type HLT, Tapped Resistors. Provides fixed taps for voltage dividers.

INDUSTRIAL POWER WIREWOUND RESISTORS

MODEL CW
COATED, AXIAL LEAD

FEATURES

- High performance for low cost
- High-temperature silicone coating
- Complete welded construction
- High power/size ratio
- Excellent stability in operation

*Maximum working voltage determined at .0008" diameter wire resistance values.
**Values available down to .005Ω in 10% tolerance.

SPECIFICATIONS

MATERIAL

Core: Ceramic: Steatite or alumina, depending on physical size.

Element: Copper-nickel alloy or nickel-chrome alloy, depending on resistance value.

End Caps: Stainless steel.

Coating: Special high temperature silicone.

Standard Terminals: Tinned Copperweld®

ELECTRICAL

Dielectric Strength: 1000 VAC minimum

Tolerance: Standard tolerance is ±5% 1 ohm and above. ±10% below 1 ohm. 3% available.

Temperature Coefficient: ±90 PPM/°C below 1Ω; ±50 PPM/°C 1Ω to 9.9Ω; ±30 PPM/°C 10Ω and above.

Short Time Overload: 5 seconds at 5 times rated power for 3.75 watt size and smaller; 5 seconds at 10 times rated power for 4 watt size and larger.

POWER RATING

Dale CW Series have two power ratings, depending on operating temperature and stability requirements.

CHARACTERISTIC U

1. 275°C maximum hot spot temperature
2. .5% maximum ΔR in 2000 hour load life

CHARACTERISTIC V

1. 350°C maximum hot spot temperature
2. 3% maximum ΔR in 2000 hour load life

DERATING (Type CW)
Dale CW coated resistors have an operating temperature range of −55°C to +350°C. They must be derated at high ambient temperatures according to the curves at right.

SPECIFICATIONS

ELECTRICAL

TYPE CP

Tolerance: ±10% standard, ±5% also available

Operating Temperature: −55°C to +275°C

Temperature Coefficient:
Below 1 ohm 0 ± 800 PPM (Typ.)
1 ohm and above 0 ± 400 PPM (Typ.)

TYPE CPL

Resistance: .01Ω to .10Ω

Tolerance: ±5% standard, ±3% also available. Lower tolerances available.

Dielectric Strength: 1000 VAC

Temperature Coefficient: Varies with resistance values. Consult factory.

DALE® RESISTOR SELECTION GUIDE

• Metal Film • Metal Oxide • Carbon Film • Wirewound

The industry's most complete selection of discrete resistors.
■ COMMERCIAL ■ INDUSTRIAL
■ PRECISION ■ ESTABLISHED RELIABILITY

TO USE:
Resistors are listed by power rating. Locate the wattage which matches your requirement, then match with the Dale Type closest to your needs in T.C., value, tolerance, etc. For more information, contact your Dale representative or the appropriate Dale factory listed at the right:

ELEMENT TYPE	FACTORY TO CONTACT

*Hermetically Sealed. **Flat Radial Lead Package.

NOTES: (1) Military power ratings are shown for RN, RNC, RL, RLR metal film resistors. Note that CMF metal film resistors can be rated higher for commercial use...see catalog. (2) Where 20 PPM is specified on wirewound resistors, it applies to 10 ohms and up. 1-9.9 ohms = 50 PPM, 1 ohm = 90 PPM. (3) MF (Metal Film), OF (Oxide Film), MO (Metal Oxide), CF (Carbon Film), WW (Wirewound). (4) Other values available, consult factory. (5) On HL and CW resistors, standard tolerance is 10% below 1 ohm.

RESISTOR CATALOG

All resistors in this guide are described in Dale's comprehensive new full line catalog. For a free copy, write on your letterhead to: Dale Electronics, Inc., Dept. 860, 2064 12th Avenue, Columbus, NE 68601.

In addition to the resistors shown, many non-standard versions are available or can be engineered to match your needs.

DALE RESISTOR NETWORKS, CHIP RESISTORS AND THERMISTORS

are described elsewhere in this EEM listing.

THERE'S ONLY ONE PLACE IN THE WORLD TO BUY RESISTORS. . .

ELECTRO COMP SILICONE

RESISTANCE RANGE: .01Ω to 250 KΩ

- Quality + Economy
- Solvent Resistant Coating
- Low Temperature Co-efficient (std. 20 PPM/°C)
- Standard Tolerance ±5% (Available up to ±.01%)
- All Welded Construction
- Excellent Breakdown Voltage Ratings
- 100% Testing for 1000 Volts DSI
- Power Derating to Zero at 350°C
- Meets Requirements of MIL R-26

MATERIALS

Core: High Alumina Ceramic
Element: Nickel/Chromium, Nickel/Copper & Other Special Alloys
End Caps: Stainless Steel
Leads: Tinned Copperweld, Tinned Copper
Coating: High Temperature Silicone Compound

PRECISON POWER RESISTORS

CHASSIS MOUNT ALUMINUM—FINNED HEAT SINK 5 through 250 Watts

Chassis Mount, EC units are designed for maximum heat dissipation by mounting solidly to metal chassis surface for maximum heat transfer. They are outstanding for their high power dissipation with precision tolerances in minimum physical sizes.

ELECTRICAL SPECIFICATIONS

- Resistance Range — .05 ohms to 275K ohms.
- Tolerance — 5%, 3%, 1%, .5%, .25%, .05%.
- Temperature Coefficient — ±20 PPM to 90 PPM

GENERAL SPECIFICATIONS

- Lower hot spot ratings due to exclusive complete encapsulation of element within anodized auminum body.
- Welded construction throughout assures long stable load life.
- Heavy spade lug type leads on 5 through 70 watt sizes, threaded heavy stud terminals on 100 through 250 watts.
- 1000 VAC minimum dielectric strength on 5W and 10W; 2500 VAC on 25W, 50W and 100W; 5500 VAC on all others.
- Temperature Range — −55°C to +275°C.
- Eight standard sizes.

DERATING CURVES

Temperature of −55°C to +275°C. Derating is required for reduced chassis mounting area and high ambient temperature.
Curves: A—When mounted on proper aluminum Chassis: 4x6x2x.040 aluminum chassis = EC5, EC10; 5x7x2x.040 aluminum chassis = EC25; 12x12x.059 aluminum panel = EC50, EC100; 12x12x.125 aluminum panel = EC110, EC180, and EC250; B—Unmounted EC5, EC10; C—Unmounted EC25, EC100 and EC110; D—Unmounted EC50, EC180 and EC250.

Passivation: Optional, thermo-plastic recommended for solder applications.	

* When bonded to substrate, value dependent, @ 125°C. ** All sizes available in center tapped versions.

Surface Mounted Resistor Networks

RATIO TOLERANCES TO 0.01%
ANY COMBINATION OF RESISTOR VALUES FROM 20Ω TO 250 KΩ

HERMETIC CHIP CARRIERS — standard JEDEC hermetic chip carries to full MIL STD 883B specifications. Available with from 16 to 64 terminals.

WRAP-AROUND CHIP RESISTORS — several sizes available for faceup surface mounting, permitting customer trim after mounting.

FLIP CHIPS — solder bumped; coated, multi-resistor substrates for face down attachment. Suitable for reflow soldering assembly. Low cost and fast production in custom networks.

VERSA-CHIP — New low-cost, surface-mounted packaging design for precision resistor networks. Provides pin-for-pin equivalency with chip carriers, and versatility for many alternate configurations. Laser-trimmable by customer after mounting.

Microwave Components

METALIZED PLATES — metalized on 1 or 2 sides; as fired or polished substrates, in house laser hole drilling and contouring, through hole metalization, and patterned edges. Metalization — see metalized ceramic substrates.

MICROWAVE ATTENUATOR CHIPS — (3rd Quarter) attenuation of 1, 2, 3, 4, 5, 6, 8, 10, 16, and 20 dB; frequency to 18 GHz.

LANGE COUPLERS — Fabricated to customer design to 0.4 MIL ±0.00005 MIL spacing.

Other New Products

R.C. NETWORKS — RC Networks are now available in standard SIP and DIP packages with tight tolerance RC time constants.

SILICON CHIP RESISTORS — (3rd Quarter) Standard and center-tapped chip resistors to compliment EFI's alumina-substrate chip resistors, TAW or NiCr, passivated.

PRECISION WIREWOUND RESISTORS

GENERAL RESISTANCE
A PRIME TECHNOLOGY COMPANY

1,500,000 resistors in stock — all manufactured to meet the most exacting standards of accuracy, stability and reliability.

General Resistance has been engaged in the development and manufacture of precision wirewound resistors for over 30 years. The widest possible range of form factors is available, including axial and PC mounting types, in resistance values and accuracies to meet virtually any requirement.

"Standard values" are normally available from stock. And *any* resistance value from 1Ω to 1,100,000Ω, as well as accuracies other than the "standard" ±0.1%, ±0.025% and ±0.01%, are available. .

All General Resistance resistors are manufactured to the exacting standards typified by military specifications such as MIL-R-93/ MIL-R-39005 (RB and RBR styles).

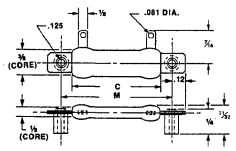
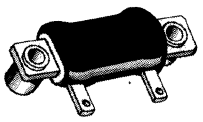
MINIATURE OVAL



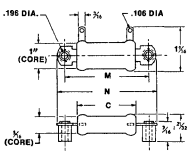


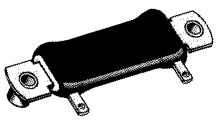
TYPE	WATT	C	M
FVOT-10	10	¾	1
FVOT-15	15	1	1¼
FVOT-20	20	2	2 5/16

NOTE: FVOT = VITREOUS
FSOT = SILICONE

Miniature oval resistors, by their basic design, are ideally suited for applications where space is limited and the mounting surface can be utilized for heat dissipation purposes. Resistors can be easily stacked into compact units. Standard tolerance is ±5% for 1 ohm and greater and ±10% for less than 1 ohm. Ayrton-Perry type non-inductive winding is available.

STANDARD OVAL





TYPE	WATT	C	M	N
FVOT-30	30	1¼	2	2½
FVOT-40	40	2	2¾	3¼
FVOT-55	55	3½	4¼	4¾
FVOT-65	70	4¾	5½	6
FVOT-75	95	6	6¾	7¼

NOTE: FVOT = VITREOUS
FSOT = SILICONE

Standard oval resistors, like the miniature ovals are easily stacked and utilize the mounting surface as a heat-sink. When stacking two or more parts, the individual resistors should be de-rated. Standard tolerance is ±5% for 1 ohm and greater and ± 10% for less than 1 ohm. Ayrton-Perry type non-inductive winding is available.

FVWL-20	20	7/16	1/4	2	1/8	1/4	—	.040	2	2½	6-32

NOTE: The above chart applies to both vitreous and silicone coated resistors. The "type" nomenclature shown is for vitreous coating. When ordering coating substitute the letter "S" for the letter "V" in the type.
EXAMPLE: FVT = VITREOUS FST = SILICONE

Huntington Electric's 5-20 watt tubular resistors are offered in a variety of styles to meet your specific applications. The 5-12 watt units are also available with a 3/16" male quick-connect terminal. All units are available with Ayrton-Perry type non-inductive winding on request. Standard tolerance is ±5% for 1 ohm and greater and ±10% for less than 1 ohm. For other specific options, consult factory.

Huntington Electric's 12-225 watt wirewound resistors, like all of our other sizes and types, feature all welded construction utilizing high quality ceramic cores, resistance wire, terminal materials and vitreous enamel or silicon coatings. A variety of optional features, including quick-connect terminals, non-inductive windings and multiple taps, along with special sizes, terminal configurations and resistance tolerances, are available. Consult factory for details. Standard tolerances for fixed resistors are ±5% for 1 ohm and greater and ±10% for less than 1 ohm. ±10% is standard for adjustable units.

Precision, Standard and Custom
RESISTOR NETWORKS

FEATURES:

- Hundreds of standard networks or your unique design
- Your choice of package: **SIP, DIP, JEDEC, LCC** (surface mount device)
- Either industrial (−25° to +85°C) or military (−55° to +125°C) temperature range
- Screening to MIL R-83401D or 883C
- Outstanding tolerances:
  - — Ratio matching to .005%
  - — Ratio tracking to ±0.5 ppm/°C
  - — Absolute tolerance to 0.05%
  - — Absolute TCR to ±10 ppm/°C
- Proprietary Nichrome mix resulting in high stability over time and temperature
- Passivated, hermetically-sealed, low moisture

THICK FILM RESISTOR NETWORKS

SERIES SC, DB

Standard resistor networks are on 96% aluminium oxide Al_2O_3 ceramic substrates using methods of screen printing and firing of thick film resistor networks. Resistors are laser calibrated. They are produced in Single-in-line (SIL) and Dual-in-line (DIL) pin versions. Surface protection is of epoxy resin guaranteeing excellent climatic characteristics.

FEATURES

△ Low Profile
△ Standard Profile and Size
△ High Reliability
△ Wide Resistance Range
△ Non-inductive Resistor
△ Low Assembly Costs

JULIE RESEARCH LABORATORIES INCORPORATED

PRECISION WIREWOUND RESISTORS

PRECISION RESISTORS FOR EVERY APPLICATION

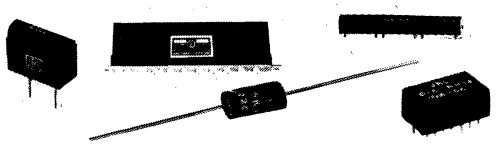
Precision Resistors for every application imaginable; high quality, low priced precision resistors are available for your every design need and at delivery schedules (1-2 weeks) even distributors can't beat!! JULIE RESEARCH resistors are guaranteed for a lifetime performance in almost every value, tolerance and stability.

Available as individual, ratio or network assemblies, these expertly manufactured and trimmed resistors assist you in eliminating countless hours of Production Test time from your design. In addition, the use of these very stable resistors contribute to reliable design and reduced component count. Specify a Julie Resistor. Better yet, call us and we will assist in helping you get the best price-performance unit your application and budget will allow.

JUST A FEW OF THE PROVEN APPLICATIONS FOR THESE LOW REACTANCE HIGH PERFORMANCE RESISTORS ARE:

- Transducer Calibrating Networks
- Current Metering
- Gyro Torquing
- AC and DC Precision Bridge Elements
- Amplifier Summing Elements
- D/A Converters
- Reference Divider
- Precision Multiplier
- Resistive Divider Networks
- Shunting
- AC or DC Ratio
- High Performance MIL Spec
- Zener Trimming Networks

RESISTOR STYLES



SPECIFICATIONS

Precision wirewound resistor accuracy and stability available in standard DIP styles.

Range: 100Ω to 100 KΩ per resistor.
Ratio Accuracy: To .001% for ratio 1:1.
Stability: Network .002% for standard ranges.
Temperature Coefficient: 1 ppm/°C to 20 ppm/°C.
Delivery: 3-4 weeks.
Custom designs available — contact factory for other package styles.

SPECIFICATIONS

Range: Individual Resistors, 0.1 ohm to 5 megohms. Ratio Sets, 1:1 to 10^6:1 depending on total resistance required.
Accuracy: Standard accuracy of resistors, 0.005% for values from 1000 ohms to 5 megohm. Standard accuracy of ratio sets, 0.0025% for ratios near 1:1. Accuracies from 0.002% to 0.1% are available (at corresponding prices) on special order.
Stability: Resistors, 0.002% per year for standard ranges.
Accuracy Over Military Temperature Range: ±0.02% from −45°C to +85°C.
Matching Over Military Temperature Range: ±0.005% from −45°C to +85°C.
Retrace Over Military Environmental Conditions: 0.002%.
Temperature Coefficient: Resistors, 5 ppm/°C standard. (Available as low as 1.0 ppm/°C). Ratio sets, 2.5 ppm/°C standard. (Available as low as 0.7 ppm/°C).
Note: Temperature Coefficient can be altered, in manufacture, over wide ranges.
Thermal Transients: All thermal-induced transient effects, e.g.: self-heating, Seebeck and Peltier effects, are less than 0.0015% at rated power dissipation. Self-heating and time constants of thermal transients are reduced to 10% of normal values in air.
Current Capability: To 2 amperes.
Voltage: Between Terminals, 300 volts maximum, Terminals to Case, 500 volts maximum.

SPECIFICATIONS

Range: Individual Resistors, 1 ohm to 10 megohms. Ratios, 1:1 to 10^6:1, depending on total resistance required.
Accuracy: Standard accuracy of resistors, 0.01%, for values from 100 ohms to 5 megohm. Standard accuracy of ratios, 0.005%, for ratios near 1:1. Intermediate accuracies of 0.05% and up and higher accuracies to .0025% are available on special order.
Stability: Resistors 0.003% per year for standard ranges.
Accuracy Over Military Temperature Range: 0.02% from −30°C to +85°C.
Retrace Over Military Environmental Conditions: 0.003%.
Temperature Coefficient: Resistors, 5 ppm/°C standard, (available as low as 1.0 ppm/°C). Ratios, 2.5 ppm/°C standard, (available as low as 0.7 ppm/°C).
Note: Temperature Coefficient can be altered, in manufacture, over over wide ranges.

SPECIFICATIONS

Range: Individual Resistors, 1 ohm to 100 ohms.
Accuracy: Standard accuracy of resistors, 0.01%, for values from 1.0 ohm to 100 ohms. (R_1xG) .005% (CH).
Stability: Resistors 0.003% per year for standard ranges.
Accuracy Over Military Temperature Range: 0.02% fom −30°C to +85°C.
Retrace Over Military Environmental Conditions: 0.003%.
Temperature Coefficient: Resistors, 5 ppm/°C standard, (available as low as 2.5 ppm/°C).
Note: Temperature Coefficient can be altered, in manufacture, over wide ranges.
Voltage and Power Ratings: See chart.
Construction: See charts.
Group Encapsulation: Special techniquies permit group encapsulation of high-accuracy units on a high-yield basis, enabling better accuracies at competitive costs. (See JRL Bulletin B-11.)

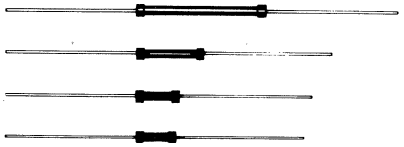
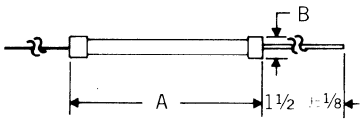
HIGH VOLTAGE
- PRECISION RESISTORS
- DIODE ARRAY

SERIES I RESISTORS
PRECISION HIGH OHMAGE HIGH VOLTAGE RESISTORS



FEATURES
- Tinned copper leads .020" or .032" standard. Other lead materials available
- Conformal epoxy coated
- Glass overglaze for vacuum applications



NOTES
- Voltage coefficient is dependent on resistance value. Typically less than 5 PPM/V in mid resistance values
- Burn in and other preconditioning options available
- Tolerance to ½% on request

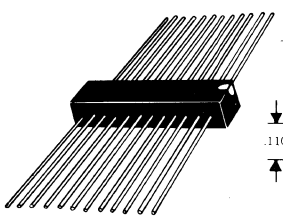
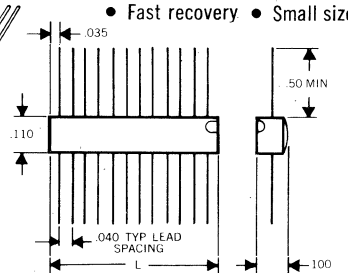
MINIATURE HIGH VOLTAGE DIODE ARRAY

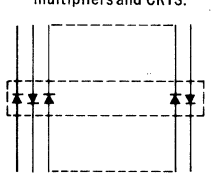
FEATURES
- Low reverse leakage current
- Fast recovery • Small sizes





MECHANICAL
- Lead Diameter .015 max
- Lead Material—Silver
- Encapsulant—Epoxy

APPLICATIONS
- Typical applications are power supplies which generate the high voltage required for image intensifiers photomultipliers and CRTS.



SPECIFICATIONS:

EEM PRODUCT SELECTION GUIDES

Use the EEM Product Selection Guides. There are 34 Guides in this edition of EEM. See page 2 (A•2, B•2, C•2, D•2) of each volume to locate the Product Selection Guides that pertain to your needs.

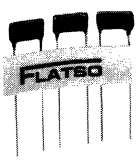
THICK AND THIN FILM ELECTRONIC COMPONENTS

DIP RESISTOR NETWORKS
MIL-R-83401

Thick film epoxy molded DIP resistor networks are available in both Commercial and M-83401 Mil-approved configurations. 14 and 16 Pin, A and B Schematics in standard resistance values are available from stock. Custom designed circuits for your unique requirements are a specialty.

RESISTOR NETWORKS

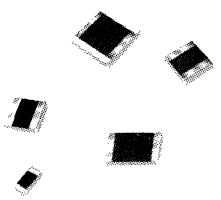
LCC resistor networks offer the designer, format compatibility between resistor networks and semiconductor devices. Custom circuits can be developed for up to 8 resistors in a .350" x .350" package. These circuits offer resistor values up to 500K ohm, TCs as low as 100ppm/°C and package power dissapations to .4 watts. Tolerances to 1% and ratio matching to .5% are available. These devices are suitable for use over the temperature range of −55°C to +125°C.



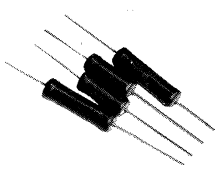
KDI Electronics offers seven "FLATSO" resistors with voltage ratings to 20 KV and power ratings from .25 watts to 5 watts. Resistance values from 50Ω to 5,000 Meg and temperature coefficients to ±100 PPM/°C are available depending on value. Custom Flatso Networks and non-standard values will be quoted upon request.

THICK FILM CHIP RESISTORS

A complete line of Thick Film Chip Resistors are available in eight sizes. These chips feature boths single-sided and wrap-around terminations. They are available with platinum gold, gold, and solder coated terminations. The resistance range is from 5.1 ohms to 4 megohms. Also available are extended range values to 500 megohms. Tolerances from 1% to 20% are standard as are temperature coefficients from 100 PPM/°C to 250 PPM/°C. Power capabilities range from 50 mW to 0.5 Watts. These chip resistors offer high rel design and construction and environmental testing is available.



HIGH VOLTAGE

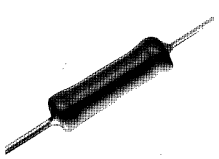


Axial lead thick film resistors for both high voltage and high resistance can be supplied in voltage ratings to 40 KV and resistance values to 1,000 Meg. Fired at over 900°C, these resistors are unmatched in performance with proven load life stability.

HIGH VOLTAGE. THICK FILM NETWORKS

Voltage dividers and other networks are available with ratings up to 60 KV. Divider Networks have tolerances to 1% with TC tracking to 25 PPM/°C. They can be manufactured with a resistance range from 10 ohm to 1,000 megohm. These networks are available in leaded and unleaded styles, in both standard and custom configurations.

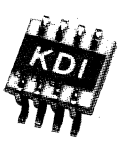
METAL FILM



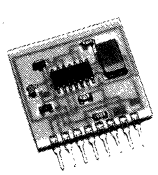
Conformal coated high precision metal film resistors offer superior stability and reliability at a reasonable cost. Features include: small size, impervious to moisture, low noise, low T.C. and resistance range of 10 ohms to 70 Megohms. Surpasses MIL-R-10509 and MIL-R-55182. In-plant testing facilities as well as matched networks are available. Standard T.C.: ±10, ±25, ±50, and ±100 ppm/°C.

"SO" RESISTOR NETWORKS

In order to gain the maximum benefit from the use of "SO" packaged semi-conductors, a compatable format for resistor networks is desirable. KDI offers a resistor network packaged to fit the "SOIC 8" footprint. General specifications for these custom networks include; resistance range up to 500K ohms, package power to .4 watts, up to 8 resistors, tolerance to 1% and ratio matching to .5%. These devices are suitable for operation over the temperature range of −55°C to +125°C.



THICK FILM HYBRID CIRCUITS



Custom Thick Film Hybrid circuits are produced using any type of surface mountable semiconductor and chip component. Both Single-in-Line and Dual-in-Line styles are available and custom packaging formats can be accommodated also. Circuits can utilize any combination of semiconductors, capacitors, resistors and chip inductors. Full functional and parametric testing is available as well as any required environmental tests. All the features of Thick Film resistor networks, such as tight tolerances and ratio tracking, as well as low TC are inherent in hybrid circuits.

CHIPLESS™ RESISTOR/ CAPACITOR NETWORKS AND CAPACITOR ARRAYS

These standard and custom circuits are available in both Dual-in-Line and Single-in-Line formats and offer cost effective alternatives to discrete designs. These circuits and arrays utilize our Thick Film Capacitor technology and therefore require no "add on" chips. Capacitor elements are available with NPO or X7R characteristics. Values range up to several thousand picofarads with tolerances to 5% and matching to 2.5%. Resistor elements range from 10 ohms to 10 meg ohm with tolerance to 0.5%, TC to 100 ppm and matching to 0.1%.

KELVIN

Precision Wire-wound Resistors, Power Resistors & Resistor Networks

Kelvin is a pioneer in the field of very high stability, close tolerance, precision wire-wound resistors. Resistors shown represent only part of the broad Kelvin line. Complete catalog data is available on request.

HIGH RELIABILITY "HRL" SERIES

Kelvin's "HRL" Series was generated after years of experience on the Polaris, Gemini, Apollo and other important high reliability missile and space programs. Kelvin has combined the many and varied parameters of these programs into a single resistor series, designed to meet the stringent high reliability requirements of many of today's military and commercial systems.

Kelvin's reliability goal, through the design and controls of the "HRL" Series resistor and the use of acceptance inspection procedures, was to produce precision wire-wound resistors having failure rates better than .0005%/1000 hours at a 90% confidence level. Present level is .00064%/1000 hours at a 60% confidence level.

All "HRL" resistors have a documented history. This includes traceability from the spool analysis of the resistance wire, through each phase of the production operation to the finished product. Each resistor is screened to eliminate INFANT MORTALITY. This consists of a 100 hour burn in at full rated power at 125°C and a short time overload at twice the rated power. Other tests are conducted as outlined in Bulletin HR 02449, which presents the complete procedure and methods approach for production of "HRL" resistors.

PRINTED CIRCUIT TYPES

TOLERANCES: 1% through .005% available on most types and resistance values.

TEMPERATURE COEFFICIENT: ±20 ppm/°C standard.

T.C.s available to 1 ppm depending on size, value and temperature range.

WINDINGS: Non-inductive.

*WATTAGE RATINGS: Based on a maximum ambient temperature of 125°C, derated to zero watts at +145°C.

**RESISTANCE MAX.: Contact factory for availability of values above maximum shown.

CATALOG #763 COVERS ALL PRODUCTS SHOWN ON THIS PAGE

KELVIN 5919 NOBLE AVENUE, VAN NUYS, CALIFORNIA 91411 TELEPHONE (818) 782-6662

FAST RISE TIME APPLICATIONS

"RT" style resistors provide exceptionally high frequency performance, in addition to the other recognized advantages of wire-wound resistors. "RT" resistors can be supplied with rise times as low as 100 nanoseconds (from 10% to 90% of peak pulse amplitude at 100 KC), depending on resistance values and physical configurations. See Catalog #763

TOLERANCES: 1% through .005% available on most types and resistance values.

TEMPERATURE COEFFICIENT: ±20 ppm/°C standard.

T.C.s available to 1 ppm depending on size, value and temperature range.

WINDINGS: Non-inductive.

*WATTAGE RATINGS: Based on a maximum ambient temperature of 125°C, derated to zero watts at +145°C.

SERIES KM MOLDED, POWER RESISTORS

Series KM are general purpose, reliable power resistors designed to be used where heat sinks are not available or not desired. These resistors are extremely stable for their size as compared to film types. Series KM are considered to have the lowest dollar per watt cost of precision resistors. Send for Bulletin K-1.

TOLERANCES:

KM025, KM050, KM100—.1% thru 5%
KM200 thru KM1000—.05% thru 5%

TEMPERATURE COEFFICIENT:
(Per Degree Centigrade)

±20 PPM (170 ohms and above)
±30 PPM (10 to 170 ohms)
±50 PPM (1 to 9.99 ohms)
Below one ohm—contact factory

T.C.s to 5 PPM/°C available depending on size and value.

NON-INDUCTIVE STYLES: Reduce resistance values by approximately 50%; derate maximum working voltage by 30%. Add "N" to part number. Example: KMN025.

KELVIN PART NUMBER	WATTAGE @ 25° C	DC Working Voltage	Maximum Resistance	SIZE and TOLERANCES Length	Diameter	Lead Length (±0.125)	Lead Diameter (AWG)	Equivalent Military Styles MIL-R-26E

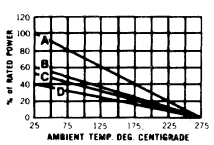
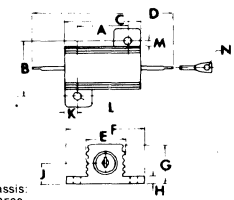
SERIES KC CHASSIS MOUNT POWER RESISTORS

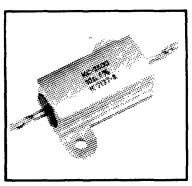
DERATING CURVES

Derating is required for reduced chassis mounting area and high ambient temperatures

Curves:







A — When mounted on proper aluminum chassis:
48 sq. inches 0.040 aluminum for KC500 and KC1000
70 sq. inches 0.040 aluminum for KC2500
144 sq. inches 0.040 aluminum for KC5000

B — Unmounted KC500 and KC1000
C — Unmounted KC2500
D — Unmounted KC5000

Designed to provide maximum heat dissipation through heat sink and finned case configuration. Ideally suited where large amounts of power must be dissipated and small size is important. Capable of maintaining their precision tolerance in wattage ratings up to 50 watts. Send for Bulletin K-3.

TOLERANCES: 0.05% through 5.0%.

TEMPERATURE COEFFICIENT:
(Per Degree Centigrade)

TC	KC500	KC1000	KC2500	KC5000
±50PPM	1 Ω to 9.9 Ω	1 Ω to 9.9 Ω	1 Ω to 9.9 Ω	1 Ω to 9.9 Ω

SERIES KM-4T & KC-4T POWER RESISTORS

KELVIN FOUR TERMINAL POWER RESISTORS provide low resistance and close tolerance capabilities to users who require accurate measurements in tightly designed circuits. The two voltage (sense) leads will yield a very precise measurement at the points where they join the current leads. Lead resistance, which plays a predominant role in low ohm resistors, is virtually eliminated.

GENERAL FEATURES

TOLERANCES:	1% through 10%
RESISTANCE RANGE:	.001 ohms and up
TEMPERATURE COEFFICIENT:	.1Ω to 1Ω ±90 PPM/°C .05Ω to <.1Ω ± 150 PPM/°C Below .05 ohm—Check Factory
TEMPERATURE RANGE:	−55°C to +275°C
DIELECTRIC STRENGTH:	1000 VRMS all styles except KC5000-4T at 2500 VRMS
LEADS:	Tinned copperweld

See KM & KC Series this page for additional specifications.

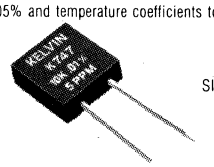
K747 WIREWOUND RESISTOR

Lead Size:	#22 (.025) solder-coated brass
Lead Spacing ℄ to ℄:	.150" (±.010)
Wattage:	.3 watts
Voltage:	200 volts
Resistance Range:	.5Ω to 400K
Resistance Tolerance:	1% thru .005%
Temperature Coefficient:	±5 PPM standard (0–85°C)
TC Tracking:	±3PPM/°C Typical—Available to ±1PPM/°C (Value dependent)
Stability:	25PPM/year
Rise Time:	25 nanoseconds (value dependent)
Noise:	Not measureable on commercially available equipment
Environmental:	Exceeds all requirements of MIL-R-39005

Designed specifically to interchange with film resistors of same physical configuration. Performance characteristics show the K747 series to be superior in almost all instances. Send for Bulletin K747.

For closer tolerances to .005% and temperature coefficients to 1 PPM (0 to 60°C referenced to 25°C), request Bulletin K746.



SIZE: 320±.020 H,
.295±.010 L,
.100±.015 W.
Or .100±.010W (specify K746)

Kelvin pioneered the close tolerance, close temperature coefficient and excellent long term stability wire-wound resistor. State-of-the-art manufacturing techniques and superior testing capabilities yield the ultimate in quality at a competitive price. Please contact your nearest Kelvin representative or the factory direct for further details.

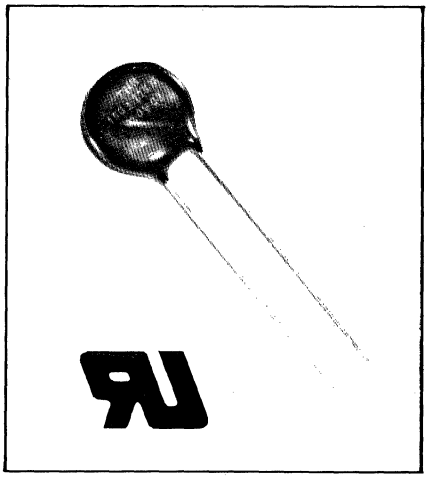
HIGH PERFORMANCE METAL OXIDE VARISTORS

Applications:

- Telephone Relays
- Telephone Solid State Circuits
- Communication Equipment
- Relay Coils
- Traffic Controllers
- Computer Equipment
- Railroad Circuitry
- Numerical Control
- Test Equipment
- Instrumentation
- Solid State Motor Control
- Television
- Copier Machines
- Calculators
- Contact Arc Suppression
- Solid State Relays/Timers
- Power Supplies
- Solid State Security Systems
- Medical Equipment
- Fire Alarms



Specifications:

Operating ambient temperature	−40°C ~ +85°C (−40°F ~ +185°F)
Operating varistor surface temperature	+115°C max. (+239°F max.)
Storage temperature range	−50°C ~ +125°C (−58°F ~ +257°F)
Max. varistor temperature coefficient	−0.05% /C
UL recognition	Standard #1414, File #E65426 #1449, File #E95427
Insulation resistance	Over 1,000 Megaohms
Hipot encapsulation	2500 VDC for 1 minute
Impulse response time	0.05 μ seconds or less

Featuring:

- Miniature Electrolytic Capacitors
- Computer Grade Capacitors
- Metallized Film Capacitors
- AC Film Capacitors
- Tantalum Capacitors
- Humidity Sensor
- Metal Oxide Varistors
- Switching Power Supply Capacitors

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

SPECIFICATIONS

TOLERANCE: 5%, 1% closer tolerances available to .05%
WATTAGE: 1 Watt to 13 Watts
STANDARD RESISTANCE VALUES: From .1 Ω to maximum values as stated in table. Values as low as .001 Ω and 4 terminal construction available
COATING: Special silicone coating withstands moisture, salt water immersion and cleaning solvents. It will withstand operation from −65°C up to 400°C
LEADS: Tinned copperweld. Length 1.25" minimum
TEMPERATURE COEFFICIENT: ±20 ppm/°C 500 Ω up
CONSTRUCTION: Welded Terminations
ADDITIONAL FEATURES: Non inductive windings. Other sizes and wattages. Special Temperature Coefficients up to +6000 ppm/°C

- Exceeds Mil-R-10509 qualification
- T.C. 25, 50 & 100 PPM
- EIA Standard Color Coding
- .5% & 1% Tolerances
- Economical
- Low Noise
- Excellent high frequency characteristics
- Excellent Resistance Stability & Repeatability
- Packaging: Bulk, Strip Pack, or Tape & Reel

Vacuum-deposited nickel-chrome alloy is deposited on high purity ceramic cores. A multiple epoxy coating protects all resistors against adverse environmental conditions. Performance characteristics exceed all requirements of Mil-R-10509F. These stable and inexpensive resistors are recommended for use whenever miniature circuits are required for sophisticated electronic equipment.

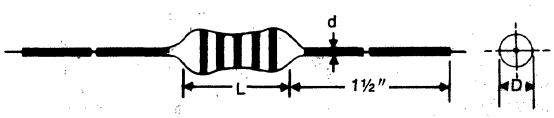
HIGH STABILITY LINEAR POSITIVE TEMPERATURE RESISTOR

Type LPTC-25 Metal Film



Max. Power Rating @ 70°C	L ±.020	D ±.020	d
¼W	.250	.090	22 ga.

CONTINUED IN NEXT COLUMN

Type LPTC-25 Metal Film (continued)

Resistance Range: 10 ohm — 20K ohm (T1 and T2)
10 ohm — 1K ohm (T3 and T4)
Resistance Tolerance: ±2% (G) and ±5% (J)
Resistance Temperature Coefficient:
T1 (+2500 PPM) T3 (+3500 PPM)
T2 (+3000 PPM) T4 (+4000 PPM)
Features: a) Linear resistance change vs. temperature, which cannot be obtained in a semiconductor or thermister
b) Positive temperature coefficient
Application: Temperature compensation, temperature indication, temperature control, temperature protection and liquid level detection.
Markings: First two bands are significant digits, third band the multiplier, and the fourth and fifth bands are first two digits of T.C.R.

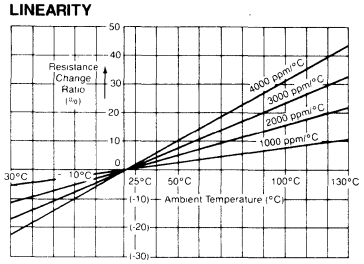
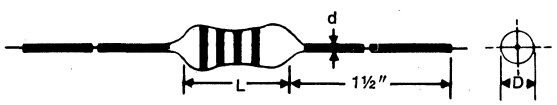
LINEARITY



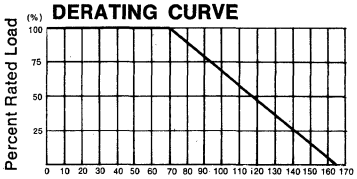
SPECIFICATIONS FOR MG SERIES METAL GLAZE RESISTORS

This high resistance component has been developed to be used as a precision or power resistor for X-ray equipment, measuring equipment and statistic electric equipment. It has high reliability in its shelf life, T.C.R. and other characteristics.

CHARACTERISTICS:
T.C.R.: 100 PPM
Load life: 3000 Hrs. ±1%
Anti moisture load life: ±1% after 250 Hrs. at 40°C 90-95% RH
Voltage coefficient: 0.00002 — 0.0005% /V
Shelf life: ±1% after 10,000 Hrs. at room temp.
Max. Temperature: 220°C
Temperature range: −55°C — +165°C



DERATING CURVE



Style	Rated Wattage (W)	Max. Working Voltage (KV)	Pulse Voltage (KV)	Resistance Range	Dimensions (inches) D ±.04	Dimensions (inches) L ±.06	Dimensions (inches) d ±.004
MG-25	0.25	0.10	0.30	1 Meg- 100 Meg	.09	.256	.025
MG-50	0.50	0.25	0.70	1 Meg- 200 Meg	.126	.393	.028

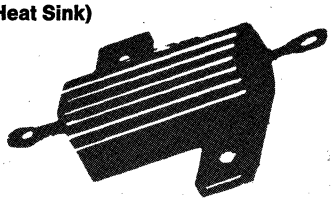
QUALITY PRECISION WIREWOUND RESISTORS

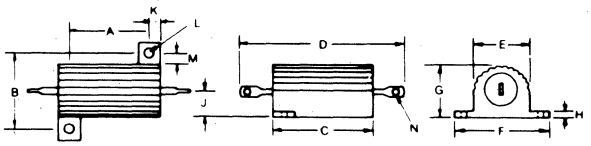
POWER WIREWOUND RESISTORS SERIES HS

(Heat Sink)



Tolerances: .05% to 10%
T.Cs: PPM/°C Resistance
20 10Ω & over
30 1Ω — 10Ω
90 under 1Ω

C = 50 watt units



POWER RATINGS

Micro-Ohm HS Resistor ratings are based on the following requirements:
1. 275°C Maximum internal hotspot temperature.
2. 1% Maximum △ R in 1000 hour load life for all models.

ELECTRICAL SPECIFICATIONS

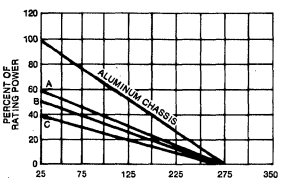
1. 4 Models, 5, 10, 25 & 50 watts.
2. Resistance Range: .05 ohms to 200K ohms.
3. Tolerances: .05% to 10%.
4. Temperature coefficient 20PPM to 90PPM.
5. 1000 VAC Minimum Dielectric Strength.
6. Non-inductive types available.

FEATURES

- Aluminum-Finned Heat Sink Case.
- Molded Construction.
- Complete Welded Construction.
- Screw Mounts on Chassis.
- High Stability at Conventional Power Ratings.
- Heavy spade lug type leads.

DERATING

Micro-Ohm HS Resistors have an operating temperature range of −55°C to +275°C. Derating is required for reduced chassis mounting area and for high ambient temp. Curves A, B & C below apply to operation of unmounted resistors.



AMBIENT TEMPERATURE DEG. CENTIGRADE

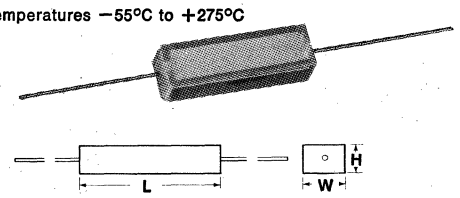
BATHTUB TYPE RESISTORS

CW SERIES

√ Economical
√ 1 watt to 50 watt
√ 5 & 10% Tolerances
√ Fireproof
√ Operating temperatures −55°C to +275°C



CONSTRUCTION

Premium grade resistance wire is wound on a woven fiberglass core. Tinned copper terminals are tightly crimped or welded (depending on resistance value) to the banded core. The wound unit is potted in a high quality Steatite Ceramic case using a high temperature, high thermal conducting inorganic potting compound. This results in a completely fireproof inorganic package, highly resistant to solvents and impervious to moisture.

Stand off or feet type available in sizes 3 Watt and larger. Specify by inserting letter "F" after type number. Example: CW5F

- Temperature coefficients (Typical) Below 1Ω 0 ±800 ppm; Over 1Ω 0 ±400 ppm
- Applicable specification to EIA Standard RS-344 Type
- Fuse type available
- Terminal strength: 5 lbs minimum
- Non-Inductive types available

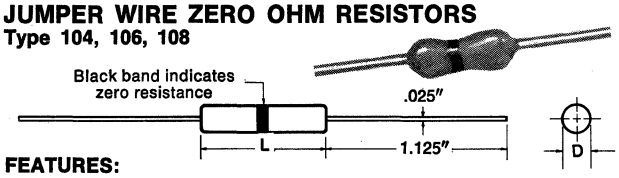
JUMPER WIRE ZERO OHM RESISTORS

Type 104, 106, 108



FEATURES:

- Sizes equal to ⅛, ¼ and ½W carbon film
- Economical
- Straight-through zero ohm continuity
- Conformal multilayer epoxy coating
- Welded cap and lead construction
- Packing: Tape & reeled or bulk

Type	Equivalent Wattage	Body Inch Length (L) ±.010	Body Inch Diameter (D) +.005
104	⅛	.150	.080
106	¼	.245	.085
108	½	.500	.095

SPECIFICATIONS:

Maximum Resistance: 0.0025 ohm
Lead Material: Leads are copperclad steel with 30/70 solder coatings to allow both welding and soldering operations.
Body material: Epoxy coated metal body
Minimum Insulation Resistance: Dry, 10,000 megohm; Wet, 100 megohm
Minimum Dielectric Withstanding Voltage: Atmospheric, 500V RMS; Reduced, 325V RMS
Insulation Flammability: Resistor insulation is self extinguishing within 10 seconds after externally applied flame is removed.
Current Rating: 25 amps at 25°C, derating to 0 amps at 150°C
Reel Capacity: 5000 pcs

APPLICATIONS

Jumper wires or crossovers, as they are sometimes called, are basically interconnection devices between points on a PC board.
Generally they are used for the following reasons:

- Inability to connect two points on a PC board due to other circuit paths which must be crossed over.
- An after-the-fact design change that requires new point connections.
- Circuit tuning by changing point connections.

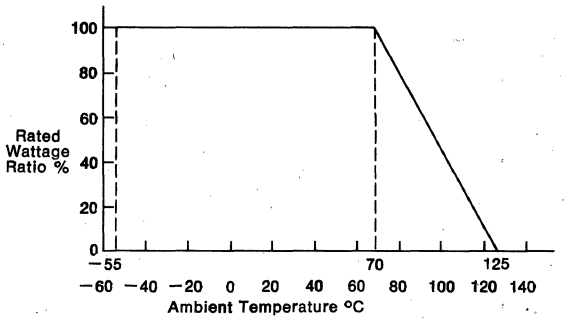
STANDARD RESISTANCE VALUE

Standard resistance values are E-12 series shown below. E-24 series and jumper chip are also available on request.

1.0	1.2	1.5	1.8	2.2	2.7	3.3	3.9	4.7	5.6	6.8	8.2

RATED WATTAGE

Rated Wattage is specified at ambient temperature of 70C°.



RATED VOLTAGE

Rated voltage shall be the AC or DC voltage corresponding to the rated wattage, and it shall be obtained by the following formula, however, if voltage obtained exceeds the Max. voltage shown in the table (item 3-1), the figure in the table shall be the Max.

$E = \sqrt{P \cdot R}$

E : Rated Voltage (V) P : Rated Wattage (W) R : Nominal Value (Ω)

PERFORMANCE SPECIFICATIONS

(Test method: JIS C-5202)

No.	Item	Characteristics	Test Method
1	Resistance Value	Resistance value must be within the specified tolerance.	To be measured at the voltage specified below. Nominal Resistance Value (Ω) / Max. Voltage (V) under 100Ω: 0.3 100Ω and over to under 1 KΩ: 1 1 KΩ and over to under 10 KΩ: 3 10 KΩ and over to under 100 KΩ: 10 100 KΩ and over to under 1 MΩ: 30 1 MΩ and over: 50
2	Temperature Coefficient	Nominal Value Ω / TCR PPM/°C under 1 KΩ: −100 ~ +600 1 KΩ and over to under 100 KΩ: −200 ~ +200 100KΩ and over: −600 ~ +100	Measure ohmic value in the room temperature and also measure the value at the room temperature plus 100°C, and obtain by the following formula. $\frac{R - R_o}{R_o} \times \frac{1}{t - t_o} \times 10^6$ (PPM/°C) R : Resistance value at room temperature (t_o) R : Resistance value at test temperature ($t = t_o + 100$)
3	Voltage Coefficient	Under 100 PPM/V, however, ohmic value change shall be within 2% in case of voltage coefficient exceeds the above.	Application Range: Over 1KΩ $\frac{R_1 - R_2}{R_2} \times \frac{1}{E_1 - E_2} \times 10^6$ (PPM/V) R_1 : Resistance value at rated voltage (E_1) R_2 : Resistance value at rated voltage at 1/10 times of rated voltage (E_2)
4	Short-Time Overload	Under ±(2.0% +0.1Ω) With no damage in the appearance.	2.5 times rated voltage or max. overload voltage, whichever smaller, shall be applied for 5 seconds.
5	Intermittent Overload	Under ±(5% +0.1Ω) With no damage in the appearance.	2.5 times rated voltage or max. overload voltage, whichever smaller, shall be tested 10,000 times for 1 second "ON" and 25 seconds "OFF".
6	Dielectric Voltage	Under ±(0.5% +0.1Ω) With no evidence of burning and insulation breakage.	AC500V shall be applied for 1 minute between substrate and termination.
7	Insulation Resistance	Over 1,000 Meg Ω	Measured by insulation resistance meter between substrate and termination.
8	Terminal Strength (Warping)	Under ±(1% +0.1Ω)	° Put the resistor on the test circuit board.

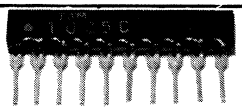
QUALITY PRECISION RESISTORS



THICK FILM RESISTOR NETWORKS
Single-In-Line SIP Resistors

INTRODUCTION

These conformal coated single-in-line (SIP) resistor networks are designed to meet a variety of application requirements in a compact, highly reliable package.

All SIP networks are quality tested for both resistance and tolerance before shipping.

Applications for resistor networks include: pull up and pull down resistors, TTL & ECL line terminating resistors. LED current limiting resistors and telecommunication networks.

PERFORMANCE SPECIFICATIONS

Temperature Coefficient: ±300 PPM Std., ±100 PPM avail.
TCR Tracking: 50 PPM Max.
Operating Temperature: −30°C to +125°C
Thermal Shock: ±5% Max.
Moisture Resistance: ±5% Max.
Terminal Strength: ±25% Max.

FEATURES

- Substrate Material — 96% alumina provides superior thermal properties and cooler operation.
- Resistors and Conductors — thick film materials with proven reliable performance.
- Lead Pull Strength: 5 lbs.
- Lead Material: Tinned plated copper alloy.
- Provides high electrical conductivity and thermal transfer.
- Encapsulation: Conformal coating ensure reliable performance.

Resistance to Soldering Heat: ±1.0% Max.
Load Life (1000) hours): ±3.0% Max.
Temperature Cycling: ±1.0% Max.
Shock and Vibration: ±.25% Max.
Solvent Resistance: Resists industrial cleaning agents per MIL-STD-202E
Lead Solderability: Meets MIL-STD-202 Method 208

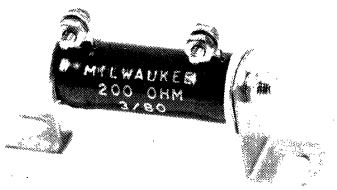
- Wattages shown in parenthesis are Navy ratings per Mil-R-15109.
† Resistors shown are standard wattages
*Add "A" after part number for adjustable types.
†For resistance values outside the limits shown, consult M.R.C.
‡ Cement coating standard — Silicone available.
- Unable to find what you need above? The same cores can be wound with ribbon wire for higher wattage capability



M.R.C. can build a resistor to your specifications on any of the basic cores shown here. (If these do not suit your need, contact M.R.C. for engineering assistance, as 32 additional cores are also available.)

When contemplating a custom resistor, consider the following options to meet your exact requirement(s):

- **SPECIAL APPLICATIONS**
- **SIZE LIMITATIONS**
- **MIL–R–15109**

SPECIAL TOLERANCE–
- Resistance tolerance to ±1% can be manufactured in many cases.

SPECIAL COATINGS–
- Silicone
- Cement
- Sand & Cement

SPECIAL TAPS–
- Taps can be provided to your specifications.

SPECIAL T.C.–
- Temperature coefficient to 20 ppm/°C.

SPECIAL WINDINGS–
- Ayrton-Perry (Non-inductive, round wire only)
- Bilfilar (Non-inductive)

SPECIAL TERMINALS–
- Single and double ¼" quick-connect
- Metal sleeve ferrule
- Live-bracket

HARDWARE–
- Terminal hardware
- L–Bracket mounting
- Spring clip mounting
- Vertical mounting hardware

LOAD BANKS–
- M.R.C. will custom design and build load banks to your requirements.

Vitreous Enamel Ribwound Resistors

APPLICATIONS

Particularly useful where high energy is to be dissipated in the lower ohmic ranges. Due to its ability to operate at higher temperatures and dissipate greater heat, the ribwound resistor is almost one-half the physical size of the equivalently rated round-wire style resistor. Ribwound wattage ratings are based on a temperature rise of 375°C above an ambient of 40°C. They may be mounted with spring clips (thru 1 1/8" dia.); thrubolt mounting hardware, individual or multiple-stacked bracket assemblies or live-bracket mountings.

BASIC CONSTRUCTION

Crimped ribbon resistance wire is edge-wound and then locked to the ceramic core with vitreous enamel. Resistance wire is spot-welded to the terminal bands. Ribwound resistors can be furnished in fixed, adjustable, or tapped styles and are also available with cement coating.

OHMS	OHMS	OHMS
0.1	1.0	6.0
0.15	1.25	8.0
0.2	1.5	10.0
0.25	2.0	12.0
0.4	2.5	15.0
0.5	3.0	20.0
0.6	4.0	25.0
0.75	5.0	33.0

Many 300 watt units are stocked in both fixed and adjustable styles. Listed are the more popular 300 watt ohmic values. All other wattage ratings and styles are made to order.

HI–OHM RIBS
Exclusively from M.R.C.

You may note on the adjacent chart that maximum ohmic values shown for each wattage are three or more times that normally available.

This development is the result of the installation of precision rib winding machines designed and manufactured by M.R.C.

Unique in the industry, these precision machines produce a winding with extreme uniformity, as close inspection of M.R.C. ribwound resistors will reveal. The uniform winding allows turns to be applied much closer to each other and consequently significantly higher resistances are achieved.

This means that lower ohmic value round wire power resistors may feasibly be replaced by HI–OHM RIBS with a significant saving in size. (For a given wattage rating, ribwounds are considerably smaller physically.)

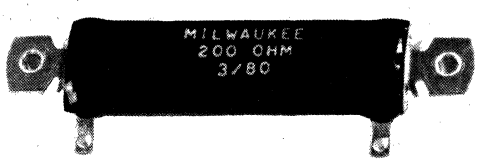
APPLICATIONS

- Electronic Circuitry
- Printed Circuits
- Radio, Television and Sound Reproduction
- Miniature Controls

FEATURES

- Rugged yet small.
- Highly stable.
- Matched expansion in core caps and coating for temperature stability.
- Standard 5% tolerance over 1 ohm, available in close tolerances on request.
- Wattage ratings based on 325°C rise at 25°C ambient.
- Standard Sizes—3, 6.5, 11 watts.
- Leads Hot Tin Dipped.

Ovals



OVAL RESISTORS are for use where space saving is desired and where the use of the 'Heat Sink' function of the metal chassis, rack or panel may be employed. Resistance tolerance of ±5% is standard except on low resistance and multi-tapped units. COATINGS of vitreous enamel or silicone base are offered.

OVALS are available in regular or miniature sizes; an original development of MILWAUKEE Resistor.

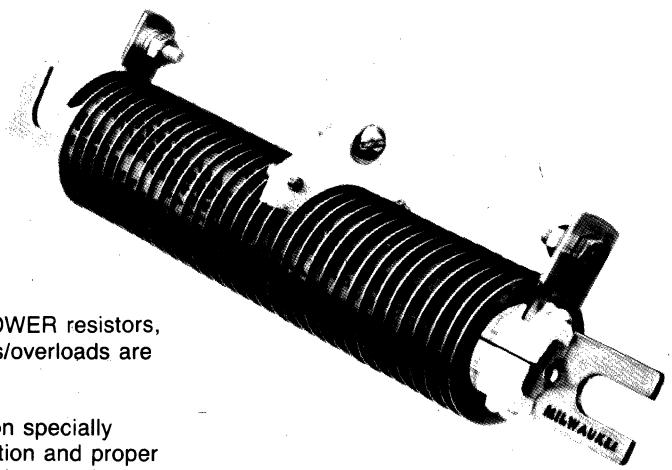
Edgewound Power Resistors

EDGE-POWER

New **EDGE-POWER** resistors complement Milwaukee Resistor's roundwire, ribwound and grid resistors which have been the industry's workhorse of electrical power dissipation for many years.

A continuous range of resistor types are now available for your high current applications. EDGE-POWER falls naturally between MRC's ribwound and grid resistors and allows full design versatility from one source.



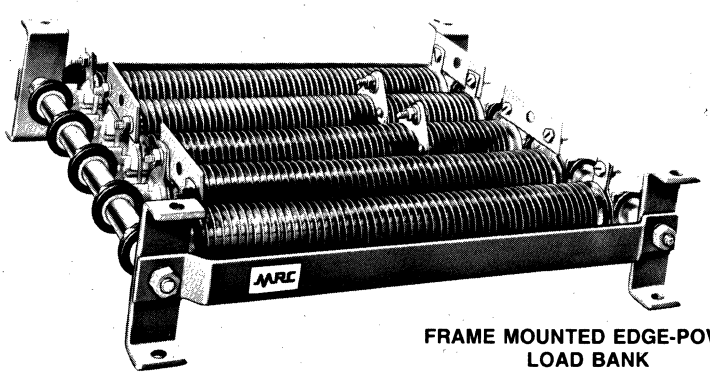
HIGH CAPACITY
GOOD WEIGHT/WATTAGE RATIO

Because of the open coil construction of EDGE-POWER resistors, heat dissipation is efficient, and reasonable surges/overloads are easily accommodated.

The heavy duty resistance-alloy coil is supported on specially designed porcelain insulators which provide insulation and proper turn-to-turn spacing. The end-slot/side-slot support bar provides versatility in mounting and adapts easily to many existing installations.

Movable tap terminals are available as an option. Terminal hardware for cable attachment is provided as a standard item on all terminals and taps.

Frame mounted load banks (as shown below) can be furnished with taps and jumpers to meet your circuit specifications (series, parallel or combination). Your load bank inquiries are invited.



FRAME MOUNTED EDGE-POWER LOAD BANK

Typical Applications of EDGE-POWER resistors include motor control (starting, plugging, speed control and braking), load dumping, ballast, current limiting, and voltage dropping. Edgewound resistors are commonly found in:

- Overhead Cranes
- Locomotives
- Lift Trucks
- Arc and Spot Welders
- Battery Lines / Chargers
- Plating Baths
- Elevators
- Power Supplies
- Many Industrial Controls

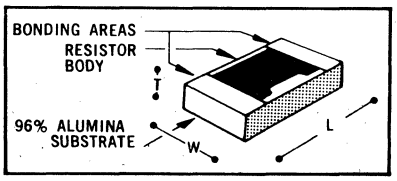
PRECISION THICK/THIN FILM CHIP RESISTORS

MINI-SYSTEMS, INC
20 David Road, P.O. Box 69, North Attleboro, MA 02761
TELEPHONE: (617) 695-0203 • TWX NO. 710-348-0564



MINI-SYSTEMS, INC., thick/thin film chip resistor components are ideally suited for the fabrication of microelectronic circuits where tight resistance tolerance, wide range of resistance values, or short production runs make the conventional screening and firing of thick/thin film resistance networks too costly. MINI-SYSTEMS, INC., chip resistors are made from a carefully engineered selection of materials. Geometries are mechanically precise and uniform. Careful testing and inspection result in the highest quality resistors.

STANDARD "MSR" SERIES

- Sizes Available: .035″ x .035″ up to .661″ x .494″.
- PDIS Rating (25°C free air): 40 mW to 15 W.
- Resistors manufactured with palladium silver or platinum gold.
- Tolerances available: ±.5%, 1%, 2%, 5%, 10%, and 20% for most resistance values.
- All types available in untinned versions for conductive epoxy attachment.
- Hi-Rel screening available on all resistor types.
- Backside metalization available upon request.
- "Flip-Chip" resistors are solder tinned (SN-62).
- Wire bond resistors have gold metalization optimized for wire bonding.
- Sandwich metalization standard on all wrap-around resistors.

***Wrap-Around Terminations**

WA-	Size (L x W)	PDIS Rating 25°C (Milliwatts)	Ohmic Range
10	.040 x .037	35	1Ω to 75MΩ
4	.057 x .052	250	1Ω to 100MΩ
13	.083 x .052	400	1Ω to 100MΩ
9	.110 x .052	500	1Ω to 100MΩ
7	.110 x .102	1000	1Ω to 100MΩ
24	.160 x .052	600	1Ω to 100MΩ

* Other standard sizes available.

ESTABLISHED RELIABILITY QPL MIL-R-55342 CHIP RESISTORS FOR ALL CRITICAL APPLICATIONS

- Sizes 55342/1 through /6
- Terminations Available: S, R, W, T, U
- Tolerances Available: F, G, J, K
- Meet or exceed Characteristic K
- Delivery: Typically 4 weeks ARO

NEW LOW COST "JR" SERIES COMPUTER/INDUSTRIAL GRADE WRAP AROUND CHIP RESISTOR

TYPE #JR13 — .075(L) x .050(W) x .017(T)

- Resistance Range: 10Ω to 10MΩ to standard EIA/MIL/IEC resistance decade values.
- PDIS Rating (25°C free air): 200 milliwatts.
- Untinned for either epoxy or solder attachment.
- Delivery typically 2 weeks ARO.

THIN FILM

MSTF-2 SERIES

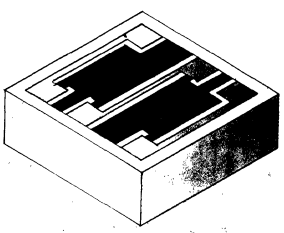
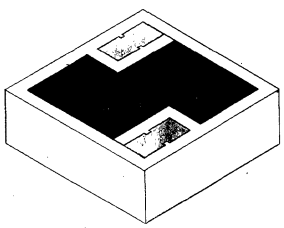
MSTF-3 SERIES
(.030″ x .030″)

MSTF-4 SERIES
(.040″ x .040″)

CUSTOM NETWORKS



MSTF-3 FORMAT A



MSTF-3 FORMAT B

- Nichrome or Tantalum Nitride
- Choice of Substrates:
  a) Oxidized Silicon — .010″ ±.003″ Oxide Thickness — 10,000 Å min.
  b) Ceramic, 99.6% — .010″ ±.001″
- Values range through the RETMA Series from 1Ω up to 10 megohm, depending on chip size.
- Tolerances: ±20%, 10%, 5%, 2%, 1%, 0.5% and 0.1% for most values.
- Backside gold available (3,000 Å typ.) on request.
- MSTF-3 series includes standard center tap dual resistor pattern.
- Visual requirements designed to meet MIL-STD-883 Method 2010.6 with full lot traceability of material and processing.
- Bond pad size: .005″ x .005″ minimum. Bond pad conductor material: Gold (20,000 Å typ.) standard. Bondable with normal wire bonding methods, such as thermocompression, thermosonic, or ultrasonic.
- Nichrome resistors passivated with silicon dioxide (5,000 Å typ.) for moisture protection and reliability. TCR (absolute) can be provided from 0-25 ppm. Special TCR's available on request.
- Noise: −30 to −35 dB typical for most values.
- Stability: 0.05% max. 0.02% typical. ± .003% typical Ratio. (After 1000 hours @ + 125°C.)
- Trimmable: Designed for later active trimming with Xenon or YAG Laser.
- Chip or Packaged

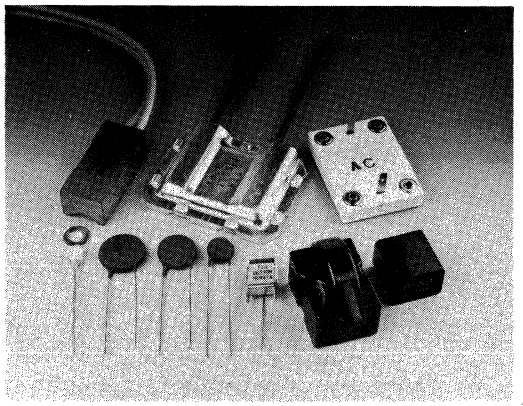
posistor® positive temperature coefficient resistors

MURATA ERIE NORTH AMERICA, INC.

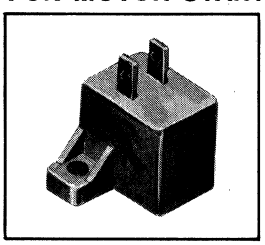


Murata Erie Posistors are basically positive temperature coefficient resistors with a very well defined resistance-temperature "knee" and the unique ability to "switch" relatively large amounts of power. They may also be used as self-regulating heating devices at useful power levels and as control devices for high power heaters. Applications include temperature sensing, over temperature and over current protection and motor starting to name a few.

Products utilizing Positors are extremely safe and reliable and offer all of the design, manufacturing, repair and sales advantages of solid state technology.

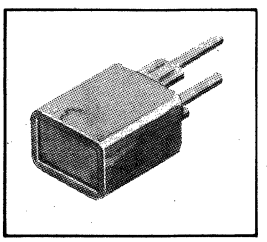
- Compact
- Reduced component count
- Extremely reliable
- "Stepless" temperature control
- Simple repair or replacement
- Long term reliability
- Shock and vibration immunity
- Nonflammable case and insulation available
- No electrical or acoustical noise
- No electrical contacts

FOR MOTOR STARTING



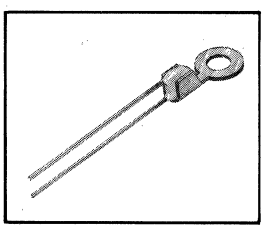
Provides a smooth, solid state electronic starting device for single phase motors utilizing a split-phase starting winding or for PSC motors as a direct replacement for starting capacitors and switches.

FOR DEGAUSING



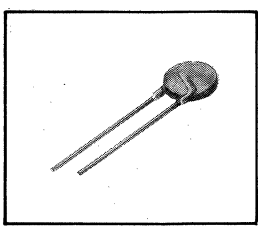
Used in series with CRT degausing coils, the Posistor functions as an automatic switch that goes to a high resistance state in a fixed time period after power is applied, effectively eliminating the current that flows through the degausing coil.

FOR SEMICONDUCTOR OVERLOAD PROTECTION



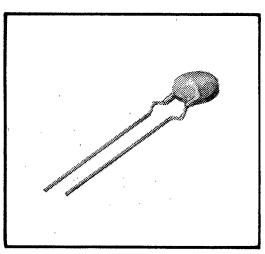
Senses the case temperature of high power semiconductors and appropriately reduces the power dissipation when dangerous power or current levels are reached by switching to a high resistance state and reducing base bias current.

FOR TRANSFORMER PROTECTION



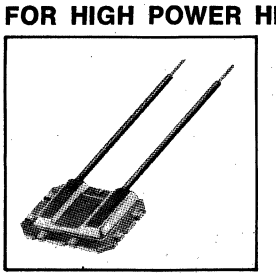
These devices are connected mechanically to the transformer core and electrically in series with the transformer primary. If core temperature exceeds temperature specs, the Posistor switches to a high resistance state and limits input current. It resets automatically when temperature returns to normal.

FOR CIRCUIT PROTECTION



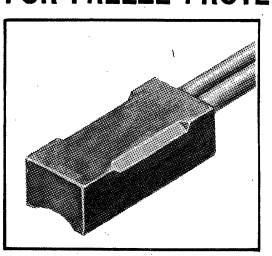
Provides overcurrent protection in a variety of applications. When connected in series with the protected device, Posistors limit the circuit current to a predetermined value — above that value they switch to a high resistance state and limit the current to a safe level.

FOR HIGH POWER HEATING



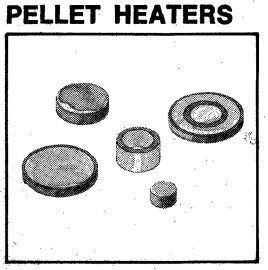
Posistors for heating are self-temperature regulating with fast thermal response and power ratings to 170 watts.

FOR FREEZE PROTECTION



Designed for water filled pipe freeze-protection. Self-temperature regulating. As temperature decreases the Posistor power dissipation increases creating more heat that is conducted to the pipe (approximately 25 watts @ −20°C).

PELLET HEATERS

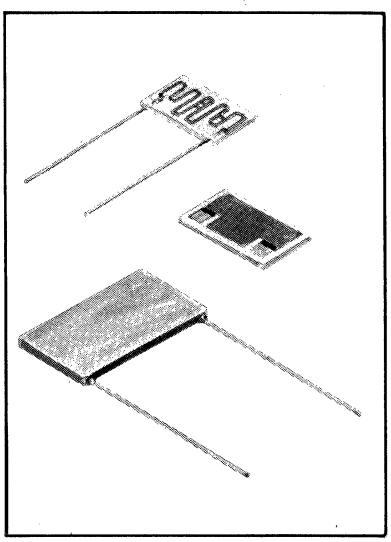


Basic Posistor elements are available in a variety of shapes and electrical characteristics to meet custom application requirements.

MURATA ERIE NORTH AMERICA, INC. 1148 Franklin Rd., S.E. Marietta, Georgia 30067 Tel: (404) 952-9777 Telex: 54-2329 TWX: 810-766-1531

high voltage resistors

MURATA ERIE NORTH AMERICA, INC.



HV resistors

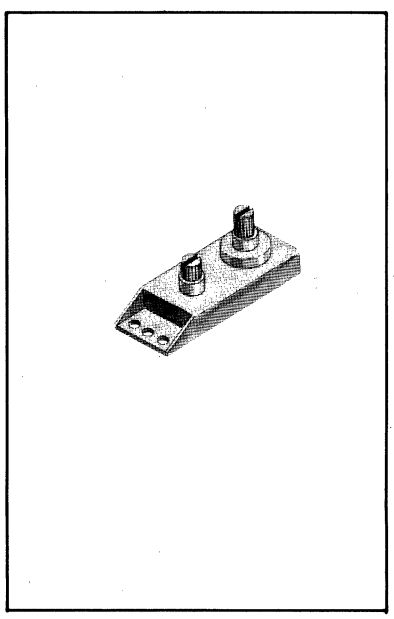
Murata Erie's line of high voltage resistors are designed to replace high voltage carbon film resistors and feature an extremely rigid alumina substrate with a deposited *thick film* resistance element for maximum electrical and mechanical stability.

Three models are offered — the *P Series* is for subassemblies that will be encapsulated in epoxy resin after assembly, the *D Series* which is supplied completely encapsulated and the *F Series* which is supplied encapsulated but without leads.

Murata Erie's application engineers are available to aid in the selection of exactly the right high voltage resistor to meet specific application requirements.

SPECIFICATIONS

Voltage Range	10 to 35 KV
Resistance Range	1 to 5000 Megohms
Power Rating	3 to 5 Watts at −70°C
Operating Temperature Range	−25°C to +130°C
Temperature Coefficient	±150 ppm/°C
Tolerance	±2% to ±20%



focus adjusting resistors

Murata Erie's focus adjusting resistors are designed to meet the stringent demands of high voltage CRT power supply applications. They are offered in a variety of configurations including those with integral capacitors and multiple taps such that most application requirements can be easily met.

TYPICAL CHARACTERISTICS

Item	Condition	Performance
Rated Power	Ambient Temperature: −20°C to +70°C	3W Max.
Temperature Coefficient	Ambient Temperature: −20°C to +120°C	±300 ppm/°C
Voltage Coefficient	Impressed Voltage: 1/10 Rated Voltage (to rated Voltage)	±3 ppm/Volt
Load Life	Ambient Temperature: 70°C; Impressed Voltage: Rated Voltage; Impressed Time: 1000 hours (90 minutes ON, 30 minutes OFF)	△R ≦ ±5% △N ≦ ±3%
Humidity Characteristics	Ambient Temperature: 40°C; Relative Humidity: 95%; Shelf Time: 1000 hours	△R ≦ ±5% △N ≦ ±3%
Thermal Shock Characteristics	1 cycle is −30°C (1 hour) to +130°C (1 hour) — Repeat 10 cycles	△R ≦ ±3% △N ≦ ±2%
Withstanding Voltage	Impressed Voltage: 1½ Rated Voltage; Impressed Time: 1 minute	△R ≦ ±3% No failure

△R denotes variation of resistance value. △N denotes variation of tapped resistance ratio.

II. GENERAL SPECIFICATIONS

A. ELECTRICAL CHARACTERISTICS

1. POWER
The power rating is the maximum power which can be applied to the resistor continuously at the specified ambient temperature.

2. RATED WORKING VOLTAGE
The rated working voltage is the maximum DC voltage or RMS value of AC voltage which can be applied to the resistor at the specified ambient temperature, and will be calculated by the following formula:

$$\text{RATED WORKING VOLTAGE} = \sqrt{\text{POWER RATING (W)} \times \text{NOM. RESISTANCE } (\Omega)}$$

However, the resistor can not be used over the specified MAXIMUM WORKING VOLTAGE.

3. MAXIMUM WORKING VOLTAGE
The maximum working voltage is the maximum limit of DC voltage or RMS value of AC voltage which can be applied to the resistor at the specified ambient temperature.

4. OVERLOAD VOLTAGE
The overload voltage is 2.5 times of rated working voltage which can be applied on the resistor in a period of 5 seconds at the specified ambient temperature. However, the resistor can not be used over the specified MAXIMUM OVERLOAD VOLTAGE even for a short period.

5. PULSE LOAD VOLTAGE
The pulse load voltage is the maximum pulse voltage specified in JIS C5202, 5.11 which can be applied on the resistor at the specified ambient temperature, and will be calculated by the following formula:

$$E_P = \text{POWER RATING (W)} \times \text{RESISTANCE } (\Omega) \frac{1}{t \times f} \quad (t\text{: time of pulse, f: test frequency})$$

However, the resistor can not be used over the specified MAXIMUM PULSE VOLTAGE.

B. MECHANICAL CHARACTERISTICS

1. LEAD PULL TEST
The lead wire shall withstand steady pull of the following weight applied axially to the lead wire for the minimum period of 10 seconds without any breakage or damage:

Nom. Lead Diameter	0.4ϕmm	0.5ϕmm	0.6ϕmm	0.7ϕmm	0.8ϕmm & over
Steady Weight	1.0Kgs.	1.0Kgs.	1.5Kgs.	2.0Kgs.	2.5Kgs.

2. LEAD BEND TEST
The lead wire shall withstand minimum 4 bends of 90° rotation without any breakage or damage, when the resistor is placed in a vertical position and is applied with a weight of 0.5Kgs for 0.4—0.5ϕmm or 1.1Kgs for 0.6ϕmm and over lead wire.

3. SOLDERABILITY
The lead wire is immersed into 10% methanol or isopropyl alcohol of rosin by weight for a period of 2±0.5 seconds. Then, it shall be dipped into molten solder (60% Sn & 40% Pb) melted at 230±5°C for a period of 5±1 seconds approximately 1.5mm from the body of the resistor. A new adhering coating of solder shall cover minimum 95% of the surface being dipped into solder.

4. RESISTANCE TO CLEANING SOLVENTS
Color coating or marking shall remain legible after cleaning by solvents such as isopropyl alcohol, trichloroethylene, freon TF/TAC, xyliene etc., in form of liquid or gas.

TYPE S RESISTOR ITEM DESCRIPTION

Sage Part Number identification consists of a combination of numerals and letters according to the following guide. This is the nomenclature ordinarily marked on resistors and it fully serves the purpose of purchased item description except for limited cases of special testing. Note that grouping of characters is not constant, but varies to fit descriptive need of a given part.

STYLE DESIGNATION

1500 S/NS B 2740 1

- 1 — ±% tolerance
- 2740 — Nominal Value, Ohms (decimal symbol, as required, is used in both nominal value and tolerance)
- B — if applicable — Core Material and Process Classification: Blank entry indicates regular steatite core, commercial processing; A = alumina core, commercial processing; B = beryllia core, commercial processing; P = alumina core, High Rel processing; M = beryllia core, High Rel processing
- S/NS — S = single layer wound; NS = non-inductively wound
- 1500 — Body type, size, lead details per catalog chart

conformal silicone ceramic axial lead wirewound resistors

Series 44 *Ohmicone*® conformal silicone ceramic power resistors are designed for a wide range of commercial, industrial and communications equipment and systems. Resistors feature low, stable T.C.; all welded construction; and operation under high temperature conditions.

ELECTRICAL:

Tolerance: ±5%.

Temperature Coefficient: <1Ω — ±90 ppm/°C; 1 to 10Ω — 0 ±50 ppm/°C; 10Ω & greater — 0±20 ppm/°C.

Dielectric Withstanding Voltage: 1000 VAC for 3-5-10 Watt sizes, 500 VAC for 2 Watt and 250 VAC for 1 Watt size.

Overload, Short Time: 10X rated wattage for 5 seconds (5W and larger); 5X rated wattage for 5 seconds (3W and smaller).

Wattage: 1, 2, 3, 5, and 10 Watt sizes.

Inductance: Varies with no. of turns and wire size. Standard units have single layer winding.

Non-inductive (ARYTON-PERRY) windings available.

MATERIALS:

Core: Ceramic, resistant to thermal shock and wide variations in temperature.

Resistance Element: High grade resistance alloy wire, single layer winding. Leads and resistance elements welded to metal end caps.

Coating: High performance conformal silicone ceramic.

Leads: Solder coated.

DERATING

Wattage is based on 25°C Free Air Rating. For high temperature operation, derate linearly from 100% @ +25°C to 0% @ 275°C.

OHMITE® Series 22 5% Tolerance

conformal *Vitreous Enameled* axial lead wirewound resistors

FEATURES

- **Rugged Vitreous Enamel Coating Withstands Severe Humidity and Temperature Cycling**
- **Economical**
- **All Welded Construction**
- **Ideal for Machine Insertion**

Advanced conformal vitreous enamel coating protects resistors, even in environments of high heat. These rugged, economical wirewound resistors are recommended for industrial applications where quality construction and reliable operation are prime specifying parameters.

The items listed in the chart are standard stock items. Other values and wattages are also available in accordance with the following applications.

SPECIFICATIONS

Tolerance: ±5% std. ±1% to ±10% available.

Temperature Coefficient:
0 ±30 ppm/°C 10 ohms and above
0 ±50 ppm/°C 1 to 9.99 ohms
0 ±90 ppm/°C below 1 ohm.

Dielectric Withstanding Voltage:
1000 VAC. (500 VAC for 1 watt type.)

Overload: 10X rated wattage for 5 sec. for 5 watt size and larger. 5X rated wattage for 5 sec. under 5 watt size.

Inductance: Standard units have single layer inductive winding. Low inductance windings available.

Core: Steatite ceramic.

Coating: Conformal vitreous enamel.

OHMITE MFG. CO., a NORTH AMERICAN PHILIPS company / 3601 W. Howard St., Skokie, Illinois 60076 / (312) 675-2600 / TWX 910-223-0805 / TELEX 72-4433

OHMITE® Series 80 OHMICONE® 1% Tolerance

MIL-R-26 Axial Lead Resistors

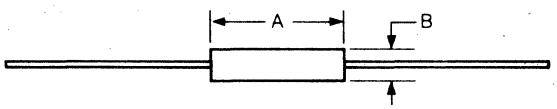
conformal *Ohmicone*® precision resistors

IN ACCORDANCE WITH RW70U — RW74U — RW78U — RW79U. SERIES 80 RESISTORS ARE DESIGNED FOR HIGH STABILITY, PRECISION POWER APPLICATIONS.

LOW TEMPERATURE COEFFICIENT, 20 PPM/°C FOR 10 OHMS AND ABOVE.

DIELECTRIC WITHSTANDING VOLTAGE 1000 VAC

1% TOLERANCE STANDARD, LOWER TOLERANCES AVAILABLE ON SPECIAL ORDER.



SPECIFICATIONS

Tolerance: ± 1% std.

Temperature Coefficient:
±20 ppm/°C 10 ohms and above
±50 ppm/°C 1 to 9.99 ohms
±90 ppm/°C below 1 ohm

Dielectric Withstanding Voltage: 1000 VAC for 3-5-10 Watt sizes, 500 VAC for 1 Watt size.

Overload: 10X rated wattage for 5 sec. for 5 Watt size and larger. 5X rated wattage for 5 sec. under 5 Watt size.

Stability: Load life delta R of 0.5% for 2000 hours.

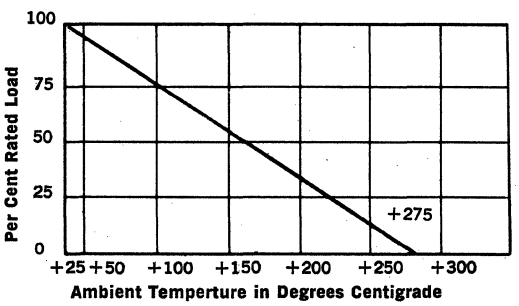
Inductance: Standard units have single layer inductive winding.

Core: Steatite ceramic.

Coating: Silicone ceramic.

DERATING

Wattage ratings are based on 25°C Free Air Rating. For higher ambient temperatures, use derating chart.



DIMENSIONS: Inches (mm)

OHMITE MFG. CO., a NORTH AMERICAN PHILIPS company / 3601 W. Howard St., Skokie, Illinois 60076 / (312) 675-2600 / TWX 910-223-0805 / TELEX 72-4433

OHMITE® Type 995 MOLDED Axial Lead Vitreous Enameled Resistors

FEATURES

- **Unique Molded Construction Provides Consistent Shape & Size**
- **Exceeds MIL-R-26 Moisture Requirements**
- **Endures Heat Up to 1500 F**
- **All Welded Construction**
- **Ideal for Machine Insertion and High Density Circuits**

Series 99 molded vitreous wirewound resistors are high performance components designed for precision instrumentation, medical equipment and other applications demanding high reliability and stable operation. MIL-R-26 approved units are available for Military Application.

The items listed below are standard stock items. In addition items in accordance with the specifications shown are available on special order.

SPECIFICATIONS

Tolerance: ±5% std. ±.25% to ±10% available. 2 ohm minimum for tolerances closer than ±1%.
Temperature Coefficient: 0 ± 30 ppm/°C 10 ohms and above
0 ±100 ppm/°C 1 to 10 ohms 0 ±200 ppm/°C below 1 ohm.
Dielectric Withstanding Voltage: 1000 VAC. 500 VAC for 1 watt size.
Overload: 10X rated wattage for 5 sec. for 5 watt size and larger. 5X rated wattage for 5 sec. under 5 watt size.
Wattage Rating: May be increased by using metal mounting clips as a heat sink.
Inductance: Standard units have single layer inductive winding. Non-inductive (Aryton Perry or limited inductance) windings available.
Core: Steatite ceramic.
Coating: Molded vitreous enamel.

OHMITE MFG. CO., a NORTH AMERICAN PHILIPS company / 3601 W. Howard St., Skokie, Illinois 60076 / (312) 675-2600 / TWX 910-223-0805 / TELEX 72-4433

OHMITE® Type 200 Brown Devil® Fixed Resistors

***Brown Devil*®** (Type 200) resistors, are vitreous enameled, wirewound units long famous for ruggedness and durability in small power resistors. With the emphasis toward miniaturization and the current industry trend toward high operating temperatures, Ohmite has been able to increase the ratings on two Brown Devil sizes. The 5 watt size is now rated 8 watts and the 10 watt size is now rated 12 watts. The 20 watt unit retains the same rating.

Available on special order in 3 watt size and in values other than those listed as standard. Also available on special order with radial leads for P-C board mounting.

Standard resistance tolerance is ±5% for values 1 ohm or higher; ±10% for values below 1 ohm. Tinned leads 1½" long: 3 and 5¼ watt, 20 AWG; 8, 12 and 20 watt, 18 AWG.

OHMITE® Type 270 Vitreous Enameled Fixed Resistors

These lug type resistors are wire-wound on high quality ceramic cores, protected and insulated by Ohmite vitreous enamel — the time-proved standard covering that is the best conductor of heat for a material which must also be a good electrical insulator.

Resistance tolerance is ±5% for values 1 ohm or higher; ±10% below 1 ohm.

Wattage ratings are for use in free air. When resistors are mounted in closed spaces or where the circulation of air is restricted, they should not be used at more than one-half rating. Currents and voltages for reduced ratings can be obtained by multiplying full rating by the following factors: 75% load = .86, 66% = .81, 50% = .71, 33% = .57, 25% = .50.

Higher wattage resistors are available on a custom manufactured basis. Call for information.

These items are also available on special order, with non-inductive windings, (Aryton Perry).

The resistors listed below are standard stock items only. The 270 resistors are also available, on special order, in wattages from 3 through 1,000 with many intermediate values. Resistance values can also be supplied to meet your specific requirements. Contact our field representatives or our application engineers for assistance.

OHMITE MFG. CO., a NORTH AMERICAN PHILIPS company / 3601 W. Howard St., Skokie, IL 60076 / (312) 675-2600 / TWX 910-223-0805 / TELEX 72-4433

OHMITE® Dividohm® Type 210 Adjustable Vitreous Enameled Resistors

Dividohm resistors make ideal voltage dividers for original equipment and replacement in transmitters, rectifiers and other apparatus. Such tapped "bleeders" are made by using one or more adjustable lugs, as required. ***Dividohm*** are also handy for obtaining odd resistance values, for adjusting circuits, and for use on equipment which must be set to meet various line voltages.

Dividohm resistors are vitreous enameled resistors on which a narrow strip has been left uncovered to expose a portion of each turn. Contact to any wire in this strip is made by an embossed contact on the adjustable lug (supplied).

WATT RATING: The stated wattage rating applies only when the entire resistance is in the circuit. When the adjustable lug is set at an intermediate point, the wattage rating is reduced in approximately the same proportion, i.e., if the lug is set at half the resistance, the wattage is reduced by one-half. A safe rule to follow is to make sure that the maximum rated current is not exceeded. This should be carefully checked particularly if the resistor will be used as a voltage divider with several adjustable lugs. Resistance tolerance is ±10% for the total resistance value.

The items listed in the chart below, are those items that have proven to be the most popular based on usage. "Dividohm" style resistors are available on special order in resistance values other than those shown and in a wattage range of 12 Watts through 1000 Watts. In addition to the vitreous enamel standard coating, these items are also available with an Ohmicone silicone ceramic coating.

For any variable or adjustable resistor requirement, contact your Ohmite field representative or our application engineers.

Adjustable Lugs

One "Screw Driver Type Adjustable Lug" is supplied with each unit. Lugs with a silver contact button can be ordered from the table below. MOVING THE LUGS: Lugs always should be loosened completely before moving and not moved except while the current is off in order to protect the exposed wire from mechanical or electrical injury and to protect the operator from dangerous voltages.

DOUBLE THUMB SCREW ADJUSTABLE LUG

This adjustable lug, which is illustrated at left, features two advantages — ease of adjustment and less chance of damaging the resistance wire while moving lugs. Available for 1⅛" cores. Catalog No. **2160**

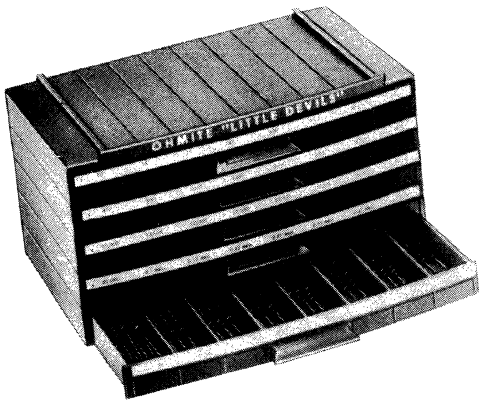
OHMITE® Cabinet Resistor Assortments



Perfect for R & D and prototype labs.
All popular values included.
8 wattage sizes to choose from.
Contents clearly marked on front of each drawer segment.

Always have the right style, wattage, and resistance value on hand. Thwart Murphey's Law which states; "The resistance value needed will not be available."

Ohmite cabinet assortments come in four different resistor styles and 8 different wattages. The resistors used to make up these assortments are the most popular resistance values as determined by national usage.

The handy compact plastic cabinets are packed in accordance with the tables below, which state the quantities, number of values, and the resistance range of each assortment. Each drawer segment is individually labeled. Dovetail tops and bottoms of each cabinet facilitate stacking. Individual cabinet dimensions are: 9″ long by 4¾″ high by 5¼″ deep.

For specific information regarding any of the cabinet assortments, ask your Ohmite Distributor for the latest cabinet brochure.

Style of Resistor	Watts	Cat. No.	Tolerance	Quantity	No. of Values	No. of Cab. in Assortment	Resistance Range

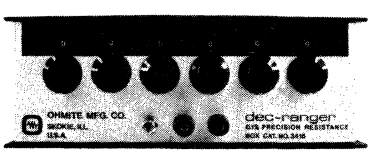
DEC-RANGER



0.1% ACCURACY PRECISION DECADE RESISTANCE BOX NO. 3416

SPECIFICATIONS:
ACCURACY: ±0.1% (PLUS 0.03Ω MAXIMUM CONTACT AND CIRCUIT RESISTANCE)
NUMBER OF DECADES: 6
SELECTION: ROTARY TAP SWITCHES, CONTINUOUS ROTATION IN EITHER DIRECTION
READ OUT: DIGITAL, IN LINE, THROUGH "WINDOWS" IN PANEL
SWITCH LIFE: IN EXCESS OF 50,000 OPERATIONS
DIMENSIONS: 10½″ LONG x 3¾″ HIGH x 4⅝″ DEEP
RANGE: 1Ω — 1,111,110Ω IN 1Ω STEPS

CAP-RANGER®

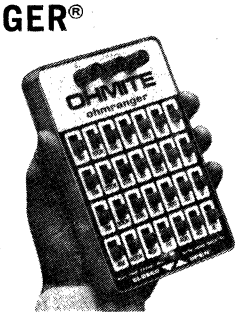
ECONOMICAL, PORTABLE CAPACITANCE SELECTOR

100 picofarads to 11.111 microfarads in 100 picofarad steps with ±2% accuracy. Three binding posts, one to ground the metal case. Compact size. Big performance. Simple operation. Solves your troubleshooting, breadboarding and circuit design problems using simple sliding switches. Dimensions 4″ x 6″ x 1″.
Catalog No. 3430A

OHM-RANGER®

ECONOMICAL, PORTABLE RESISTANCE SELECTOR

- **Over 11 million ohms in one-ohm increments**
- **1% accuracy***
- **Easy slide switch operation**
- **Handy slimline size**
- **Rugged metal construction**



1 to 11,111,110 ohms, in one-ohm steps — with accuracy assured by half-watt 1% tolerance resistors! Has three binding posts, one to ground case. Small enough to take anywhere in your pocket, the handy easy-to-use OHM-RANGER is ideal for lab use, schools and service technicians. Dimensions 4″ x 6″ x 1″.
* 10 ohms and above
Catalog No. 3420

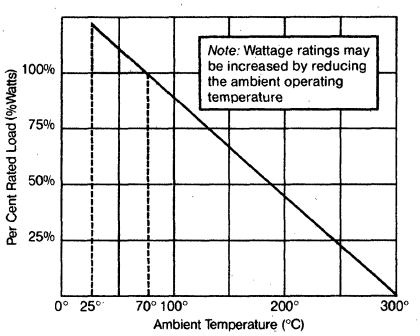
Power Rating

The power rating for *PowrFilm*™ resistors is dependent on the maximum power that can be dissipated continuously at a specified ambient temperature.

The nominal wattage ratings given for *PowrFilm* resistors are based on an ambient operating temperature of 70°C.

PowrFilm resistors can be operated at ambient temperatures other than 70°C in accordance with the Load Vs. Temperature curve shown.



Load Vs Temperature

Application Information

Construction

A homogenous film of metal alloy is deposited on a high grade ceramic body. The alloy is cut in a helix to increase and adjust the resistance. Tinned leads of copper-clad steel are welded to the end caps which are force fitted to the ceramic body.

Coated with a red non-flammable coating of silicon lacquer for environmental and electrical protection, the resistor will withstand 500V (R.M.S.) and is resistant to most of the commonly used cleaning solvents conforming to MIL-STD-202E, method 215 and IEC 68-2-45.

Inductance

The *PowrFilm* resistor is fundamentally non-inductive. Any reactance would be capacitive (dominated by the end cap to end cap capacitance) and would be extremely small.

Mounting

The body "hot spot" temperature at maximum dissipation and ambient temperature is 300°C and must be considered in relation to other nearby components and materials.

Weight

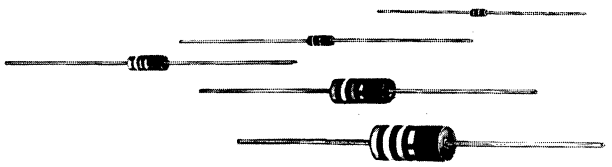
The PF1 resistor has a net weight of 4.4 lbs. per 5,000 pieces (reel).

The PF2 resistor has a net weight of 3 lbs. per 1,500 pieces (reel).

OHMITE® Little Devil® Molded Composition Resistors 5% Tolerance

Color Coder

CATALOG NO. 5190



Little Devils, Ohmite's famous molded composition resistors, find broad use in commercial and military applications. The 1/8, 1/4, 1/2, 1 and 2-watt sizes, which conform respectively to Styles RC05, RC07, RC20, RC32 and RC42 of MIL-R-11, meet all the stringent requirements of this military specification. All sizes available satisfy a wide range of design and service needs.

Little Devils have molded insulation for high dielectric strength. Noted advantages of these units are great stability, low noise level, low voltage coefficient, high insulation breakdown voltage and rapid heat dissipation. They may be used at full rated wattage at 70°C (158°F) ambient temperature.

Little Devils are available from stock in standard EIA resistance values in the tolerances and resistance ranges shown in the price table. Ratings for maximum continuous RMS voltage drop are high: 150 volts for 1/8 watt units, 250 volts for 1/4 watt, 350 volts for 1/2 watt, 500 volts for 1 watt, and 500 volts for 2 watt units.

24 PAGE PRODUCT INDEX BOOK LISTS 3,800 ITEMS

62 CROSS REFERENCE CARDS

300 FILE FOLDER LABELS

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

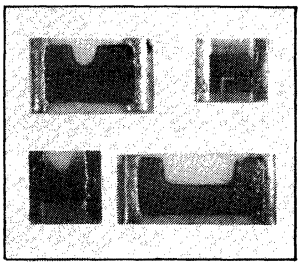
There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

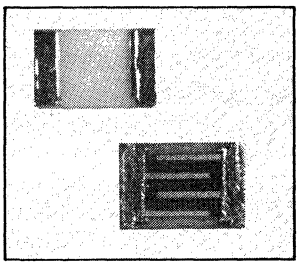
Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

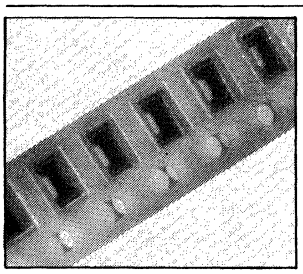
OHMTEK Surface Mount Resistors Chips/Networks



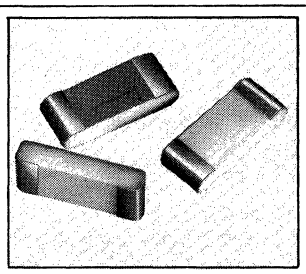
CERMET WRAPAROUND CHIP RESISTORS DESIGNED TO MEET MIL-R-55342, CHARACTERISTIC "K"
Resistance range 10 ohms - 1 megohm, tolerances 1 thru 10% in the following popular sizes (mils) 50x40, 50x50, 50x75, 50x100, 50x150, 100x100. Solder coated with nickel barrier and glass overcoat.



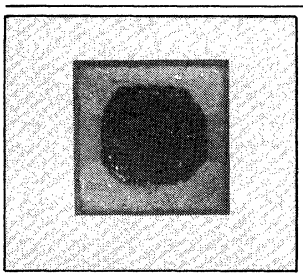
PRECISION THIN FILM WRAPAROUND CHIP RESISTORS DESIGNED TO MEET MIL-R-55342, CHARACTERISTIC "H"
Resistance range 10 ohms - 200k ohms, size 50x75 mils; tolerances 0.1, 0.5, 1, 2, 5%. Ideal for high frequency, low noise, and tight TCR applications requiring good stability.



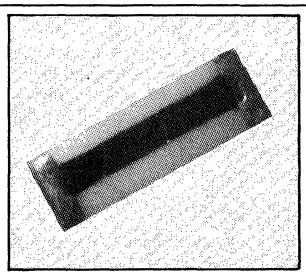
GENERAL PURPOSE CERMET WRAPAROUND CHIP RESISTORS
Economically priced industrial grade features standard 1206 case size (1.6x3.2 mm) Resistance range 10 ohms -10 megohms; tolerances 2, 5, 10, 20%. Bulk or tape and reel packaging.



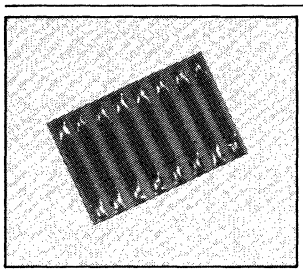
ULTRA-LOW VALUE WRAPAROUND CHIP RESISTORS
Resistance range 0.1 ohm - 10 ohms; tolerances 1, 2, 3, 5, 10%; size 60x150 mils; solder coated with nickel barrier.



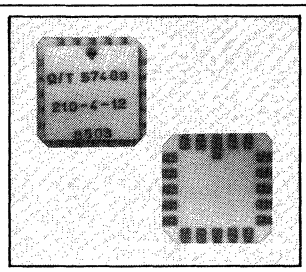
GOLD TOPSIDE CERMET CHIP RESISTORS
Cermet thick film chip with gold-wire-bondable terminations; sizes 50x50 and 35x35 mils standard; resistance range 10 ohms - 5 megohms; tolerances 1, 2, 5, 10%.



FLIP-CHIP CERMET RESISTORS
Cermet one-sided resistors for low cost reflow applications; sizes 50x75, 50x100, 50x150 mils; resistance range 10 ohms - 100 megohms; tolerances 2, 5, 10, 20%.



WRAPAROUND OR FLIP-CHIP RESISTOR NETWORK
Standard "A" and "B" schematics available with 50-mil pad spacing; 100 ohms to 1 megohm. Cermet resistance elements with pre-tinned nickel barrier layer conductors.



LEADLESS CHIP CARRIER CERMET NETWORK
Standard "A" and "B" schematics available in a 20 terminal, 50-mil center single-layer ceramic package with glazed overcoat or with ceramic cover; 100 ohms to 1 megohm; 1, 2, 5, 10% tolerances.

Features:
- All wraparound connections feature a thick or thin film adhesion layer covered with a leach-resistant nickel barrier layer and solder coated for 150°C applications.
- Ruthenium-based cermet thick film yields dependable performance and low cost.
- Abrasive and laser trimming available.
- Hi-Rel screening available on all resistor types with all Mil-Spec Qual testing in house.
- Special metalization and custom sizes available upon request.
- No inductance.
- Static free waffle pack packaging standard.
- Glass fired passivation as standard adds reliability and stability to the resistor elements.

Performance/Design Characteristics:
- Tolerances: ± 0.1% - 20%
- Resistance values: 1 ohm to 1 megohm
- TCR: Thin Film
  ± 50 ppm/°C (standard)
  Thick Film
  ± 100 ppm/°C (standard)
- Operating temperature range: -55°C to +150°C

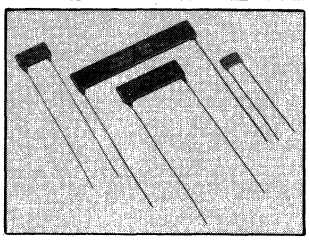
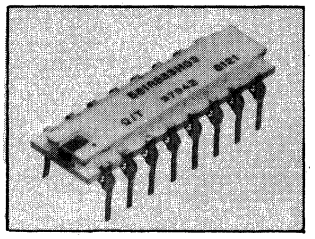
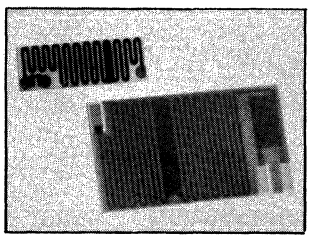
OHMTEK Cermet Resistors, Dividers and Networks



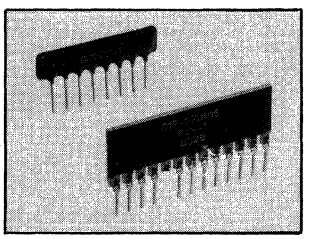
RADIAL LEAD RESISTORS
High voltage, low inductance applications; ¼, ½, 1, and 2 watt sizes; standard 10 ohms to 500 megohms 1%, 2%, 5%, 10% tolerances.



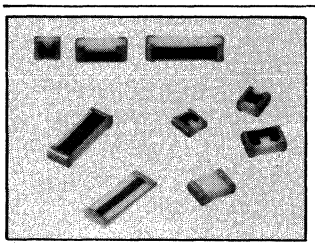
DUAL-IN-LINE
Resistor and R-C networks in standard DIL style "A" and "B" schematics; 100 ohms to 1 megohm; 1%, 5%, 10% tolerances. Testing to Group A of MIL-R-83401.



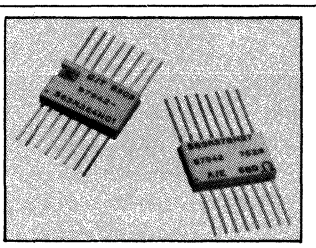
HIGH VOLTAGE DIVIDERS
Broad application to both military and commercial power supplies. Many standards to choose from, or custom made.



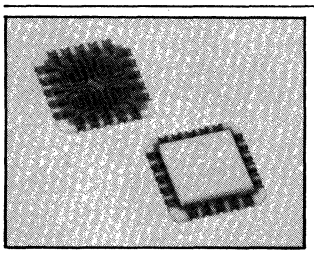
SINGLE-IN LINE CONFORMAL
Isolated resistors or common lead configurations. Low profile or high profile conserve P-C board space. Conformal epoxy coated or single-sided screened coatings.



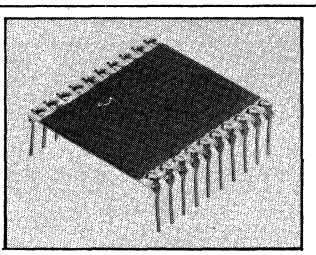
CHIP RESISTORS
General purpose solder-coated wraparounds and flipchips for reflow applications; gold topside terminations for wire bonding, ultra low to high megohm values; 1%, 2%, 5%, 10% tolerances.



FLAT PACKS
Application to high density packaging in airborne computers. Standard "A" and "B" schematics available as well as R-C networks tested to Group A of MIL-R-83401.



LEADLESS CHIP NETWORKS
Standard "A" or "B" schematic in single-layer ceramic with glazed overcoat or with ceramic cover; 100 ohms to 1 megohm; 1%, 5%, 10% tolerances.



CUSTOM NETWORKS
Custom sizes as well as networks including binary, R-2R, and decade configurations. Laser or abrasive trimmed as required to meet tolerancing demands.

Features:
- Standard circuits for military and commercial applications.
- Custom circuits to meet demanding or unique applications.
- Ruthenium-based screened films.
- Pt/Au or Pd/Ag terminations as required.
- Broad packaging sizes and styles – Standard DIL's, 3-13 pin SIL's, oversize .600 centers or greater DIL's.
- Rugged ceramic-based construction yields dependable performance and low cost.
- Discrete performance with space saving and greater reliability of networks.

Performance/Design Characteristics
- Tolerances: .1% – 20%.
- Resistance values: .1 ohm to 1 gigaohm.
- TCR's: 100 & 250 ppm standard; 50 ppm available.
- Operating temperature range: – 55° C to +125° C.
- Tracking: 10 to 25 ppm.
- Testing to full MIL-spec requirements available.

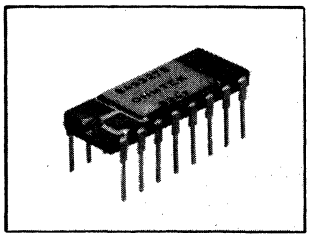
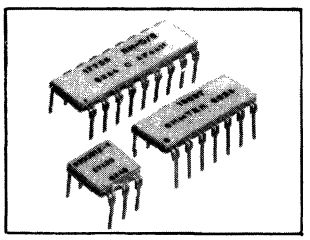
OHMTEK Precision Resistor Networks

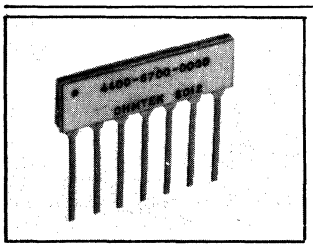
Wirewound Performance in Contemporary Packages



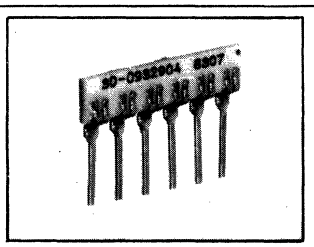
DUAL-IN-LINE HERMETIC
Meets Mil-R-83401 Characteristic "C" for military and other environmental extremes. Available 8, 14, 16 and 18 leads.



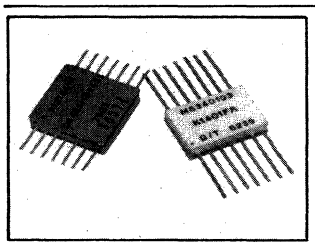
DUAL-IN-LINE CERAMIC SANDWICH
Meets Mil-R-83401 Characteristic "V". Packages of 4-22 leads in rugged monolithic inexpensive construction with highest precision in the industry.



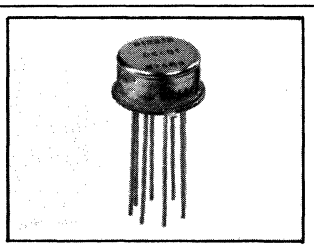
SINGLE-IN-LINE MIL-GRADE
Meets Mil-R-83401 Characteristic "V". 3-13 lead ceramic sandwich construction in high and low profile versions.



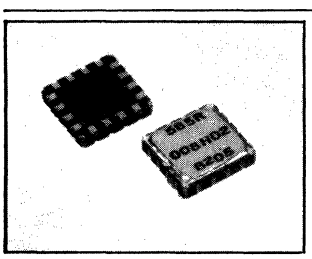
SINGLE-IN-LINE CONFORMAL
3-13 lead packages available. Designed for a wide range of tolerances and values at minimum cost.



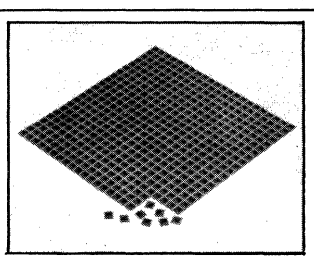
FLATPACKS
Hermetic or non-hermetic meet Mil-R-83401 Characteristic "C", "V" or "K". Available in 14 through 28 lead packages.



TO-STYLE HERMETIC
Available for custom precision applications requiring very low TCR and tight tracking.



LEADLESS CHIP CARRIERS
Hermetic or ceramic sandwich JEDEC packages. Standard and custom schematics available.



CHIP RESISTORS AND ARRAYS
Exceptional stability and reliability. Available in general purpose, 30-Mil square Mil-R-55342 characteristics and custom circuit arrays on ceramic or silicon.

Features:

- Standard circuits for military and commercial applications.
- Custom circuits as required for demanding applications.
- Nichrome or Tantalum based films optional.
- Wide packaging styles - standard hermetic or versatile custom pin counts with ceramic sandwich and conformal coated styles.
- Full Mil-spec screening available in-house.
- Rugged construction provides dependable performance at minimum cost.
- Network reliability greater than discrete resistor arrays.

Performance/Design Characteristics:

- Tolerances: .005% - 1%
- Resistance values: 10 ohms to 10 Megohm.
- Low TCR: 25 ppm/°C Std.
- Ultra low TCR: 10 and 5 ppm/°C available.
- Tracking less than 1 ppm.
- Operating temperature range: -55°C to +125°C
- Low noise: -35 db
- Stability: Δ R less than 200 ppm/70°C/ 10,000 hrs.

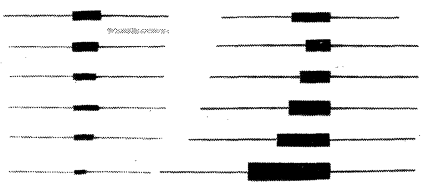
PHONE: 716/283-4025 EASYLINK 62343910

PRECISION POWER RESISTORS
Sub-Miniature Wire Wound
V-Coated for 350° C

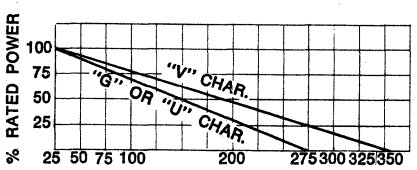


TYPE A MOLDED
.4 to 14 watts

TYPE B MOLDED
1 watt to 10 watts
Beryllium or Alumina Oxide Core

ELECTRICAL SPECIFICATIONS

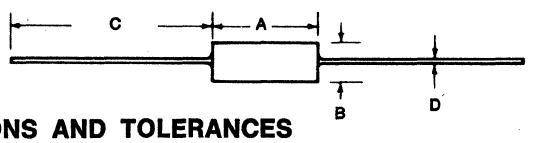
1. **Tolerances** — 5%, 3%, 1%, .5%, .25%, .1%, .05%, .02%.
2. **Dielectric Strength** — 500 VAC for 04A, 05A, 15A; B1, B3. Bal. 1000 VAC, circular foil wrap method or V-block.
3. Life — Maximum 0.5% resistance change after 1000 hour load life cycling 1½ hours on, ½ hour off, full load at 25°C).
4. Temperature Coefficient — Below 1 ohm = 90 PPM, Below 10 ohms = 50 PPM, Below 50 ohms = 30 PPM, All above = 20 PPM.



AMBIENT TEMP. DEG. CENTIGRADE

GENERAL SPECIFICATIONS

1. **Molded Type A** axial-lead resistors, molded for uniformity and minimum size for today's space age requirements.
2. Completely welded construction.
3. Meet or exceed requirements of Mil-R26, characteristic U.
4. Leads are tinned copperweld. Other materials available on request.
5. High temperature silicone molded coating.
6. **Molded Type B** beryllium oxide or alumina with power ratings 1.4 to 4 times higher than conventional ceramic resistors of the same size.



DIMENSIONS AND TOLERANCES

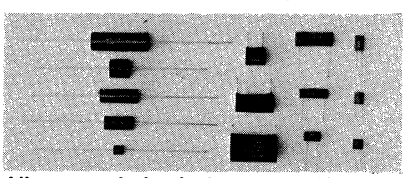
For Non-Inductive Winding add Suffix "N" to Callout.

MOLDED PRECISION WIRE WOUND RESISTORS



TYPE AP: AXIAL PRECISION
TYPE LP: LUG PRECISION
TYPE RP: RADIAL PRECISION
TYPE RPC: RECTANGULAR PRINTED CIRCUIT
TYPE PC: PRINTED CIRCUIT

All are non-inductively, reverse Pi wound at minimum wire tension for maximum long life stability. All production is aged before calibration for insurance of minimum long-term load-life drift. Due to advance winding techniques and design they have extremely low rise time characteristics approaching film type resistors. Through matching of materials, resistance changes from temperature expansion rates is eliminated. Zero voltage coefficient and low noise characteristics. Leads are solderable or weldable. TC of 15 PPM/°C standard. TC of 2 PPM/°C to 6000 PPM/°C available. All bridges and other instrumentation used in calibration are periodically checked against National Bureau Primary Standards. Designs exceed Mil-R-93 and Mil-R-9444. Distinct capabilities for: Special Networks; Matched Sets; Voltage Dividers; Molded and encapsulated Modules.

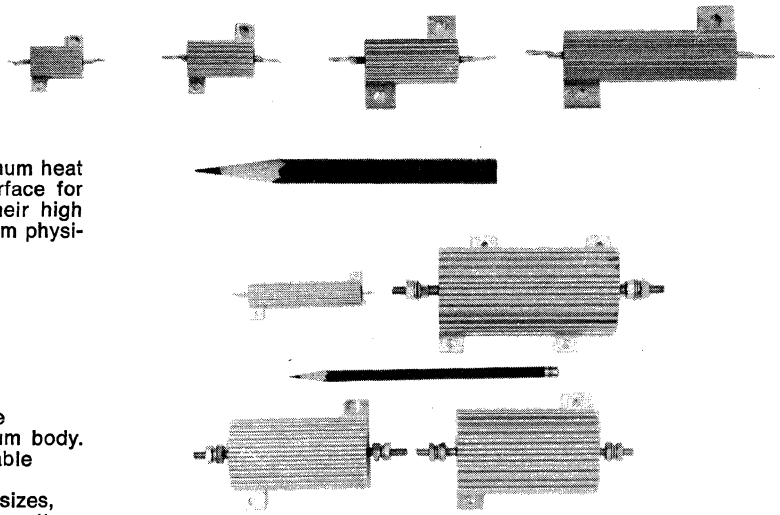
PACIFIC RESISTOR CO.
18300 OXNARD STREET, TARZANA, CA 91356 • (818) 345-7811 - (213) 873-4574 • Inside CA: 800-835-3355 • Outside CA: 800-367-6677

PRECISION POWER RESISTORS
Aluminum-Finned Heat Sink

TYPE CH CHASSIS MOUNT
5 through 250 watts

TYPE BCH CHASSIS MOUNT
15 through 35 watts
Beryllium Oxide or Alumina Core

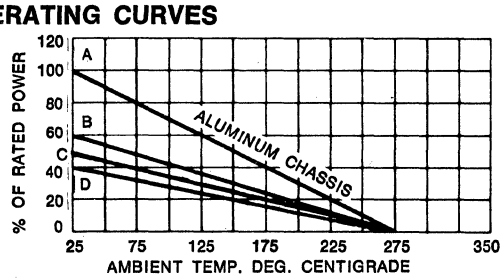


Chassis Mount, Type CH units are designed for maximum heat dissipation by mounting solidly to metal chassis surface for maximum heat transfer. They are outstanding for their high power dissipation with precision tolerances in minimum physical sizes.

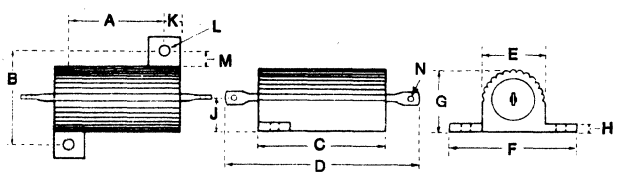
ELECTRICAL SPECIFICATIONS
1. Resistance Range — .05 ohms to 275K ohms.
2. Tolerance — 5%, 3%, 1%, .5%, .25%, .1%, .05%.
3. Temperature Coefficient — ±20 PPM to 90 PPM

GENERAL SPECIFICATIONS
1. Lower hot spot ratings due to exclusive complete encapsulation of element within anodized aluminum body.
2. Welded construction throughout assures long stable load life.
3. Heavy spade lug type leads on 5 through 70 watt sizes, threaded heavy stud terminals on 100 through 250 watts.
4. 1000 VAC minimum dielectric strength on 5CH, 10CH, B5CH and B10CH; 2500 VAC on 25CH, 50CH, 100CH, and B25CH; 5500 VAC on all others.
5. Temperature Range — −55°C to +275°C.
6. Eight standard sizes.

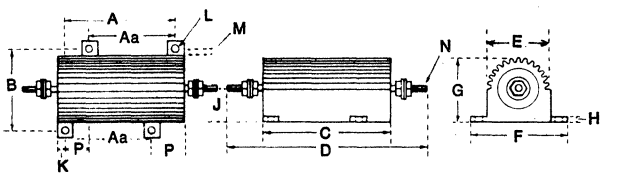
DERATING CURVES



Temp. of −55°C to +275°C. Derating is required for reduced chassis mounting area and high ambient temp.
Curves:
A — When mounted on proper alum.
Chassis:
4x6x2x.040 alum. chassis = 5CH & 10CH.
5x7x2x.040 alum. chassis = 25CH, B25CH, & B50CH.
12x12x.059 alum. panel = 50CH & 100CH.
12x12x.125 alum. panel = 110CH, 180CH, and 250CH.
B — Unmounted 5CH, 10CH, B5CH, B10CH.
C — Unmounted 25CH, 100CH, B25CH, and 110CH.
D — Unmounted 50CH, 180CH, and 250CH.



5CH, 10CH, 25CH, 50CH, 100CH, B5CH, B10CH, B25CH



110CH, 180CH, 250CH

Core Conductivity at 275°C (BTU-Ft / Ft²-Hr-°F)	
BERYLLIUM OXIDE (BeO)-64	
ALUMINUM OXIDE — 8	
STEATITE — 1.5

LEAD MATERIAL

OFHC with 60/40 Tin/Lead Coating

NOTE: The GP-Series of resistors is conformally coated and fully protected against moisture by a multi-paint coat system and a hard epoxy outer coating.

Marking is alpha-numeric and meets the most demanding marking requirements. Special marking is available upon request.

Consult the factory concerning failsafe, flameproof, and fusing requirements.

PRECISION

TYPE SX (SILICONE PROTECTION)
TYPE TX (ECONOMY LINE)

DESCRIPTION AND APPLICATION:

PRECISION continues a tradition with . . . low-priced resistors for critical applications . . . such as input voltage divider ratios of 10:1, 100:1 and 1000:1 with precise tolerances and TCR matching requirements . . . Which of these selections meet your needs exactly?

* 0.01 ohm to 0.1 ohm and maximum special resistance values available in non-standard physical sizes — 0 + .062″
† Commercially pure copper (Electrolytic Tough Pitch/Oxygen-Free High Conductivity).

ENGINEERING DATA:

1 RESISTANCE RANGE AND TOLERANCE "Repeatable (part-to-part)"
Any ohmic value or decimal part of an ohm desired with tolerances to ±0.05%. Refer to type HR for closer resistance tolerances.

2 TEMPERATURE COEFFICIENT OF RESISTANCE (TCR)
Zero ±10ppm/°C. (Standard)
For specific TCR characteristics to ±1 ppm/°C refer to type HR. See type PT for Precision Positive (+) TCR characteristics to +6000 ppm/°C.

3 STABILITY VS. TIME CHARACTERISTICS "Low ΔR"
To ±0.005%/year at 25°C (no load).

4 POWER RATINGS VS. AMBIENT TEMPERATURE AND RESISTANCE TOLERANCE
(Full power ratings are based upon standard ±1% resistance tolerance. Derating is required for higher temperatures and closer resistance tolerances.)
Type SX: To +125°C.
Type TX: To + 85°C.

5 INDUCTANCE
The standard Type SX/TX resistors are inductively wound. Non-inductive resistors are available — add suffix letter "N" in part number.

6 TERMINALS
Solderable hot-tinned (63% Sn — 37% Pb) copper wire leads. Low thermal EMF, noise free construction.

7 PROTECTIVE COATINGS
Type SX: New **solvent resistant** silicone-epoxy-seal.
Type TX: Commercial plastic conformal coating.

8 PURCHASING INFORMATION
Please specify: Quantity, type, resistance value, resistance tolerance and special features which may apply.

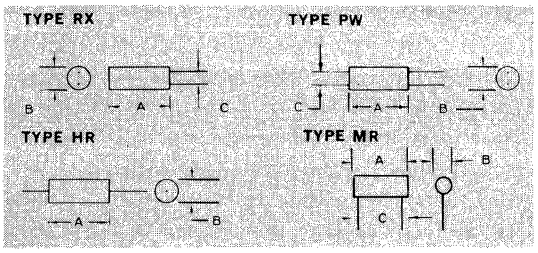
ULTRA



DESCRIPTION AND APPLICATION:

PRECISION'S ULTRA performance resistors represent exactly fifty years of specialization in the exclusive design and manufacture of precision resistance units. These ultra-high accuracy, ultra-time stability, low noise resistors are excellent for matched tolerances and TCR characteristics, as well as economical single or multiple secondary standards for critical commercial and military applications.

* Commercially pure copper (Electrolytic Tough Pitch/Oxygen-Free High Conductivity). † 2" leads on MIL-Styles

ENGINEERING DATA:

1 RESISTANCE RANGE AND TOLERANCE "MIL Guidelines"

Standard: Any ohmic value or decimal part of an ohm desired with tolerances to ±0.01%. 10Ω min. res. (.01%).

Special: Higher or lower values beyond the standard limits with tolerances to ±0.005%. (Allow approx. +.001 ohm/inch for lead resistance on low value two-terminal designs: Lead resistance adder may be eliminated by using a four-terminal configuration). 100Ω min. res. (.005%). Type PW can also be supplied as two (2) resistor network for series/parallel circuits.

2 TEMPERATURE COEFFICIENT OF RESISTANCE (TCR)

Standard: Zero ±5 ppm/°C (100 ohms and above). **Zero ±15 ppm/°C** (values below 100 ohms).

Special: To ±1 ppm/°C. TCR matching to within 0.5 ppm/°C.

3 INDUCTANCE

Standard: Non-inductively wound with balanced reverse-pi winding.

4 STABILITY VS. TIME CHARACTERISTICS (No Load)

To ±0.001%/year at 25°C. 10% of tol. .01% tol. = .001% stability/yr.

5 POWER RATINGS VS. AMBIENT TEMPERATURE

These resistors are designed for full load operation providing the ambient temperature plus the temperature rise due to power dissipation does not exceed +125°C. (Derated to zero power at +145°C.)

6 VOLTAGE RATINGS (D.C. Voltage or Peak Voltage)

To calculate the safe operating voltage for any resistance value below the maximum listed, apply the formula $E = \sqrt{PR}$.

7 THERMAL EMF (With respect to copper)

Standard: < +2 microvolts per °C (100 ohms and above). < −3 microvolts per °C (values below 100 ohms).

Special: Construction and materials are available to minimize thermal electric effects.

8 PROTECTIVE ENCAPSULATION

Expansion — stress free base coat and epoxy seal.

9 MARKING (Identification)

Standard: PRC symbol, type, resistance value and tolerance.

Special: Military or custom marking.

10 SPECIAL TESTS

Qualification testing: Per MIL-Std-202 on a 100% or sample basis available.

POWER

TYPE SM AXIAL LEAD

DESCRIPTION AND APPLICATION:

PRECISION'S TYPE SM sub-miniature precision power wirewound resistors are available in two and four terminal designs for commercial and military applications . . . such as precision current sensing in multi-range instrumentation. Popular resistance sets: Type SM186 0.9Ω and SM186-4 0.1Ω units used with Type SX154 90KΩ, 900Ω, 90Ω and 9 ohm resistors.

* 0.02 ohm to 0.1 ohm and maximum resistance values available in non-standard physical sizes −0 +.062".
All low value 2-terminal designs are calibrated and tested at mid-point on lead unless otherwise specified.

CONSIDER THESE INNOVATIVE FEATURES:

1 WIDE RESISTANCE RANGE
"Widest in the industry" any ohmic value or decimal part of an ohm from 0.02 ohm to 4 megohms.

2 DEPENDABLE TOLERANCES
Small quantity lots, as well as, competitive high volume production quantities are accurately checked 100% to assure specified limits . . . ±1% (Std.), ±0.5%, ±0.25%, ±0.1% and ±0.05% resistance tolerances.

3 STABILITY VS. TEMPERATURE CHARACTERISTICS
Carefully selected materials/processes & quality control procedures insure low temperature (TCR) and power coefficients. **Standard:** Zero ±5 ppm/°C to zero ±20 ppm/°C. Special to ±2 ppm/°C.

4 HIGH VOLTAGE RATINGS
(D.C. Voltage or Peak Voltage)
Precision's high operating voltage winding patterns also eliminate dangerous crossovers and potential problems of standard mandrel style resistors. To calculate the safe operating voltage for any resistance value below the maximum listed, apply the formula $E = \sqrt{PR}$.

5 PRECISION POWER RATINGS
All (Std.) Type SM 1% tolerance resistors are designed for continuous full load operation at 25°C. Derate to zero power at +275°C. (Fig. #1)

6 SOLVENT RESISTANT COATING
All Type SM resistors are sealed in a tough solvent resistant—high temperature silicone coating . . . with indelible marking.

7 PURCHASING INFORMATION
Please Specify: Quantity, type, resistance value, resistance tolerance and special features which may apply. TCR characteristic together with temperature span of operation should be specified in behavior spec.

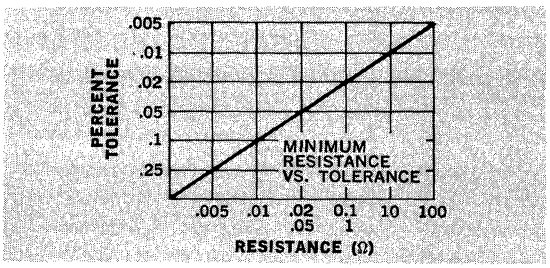
TYPE SM-(4) FOUR TERMINAL

SHUNTS



DESCRIPTION AND APPLICATION:

The four (4) terminal shunt/resistors illustrated on this page are specifically designed and constructed for applications requiring precise measurement and sensing of current by voltage drop methods or for use as precision voltage divider networks.

ELECTRICAL AND PHYSICAL SPECIFICATIONS

Precise low-value repeatability. Eliminates lead-out and contact resistance. "Single Joint" design makes lead identification academic.

* Heavier current carrying capacity leads are available for low resistance — full power applications.

ENGINEERING DATA:

1 RESISTANCE RANGE AND TOLERANCE

Standard: Any ohmic value or decimal part of an ohm desired from 0.005 ohm to 100 ohms with tolerances to ±0.005% — see minimum resistance vs. tolerances graph above.

2 TEMPERATURE COEFFICIENT OF RESISTANCE

Zero ±15 ppm/°C

3 STABILITY VS. TIME CHARACTERISTICS

To ±0.001%/year @ 25°C e.g. 10% of tolerance ±0.01% = 0.001%/year.

4 SOLVENT RESISTANT COATING

. . . with indelible marking.

5 PRECISION POWER RATINGS

Minimum resistance values @ full power ratings are based upon ±1% resistance tolerances at 25°C. Derating is required for higher temperatures, closer tolerances and lower resistance values.

6 TERMINALS

Solderable "hot-tinned" copper wire leads act as an excellent wetting agent and provide long shelf life. Low EMF construction reduces thermal effects.

7 DC SHUNT APPLICATIONS

Example: To increase the range of a Milliammeter with an internal resistance of 27 ohms to read 500 milliamperes.

$$\text{Formula: } \frac{R^m \times I^m}{I - I^m} = \text{Shunt Resistance}$$

$$\text{Solution: } \frac{27 \times .001}{.500 - .001} = \frac{.027}{.499} \text{ or } .054\Omega \text{ shunt}$$

where: I^m = current of meter
I = current range desired
R^m = resistance of meter

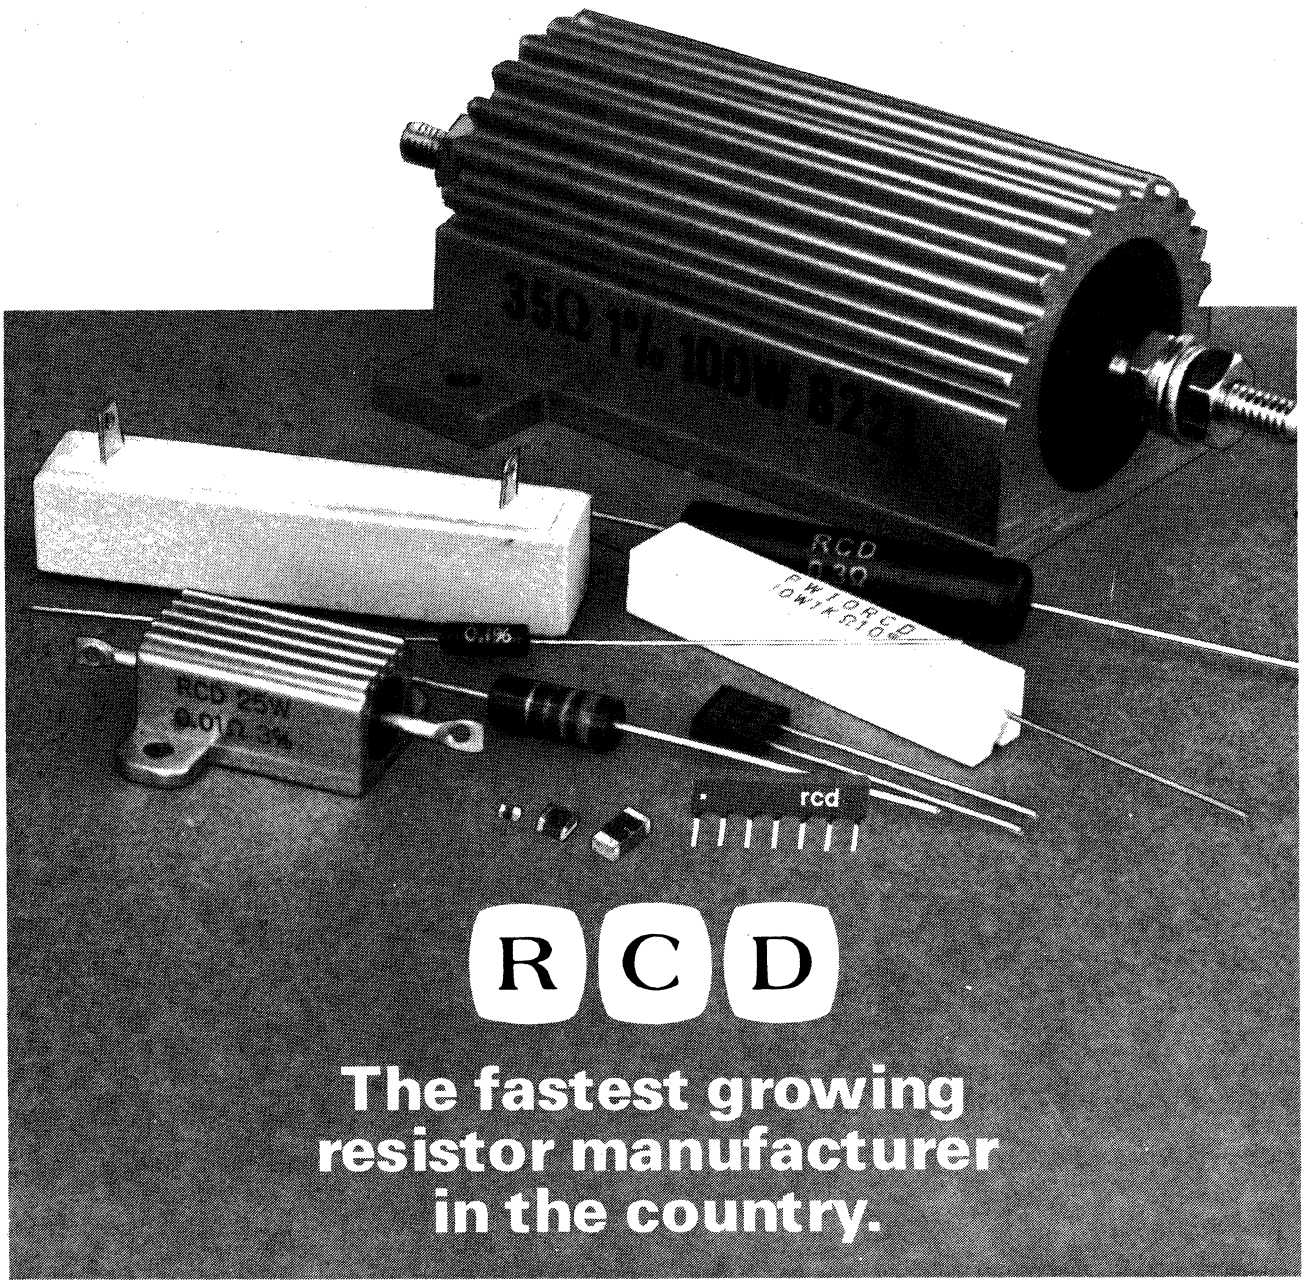
10601 75th STREET NO. • LARGO, FL 33543 U.S.A. • TEL: (813) 541-5771 • TELEX: 821788

It's simple.

If we can't save you money on resistors, then we don't deserve your business.

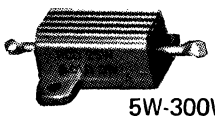


RCD Quick Reference Guide

POWER WIREWOUND RESISTORS

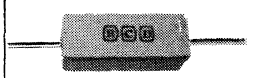
Series 100* (STOCK)
¼W-20W

Silicone coated, all-welded, per MIL-R-26(RW), MIL-R-39007 (RWR). .001Ω to 300KΩ, tolerances to ±0.01%, TCR to 5PPM.
100X — non-inductive
100BEO — increased power
100R — radial leads
100F — flameproof coating

Series 600*


5W-300W

Silicone molded in an aluminum housing. High wattage capability with chassis mounting, per MIL-R-18546(RE), MIL-R-39009(RER). .005Ω to 200KΩ, tolerances to ±0.01%, TCR to 5PPM.
600X — non-inductive
600BEO — increased power

Series PW* (STOCK)


2W-50W

Low cost general purpose wirewounds. Ceramic encased, completely flameproof.
PWX — non-inductive
PWA — standoffs
PWR — radial leads
PWF — failsafe fusible
PWS — miniature sizes

Series RW

1W -3W

Low cost epoxy molded or conformal coated wirewounds offer savings over carbon comps. RW-1 (1-watt) is the size of a ½-W carbon comp. RW-2(2W) and RW-3(3W) are both the size of a 1W comp.
RWF — Flameproof fusible

Series ULV,LVF*

1W-25W

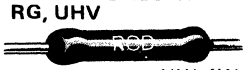
Series ULV utilizes a newly-developed manufacturing technique to obtain very low values (to 0.002Ω), with precision accuracy at lowest cost.
LVF — four terminal construct.

THICK FILM RESISTORS

Series RSF,BW (STOCK)

¼W-9W

METAL OXIDE RESISTORS
Flameproof, thick complex-oxide construction results in performance and size of wirewounds, at significant price reductions. Non-inductive, high-surge capability. 0.1Ω to 240K stocked. BW Series is fusible.

RG, UHV


¼W-4W

HIGH VOLTAGE/HIGH MEGOHM
Voltage capability to 50KV. Resitance to 10,000 Gig. Tolerances to 0.5%, TCR to 50PPM.

Series MG

½W- 1W

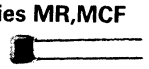
SPACE SAVER RESISTORS—
Miniature resistors! ½-watt is ⅛W size, 1-watt is ¼-watt size. Improved dissipation due to thick cermet glaze. 6.2 ohm to 1 Meg, TCR to 50 PPM, tolerances to 1.0%.

Series MC, MCR

1/16-1.0W

THICK FILM CHIPS—12 SIZES
High-stability thick film chip resistors. 4.7Ω to 2000 Meg. Wrap-around termination available. Tolerances to 0.25%, TCR to 50PPM.

Series MR,MCF



WORLD'S SMALLEST!
Cermet micro-resistors offer highest performance in smallest possible size. Under 0.1" long! 4.7Ω to 8.2 Meg. Axial or radial leads.

DIP,SIP * (STOCK)

THIN FILM/THICK FILM—
RCD resistor networks offer premium performance per MIL-R-83401. SIP packages are 4 to 12 pin. DIP's are 14 or 16 pin. Variety of standard and custom configurations, hybrids available.

PRECISION WIREWOUND RESISTORS

Series SA,MA*

.1W-2W

Epoxy encapsulated, non-inductive precision bobbin wirewounds per MIL-R-93(RB), MIL-R-39005 (RBR). 0.1Ω to 25 Meg, tolerances to ±0.005%, TCR from ±1PPM to +6700PPM

Series PC*

.1W-1W

Same as Series SA, MA but feature radial leads for easy PCB insertion and space savings per MIL-R-93, MIL-R-39005. PC451 (rectangular) is direct low-cost replacement for ultra-precision films.

Series Q*

.1W-1W

Wirewound substitutes for precision metal film's RN55, RN60, RN65, RN70, RN75. Better stability, lower price. TCR as low as ±2PPM. Tolerances to ±0.01%.

THIN FILM RESISTORS

Series MF*

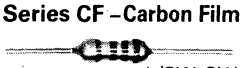
.1W-1W

Precision metal film per MIL-R-10509, RN55,60,65,70,75 and MIL-R-55182(RNR,RNC). 10Ω to 5.1 Meg, tolerances to ±0.05%. Outstanding TC's to 5PPM.

Series GP–Metal Film (STOCK)

.1W-1W

Commercial metal film with MIL-spec performance at half the price! Exceeds MIL-R-10509(RN),-22684 (RL),-39017(RLR). Values to 22.1 Meg, TC's to 25PPM, tolerances to ±0.5%.

Series CF–Carbon Film (STOCK)


1/8W-2W

General purpose carbon fim feature highest grade core for extended life stability and overload dissipation. 1ohm to 22 Meg, 7 standard sizes. Series CFF is flameproof.

TEMPERATURE SENSORS

LP 1/4

+150°C

Low cost metal film with linear positive TCR. 33Ω to 30K, tolerances to ±1.0%. Available in any T.C. up to +5000PPM (.5%/°C). Only ¼" long.

ATB,PTB,ATS,ATC *

+375°C

Precision wirewound, axial or radial. Interchangeable TCR, 1Ω to 1 Meg, tolerances to ±0.05%. Available in any T.C. up to +6720 PPM.

PTC,PTS *

+600°C

Ceramic encased RTD elements or stainless steel RTD probles. Platinum, Nickel, Nife elements stocked. Tolerances to +0.1%.

SPECIALTY PRODUCTS

FUSE RESISTORS

1/8W-10W

Standard and Custom fusing curves to provide precisely controlled circuit protection. Fusing time to 5μS at 0.1A and up.

SURGE RESISTORS *

1W-50W

Withstand high energy dissipation and absorb surges up to 75 joules with minor resistance shift Standard and Custom designs.

ZERO OHM (STOCK)

¼W

Insulated jumpers come in 1/4W size and are suited for automatic insertion. Resistance is .02 ohm or less. Chip jumpers available.

INDUCTORS

Series AL (STOCK)

Low cost color banded inductors per MIL-C15305. Special core results in high Q and SFR, low DCR. .22μH to 56000μH. Axial or radial leads. Shielded type available.

CUSTOM

RCD manufactures a series of custom coil products including toroids, transformers, and shielded chokes. RCD also offers custom Res/cap, Res/Diode hybrid networks and voltage dividers.

* Don't forget our **'SWIFT'** service (**S**hip **W**ith **I**n **F**ifty **T**wo hours) when you require fast delivery of a non-stock item!

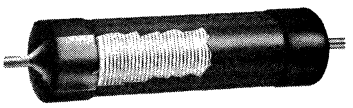
RCL·Shallcross
WIREWOUND RESISTORS

POWER

MIL-R-26, Type RW

T Series, Silicone Coated



GENERAL SPECIFICATIONS

Wattage Range: 25 styles to choose from ranging from .4 to 14 watts.

Resistance Values: From 0.1 ohm to maximum values as stated in table. For values below 0.1 ohm, use RCL-Shallcross Low Ω Metal Element Resistors.

Power Rating: Two power ratings, depending on operating temperature and stability requirements:

- Characteristic U: 275°C maximum hotspot temperature.
- Characteristic V: 350°C maximum hotspot temperature.

Derating: Wattage Ratings based on operation at 25°C. For higher ambient temperatures, derate per derating curve.

Tolerance: ±1.0% is standard. Closer tolerances are available.

Temperature Range: From −65°C to +275°C (Characteristic U) or +350°C (Characteristic V).

Temperature Coefficient of Resistance: Standard T.C.: ±20 PPM/°C = 500Ω and up, ±30 PPM/°C = 10Ω to 499Ω, ±50 PPM/°C = 1Ω to 9.99Ω, ±90 PPM/°C = 0.1Ω to 0.99Ω, ±400 PPM/°C = 0.025Ω to 0.099Ω, ±650 PPM/°C = 0.01Ω to 0.024Ω.

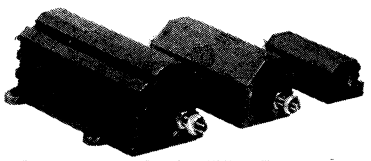
CHASSIS MOUNT POWER

MIL-R-18546, Type RE

AL Series, Aluminum Housed Chassis Mount



GENERAL SPECIFICATIONS

Wattage Range: 7 styles to choose from ranging from 5 to 250 watts.

Resistance Values: From 0.1 ohm to maximum values as stated in table.

Power Rating: 275°C maximum hotspot at 25°C ambient. 1% maximum ΔR in 1000 hour load life.

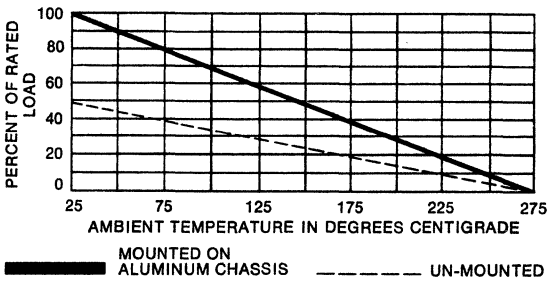
Derating: Wattage ratings based on operation at 25°C. For higher ambient temperatures, derate per derating curve.

Tolerance: ±1.0% is standard.

Temperature Range: From −55°C to +275°C.

Temperature Coefficient of Resistance: Standard T.C.: ±20 PPM/°C = 10Ω and up, ±50 PPM/°C = 1Ω to 9.99Ω, ±90 PPM/°C = below 1Ω.

WATTAGE VS. AMBIENT TEMP. DERATING



DIMENSIONS — 5 THRU 75 WATTS

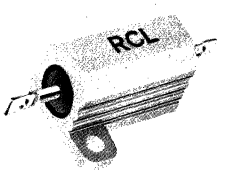
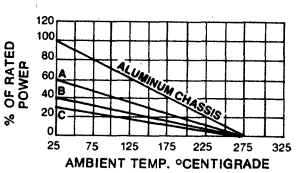
MIL-R-39009, Type RER, R Level

AL-ER Series, Aluminum Housed Chassis Mount





GENERAL SPECIFICATIONS

Wattage Range: 4 styles to choose from ranging from 5 to 50 watts.

Power Rating: 275°C maximum hotspot at 25°C ambient. 1% maximum ΔR in 2000 hour load life.

Derating: AL-ER chassis mount resistors have an operating temperature range of −55°C to +275°C. For higher ambient temperatures, use derating curve which applies to operation of unmounted resistors (A = AL5ER and AL10ER, B = AL25ER and C = AL50ER).

Tolerance: ±1% is standard.

Temperature Coefficient of Resistance: Standard T.C.: ±20 PPM/°C = 20Ω and up, ±50 PPM/°C = 1Ω to 19.6Ω, ±100 PPM/°C = below 1Ω.

Dimensional Specifications: Identical to AL Series on previous page.

RCL·Shallcross
WIREWOUND RESISTORS

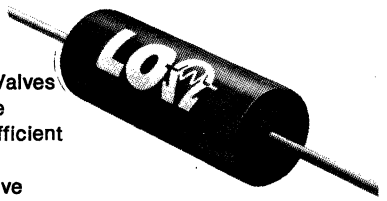
SPECIAL PRODUCTS

LO® Metal Element Resistors



GENERAL SPECIFICATIONS

Wattage Range: 3 and 5 watts.

Resistance Values: 0.005, 0.01, 0.015, 0.02, 0.025, 0.03, 0.04, 0.05, 0.07, 0.08, 0.1, 0.2 ohms.

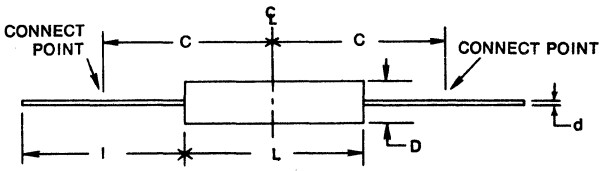
Derating: Lo Ω Metal Element Resistors are derated linearly from room temperature at full power to 0 power at 275°C.

Tolerance: 5% — All styles and values, 3% — All styles and values, 0.5% available above 0.005 ohms.

Construction: Tinned copper leads are welded directly to a low temperature coefficient of resistance element by a highly mechanized proprietary process. Resistors are encapsulated in a special formulated compound.

FEATURES

- Ultra Low Resistance Valves
- High Stability Over Life
- Low Temperature Coefficient of Resistance
- Inherently Non-Inductive



DIMENSION SPECIFICATIONS — Inches (Millimeters)

Style	L	D	C	l	d
LO-3	0.560 ±0.010 (14.224 ±0.254)	0.210 ±0.010 (5.334 ±0.254)	0.655 (16.64)	1.375 ±0.125 (34.925 ±3.175)	0.032 ±0.002 (0.813 ±0.051)

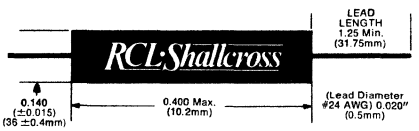
Dual Function Fuse Resistors

A Dual Purpose Device That Acts As Both A Wirewound Resistor and Fuse



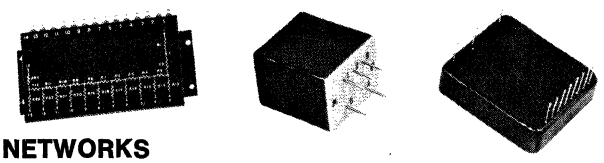
GENERAL SPECIFICATIONS

Resistance Range: 0.2Ω to 200Ω.
Resistance Tolerance: 10% is standard, 5% and 2% definition.
Operating Temperature: −55°C to +150°C
Temperature Coefficient: ±50 PPM/°C Max.

FEATURES

- Affords protection for semiconductor devices
- Eliminates fire hazard and circuit board damage to overheated components
- Eliminates unnecessary blowing due to transient conditions
- Reduces the number of discrete components required.

Discrete Resistor Networks and Matched Sets



NETWORKS

Network quality is determined by the qualities of its individual resistors and the packaging and mounting expertise of its assembler. RCL/Shallcross offers a unique background of experience, data, manufacturing and testing skills for its wirewound resistor networks. PARAMETERS: (1) Resistance ratios to .001%, (2) Resistor tolerances to ±.005% (at ambient), (3) Ratio tolerances as close as .01% (over a range of temperatures), (4) Stability to ±.001% per year.

MATCHED SETS

Two or more resistors can be matched with relative tolerance much higher than each one's individual tolerance. Characteristics most often matched are: (1) DC Resistance at one or more temperatures, (2) AC and DC Voltage ratios, (3) Temperate Coefficients and (4) Phase Shifts. Principle advantages of matched sets are: (a) Very tight relative tolerances, (b) Lower cost than networks of comparable accuracy and (c) Flexibility in locating components during design and packaging. An engineering staff at RCL/Shallcross is ready to assist you in specifying your matched set requirements.

Molded Temperature Sensors

RCL offers a standard line of epoxy encapsulated sensing resistors for temperature compensating applications. The standard resistance tolerance ±5% with tighter tolerances available on special order. Cable lengths from 2.0" to 48.0" (50.80 to 1219.2 mm) are available with 6.0" (152.40 mm) standard. Operating temperature range is −55°C to +105°C. Repeatability of tempco within a given lot is ±100 PPM.

RCL Style	Resistance Range	PPM/°C Average Tempco 0°C — 100°C
TC35	10Ω — 50KΩ	3500 ±350
TC45	10Ω — 10KΩ	4500 ±450
TC55	10Ω — 5KΩ	5500 ±550

We've Put up a LOT of Resistance...

Reliable Performance *Wherever* Needed!

For More Than 30 Years Our Famous, *Versatile* Ohmic Capabilities have met the rigid demands of smart buyers with unerring consistency — saving time, tempers and money.

Against this enviable background our engineers envision even greater challenges in solving future OEM and industrial resistor application problems. For prompt, practical answers to your requirements, send us your prints or specs.

AXIAL LEAD

RESNET® ULTRA PRECISION METAL FILM RESISTORS & NETWORKS

RESISTANCE TOLERANCES — 0.005% to 1%

TEMPERATURE COEFFICIENT — 1, 2, 5, or 10ppm/°C

FEATURES

- Long Term Stability: 25ppm/year
- Noise Factor: Below 30db
- Inductance: Approx. .05 microhenry
- Capacitance: Below 0.5 picofarad
- Voltage Coefficient: < 2ppm/volt
- Rise Time: Less than 1ns without ringing

CARBORUNDUM® NON-INDUCTIVE POWER RESISTORS

Choose Type SP for great A-C power handling capability, whether it be at power frequency or many megahertz.

Choose Type A when high resistance is required in a high power non-inductive resistor.

Choose Type AS for its ability to absorb huge amounts of energy and for its non-inductive property at high voltage.

CHARACTERISTICS	Type SP	Type AS	Type A
Maximum Operating Temperature: °C	350	230 150*	230
Temperature Coefficient: Percent per degree C, −55°C to maximum rated temperature	±0.075	−0.075	−0.20
Voltage Coefficient: Maximum percent per kilovolt per inch active length (overall length less termination)	1.0	1.0	–
Short Time Overload: Maximum percent change after 5 cycles 10 times rated power, 5 seconds on, 90 seconds off	2.0	2.0	–
Moisture Resistance: Maximum percent change when tested per MIL-STD-202 method 103	2.5	2.5	2.5

*with epoxy insulation for use in oil

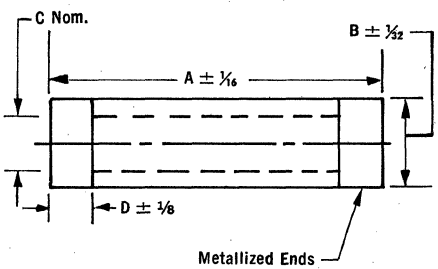
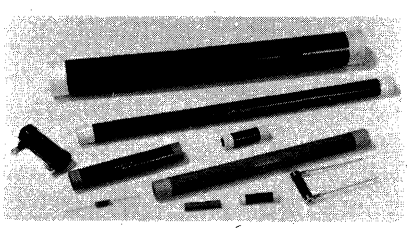
892 SP	24.0	2.00	1.50	—	1.00



SERIES 800 AND 1000

This general line is available in a wide variety of sizes and terminations. They retain the non-inductive and heavy load characteristics of all Carborundum ceramic resistors. These resistors can handle up to 1000 watts, 165 KJ and 165 KV in resistance values from 1 ohm to 1 megohm.



Parts are specified by the four or five character type number (for example 885SP, 888AS, 890A), the first two digits of the resistance, a single digit to indicate the power of ten multiplier, and a "J" for ±5%, a "K" for ±10%, or an "L" for ±20%. Where the resistance is less than ten ohms, the power of ten multiplier is not used, and an "R" replaces the decimal point. Thus R50 = 0.50 ohm, 7R5 = 7.5 ohm, 220 = 22.0 ohm, 152 = 1500 ohm, etc. *Type AS with a suffix letter to part number denotes optional construction: "D" for dielectric coating; "O" for oil application; "N" for No Arc terminal. Consult Customer Service for additional options and part number detail. A typical part number would be 886AS501KD. This represents a type AS resistor, 5" long x ¾" diameter, 500 ±10% ohms, with dielectric coating.

SOHIO CARBORUNDUM

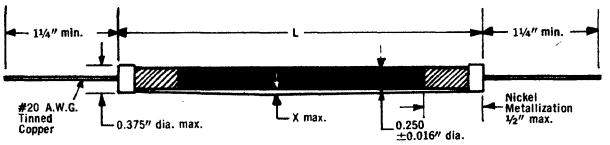
CARBORUNDUM® NON-INDUCTIVE POWER RESISTORS FOR SPECIAL PROBLEM SOLUTIONS

Series 102/104/106/109AS & SP Pencil-type Resistors

These ¼" diameter resistors are available in a variety of lengths. Pencil shaped resistors offer unique non-inductive and high-voltage properties in a compact, easily-wired configuration.

Type AS for high voltage and energy applications.

Type SP for high AC power handling capabilities.



Length	Type No.	Resistance Available (ohms) Min.	Resistance Available (ohms) Max.	Average Power @ 40°C (watts)	Peak Energy (joules)	Peak Voltage (volts)
2"	102AS	30	9,000	5	600	3,000

	109SP	4	3,800	55	250	8,800

TYPE 234 AND 231 RESISTORS

Carborundum type 234 and 231 resistors are a small size non-inductive bulk type resistor (there are no spirals or windings), capable of dissipating a full 10 watts of power (Type SP) or absorbing **275** Joules of energy (Type AS).

234 — ¼" x 1"
231 — 5/32" x ¾"

Specifications	234SP	234AS	231SP	231AS

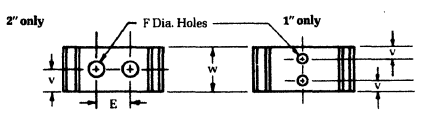
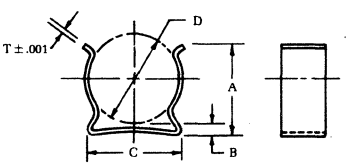
Temperature Coefficient	±0.075% /°C	−0.075% /°C	±0.075% /°C	−0.075% /°C

Termination and Mounting

Electrical connection to the resistive bodies of resistors is made by flame-sprayed metal end bands. The standard metal is aluminum for type SP, nickel for types AS and A. Special terminations of brass or copper overspray or tinned ends are readily available specials. Add "B," "C," or "T" respectively to the part number to designate these special terminations.

In most cases, connections to the resistors may be made by stock clips such as these:





CLIPS DIMENSIONS

Stock No.	Size	Holes	A	B	C	D	E	F	T	V	W
35370	½"	1	0.620	0.090	0.560	0.500		0.093	0.020	0.188	0.375

Material: Beryllium Copper
Finish: Electro Tin Plate

TYPE AS EPOXY COATED STYLE

Carborundum Type AS High-Energy Ceramic Resistors are available with an epoxy coating which protects the resistors body from contaminants. It is especially useful where the resistor is employed in an application where it is not protected from a dirty ambient atmosphere or where it is immersed in a cooling or dielectric fluid. Energy level in oil should not exceed 300 joules/cc.

The overall length, L, of the coated resistor is approximately 0.25" longer than the uncoated part; the diameter, D, is approximately 0.30" greater. Coated resistors are also available with an axial mounted cab.

SOHIO CARBORUNDUM

CARBORUNDUM® NON-INDUCTIVE POWER RESISTORS FOR SPECIAL PROBLEM SOLUTIONS

TYPE AS DISC AND WASHER STYLES

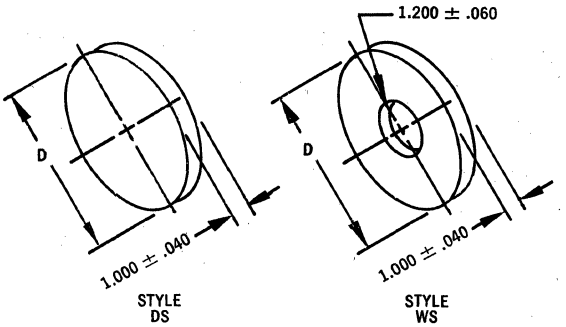
Carborundum Type AS Disc and Washer Ceramic Resistors are a bulk-type low resistance element, and therefore have the ability to absorb instantaneously great surges of energy with virtually zero inductance.

Maximum Peak Voltage: 5000 volts.

Maximum Temperature: 230°C.

Power Rating: In free air, parts will safely dissipate 2.5 watts per square inch of surface area at 40°C.

Temperature Coefficient of Resistance: −0.1%/°C to 0.0%/°C.



Style		Diameter "D" (inches)	Peak Energy (joules)	Available Resistances	
				Minimum	Maximum

CARBORUNDUM® VARISTORS

Standard varistors described below have a 10% tolerance on voltage. Also available: leadless discs and rods, voltages specified at intermediate values or at other currents, and voltage tolerances of ±15% and ±20%. Available at extra cost: voltage tolerances of ±5% and ±7%, color coding, and special coatings.

Standard rod varistors have a blue epoxy coating. Available at extra cost: formed leads for printed circuit board insertion.

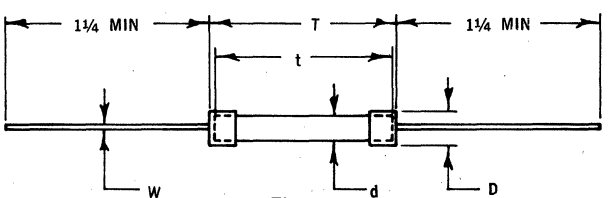

Figure 1

Standard disc varistors have a black flame-retardant PVC coating. Also available: Glyptal coating and kinked leads for printed circuit board insertion.

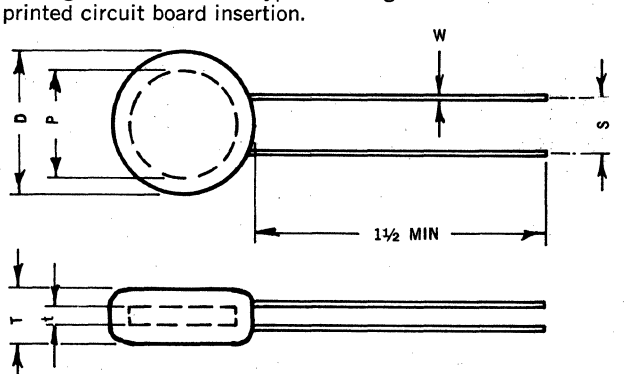

Figure 2

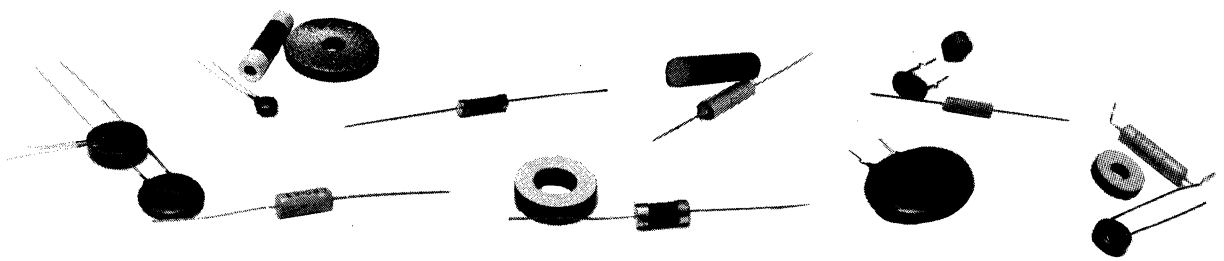
SOHIO CARBORUNDUM

CARBORUNDUM® VARISTORS



Carborundum silicon carbide varistors are voltage-dependent resistors which are offered in a wide variety of configurations, including discs, rods, and washers. In addition to the sizes shown on these pages, rods are available up to 18 inches in length, washers are available up to 3½ inches in diameter. Typical uses include limitation of peak discharges, spike suppression, stabilization of voltages, and generation of nonlinear functions.

Varistors are specified by the voltage measured across them, suitably toleranced, at some constant current. The slope of the voltage-current characteristic is most often given by the maximum voltage ratio for two specified currents.

In general the characteristic for a varistor may be approximated by the equation:

$$i = Ke^n$$

where i and e are instantaneous current and voltage respectively, K is a proportionality constant, and n is an exponent applicable in the range in which the varistor is used: most often it is between 3 and 5.

The silicon carbide varistor is a "forgiving" component. When hit by a voltage surge, the energy is absorbed throughout its body, not at a junction. A voltage surge beyond the design level causes substantial increase in current and energy absorption, but not a catastrophic failure.

SMALL DISC VARISTORS

SOHIO CARBORUNDUM

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M

MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O

OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P

PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

Z

ZIF zero insertion force

Thick-Film Chip Resistors

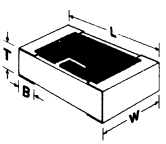
Chip resistors were State of the Art's first manufactured product, and in the years since we started production our resistor chip line has grown into the broadest range of thick film chip resistors offered anywhere. We offer lower values, higher values, closer tolerances, flatter temperature coefficients, smaller sizes, etc., etc.

RESISTOR PERFORMANCE

PERFORMANCE CHARACTERISTICS STANDARD PRODUCTION	MAX CHANGE IN RESISTANCE
RESISTANCE TO SOLDERING	0.5%
THERMAL SHOCK	0.5%
SHORT TIME OVERLOAD	0.5%
HIGH TEMPERATURE STORAGE	1.0%
LOAD LIFE (1000 hrs)	1.0%

SIZES AVAILABLE

State of the Art offers fourteen standard resistor chip sizes, ranging from the extremely compact .030 x .020 inch chip to a 2-watt chip measuring .250 x .125 inch.



OTHER SIZES AVAILABLE
0703
1002
1507

PART NUMBERING SYSTEM

Our part numbering system is explained on the right. As an example, we show the part number of our standard production; passivated; 50 x 40-mil chip; with pretinned nickel barrier wrap-around terminations, 15 ohm ±5%. The part number is S0504CPX150J:

If in doubt about the proper codes, or if there is more information to be transmitted than the part number can carry, use plain language.

S 0504 CPX 150 J

SPECIAL TERMINATION
G - Gold **PS** - Platinum/silver **PG** - Platinum gold

TCR CERTIFICATION
05: 50 ppm/°C **10:** 100 ppm/°C **20:** 200 ppm/°C **30:** 300 ppm/°C

RESISTANCE TOLERANCE
M: 20% **K:** 10% **J:** 5% **G:** 2% **F:** 1% **D:** ½%

RESISTANCE VALUE
Use a three or four digit code. Four digits are used for 1% tolerance or lower, otherwise three digits are used. The first two or three digits represent significant figures and the last digit specifies the number of zeros to follow. The letter "R" shall be used to represent the decimal point when fractional values of an ohm are required; i.e., 1 ohm = 1R0; 4.7 ohms = 4R7; 16.9 ohms = 16R9, etc.

P: Passivated (glass)
X: Tinned NICKEL BARRIER
U: Untrimmed resistor

TERMINATION STYLE
A — Single surface for gold wire bonding
C — Wrap-around style
D — Metallized bottom side
E — Metallized bottom with one side wrap-around

SIZE CODE
See Table I for size code

PREFIX
C — Commercial/industrial (please consult factory)
S — Standard production
H — High reliability testing

PRODUCTION TESTING

Inspection of Product for Delivery

Production testing of product for delivery consists of group A and group B inspections. Each production lot or batch of chip resistors must pass this screening before shipment can be authorized.

Each production batch must be subjected to and pass the group A screening listed below. Sub-group 2 sampling is in accordance with MIL-STD-105, general inspection level II.

Each production batch must also pass the group B tests below. Sampling is in accordance with MIL-STD-105, special inspection level S-4.

GROUP A — INSPECTION

SUBGROUP 1
THERMAL SHOCK
DC RESISTANCE
SUBGROUP 2
VISUAL and MECHANICAL INSPECTION

GROUP B — INSPECTION

SUBGROUP 1
RESISTANCE to BONDING EXPOSURE
RESISTANCE-TEMPERATURE CHARACTERISTICS
LOW-TEMPERATURE OPERATION
SHORT TIME OVERLOAD
SUBGROUP 2
ADHESION
SUBGROUP 3
SOLDERABILITY

PACKAGING

Resistors are packaged in anti-static waffle packs. Individual chips are not marked. Each package contains a noncorrosive label indicating source code, lot number, military part number, quantity, date code, resistance value and tolerance. Unit packages are heat sealed in water-vapor proof conductive bags in conformance with MIL-B-81705 (type I) and are labeled per MIL-STD-129.

PART NUMBERING SYSTEM

To order MIL-R-55342 thick film chip resistors, use part numbers as in the following example. A .075" x .050", 6800 ohm, ± 5% tolerance, ± 100 PPM, tinned, wrap-around resistor is properly indicated with part number: M55342/6—K682JRM, which has the code elements shown below.

M55342/6-K 682 J R M

LIFE FAILURE RATE DESIGNATION
M: 1% per 1000 hours **R:** 0.01% per 1000 hours
P: 0.1% per 1000 hours **S:** 0.001% per 1000 hours

TERMINATION MATERIAL
R: Pre-tinned, wrap-around style
(untinned is not available)

RESISTANCE TOLERANCE
F: ± 1% **G:** ± 2% **J:** ±5% **K:** ± 10%

RESISTANCE
Use a three or four digit code. Four digits are used for 1% tolerance, otherwise three digits are used. The first two or three digits represent significant figures and the last digit specifies the number of zeros to follow. The letter "**R**" shall be used to represent the decimal point when fractional values of an ohm are required.

TEMPERATURE CHARACTERISTICS
K: ± 100 PPM per °C **M:** ± 300 PPM per °C

SIZE
M55342/2: Style RM0505 (.050" x .050") — 50mW, 40v
M55342/6: Style RM0705 (.075" x .050") —100mW, 50v
M55342/3: Style RM1005 (.100" x .050") —100mW, 40v
M55342/4: Style RM1505 (.150" x .050") —150mW, 40v
M55342/5: Style RM2208 (.225" x .075") —225mW, 40v

Custom Networks

State of the Art produces a variety of custom conductor networks, resistor networks, and resistor capacitor networks in low and high volume. Most of our customers are in one of the following categories:

1) Hybrid firms
2) Non-hybrid manufacturers who, for one reason or another, can use a thick film circuit (as an example, a pulse transformer manufacturer who uses an RC network, but one that fits into a molded DIP package).
3) Thin-film houses that use thick-film substrates from time to time.

State of the Art can quote and manufacture from a complete network layout or from a schematic with size, component and output pad location requirements. Our design department will be glad to assist you in designing your network to achieve your lowest cost.

NETWORK CONSTRUCTION

SUBSTRATE: 96% Alumina std — 99% Alumina optional
THICKNESS: .025 inch std — .012 .015. 020 .040 inch optional
LINEAR TOOLING: Laser scribed, green scored, diamond saw cut
HOLE TOOLING: Laser drilled, green punched
CONDUCTORS: Silver, palladium silver, platinum silver, gold, platinum gold, etc. NICKEL BARRIER is available on some types of networks.
RESISTORS: Screened on substrate or thick film chip
PASSIVATION: Glass or silicone based
TINNING: Solder dip or solder paste
CAPACITORS: Screened on thick film or multilayer ceramic chip
COMPONENT MOUNTING: Conductive epoxy or solder reflow; Other components: consult factory

Surface Mount Resistor Networks

SLAMDIP

The SLAMDIP resistor network is the first of a series of surface mount resistor networks under development at SOTA*.

When State of the Art's "SLAMDIP" resistor network replaces individual chip resistors, you will save space and reduce your placement labor. Other benefits also surface, such as better tracking and lower board cost.

RESISTANCE VALUES

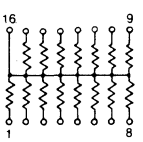
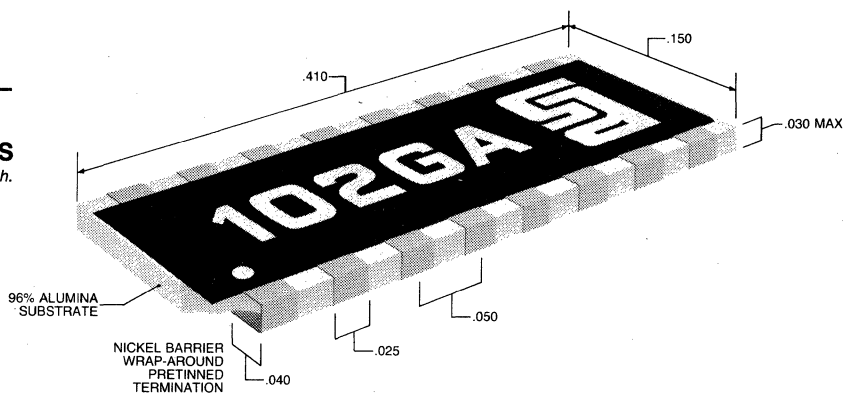
SLAMDIP 8
POWER RATING
Package 500 mW
Resistor 62 mW
Maximum Voltage: 100V



CONFIGURATION B
SLAMDIP 15
POWER RATING
Package 500 mW
Resistor 31 mW
Maximum Voltage: 50V



DIMENSIONS

NOTE: Dimensional Tolerance ± .005 inch.

PERFORMANCE CHARACTERISTICS

	MAXIMUM CHANGE IN RESISTANCE 100 PPM UNITS	200 PPM UNITS
LOW TEMPERATURE OPERATION	±0.25	±0.5
SHORT TIME OVERLOAD	±0.25	±0.5
MOISTURE RESISTANCE	±0.5	±0.5
THERMAL SHOCK	±0.5	±0.5
RESISTANCE TO SOLDERING HEAT	±0.25	±0.5
HIGH TEMPERATURE EXPOSURE	±0.5	±1.0
LIFE	±0.5	±2.0

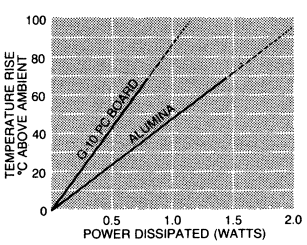
CUSTOM DESIGNS

State of the Art can offer a variety of custom network designs. Using our standard 8 resistor package, the values of individual resistance can be altered to suit the need; other resistance patterns can be applied — limited only by what can be put into the available space.

We can also produce other substrate designs. The length or width can be increased or decreased, the "lead" spacing can be changed, and we can put termination pads on all four sides. Please contact State of the Art's engineering department for information and quotations. Tooling for special networks is not expensive.

POWER RATINGS

We have rated the State of the Art "SLAMDIP" resistor network at a maximum of ½ watt per package. By this, we mean that at 70°C on a 2" x 2" G-10 PC board, the resistor film temperature would be limited to approximately 125°C. The performance on life test listed here will be met if the resistor package does not exceed 125°C. Reference to the power graph indicates that the arbitrary power rating of ½ watt could be either increased or decreased depending on the actual situation. Our engineering department has a wealth of information on the subject and will be happy to share it with you.



ALL RESISTORS
ENERGIZED SIMULTANEOUSLY
2 INCH X 2 INCH BOARD SZES

NOTE: At the time of publishing, we had a number of innovative surface mount resistor networks under development. Our SLAMDIP is only the first. Please Write or Call our sales office for up to date availability of other networks.

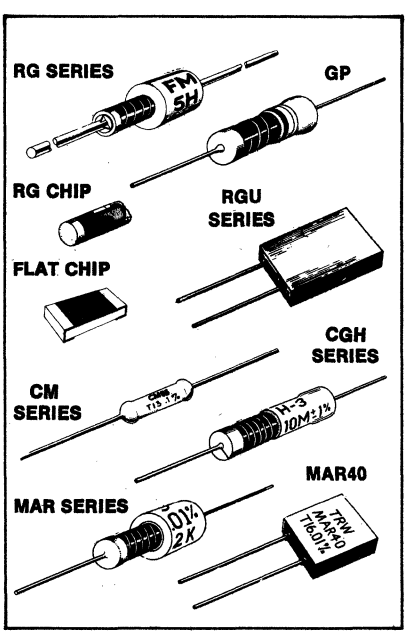
SEMI-PRECISION, PRECISION, ULTRA-PRECISION METAL FILM AND METAL GLAZE™ DISCRETES AND CHIPS



TRW has a discrete resistor for every application. High performance is attributable to TRW's proprietary Metal Glaze™ technology and metal film process, sustained over decades of manufacturing experience.

- General purpose metal film resistors, high stability—GP Series.
- Precision Metal Glaze™ resistors — RG Series.
- RG Series chip resistors.
- Precision high voltage thick film —CGH Series.
- CM Series—high reliability/stability, zero noise industrial precision metal film.
- Ultra precision metal film MAR Series and MAR matched sets.
- RGU series radial lead molded metal glaze resistors take up half the board area of comparably rated axial-lead resistors.

RG SERIES
SPECIFICATIONS
Resistance Values: 1Ω to 3 MΩ
Tolerance: ±.5, ±1, ±2, ±5%
Power Rating @ 70°C: ⅛W to 3W
Temperature Coefficient of Resistance: 25 to 200 ppm/°C

FLAT CHIP RESISTORS
SPECIFICATIONS
Resistance Range: 10Ω to 1 MΩ
Tolerance: ±5%
Power Rating: 0.125W @ 70°C
Temperature Coefficient: 200 ppm/°C

GP SERIES
SPECIFICATIONS
Resistance Values: 10Ω through 1.0 MΩ higher values available; consult factory.
Tolerance: ¼W application ±1%
½W application ±1%
Power Rating @ 70°C: ⅛ through 1 watt
Temperature Coefficient of Resistance: ±50.7 ±100 ppm

RG CHIP RESISTORS
SPECIFICATIONS
Resistance Range: 3Ω to 1 MΩ, plus zero-ohm jumpers
Tolerances: ±.5%, ±1%, ±2%, & ±5%
Rated Wattage: ⅛W @ 70°C
Temperature Coefficient: <100 ppm/°C for all tolerances*

RGU SERIES
SPECIFICATIONS
Resistance Range: 10Ω to 1 MΩ
Tolerance (E96, E24): ±1%, ±2%, ±5%
Power Rating: ½ watt at 70°C
Temperature Coefficient: ±50, ±100 ppm/°C

CGH SERIES
SPECIFICATIONS
Resistance Range: 100 KΩ to 500 MΩ
Tolerance: ±.5%, ±1%, ±2%, ±5%
Power Rating @ 70°C: ¼-5W
Temperature Coefficient: 50, 100 ppm/°C

CM SERIES
SPECIFICATIONS
Resistance Range: 10-7.0 MΩ
Tolerance: ±.05%, ±.1%, ±.25%, ±.5% ±1.0%
Temperature Coefficient 5, 10, 15, 25 ppm/°C

MAR SERIES
SPECIFICATIONS
Resistance Range: 10Ω-3 MΩ
Tolerance: .01-5%
Power Rating @ 85°C: 1/20-¼ watt
Temperature Coefficient: 5, 10, 15 ppm/°C

MAR40 SERIES
SPECIFICATIONS
Resistance Range: 20Ω-250 KΩ
Tolerance: .005-1.0%
Power Rating @ 85°C: 0.3W
Temperature Coefficient: 2, 5, 10 ppm/°C

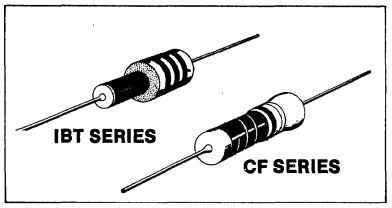
GENERAL PURPOSE RESISTORS
CARBON FILM AND CARBON COMPOSITION



Over fifty years ago it was the skilled technical personnel at TRW that invented and volume produced the very first carbon resistor. Still the most widely used 5% resistors, the TRW standard CF and IBTs assure all the quality and reliability exhibited by TRW Resistive Products for six decades.

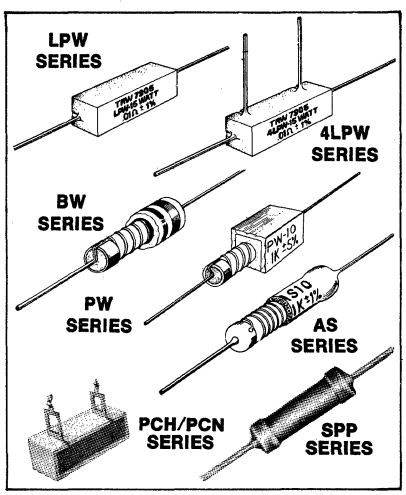
WIREWOUND RESISTORS
LOW AND HIGH POWER, PRECISION, FLAMEPROOF/FAILSAFE



TRW is one of the largest wirewound resistor manufacturers in the world and offers the proven best failsafe/flameproof resistor available. TRW's wirewound resistors feature smaller sizes for all applications: 2 Watts in a 1 Watt package, 1 Watt in a ½ Watt package with TCR's tailored per customer requirement. TRW wirewound resistors are molded, conformally coated, or encased in a flameproof ceramic housing with optional stand offs and alternate configurations to fit a wide variety of applications.

- General purpose low power molded BW series and flameproof/failsafe BWF series 1, 2 watts; ±2, ±5, ±10% from .05 to 2400Ω.
- General purpose power PW series.
- Semi-precision power AS series.
- Semi-precision power for pulse and surge applications—PPW series.
- Low resistance power LPW series.
- Current sensing 4 terminal 4 LPW series.
- High power PWW series.
- Temperature sensing BWG series.
- New semi-precision power (SPP) resistor is auto insertable, low noise, conformal coated, in 2, 3 and 5 watt sizes.

LPW SERIES, 4LPW SERIES
- 3 watts to 15 watts
- ±1%, ±2%, ±3%, ±5%, ±10% tolerance
- .01 ohm to 1.0 ohm

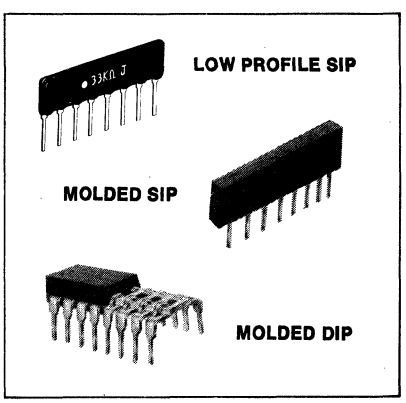
BW SERIES
- 1 watt, 2 watts
- ±2%, ±5%, ±10% tolerance
- 0.05 ohm to 2400 ohms
- TCs as low as ±150 ppm/°C

PW SERIES
- 3 watts to 50 watts
- ±10%, ±5% tolerance
- 0.18 ohms to 30k ohms
- TCs from 300 ppm/°C to +5500 ppm/°C

AS SERIES
- ½ watt to 10 watts
- ±5%, ±3%, ±1%, ±.5%, ±.25%, ±.1% tolerance
- 0.1 ohm to 175k ohms
- ±20 ppm/°C

PCN, PCH SERIES
- 5w to 15w
- ±10%, ±5% tolerance
- I ohm to 1200 ohms
- ±400 ppm/°C TC

CONFORMALLY COATED NETWORKS, MOLDED SIP's AND DIP's, LOW AND HIGH PROFILE, THICK AND THIN FILM



TRW's resistor networks exploit the same Non-Noble Glaze™ technology employed in our well known RG discretes. The conformally coated networks offer both significant cost and space savings. The molded networks are auto insertable and less susceptible to damage. Resistance values as low as 22Ω. Temperature coefficients as low as ±100ppm—°C for requirements of ±1%, ±2% or ±5%.

- 4-14 pin conformally coated SIP packages in 22Ω to 2.2 MΩ.
- Low profile (.200 in. max. ht.) SIP available in 5-11 pin conformally coated in 22Ω to 1 MΩ.
- Molded SIP Networks in 6-, 8-, and 10-pin .350 in. and 8- and 10-pin .195 in. 22Ω-1MΩ.
- Molded DIP Networks in 14- and 16-pin packages 22Ω to 1 MΩ.

THICK FILM CONFORMAL COATED SIP NETWORKS
SPECIFICATIONS
Resistance Range: 22Ω to 1.0 MΩ
Resistance Tolerance: ±2% and ±5%
Temperature Coefficient: ±200 ppm/°C

THICK FILM MOLDED SIP NETWORKS
SPECIFICATIONS
Resistance Range: 22Ω to 1 MΩ
Resistance Tolerance: ±2% and ±5%
Temperature Coefficient: ±150 ppm/°C
TC Tracking: 50 ppm/°C typical

THICK FILM MOLDED DIP NETWORKS
SPECIFICATIONS
Resistance Range: 22Ω to 1 MΩ
Resistance Tolerance: ±2% and ±5%
Temperature Coefficient: ±150 ppm/°C
TC Tracking: 50 ppm/°C typical

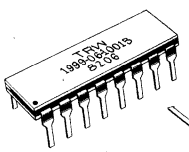
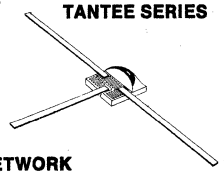
R-2R LADDER

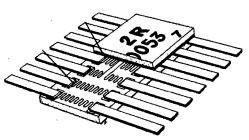
DIP RESISTOR NETWORKS



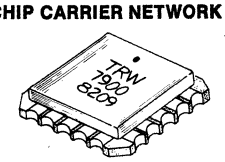
TANTEE SERIES



FLATPACK NETWORK



CHIP CARRIER NETWORK



TaNFilm® is the most cost effective way to achieve tight tolerance and tight tracking. TRW's TaNFilm products have the highest reliability/stability available due to the innate properties of TRW's unique materials technology. Network capabilities include TCR ±300 ppm to ±25 ppm°C with as low as 2 ppm°C tracking, ±.1% absolute tolerance, and ±.01% ratio tolerance. Ohmic values run from 20Ω to 200K per resistor. Custom circuit confirgurations, packages and substrates are available.

- SIP's up to 12 pins, low profile, 3 standard sizes, conformally coated.
- DIP's up to 20 pin standards with special mechanical and electrical configurations available, as well as R-2R ladder and flat-pack networks.
- Custom hybrid circuit packages.
- Miniature leadless chip carrier networks contain 20 pads with standard and custom schematics.

Higher and lower resistance values available
Resistance Tolerances: ±.1%, ±.25%, ±.5%, ±1%, ±2%
Temperature Coefficient of Resistance: ±50 ppm/°C, ±100 ppm/°C, ±300 ppm/°C, −100 ±25 ppm/°C
TCR Tracking: 5 ppm/°C, except Models 1987 & 1998 below 500Ω (20 ppm/°C)
Temperature Range: −55°C to +150°C
Power Rating @ 70°C:

	Wattage	
Model	Resistor	Network
1987	.1	1.3
1998	.1	1.5
1989	.2	1.4
1999	.2	1.6

TaNFilm® FLAT-PACK RESISTOR NETWORKS

SPECIFICATIONS

Mil Qualified Resistance Ranges:
49.9Ω to 121 KΩ
49.9Ω to 121 KΩ
Higher resistance values available
Resistance Tolerances: ±.1%, ±.25%, ±.5%, ±1%, ±2%
Temperature Coefficient of Resistance: ±25 ppm/°C, ±50 ppm/°C, ±100 ppm/°C, ±300 ppm/°C, −100 ±25 ppm/°C
TCR Tracking: Referenced to R1, is ±5 ppm/°C, except Model 8987 below 500 ohm, which is ±20 ppm/°C
Temperature Range: −55° to +150°C
Noise: Less than −25 dB
Power Ratings: .1 watt per resistor, .5 watt per network at 70°C; 1.0 watt per network at 25°C

TaNFilm® R-2R LADDER 12- BIT, 20-PIN DIP

SPECIFICATIONS

Ladder Resistance Values (R): 5K, 10K, 20K, 25K, 50K
Ladder Resistance Tolerance: ±5%

TaNFilm® SUBMINIATURE DUAL NETWORK TaNTee SERIES

SPECIFICATIONS

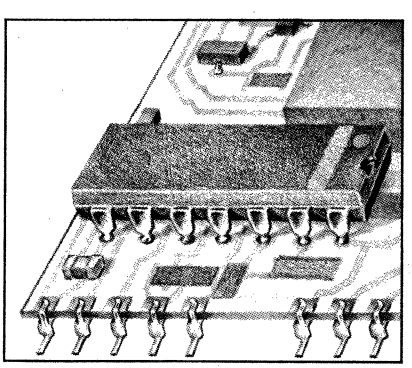
Resistance Range, each R: 10Ω to 10 KΩ
Power Rating: ¼W @ 85°C (sum of power in both resistors)
Resistor Tolerance:
Absolute Tolerance—±5% standard, ±1% available
Ratio Tolerance—To .1%

TaNFilm® CHIP CARRIER RESISTOR NETWORKS

SPECIFICATIONS

Resistance Values: 50Ω to 50 KΩ standard; up to 100 KΩ on special order
Resistance Tolerances: ±.1%, ±.25%, ±.5%, ±1%, ±2%
Temperature Coefficient of Resistance: ±25 ppm/°C, ±50 ppm/°C, ±100 ppm/°C, ±300 ppm/°C
TCR Tracking: 5 ppm/°C
Temperature Range: −55°C to +150°C
Noise: Less than −25 dB
Power Rating @ 70°C: .1W/resistor, .5W/network

CUSTOM HYBRID CIRCUITS



Custom thick film hybrid circuits utilize surface mount technology and are most applicable where size reduction and reliability are prime factors. Circuit miniaturization is due to higher density manufacturing techniques. Higher reliability is the result of fewer "component to board" interconnections and common thermal effects between components. Generally, outboard components (diodes, transistors, IC's, and capacitors) are surface mounted. Resistors and conductors are screen printed and fired at 900-1000 °C directly to the ceramic substrate.

Performance specifications are per customer requirements relative to specific applications. TRW will assist in design upon request. Both custom thick film substrates and complete hybrid circuit manufacture available.

TRW circuit features include:

- High conductivity, leach resistant copper conductors
- 10 ohm to 10M ohm/square resistors
- Stability characteristics and cost effectivity of TRW's proprietary Non-Noble Metal Glaze™ technology
- Precious metal elements also employed per customer application and requirements

CUSTOM THICK FILM CIRCUITS

- High reliability
- Major size reduction compared to discrete components
- Cost effective in volume quantities

ADDITIONAL FEATURES:

- Top Stamping — to customer specification; one 8-character line
- Missing Pins — removed external to SIP molded package, but within standoff profile
- TCR — ±150 ppm
- Ratio Matching — ±2% between specifed resistor pairs — ratios not to exceed 20:1

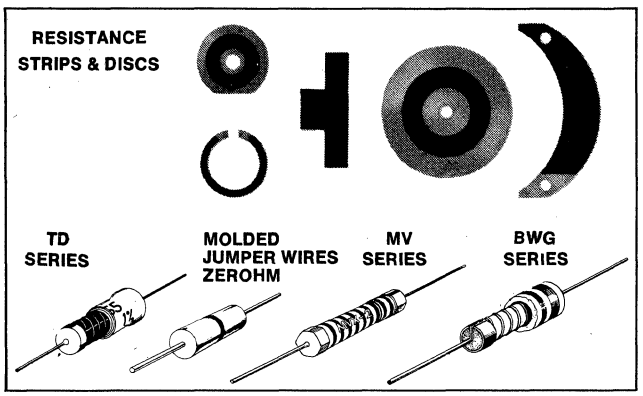
TRW will customize relative to specific application requirements.

CIRCUIT VARIATIONS:

Variations to standard circuits of both the .350-in. and .195-in. SIP are feasible, such as:

- Crossovers
- Modified common locations
- Missing resistors
- Multiple value resistances
- Open or shorted pins

SPECIAL PURPOSE RESISTORS AND RESISTIVE PRODUCTS TEMPERATURE SENSING DEVICES



Within the broad line of products available from TRW Resistive Products Division is also included standard and special resistance strips and discs, molded jumper wires or crossovers, and a wide range of high voltage, high temperature and temperature sensing resistors and elements for all applications.

- BWG Series wirewound temperature sensing resistors with TCs as high as +5500 ppm/°C
- Thin film TD Series temperature sensing element with superior linearity, close tolerance, and ultra miniature size
- MV Series high-voltage film resistors from 10K to 1000 megohm range
- Standard and special resistance strips and concentric disc resistors
- Straight-through wire conformal coated and molded crossover ¼ watt size supplied on lead tape and reel for automatic insertion

BWG SERIES

- Excellent linearity over wide temperature span
- Fast response time
- Small size
- Economical cost
- 1 watt, 2 watts
- ±5%, ±10% tolerance
- 0.1 ohm to 300 ohms
- TCs as high as +5500 ppm/°C

TD SERIES

- Proven metal film reliability
- Fast thermal response
- Positive temperature coefficient
- Superior linearity
- Ultra miniature

SPECIFICATIONS

Resistance Range at 25°C; TD50 - 100Ω to 2 KΩ, TD55 - 10Ω to 3 KΩ; TD60 - 10Ω-6 KΩ; TD65 -10Ω-10 KΩ

Temperature Coefficient: +5000 ±100 ppm/°C at 25°C; +6000 ±120 ppm/°C at 100°C

Tolerance at 25°C: ±.5%, ±1% or ±2%

MV SERIES

- ½ watt to 90 watts
- 10k to 1000 megohm range
- ±5%, ±10%, or ±20% tolerance

CONFORMAL COATED AND MOLDED JUMPER WIRES, ZEROHM

SPECIFICATIONS

Maximum Resistance: 0.01 ohm

Lead Material: Leads are copperclad steel with TRW's 30/70 solder alloy coating to allow both welding and soldering operations

Body Material: Electrical grade, high performance, molding compound

Minimum Insulation Resistance: Dry, 10,000 megohm; Wet, 100 megohm

Minimum Dielectric Withstanding Voltage: Atmospheric, 500V RMS; Reduced, 325V RMS

Insulation Flammability: Resistor insulation is self extinguishing within 10 seconds after externally applied flame is removed

Current Rating: 25 amps at 25°C, derating to 0 amps at 150°C

RESISTANCE STRIPS & DISCS

SPECIFICATIONS

ELEMENTS

TRW resistance strips consist of a high grade paper-base phenolic laminate with the resistance material permanently bonded to the surface. Disc resistors are simply die stamped from a resistance strip.

Strips can be supplied with a low-resistance colloidal silver contact coating over any portion of the surface where a low-resistance positive contact is desired. On discs, inner and outer rings of colloidal silver are applied to provide contact with coaxial line fixtures.

RESISTANCE VALUES

Strips are available with resistances from 19 ohms/square to 1.0 megohm/square. Standard disc values range from 5 ohms to 100,000 ohms.

TOLERANCE

Standard tolerance is ±20%. Special tolerances of ±15% and ±10% are available on special order.

VOLTAGE RATING

Maximum rated voltage is 500 volts per inch of current path.

SURFACE MOUNTABLE DEVICES

TRW has recently extended its broad line of resistive products to include a family of surface mountable devices. These products combine TRW's proprietary state of the art technologies with both standardized and custom configurations to meet the specifications of a wide variety of applications.

Currently available surface mountable designs include:

—Thick Film RG Power Chip Resistors
—Thick Film Non-noble Flat Chip Resistors
—Thin Film Chip Carrier Networks
—Surface Mountable Thick and Thin Film SIP and DIP Networks
—Flatpack Network and TaNTee Series Designs
—Semi Precision Power Wirewound Resistors

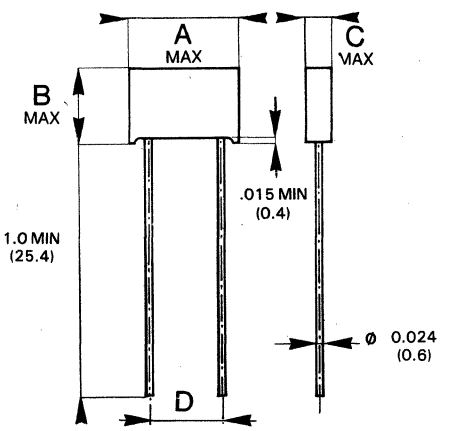
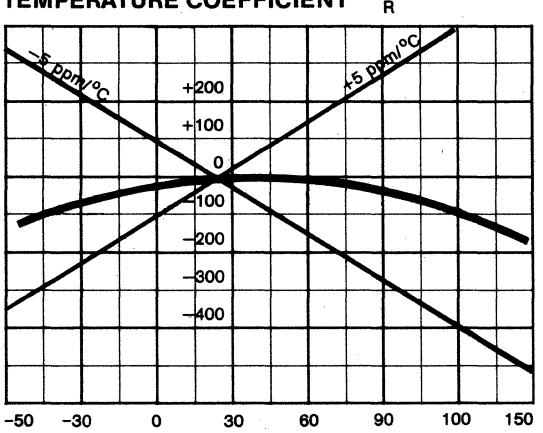
RCK06	1.200 (30.5)	.531 (13.5)	.256 (6.5)	.900 (22.86)



TEMPERATURE COEFFICIENT $\frac{\Delta R}{R}$ ppm



*The T.C. of RCK resistors is always better than ± 5 ppm/°C in the temperature range −55°C to +155°C.

More generally, the T.C. is positive towards the very low temperatures, typical values +2.2 ± 2 ppm/°C for −55°C to +25°C.

It is negative towards the high temperatures, typical value −1.8 ± 2 ppm/°C for +25°C to +125°C.

For temperature variations of about 20 to 30°C from the 25°C ambient temperature, the T.C. is very low.

In the temperature range 0°C to +60°C it can be reduced to a value below ± 1 ppm/°C.

For a group of resistors, T.C. matching can be made to better than ± 0.5 ppm/°C. Consult **ULTRONIX.**

Maximum T.C. spread may vary from the nominal T.C. spread for ohmic values less than 5 ohms. Consult **ULTRONIX.**

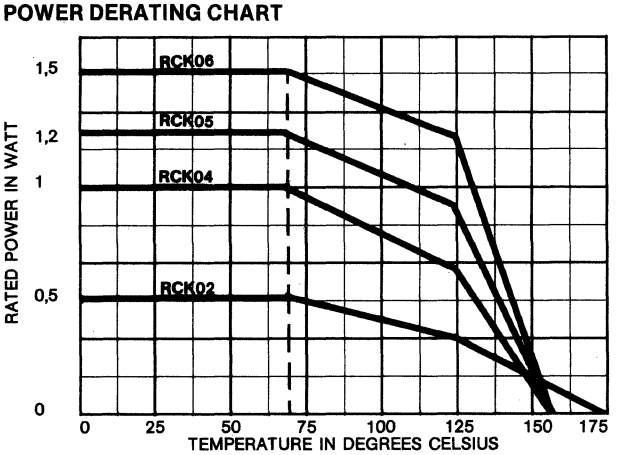
POWER DERATING CHART



POWER DERATING

The power ratings listed in the tables are based upon achieving the specified stabilities at maximum ambient temperatures of 70°C. If a resistor is to be used at higher ambient temperature, the power should be derated linearly to zero per the chart. To insure maximum stability, this power curve should be derated by 25% for tolerances to 0.05%, by 50% for tolerances to 0.01% and by 75% for tolerances of 0.005%.

1. - 35.				5 watts	7 watts

Derate to 0 at 175°C.

Ultronix manufactures a large variety of four-terminal resistors and networks for specialized applications. These are used in requirements of lower value where high precision and low temperature coefficient is required.

Tolerances available 1.0% or greater.

Temperature Coefficient for the FT1, FT2, and FT3 is 100 ppm/°C from +25°C to +125°C. FT5 and FT7. T.C. is 10 ppm/°C from +25°C to +125°C.

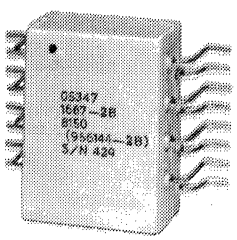
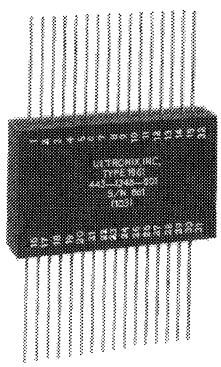
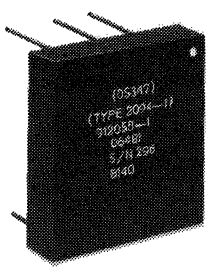
wirewound networks and custom requirements

CALL FOR OUR APPLICATIONS ENGINEERS TO ASSIST YOU WITH YOUR DESIGN REQUIREMENTS

CUSTOM DESIGNED NETWORKS AND MATCHED SETS







Network quality is determined by the precision of its individual resistors plus packaging and mounting techniques. **ULTRONIX** offers a unique background of experience, reliability, data, manufacturing and testing skills for wirewound resistor networks. For a sample of this ability, submit your next network requirement for evaluation by **ULTRONIX** engineers.

Matched resistor sets and custom designed networks are available from Ultronix for equipment design requiring close ratio matching and temperature tracking of resistors.

Our networks are used in a wide variety of applications such as communications satellites, precision instrumentation, aircraft controls, etc.

GENERAL SPECIFICATIONS AVAILABLE

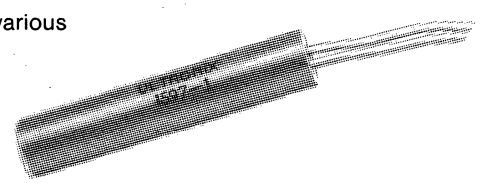
Ambient operating temperature range	−55°C to125°C
Resistances values	0.1 ohm to 40M ohm
Absolute resistor tolerances	to ±0.005%
Matched resistance ratios	to ±0.001%
Temperature coefficient match and tracking between resistors within	±1 ppm from 0°C to +85°C

Low reactance and rise times as low as 0.02 microseconds.
AC resistance match at frequence determined by user.

CUSTOM WIREWOUND TEMPERATURE SENSORS

Ultronix temperature sensors are available with temperature coefficients from −50 to +6000 PPM/°C. Various alloys and metals are used to obtain the required range of resistance change with temperature for trimming, tracking, compensation and matching. These units may be in metal housings such as brass, aluminum, or stainless steel, or molded in various epoxies or silicone.

TCR PPM/°C		TCR PPM/°C	
25°C to 125°C	-55°C to 25°C	25°C to 125°C	-55°C to 25°C
80 ± 20	80 ± 20	1400 ± 200	1500 ± 200
100 ± 20	100 ± 20	2600 ± 200	2600 ± 200
140 ± 30	140 ± 30	3000 ± 150	3000 ± 150
180 ± 30	180 ± 30	3200 ± 300	3200 ± 300
290 ± 30	290 ± 30	3500 ± 300	3500 ± 300
400 ± 40	380 ± 40	4500 ± 400	3900 ± 300
700 ± 200	700 ± 200	5000 ± 500	4000 ± 500
850 ± 80	850 ± 80	6000 ± 300	5000 ± 300
1000 ± 100	1000 ± 100		

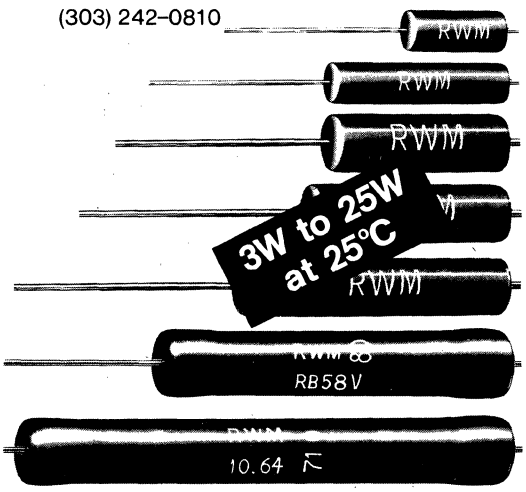


The accompanying table lists standard TCR's for readily available alloys and metals. Most alloys show some non-linearity as can be noted by the TCR differences above and below 25°C. However, all alloys can be considered linear over narrow spectrums.

enameled wirewound power resistors

P.O. Box 1090
Grand Junction
Colorado 81502

(303) 242-0810



As a result of more than 40 years of experience and continuous improvements the RWM Series of resistors features proven reliability either in direct or alternating current.
The high quality of the RWM results primarily from the use of a proprietary Sfernice enamel fired at high temperature and which is free from any compound that would corrode the resistive wire.

- **HIGH SPECIFIC DISSIPATION**
- **HIGH RELIABILITY LEVEL**
  - **Fire proof**
  - **Excellent endurance**
  - **Conformal vitreous enamel**
  - **Great mechanical strength**
  - **Good environmental protection**
  - **All welded construction**
- **LOW OHMIC VALUES**

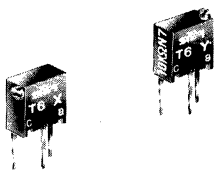
1/4" ultra high precision multiturn trimmer

NICROCER® process

– fully sealed container military and professional grade –

P.O. Box 1090
Grand Junction
Colorado 81502
(303) 242-0810

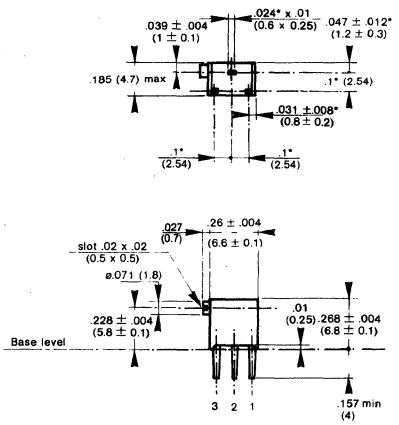


The nickel-chromium track specially developed by SFERNICE using the NICROCER® process for high-precision planar resistors, gives this trimmer a unique combination of performances:

- **VERY LOW TEMPERATURE COEFFICIENT: typical < ± 10 ppm/°C in the range – 55°C + 125°C**
- **VERY LOW CONTACT RESISTANCE VARIATION: typically 0.2Ω**
- **INFINITE RESOLUTION: TYPICAL ADJUSTMENT: < 0.1%**
- **NON-INDUCTIVE**
- **EXCELLENT OVERALL STABILITY**
- **FULLY SEALED CASE**

Two versions are available: TM6X side adjust
TM6Y top adjust

TM6 X



* To be measured at base level
Dimensions in inches (mm)

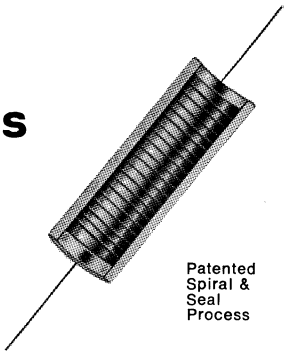
VAMISTOR

Metal Film Resistors: Power 1/10 to 4 Watts



Patented Spiral & Seal Process

FEATURES:

- Parts exceed MIL-R-55182
- Special burn-in available
- Matched sets, both toler.
- Tolerances to .1% & TC to 10 PPM

QPL Pendings: RN80 G/B, RL42 TX, RL32, RL32 TX

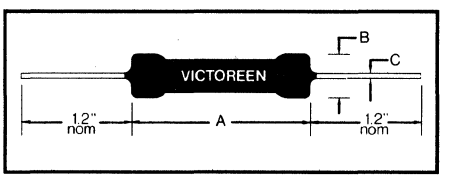
VICTOREEN Carbon & Metal Film Resistors

From general purpose thru extreme precision, Victoreen now offers low-priced Carbon and Metal Film Resistors.

In addition to our broad based stock, custom stocking plans are available to fit your needs.

CARBON FILM

- Wide resistance range: 1 ohm to 10M ohm
- Tolerances available: 2 & 5%
- Packaging variety: Bulk, Tape & Reel, Ammo Pack
- Cut and form leads available as required
- Custom stocking plans available
- Epoxy conformal coated

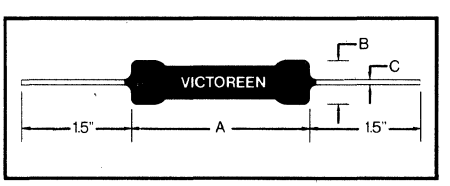


Dimensions (in inches)

Type	A Max Length	B Max O.D.	C Nominal
VCF-125	0.150	0.080	0.020
VCF-250	0.270	0.110	0.024
VCF-200	0.410	0.160	0.024
VCF-1000	0.512	0.189	0.028
VCF-2000	0.709	0.256	0.028

METAL FILM

- Wide Temperature Coefficient range: 25, 50, 100PPM/°C
- Tolerances available: 0.25%, 0.5%, 1%, 2%, 5%
- Packaging variety: Bulk, Tape & Reel, Ammo Pack
- Cut and form leads available as required
- Custom stocking plans available
- Epoxy conformal coated



Dimensions (in inches)

Type	A Max Length	B Max O.D.	C Nominal
VMF-50	0.150	0.078	0.018

VICTOREEN
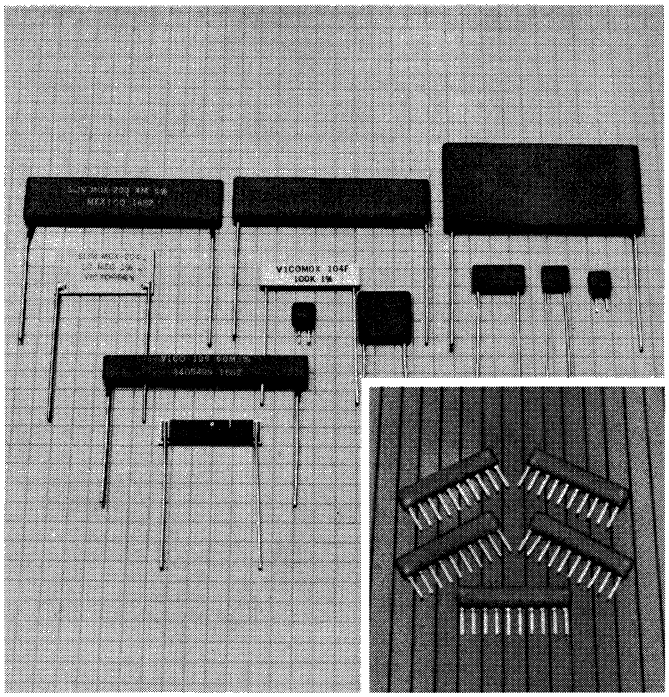
Thick Film Flat Resistors S.I.P. and D.I.P. Networks

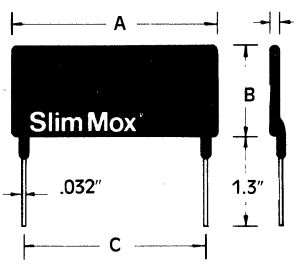


Slim-Mox Resistors are ideal for applications where high voltage/high impedance or high density packaging are benefits to the designer.

S.I.P. Networks are available from 47 ohm to 2.2 megs, with stocking plans to fit your needs. D.I.P. Networks are also available.

Slim-Mox

- Stocking values available
- Wide resistance range to 50,000 Meg ohm
- Voltage capability to 20 KV
- Power rating to 15 Watts
- Tolerances from 0.5 to 20%
- Epoxy conformal coated
- Resistor Dividers available



Dimensions (in inches)

SLIM-MOX	A Max. Length	B Max. Height	C Nominal
SIL-2	0.30	0.30	0.1
101	0.33	0.34	0.2

VICTOREEN

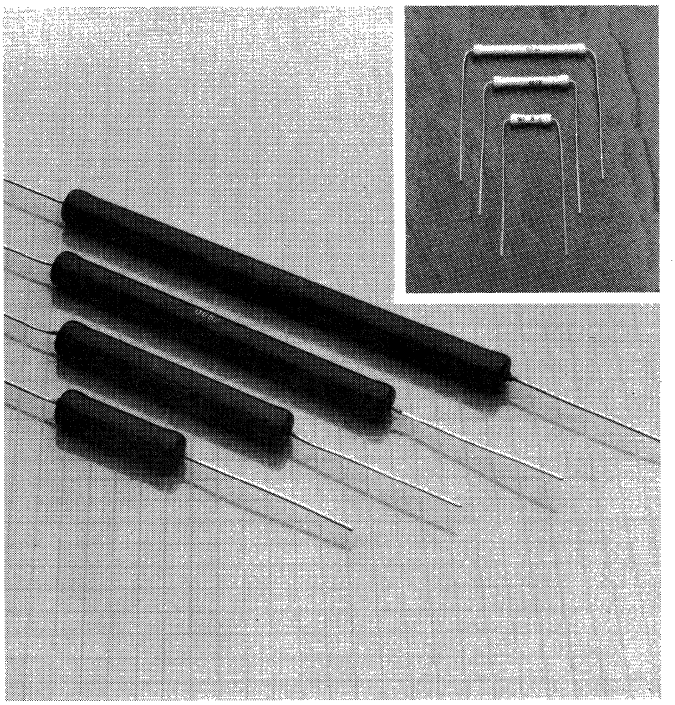
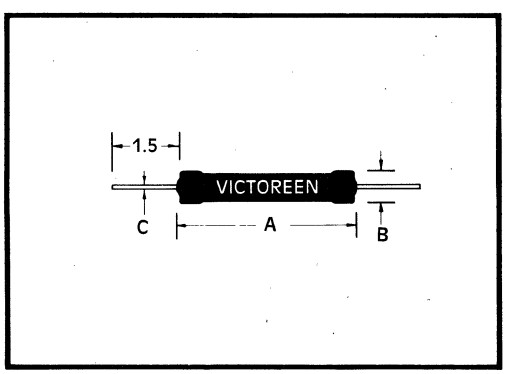
Thick Film Cylindrical Resistors

Victoreen's MOX series of high voltage, high resistance, high power resistors provide dependable product with high performance to size ratio.



Mini-Mox Maxi-Mox

- **Stocking values available**
- **Wide resistance range to 100,000 meg ohm**
- **Voltage capability to 37.5 KV**
- **Power rating to 10.0 Watts**
- **Tolerances from 0.5 to 15%**
- **Epoxy conformal coated**



Capabilities

Type	Resistance Range (ohm)	Power Rating (@ 25°C)	Voltage Rating

VICTOREEN
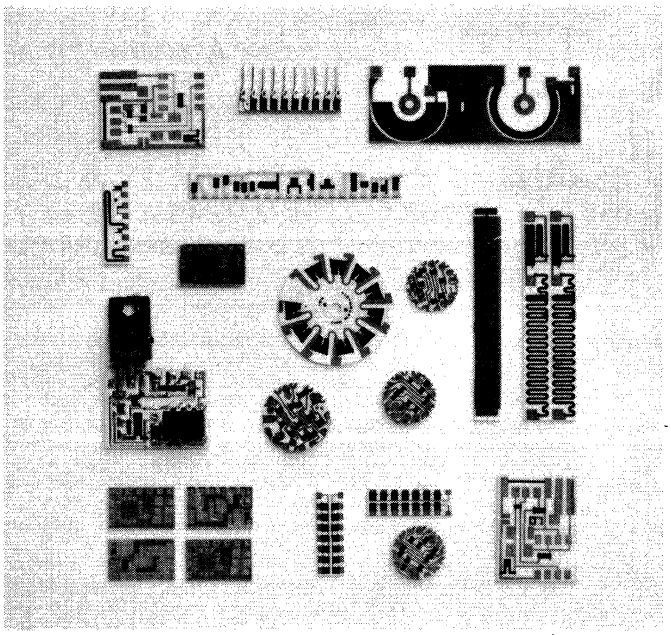
Micro Circuits



From Substrates To Hybrids

- Custom-Made
- Miniaturized Circuits
- Reliable Performance
- Flexible Design
- Quick Prototyping

Electrical Options

- Ratio Matching to ± .1%
- Absolute Tolerances to ± .1%
- Temperature Coefficient Tracking to ± 10PPM/°C
- Power Ratings of up to 50 Watts/In.^{2}

General Information

- **Resistance Range: .1 ohm to 50,000 Megohm**
- **Termination Materials: PdAg, PdAu, PtAg, PtAu, Ag, Au**
- **Minimum Line Resistance: .020 ohm/□**
- **Line Definition: .005" Min. line width .005" Min. spacing between adjacent lines**

Mechanical Options

- Any Size to a Preferred Maximum of 3" × 3"
- Electrical Crossovers, Multi-Layer Printing
- Double Sided Printing of Resistive and Conductive Paths
- Through Hole Plating on Internal Holes (vias)
- Wrap Around Plating

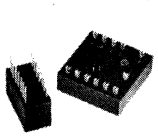
STANDARD AND CUSTOM RESISTANCE NETWORKS

Binary Networks and BCD Ladders



Besides designing completely custom precision networks to your most demanding specifications, Vishay offers standard binary R-2R ladder networks in 4-bit to 16-bit configurations (voltage-fed) with resistance values from 1 ohm to 50KΩ; 2R to 100KΩ. Three basic package styles (nominal dimensions): **Profile 500,** 0.750" (19.05 mm) W x 0.500" (12.70 mm) H. **Profile 375,** 1.230" (31.24 mm) W x 0.365" (9.27 mm) H. Lengths dependent on number of bits: min. 0.700" (17.78 mm) for 4-bit Profile 500 to 2.14" (54.35 mm) for 16-bit ladder; min. 0.730" (18.54 mm) for Profile 375 to 2.59" (65.78 mm) for 15-bit package. **Profile 200,** 1.0" (25.4 mm) W x 1.0" (25.4 mm) L x 0.200" (5.08 mm) H only.

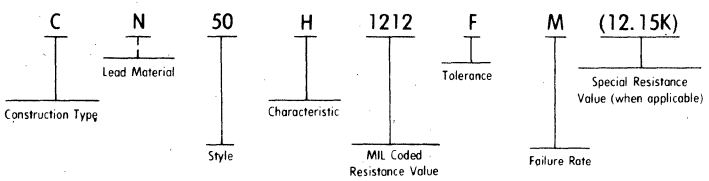
PART NUMBER INFORMATION

When ordering, specify military part number in accordance with MIL-R-55182 or MIL-R-10509 or Angstrohm part number as follows:



VISHAY ...to be precise®

63 Lincoln Highway, Malvern, PA 19355 • Tel: (215) 644-1300 • TWX 510-668-8944

VISHAY-ANGSTROHM

TEMPERATURE COEFFICIENT

D, K	± 100 PPM/°C Max.
C, H	± 50 PPM/°C Max.
E, J	± 25 PPM/°C Max.
W	± 20 PPM/° Max. Between −40 and +150°C
X	± 15 PPM/°C Max. Between −25 and +125°C
Y	± 10 PPM/°C Max. Between −15 and +105°C
Z	± 5 PPM/°C Max. Between 0 and + 75°C
(9)	Special; temperature range and Max. PPM/°C to be specified on order.

RESISTANCE VALUE
First three digits are significant. Fourth digit is number of zeros to follow. Must always be four digits. Use R to signify decimal when necessary. If more than three significant digits are required, round off and show exact value in parenthesis after failure rate code as shown by sample part number.

RESISTANCE TOLERANCE

F	± 1%
D	± .5%
C	± .25%
B	± .1%
(05)	± .05% (49.9 Ω min.)

FAILURE RATE

M	1% per 1000 hours.
P	.1% per 1000 hours.
R	.01% per 1000 hours.
S	.001% per 1000 hours.

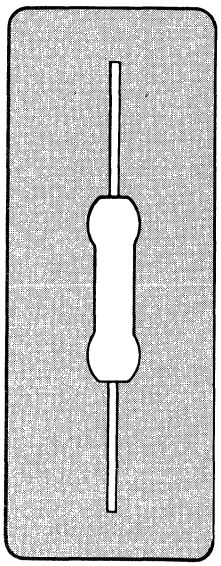
Ward Leonard Axial Lead Resistors



Application

These miniaturized, space-saving axial lead resistors find wide-spread application in computers, instruments, communication, and other electronic equipment. Axiohm® resistors meet the exacting requirements of printed circuit board and other automated equipment in addition to terminal board, point-to-point wiring, and mechanical connections.

Construction

Precision dimensioned ceramic cores are equipped with end caps and tinned axial leads for fast, easy soldering. Low TC alloy resistance wire is spot welded to end caps insuring a permanent low resistance bond. The cement, silicone, or vitreous enamel coating seals and protects the resistance wire.

Temperature Coefficient

Standard T.C. is ±180ppm/°C.

Resistance Tolerance

Standard ±5%. Closer tolerances on special order.

Optional Features

Non-Inductive Resistors — Specially designed axial lead resistors can be supplied for high frequency circuits. These resistors utilize the Ayrton-Perry method of winding in which two single layer windings run in opposite directions and cross at points 180° apart providing minimum inductance and distributed capacitance.

Controlled or Limited Inductance — Resistors are available with special single windings in which the winding is controlled not to exceed a specified inductance.

Reel Packs — Single or double adhesive tape for bulk packing resistors for automatic feeding in automated assembly line can be supplied.

Ordering Information

1. Quantity
2. State watt rating, type coating (C = Cement, SX = Silicone, X = Vitreous enamel) and ohms. Example: A five watt cement coated axial lead resistor of 1,000 ohms would be ordered as 5C1000.
3. Resistance tolerance if other than standard ±5%.
4. Optional features
5. T.C. Other Than Standard

Fixed Tubular Resistors

Application

Fixed resistors introduce only one pre-determined amount of resistance into a circuit.

Construction

Standard fixed tubular resistors are single layer wound and furnished with two lug terminals that are pre-tinned for fast, easy soldering. They can be supplied with cement, silicone or vitreous enamel coatings.

Resistance Tolerance

±5% standard. Below one ohm ±10%.

Ordering Information

1. Quantity required.
2. Watt rating.
3. Type coating (FC = cement, FS = silicone, F = vitreous enamel).
4. Resistance value (in ohms).
   Example: A 10-watt cement coated fixed resistor of 500 ohms would be ordered as 10FC500.

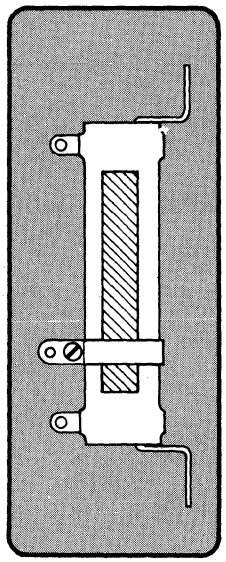
Ward Leonard

Adjustable Tubular Resistors



Application

Ward Leonard Adjustohm® resistors are designed for use in electronic and other circuitry where resistance values must be adjusted from time to time or where intermediate resistance values are required.

Construction

Adjustable tubular resistors are manufactured to the same precise specifications as fixed tubular resistors. Each wire-wound resistor has a bare side, two lug terminals and one adjustable band.

Ordering Information

1. Quantity required 2. Watt rating
3. Type coating (AC=cement, AS=silicone, A=vitreous enamel)
4. Resistance value (in ohms)

Example: A 12 watt cement coated adjustable resistor of 1,000 ohms would be ordered as 12AC1000.

Adjustable Bands

Resistor Size (in Watts)	Band Cat. No.
12	609
30	612
50	612
70	612
130	615
180	615
225	615

NOTE: When adjustable contact band is positioned to obtain resistance required, the power rating must be lowered in proportion to the adjusted resistance to nominal. To determine power rating, use the following equation:

$$P_M = \frac{R_A}{R_N}$$

Where: P_M = Max. Power Rating (in Watts)
R_A = Resistance in Ohms (Adjusted)
R_N = Resistance in Ohms (Nominal)

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

POTENTIOMETER
CAPITAL OF THE WORLD

FROM LOW-COST CARBON SINGLE-TURNS TO SEALED PRECISION MULTI-TURNS. . . MURATA ERIE HAS THEM ALL!

Murata Erie manufactures one of the broadest potentiometer lines in the world. For commercial and industrial applications—single-turn trimmers in carbon, cermet and conductive plastic in all popular resistances, mounting configurations and power ratings from 1/10 watt to 3/4 watt. For instrumentation and other precision applications—single- and multi-turn trimmers with from 1 to 25 turns full range, ¼ watt to 1 watt ratings and standard square, rectangular and circular configurations.

For complete technical details write to Murata Erie North America, Inc., 1148 Franklin Road, SE, Marietta, Georgia 30067 or call 404-952-9777.

† A rheostat is a two-terminal variable resistor. When both ends of the resistance element and the slider contact (three terminals) are used, it's called a potentiometer. By tradition, nevertheless, power variable resistors are often referred to as rheostats, no matter how used.

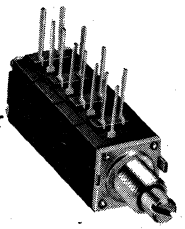
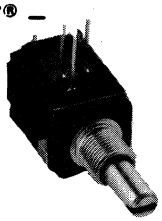
Series 70 MOD POT® – Modular design innovated by Allen-Bradley offers almost unlimited combinations: single, dual, triple or quadruple sections. Options include PC or solder lug terminals, variety of switches, vernier drives, concentric shafts, hot-molded composition, cermet or conductive plastic resistance elements.

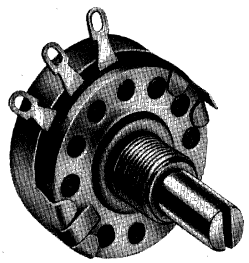


Series 72 MOD POT® – Similar to Series 70, except the bushing and shaft are non-metallic. Available in single or dual combination only.

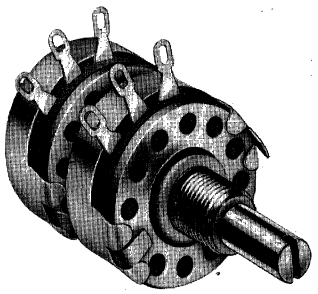
Series 73 MOD POT® – Similar to Series 70, except the bushing is of a more economical design. Available in single, dual, triple or quadruple sections.



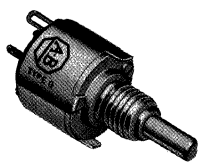
Type J (RV4 and 2RV7) – Standard of the industry for quality. Hot-molded composition, 50 ohms to 5 megs, ±10% and ±20% (special values to 1000 megs available), 2.25W at 70°C, single, dual, triple sections available. Switch for single or dual sections.



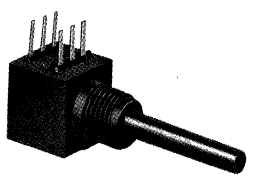
Type EJ – Extra long life version of the Type J with rotational life exceeding one million rotations, single or dual configurations. Slip clutch available.



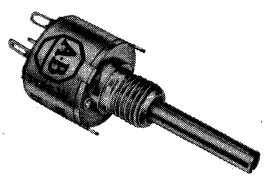
Type G (RV6) – Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.5W at 70° C, single section available with or without SPST switch.



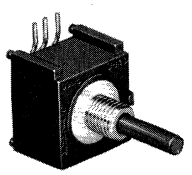
Type M – Miniature conductive plastic. 100 ohms to 1 meg., ±20%, 0.1W at 40° C, single and dual sections available. Switches optional. 5 terminal options. Non-metallic case, bushing and shaft.



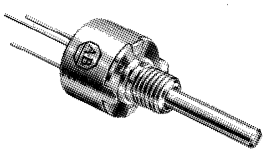
Type W (RV6) – Hot-molded composition, 100 ohms to 5 megs, ±10% and ±20%, 0.5W at 70° C, single section.



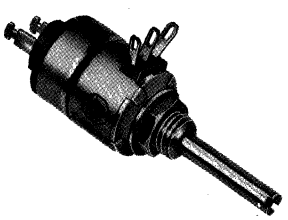
Type 2000 – Designed cost-effective in conductive plastic. 250 ohms to 1 meg, ±20%, 0.5W at 70° C single section. 3 terminal options. Sealed for board washing. Non-metallic case and shaft. Choice of bushing.



Type WP – Pin-terminal version of Type W. Suited for printed circuit board mounting.



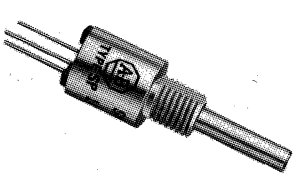
Type WR – Radial-lead version of Type W. Available with or without switch. Switch versions offer contacts that close at start of clockwise rotation (TYPE WRS) or with switch with contacts that close at start of counter-clockwise rotation (TYPE WRH).



Standard options for most types include linear and non-linear tapers, a variety of shafts, bushings, shaft endings, shaft lengths, and hardware.

Types J and the multi-section MOD POT® with composition tracks are well suited for attenuator applications.

Type SP – Cermet, 50 ohms to 1 meg, ±10%, 1.0W at 70° C, single section. Only 3/8 inch diameter.



Conductive Plastic, Cermet and Hot-Molded Carbon Composition Panel Potentiometers

BOURNS®

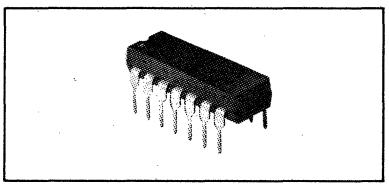
BOURNS® ATTENUATORS

Bourns offers an extensive line of fixed, variable and switchable attenuators. All Bourns attenuators are available in both standard and custom configurations. Our Engineering Departments can custom design special attenuators for your special applications.

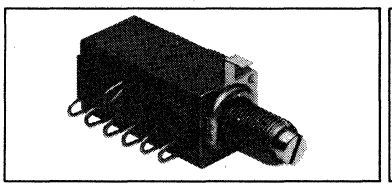
Fixed Attenuators

Models
4114R-033-001
O-Pad Configurations



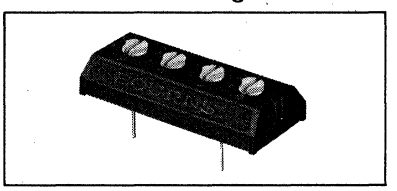
Variable Attenuator

Models 81/82, 91/92
Straight T-Pad



Switchable Attenuators

Model
3100
T and O-Pad Configurations



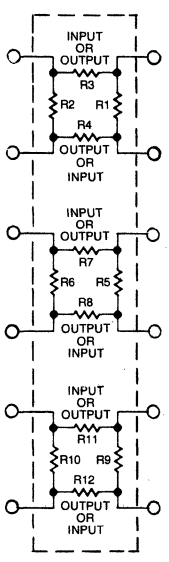
RESISTOR NETWORKS

Pre-assembled 14 pin DIPs contain balanced or unbalanced attenuator pads. Available in 1/2 dB steps to 36 dB

Features include temperature coefficient of ±100ppm/°C operating temperature −55°C to +125°C

Attenuation tolerance (dB) of ±1%

Flat response through 1MHz



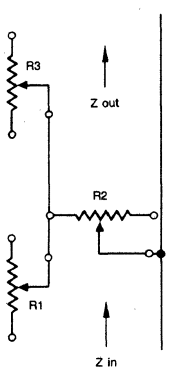
O-Pad

PRECISIONS/ CONTROLS

Thick film cermet elements achieve infinite resolutions and setting stability

Straight T is available with 10% to 20% impedance tolerances

Minimum attenuation loss 0.2 dB all models with flat response through complete audio range



Straight T-Pad

TRIMPOT

Bourns Model 3100 switchable attenuators incorporate both switching and attenuator network functions in a single integrated package resulting in reduced component count, assembly costs and PC board space

Sealed to avoid switch contamination and PCB cleaning procedures

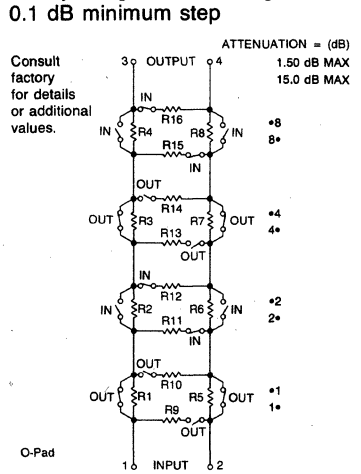
Precious metal switch contacts assure low insertion loss and long term operating stability

Impedance: 600 ohms ±2% (balanced or unbalanced)
75 ohms ±5% (unbalanced)

Standard attenuation ranges: 0-1.5, 0-15, and 0-24 dB

Binary Weighted Switching, 0.1 dB minimum step

Consult factory for details or additional values.



O-Pad

POSITION SENSING PRODUCTS

SLIDELINE® CONTROLS

FOR INSTRUMENTATION AND AUDIO/BROADCAST APPLICATIONS:

Duncan 400 Slideline® Potentiometers provide an ideal, human-factored solution for instrumentation and audio/broadcast controls, combining unusually accurate electrical characteristics with a wide variety of output options, fingertip controls, and faceplate alternatives to meet exacting customer applications requirements.

Ideally suited for medical and process control equipment, or test/measurement apparatus, the 400 is capable of providing specific packaging or electrical characteristics without the special costs you might expect. The 400 can change its face and provide excellent accuracy in single or dual element configurations for the type of control you seek. Units are available with two individual wipers generating independent outputs for establishing high/low limits in monitoring instruments. For specs, infinite resolution, virtually noise-free operation and a reputation for failure-free performance (rated for 5 million traverses without degradation), is coupled with a 600Ω to 250KΩ resistance range (±20%; ±10% available) and linearities from ±2% to ±0.1%. Stroke is 2¾" or 4¼".

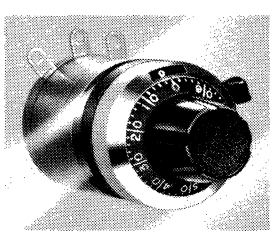
A normally open SPST or DPST "cue" switch function is available closing at the end of travel. As a result, valuable instrument panel space is saved and multiple functions provided.

TURNS-COUNTING DIALS

Duncan Turns-Counting Dials are especially designed to provide accurate, highly visible position readouts of multi-turn devices.

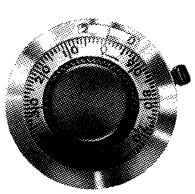
PERFECTLY DESIGNED FOR COMBINATIONS

Duncan Turns-Counting Dials are ideal for use with any Duncan Multi-turn Potentiometer, particularly the ⅞" dia., 10-turn 3250 series. Such combinations are suited for cost-effective instrumentation and system control applications.



3250 10-turn/Model 62 Dial Combination

Model 62, 15-turn



Model 82, 20-turn

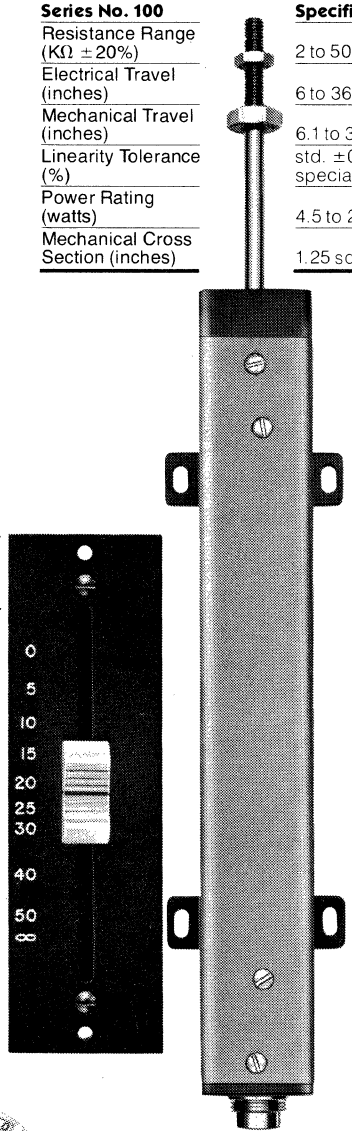
RECTILINEAR/*SERIES 100*

ACCURATE FEEDBACK AND INTERFACING CAPABILITIES IN A NEW SERIES

The new Duncan Series 100 Rectilinear Control is available in 7 different sizes.

Completely enclosed, the 100 offers an impressive array of linear motion/rectilinear capabilities and gives you a choice of 3 different interface connectors, linear and non-linear taper, and switch functions at the end of mechanical travel. They're perfect for use under unusual industrial or environmental conditions.

Series No. 100	Specifications
Resistance Range (KΩ ±20%)	2 to 500
Electrical Travel (inches)	6 to 36
Mechanical Travel (inches)	6.1 to 36.1
Linearity Tolerance (%)	std. ±0.5% special ±0.1%
Power Rating (watts)	4.5 to 27
Mechanical Cross Section (inches)	1.25 sq.



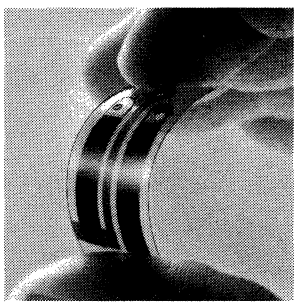
9600 Series

9800 Series

RESISTIVE ELEMENTS

A STANDARD PRODUCT APPROACH TO LOW-COST POSITION SENSING

Series 98E Elements are currently operating in hundreds of different systems. You'll find them in everything from airborne applications and instrumentation, to consumer appliances and automotive electronics.



If you want to design your own element, we'll help you. Before your first production quantity is required, you will have the satisfaction of testing and approving a design in ample time to meet your planned requirements.

TYPICAL SPECIFICATION RANGES	
Electrical Travel	up to 36" (900mm)
Resistance Range (Ω per square)	50 to 20K ±20%/±10%
Linearity	to ±0.05%
Power Rating	3 watts/square

INDUSTRIAL/AUTOMOTIVE SENSOR/ MODULES AND MINIATURE RETILINEARS

9800 Series Developed initially for demanding under hood environments, the 9800 Series now offers a complete selection of standard package/connector-interface styles. Characteristic extended life of 1 million full cycles, excellent linearity, stable materials, and integrally molded design are illustrative features of this innovative solution to demanding applications. Special configurations of this series are also available.

9600 Series Designed for a variety of miniature-sized, accurate position feedback applications, the Duncan 9600 Series Linear Position Sensor Module is ideally suited for use where reliability in a harsh operating environment is a primary consideration. Application uses include industrial, vehicular, appliance, machine tool, and robotics. The 9600 Series is available in three standard sizes and provides excellent long-life at 1,000,000 full cycles (5 million dither cycles); resistance, voltage and linearity characteristics.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

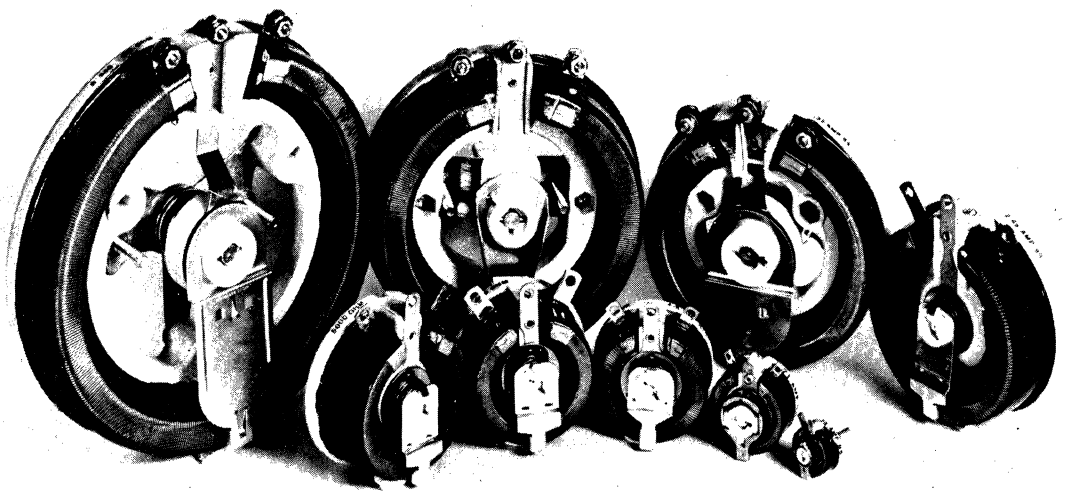
POWER RHEOSTATS

MEET THE MEMCOR FAMILY OF HIGH QUALITY WIRE-WOUND POWER RHEOSTATS



All MEMCOR Power Rheostats are vitreous enamel coated. The core and base are bonded together with vitreous enamel, thereby contributing markedly to the heat dissipation.

Standard tolerance: ±10%, ±5% available as a special.

TYPE	POWER (Watts)	RESISTANCE RANGE	DIAMETER	WEIGHT
R12½	12½ Watt	1 - 5000 Ohms	7/8"	.035 Lbs.
R25	25 Watt	1 - 5000 Ohms	1 1/16"	0.23 Lbs.
R50	50 Watt	0.5 - 10,000 Ohms	2 15/16"	0.45 Lbs.
R75	75 Watt	0.5 - 10,000 Ohms	2¾"	0.60 Lbs.
R100	100 Watt	0.5 - 10,000 Ohms	3⅛"	0.72 Lbs.
R150	150 Watt	0.5 - 10,000 Ohms	4"	1.50 Lbs.
R225	225 Watt	1 - 2500 Ohms	5"	2.18 Lbs.
R300	300 Watt	1 - 2500 Ohms	6"	3.0 Lbs.
R500	500 Watt	1 - 2500 Ohms	8"	3.75 Lbs.
R1000	1000 Watt	1 - 2000 Ohms	12"	10.0 Lbs.

Special Rheostats with Tapered Sections, Locking Devices, Off Positions, Tandem Mountings, Special Shafts on Bushing, and many other variations can be supplied.

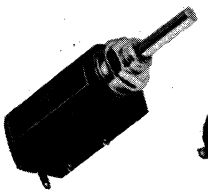
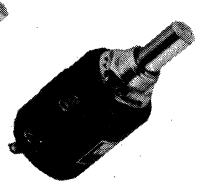
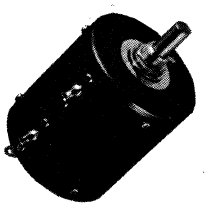
MW10-10



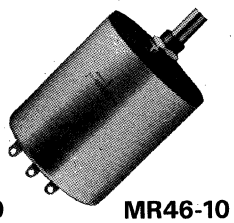
MW12-10



MW20-10



MW46-10



MR46-10

POTENTIOMETERS

Available in 3 or 5 turns on most models.

Non-Standard Options:
- —Shaft extensions.
- —Flatted shaft.
- —Increased tolerances on resistance and linearity.
- —Multi-gang, (on select pots).
- —Rear shaft extension.
- —Slipping clutch.
- —High torque.
- —Hybrid elements.

Contact factory for quotations.

Model	No. of Turns	Size Dia. x Length	Resistance Range	Resistance Tolerance	Linearity, Independent	Power Rating	Mechanical Life (Rev.)	Shaft Dia. †
MW22-10	10	.875 x .750	100Ω-100KΩ	±5%	±.25%	2 watts	500,000	¼″
MW10-10	10	.400 x 1.00	20Ω-100KΩ	±5%	<5K=±.4% >5K=±.25%	1.5 watts	200,000	⅛″
MW12-10	10	.500 x 1.00	20Ω-150KΩ	±3%	<5K=±.3% >5K=±.25%	1 watt	1,000,000	⅛″
MW20-10	10	.790 x 1.00	20Ω-200KΩ	±3%	±.25%	3 watts	2,000,000	¼″
MW46-10	10	1.812 x 2.00	5Ω-500KΩ	±3%	±.25%	5 watts	2,000,000	¼″
MW46-20	20	1.812 x 3.13	10Ω-1 Meg.	±3%	±.25%	10 watts	2,000,000	¼″
MR46-10	10	1.812 x 2.20	0.5Ω-500KΩ	±5%	±.25%	5 watts	2,000,000	¼″
MR46-20	20	1.812 x 3.74	10Ω-1 Meg.	±3%	±.25%	10 watts	2,000,000	¼″
SMR46	10	Same as MR46-10 except with limit switches at end. (Snap action)						
MO46-10	10	2.500 x 3.187	Same specs as MR46-10 except oil-filled.					

TURNS COUNTING DIALS

MG SERIES

MG22 SATIN
7/8″ Dia. Counts up to 20 turns. Over the center lock.
Black: MGA22
Gray: MGG22

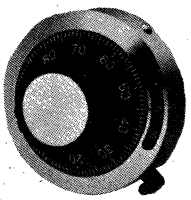
MB SERIES

MB25 SATIN
1″ Dia. Counts up to 10 turns. Over the center lock.
Black: MBA25

CA SERIES

CA20
7/8″ Dia. Counts up to 20 turns. Over the center lock.

MF SERIES

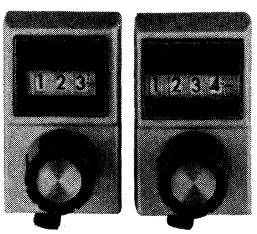


MF46 SATIN
1 13/16″ Dia. Counts up to 20 turns. Over the center lock.
Black: MFA46

MD SERIES

MD30
1 3/16″ Dia. Counts up to 10 turns.

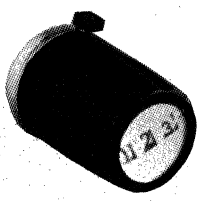
DB SERIES



DB10 1″x1.75″ DB100 1″x1.75″

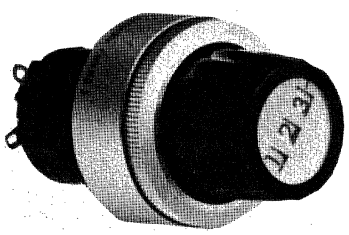
DB10=10 turns.
DB100=100 turns.
Both with over the center lock.
Available in satin or black.

DA SERIES



DA10
1″ Dia. Counts up to 10 turns.
With or without positive action brake.

COMBO® 3 POT/DIAL COMBINATION



Pre-assembled and phased to ±.25% absolute readout accuracy. Mounts in a 1.187″ dia. panel hole. Available with several potentiometers above.

Standard shaft size for dials is 1/4″ diameter. Other shaft sizes available on all models.

SEE SECTION 3500, MOTORS & DRIVES, AND SECTION 2200, CONTROL SYSTEMS AND COMPONENTS.

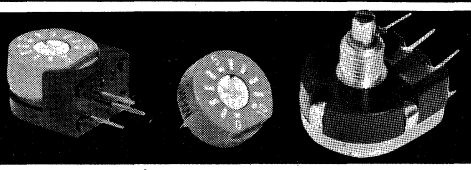
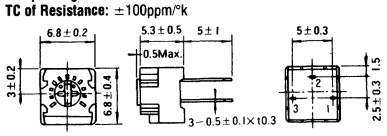
CERMET TRIMMERS



SINGLE TURN CERMET TRIMMERS

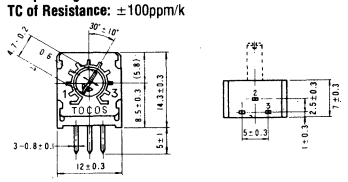
GF06 Series GF06P/W, GF06X/S, GF06UT/VT

Power Rating: 0.5W ± 70°C
Mechanical Travel: 250° ± 10°
Operating Torque: 200gm cm max
Temp. Range °C: −55°C To +125°C
TC of Resistance: ±100ppm/°k



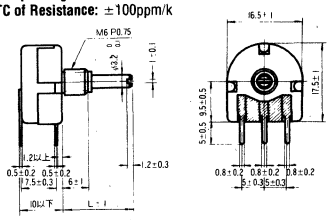
GF12 Series GF12P, GF12X,

Power Rating: 0.75W @ 70°C
Mechanical Travel: 300° ± 10°
Operating Torque: 350gm cm max
Temp. Range °C: −55°C — +125°C
TC of Resistance: ±100ppm/k



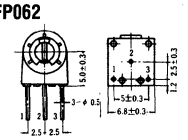
GF16 Series GF16, GFP16

Power Rating: 0.5W @ 70°C
Mechanical Travel: 260° ± 10°
Operating Torque: 20 — 200gm cm
Temp. Range °C: −55°C — +120°C
TC of Resistance: ±100ppm/k



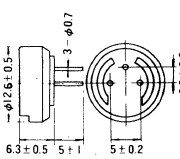
GFP06 Series GFP061, GFP062

Power Rating: 0.5W @ 70°C
Mechanical Travel: 250° ± 10
Operating Torque: 200gm cm max
Temp. Range °C: −55°C — +125°C
TC of Resistance: ±100ppm/k



G12 Series G12P, G12X/S

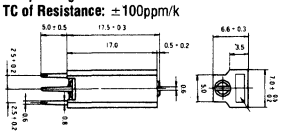
Power Rating: 0.75W @ 70°C
Mechanical Travel: 300° ± 10°
Operating Torque: 350gm cm max
Temp. Range °C: −55°C — +125°C
TC of Resistance: ±100ppm/k



MULTI TURN CERMET TRIMMERS

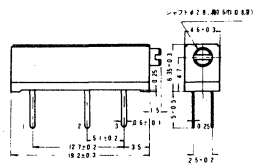
RJC07R Series Multi Turn

Power Rating: 0.75W @ 40°C
Mechanical Travel: 15 ± 3 turns
Operating Torque: 300gm cm max
Temp. Range °C: −55°C — +125°C
TC of Resistance: ±100ppm/k



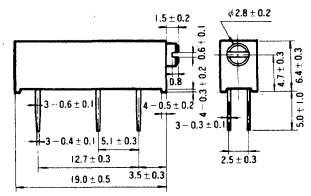
RJC094 Series
Multi Turn, Thin Film, Cermet, RJC094P/X

Power Rating: 0.75W @ 40°C
Mechanical Travel: 15 ± 3 turns
Operating Torque: 300gm cm max
Temp. Range °C: −55°C — +125°C
TC of Resistance: ±100ppm/k



RJC097 Series
Multi Turn, RJC097P/PK/PK2

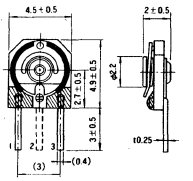
Power Rating: 0.7W @ 70°C
Mechanical Travel: 15 ± 3 turns
Operating Torque: 300gm cm max
Temp. Range °C: −55°C — +125°C
TC of Resistance: ±100ppm/k



OPEN FRAME TRIMMERS

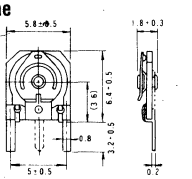
RGP04 Series
Open Frame, RGP043/46, RGP044/47

Power Rating: 0.1W @ 70°C
Mechanical Travel: 250°
Operating Torque: 200gm cm max
Temp. Range °C: −40°C — +100°C
TC of Resistance: ±250ppm/k



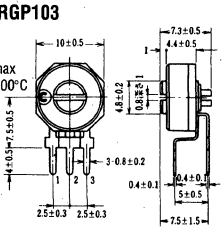
RGP05 Series Open Frame

Power Rating: 0.2W @ 70°C
Mechanical Travel: 300°
Operating Torque: 200gm cm max
Temp. Range °C: −40°C — +100°C
TC of Resistance: ±250ppm/k



RGP10 Series
Open Frame, RGP102, RGP103

Power Rating: 0.5W @ 70°C
Mechanical Travel: 220° ± 10°
Operating Torque: 300gm cm max
Temp. Range °C: −40°C — +100°C
TC of Resistance: ±250ppm/k



RG04 Series Open Frame, RG041C, RG042C
Surface Mount

Power Rating: 0.1W @ 70°C
Mechanical Travel: 250°
Operating Torque: 200gm cm max
Temp. Range °C: −40°C — +100°C
TC of Resistance: ±250ppm/k

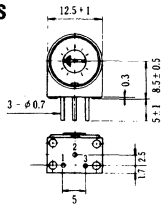
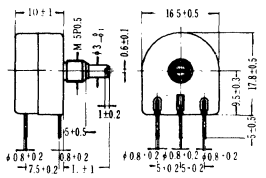
RA12 Series
Wire Wound, RA12P, RA12X/S

Power Rating: 0.5W ± 70°C
Mechanical Travel: 300° ± 10°
Operating Torque: 300gm cm max
Temp. Range °C: −55°C — −125°C
TC of Resistance: ±50ppm/k



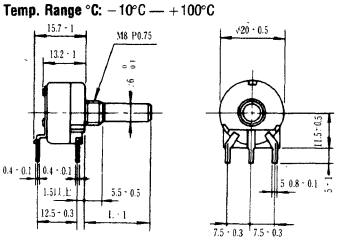
RA16 Series Wire Wound, RA16Y, RA16P

Power Rating: 0.5W
Mechanical Travel: 290° ± 5°
Temp. Range °C: −10°C — +100°C



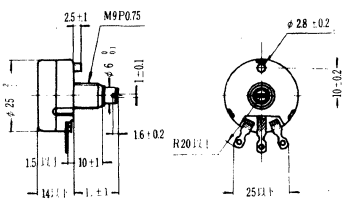
RA20 Series Wire Wound, RA20Y, RA20YP

Power Rating: 1.0, 0.5W
Mechanical Travel: 290° ± 5°
Temp. Range °C: −10°C — +100°C



RA25 Series Wire Wound, RA25Y

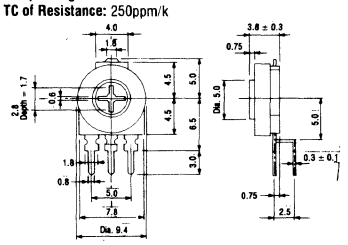
Power Rating: 1.2, 0.6W
Mechanical Travel: 290° ± 50
Temp. Range °C: −10°C — +100°C



CARBON VARIABLE RESISTORS

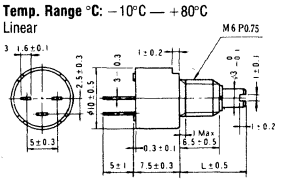
FF08 Series Carbon, FF083VZ

Power Rating: 0.2W @ 50°C
Mechanical Travel: 280° ± 10°
Operating Torque: 30 — 350GM cm max
Temp. Range °C: −30°C — +70°C
TC of Resistance: 250ppm/k



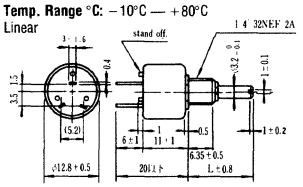
RV-102YN Series Carbon

Power Rating: 0.25W
Mechanical Travel: 300° ± 10°
Temp. Range °C: −10°C — +80°C
Linear



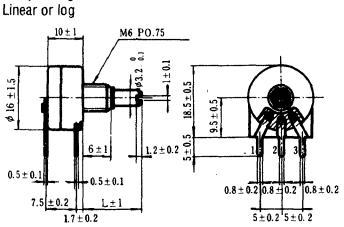
RV12YN Series Carbon

Power Rating: 0.5W
Mechanical Travel: 300° ± 10°
Temp. Range °C: −10°C — +80°C
Linear



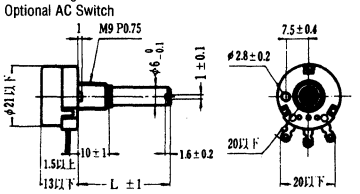
RV16YP Series Carbon

Power Rating: 0.125W
Temp. Range °C: −10°C — +80°C
Linear or log



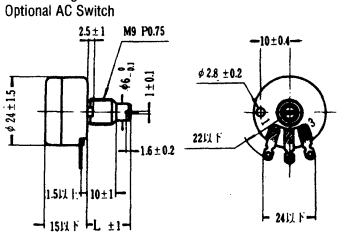
RV20N Series Carbon

Power Rating: 0.25W
Mechanical Travel: 290° ± 5°
Temp. Range °C: −10°C — +80°C
Linear or log
Optional AC Switch



RV24YN Series Carbon

Power Rating: 0.4W
Mechanical Travel: 300° ± 5°
Temp. Range °C: −10°C — +80°C
Linear or log
Optional AC Switch



RV30YN Series Carbon

Power Rating: 1.0W
Mechanical Travel: 300° ± 5°
Temp. Range °C: −10°C — +80°C
Linear or log
Optional AC Switch

MINIATURE PRE-SET POTENTIOMETERS

For the requirements of modern electronic equipment ISKRA has designed a new series of trimmer potentiometers PNZ 10, which feature a number of improvements.

Some of them are:

△ Miniature rectangular design
△ Horizontal and vertical mounting
△ Three types of resistive layers:
carbon layer on phenolic
carbon layer on ceramic
cermet layer on ceramic
△ With hex slot suitable for automatic adjustment
△ Dual wiper design reduces contact resistance and electrical noise
△ Enclosed body protects against dust and short circuits
△ Non-inflammable plastic according to UL-94 — V0
Technical and electrical data and dimensions are given below

MINIATURE PRE-SET CARBON ON PERTINAX POTENTIOMETERS

PNZ 10, 10A, 11

Technical Data

Rated dissipation at 40°C	0.2 W
Resistance value range	100 Ω to 5 MΩ
Tolerance	±20%, ≤ 1 MΩ ±30%, > 1 MΩ
Resistance law	linear
Maximum voltage	200 Vdc
Temperature coefficient	±1000 × 10⁻⁶/K, ≤ 100 kΩ ±2000 × 10⁻⁶/K, > 100 kΩ
On special request only	± 500 × 10⁻⁶/K, ≤ 100 kΩ ±1000 × 10⁻⁶/K, > 100 kΩ
Climatic category	25/70/21
Climatic stability	IEC 190, DIN 41 450, group HSF

Mechanical Data

Angle of rotation	295° ±5° 360° continuous
Self-extinguishing plastic material according to UL-94	V0
Operating torque	4 to 20 mNm
End stop torque	≥ 50 mNm
Weight	0.8 g

MINIATURE PRE-SET CARBON ON CERAMIC POTENTIOMETERS

PNKZ 10, 10A, 11

Technical Data

Rated dissipation at 55°C	0.5 W
Resistance value range	100 Ω to 2.5 MΩ
Tolerance	+50%, −30%, < 100 Ω ±20%, 100 Ω to 1 MΩ ±30%, > 1 MΩ
Resistance law	linear
Maximum voltage	250 Vdc
Temperature coefficient	±500 × 10⁻⁶/K
On special request only	±100 × 10⁻⁶/K
Climatic category	40/90/56
Climatic stability	IEC 190, DIN 41 450, group GND

Mechanical Data

Angle of rotation	295° ±5° 360° continuous
Self-extinguishing plastic material according to UL-94	V0
Operating torque	4 to 20 mNm
End stop torque	≥ 50 mNm
Weight	1 g

MINIATURE PRE-SET CERMET POTENTIOMETERS

PNCZ 10, 10A, 11

Technical Data

Rated dissipation at 85°C	0.5 W
Resistance value range	25 Ω to 5 MΩ
Tolerance	+50% −30%, < 100 Ω ±20%, 100 Ω to 1 MΩ ±30%, > 1 MΩ
Resistance law	linear
Maximum voltage	250 Vdc
Temperature coefficient	±200 × 10⁻⁶/K
On special request only	±100 × 10⁻⁶/K
Climatic category	55/125/56
Climatic stability	IEC 190, DIN 41 450, group GND

Mechanical Data

Angle of rotation	295° ±5° 360° continuous
Self-extinguishing plastic material according to UL-94	V0
Operating torque	4 to 20 mNm
End stop torque	≥ 50 mNm
Weight	1 g

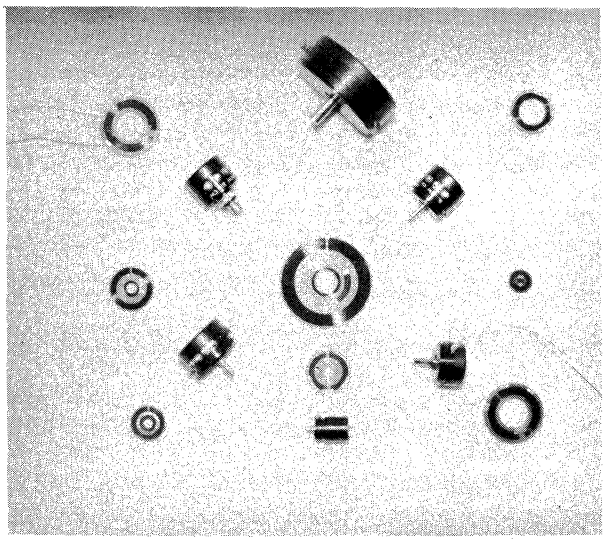
JDK Controls, Inc.

PRECISION CO-MOLDED CONDUCTIVE PLASTIC POTENTIOMETERS & ASSEMBLIES

JDK Controls manufactures one type of potentiometer element — co-molded conductive plastic — because to a serious user, there are very few reasons to use any other type of resistive element technology. In the JDK process, the termination and resist materials are molded under temperature to a plastic substrate. The result is a very hard, smooth surface which promotes ultra-long life and excellent electrical characteristics. This process is superior in reliability to other conductive plastic processes such as film and screening, as well as other element types including cermet, hybrid, and wirewound.



JDK FEATURES

- ULTRA-LONG ROTATIONAL LIFE
  50 Million Cycles — Minimum
- EXCELLENT OUTPUT SMOOTHNESS
  Always under .1%
- LINEAR AND NON-LINEAR
  Functions Available
- OUTSTANDING VALUE
  $\frac{\text{Unit Price}}{\text{Performance}}$
- 18 MONTH WARRANTY
  For most applications —
  because JDK believes in what it manufactures

QUALITY ASSURANCE

All JDK precision co-molded conductive plastic potentiometers are designed and manufactured to meet or exceed the requirements of:

MIL-R-39023A

Our Quality Assurance System meets the requirements of:

MIL-Q-9858A
MIL-I-45208A

MARKETS

JDK precision co-molded conductive plastic potentiometers are used in a variety of commercial, industrial, and military applications.

STANDARD ROTARY SINGLE-TURN SIZES

Model No.	Dia. Inches	Res. Range	Standard* Elect. Travel	Standard* Ind. Lin.	Mounting Styles
6005	.500	1K-50K	325°	1.0%	Servo/Bushing
6008	.750	1K-50K	340°	.5%	Servo/Bushing
6009	.875	1K-50K	340°	.5%	Servo/Bushing
6011	1.062	1K-50K	340°	.5%	Servo/Bushing
6015	1.437	1K-50K	340°	.5%	Servo/Bushing
6018	1.750	1K-50K	350°	.5%	Servo/Bushing
6020	2.000	1K-50K	350°	.5%	Servo/Bushing

* Specials Available

CUSTOM REQUIREMENTS AND ASSEMBLIES

JDK specializes in custom requirements for potentiometers in the sizes listed above as well as the following:

- ELEMENTS
  .578" to 3.0" outside diameter
  Rotor/Wiper assemblies available
- DC MOTOR POTENTIOMETER ASSEMBLIES
  16 or 22 mm
  Gearheads also available
- NEXT ASSEMBLIES
  JDK will add to its potentiometers —
  brackets, connectors, switches,
  wire harnesses, etc.

OTHER WIREWOUND POTENTIOMETER FEATURES AVAILABLE ON SELECTED PRODUCT TYPES:
- nonlinear resistance tapers,
- ±5% resistance tolerance,
- multisection units,
- twist-tab mounting.

MALLORY MANUFACTURES A COMPLETE LINE OF "T", "L", and "LL" PAD ATTENUATORS.

In addition to the many types of wire-wound controls carried as stock items, Mallory can supply custom made units tailored to your exact requirements. Specifying Mallory for your custom made control will assure exacting quality for either your prototype or production use.

POTENTIOMETER LINE SWITCHES AVAILABLE

MAUREY INSTRUMENT CORP. Potentiometers

Rotary and Linear Motion Transducers

WIREWOUND These precision potentiometers were developed for military use over a period of 27 years. They are widely used in instrumentation and automation where precise electrical and mechanical requirements are specified. Low resistance tolerance and TCR; close electrical angle tolerance. Custom designs are available.

CONDUCTIVE PLASTIC Our raised molded track will withstand 200,000,000 cycles of high dynamic velocities (10″ per second). The infinite resolution and low noise make these units particularly suitable for servo feedback applications. 100 g shock, 100—20,000 Hz at 50 g. Impervious to most gases and oils.

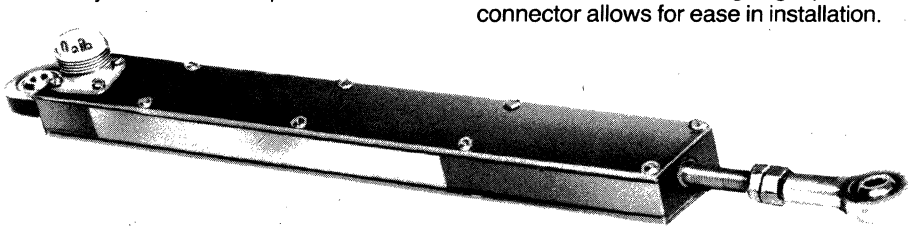
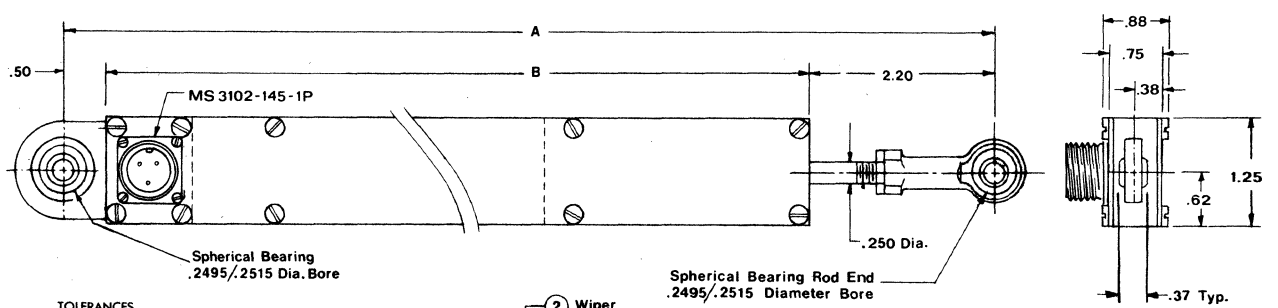
MAUREY INSTRUMENT CORP.

HEAVY DUTY LINEAR MOTION POTENTIOMETERS WIREWOUND AND CONDUCTIVE PLASTIC HDL

WIREWOUND M2028 This transducer combines the inherent accuracy and reliability of a wirewound potentiometer with the physical ruggedness required in industrial applications. They are used with hydraulic and mechanical actuators to measure and control linear motion. The self-aligning spherical ball ends and MS connector simplifies installation. High duty bearings give the ¼ inch shaft stability in the extended position.

CONDUCTIVE PLASTIC P1991 Where severe environmental conditions exist as in mills, factories and power generating plants, this linear motion transducer is practically indestructible. The unit is impervious to dust, oil and moisture. The molded, raised conductive track and graphite composition contacts provide for years of maintenance free service. As with the M2028, the self-aligning spherical ball ends and MS connector allows for ease in installation.





ELECTRICAL AND MECHANICAL CHARACTERISTICS

	M2028 WIREWOUND	P1991 CONDUCTIVE PLASTIC
Total Resistance (Ohms)	See Charts II & III	See Note 5
Total Resistance Tolerance	±5%	±20%
Theoretical Resolution	See Chart III	.001 inch
Independent Linearity	See Note 6	±0.5%
Theoretical Elect. Travel (inches)	See Chart I	See Chart I
Theoretical Elect. Travel Tolerance (inches)	±.010	±.025
Total Mechanical Travel (inches)	See Chart I	See Chart I
Temperature Coefficient	50 PPM/°C	500 PPM/°C
Operating Temperature Range	−55 to 125°C	−55° to 105°C
Power Rating (Watts at 40°C)	1 watt/inch	0.5 watt/inch
Dielectric Strength (Volts, RMS for 60 Sec)	750 volts, RMS	750 volts, RMS
Terminals	3	3
Taps	1/2 inch spacing	1/2 inch spacing
Tap Tolerance (inches)	±.010	±.030
Life Expectancy (Cycles at 60 in./min.)	500,000	50,000,000
Shaft Frictional Force	4 ounces	4 ounces
Weight (ounces)	See Chart I	See Chart I
Bearings	Nylon	Nylon

Notes:
1. Mating connector supplied.
2. Stainless steel shaft.
3. Anodized aluminum housing.
4. Terminals available on special request.
5. Ohms per inch for P1991: 500, 1K, 2K, 5K, 10K.
7. Independent linearity for M2028: (100% ÷ Total Turns x 2)
6. With modification, this type is available in strokes greater than 15 inches.

LIGHT DUTY LINEAR MOTION POTENTIOMETERS WIREWOUND AND CONDUCTIVE PLASTIC

LDL

WIREWOUND (M-Series) These miniature transducers combine the best electrical characteristics in the smallest size at the lowest cost. The units were designed for use in laboratory test equipment, light industrial applications and automation where great accuracy of electrical output is essential. The spherical ball ends add flexibility to mounting. These wirewound, linear motion potentiometers will meet the requirement in the majority of applications.

CONDUCTIVE PLASTIC (P-Series) Where long life in a hostile environment is required, these linear motion transducers with molded, raised tracks and graphite composition contacts have no equal. They are practically impervious to dust, water and oil. The high contact pressure resists the effects of severe vibration and shock. The units are being used in factories and mills where maintenance-free operation is essential.

PRECISION CONDUCTIVE-PLASTIC SINGLE TURN POTENTIOMETERS

PST

These conductive plastic potentiometers have been specially designed for severe environmental conditions in mill-factory operations as well as in critical military applications. The molded, raised track maintains itself free from contamination of foreign particles, oil or water. The high gram pressure of the graphite composition contact on the raised track gives excellent resistance to contact bounce under punishing vibration or shock, as well as an exceptional rotational life. Such units are particularly suited for applications where trouble-free maintenance is required.

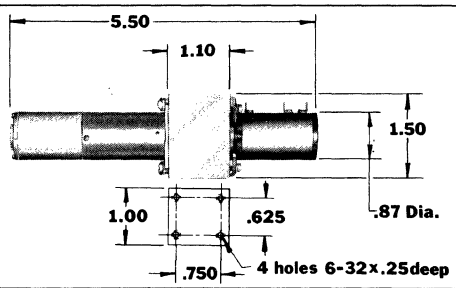
MAUREY INSTRUMENT CORP. MOTORIZED POTENTIOMETERS AND SWITCHES — MPS

General Description & Applications

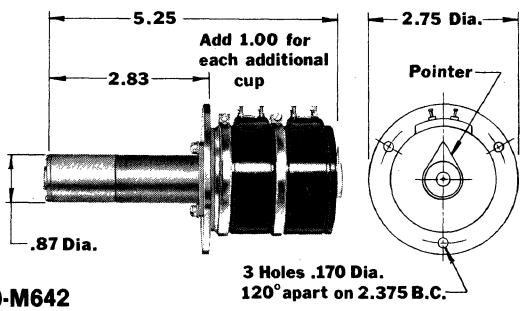
A family of single turn and multiturn, motor driven potentiometers and switches has been developed for industrial servo applications. They are used for such applications as variable speed controls on power generating sets, electrical-mechanical remote control, and readouts. They provide excellent accuracy at an economical price. These integrated motor-potentiometers are the result of years of Maurey experience in the manufacture of precision potentiometers and motor assemblies. The potentiometers, gear head, clutch, and motor are precisely matched to perform to exacting specifications. Motor-clutch-pot units are available in a wide range of specifications. A motor of selected speed and voltage may be matched with single, 3, 5, or 10 turn potentiometers, either wirewound or conductive plastic. When multiple voltages are required, single cups may be conveniently ganged with or without clutches. In addition, Maurey engineers can provide multi-tap potentiometers, special shafts and mountings, and a wide range of AC or DC motors to your specification.



87-H477

87-H477 DC Motorized Multiturn Potentiometer

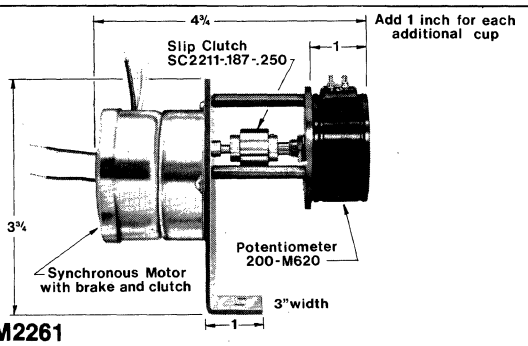
A compact, motor driven, 10 turn ⅞" diameter precision potentiometer. A slip clutch between the motor and the potentiometer protects the stops at the end of mechanical travel. The precision machined, square aluminum housing provides mounting holes for the device.
Sealed from dust and normal industrial environment.
Potentiometer independent linearity: ±0.25% or better
Power rating: 2.5 watts at 60°C
Resistances available: 500 Ω, 1K, 2K, 5K, 10K, 20K, 50K, 100K.



200-M642

200-M642 DC Motorized Single Turn Potentiometer

A versatile motor, switch, potentiometer assembly. This model may use multi-pole, single throw switch cups, and with up to six precision potentiometers of various resistance values. All components are easily assembled or changed. Proven design for factory or mill environments. A pointer indicates position of wiper or percentage of voltage. A mounting flange simplifies installation on a panel or bracket.
Potentiometers have 320°electrical angle, linearity: ±0.5%
Power: 5 watts at 85°C.
Resistances available: 100 Ω, 250 Ω, 500 Ω, 1K, 2K, 2.5K, 5K, 10K, 20K, 25K, 50K, 100K.



M2261

M2261 AC Motorized Single Turn Potentiometers

A compact AC motor driven wirewound potentiometer with mechanical stops. A slip clutch provides positive protection to the mechanical stops in the potentiometer. The slip clutch can be eliminated for continuous rotation potentiometers. Also available with single throw switches.
Potentiometer: ±0.5% independent linearity; 4 watts, standard resistances of 250, 500, 1K, 2K, 2.5K, 5K, 10K, 20K, 50K, 100K.
Motor: 115 Volts, A.C. 60 Hz; synchronous continuous duty with positive clutch and instantaneous brake; standard RPM: 1, 2, 4, 6, 10, 12, 30, 60.

Standard DC Motor Data:

Speed: (See chart)
Voltage: (See chart)
Current: (See chart)
Torque at 24 volts: 50 oz-in.
Break away voltage: 10 volts DC
Other requirements on request

Voltage VDC	ma	Speed RPM
12	49	6.0
24	50	16.0
28	51	21.2
35	53	24.5

Special Requirements

The types shown here are representative of a wide range of motor driven mechanisms manufactured by Maurey. AC or DC motors may be used. Single and multicup carbon, wirewound, or conductive plastic potentiometers may be specified, with or without slip clutches or switches. Write or phone for a solution to your requirement.

CERMET TRIMMER SPECIFICATIONS

Temperature Coefficient: ±100 ppm/°C, standard
Contact Resistance Variation (CRV): 3%
End Resistance: 1% maximum or 2Ω, whichever is greater.
Resolution: Essentially infinite.
Operating Range:
−25°C to +125°C for Models 8014, 8038.
−55°C to +125°C for Model 8035.
−65°C to +150°C for Models 8024, 8026, 8050.
Torque: 3 to 5 inch-ounces maximum, depending on model.
Sealed to allow wave solder and immersion cleaning.
Stops: Clutch at both ends for multiturn; positive at both ends for single turn models.

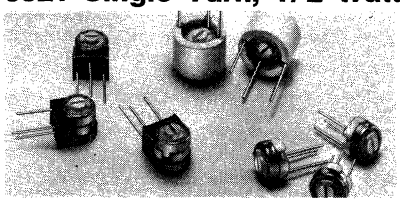
muRata ERIE
MURATA ERIE NORTH AMERICA, INC.

3321 Single Turn, 1/2 Watt



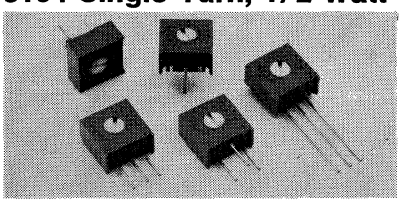
FEATURES

- Flame retardant rotor meets UL94V-0 requirements
- Extremely small size — .260″D. x .181″
- Sealed to withstand wave soldering and immersion cleaning processes

SPECIFICATIONS

Resistance Range	10 ohms to 2 Megohms
Tolerance	±20%
Residual Resistance	1% or 2 ohms max. whichever is greater
Power Rating	0.5W at 70°C. Derated to 0W at +150°C
Working Voltage	300 VDC max.
Operating Temperature Range	−55°C to +150°C
Contact Resistance Variation	3% or 3 ohms max. whichever is greater

3104 Single Turn, 1/2 Watt



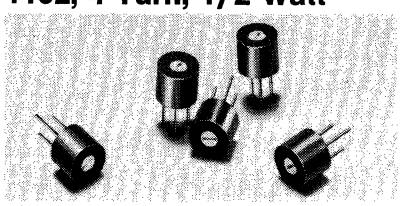
FEATURES

- Low cost
- ⅜″ square

SPECIFICATIONS

Resistance Range	10 ohms to 2 Megohms
Tolerance	±10%
Residual Resistance	2 ohms max.
Power Rating	0.5W at 70°C. Derated to 0W at +125°C
Working Voltage	300 VDC max.
Operating Temperature Range	−55°C to +125°C
Contact Resistance Variation	1% or 1 ohm max. whichever is greater

1102, 4-Turn, 1/2 Watt



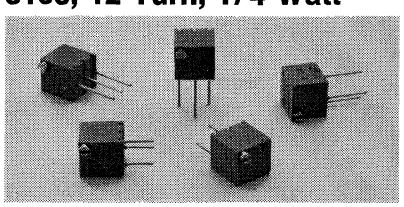
FEATURES

- Unique planetary drive provides the precise setting capability of a multi-turn unit in a small single-turn package
- Just .299″D x .260″
- Sealed to withstand wave soldering and immersion cleaning process

SPECIFICATIONS

Resistance Range	10 ohms to 2 Megohms
Tolerance	±10%
Residual Resistance	1% or 2 ohms max. whichever is greater
Power Rating	0.5W at 70°C. Derated to 0W at +125°C
Working Voltage	300 VDC max.
Operating Temperature Range	−55°C to +125°C
Contact Resistance Variation	3% or 3 ohms max. whichever is greater

3103, 12-Turn, 1/4 Watt



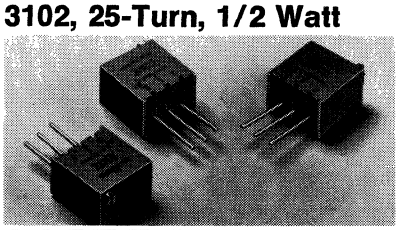
FEATURES

- ¼″ square
- Sealed to MIL-R-22097 standards

SPECIFICATIONS

Resistance Range	10 ohms to 1 Megohm
Tolerance	±10%
Residual Resistance	1% or 2 ohms max. whichever is greater
Power Rating	0.25W at 70°C. Derated to 0W at +125°C
Working Voltage	200 VDC max.
Operating Temperature Range	−55°C to +125°C
Contact Resistance Variation	3% or 3 ohms max. whichever is greater

3102, 25-Turn, 1/2 Watt



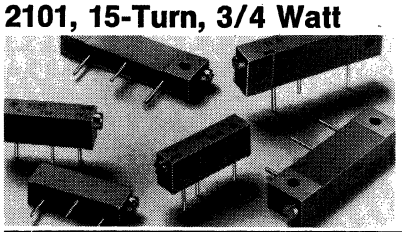
FEATURES

- Small size — .374″ x .394″ x .240″
- Sealed to MIL-R-22097 standards. Will withstand industrial cleaning processes

SPECIFICATIONS

Resistance Range	10 ohms to 2 Megohms
Tolerance	±10%
Residual Resistance	1% or 2 ohms max. whichever is greater
Power Rating	0.5W at 70°C. Derated to 0W at +125°C
Working Voltage	300 VDC max.
Operating Temperature Range	−55°C to +125°C
Contact Resistance Variation	3% or 3 ohms max. whichever is greater

2101, 15-Turn, 3/4 Watt



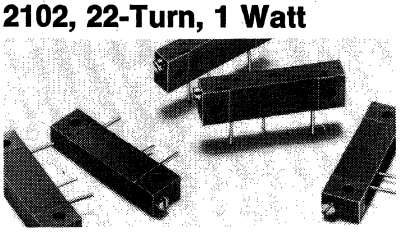
FEATURES

- Small size — .181″ x .252″ x .752″ for close board spacing
- Sealed to MIL-R-22097 standards. Will withstand industrial cleaning processes

SPECIFICATIONS

Resistance Range	10 ohms to 2 Megohms
Tolerance	±10%
Residual Resistance	3% or 1 ohm max. whichever is greater
Power Rating	0.75W at 70°C. Derated to 0W at +125°C
Working Voltage	300 VDC max.
Operating Temperature Range	−55°C to +125°C
Contact Resistance Variation	3% or 3 ohms max. whichever is greater

2102, 22-Turn, 1 Watt



FEATURES

- 22 turn mechanism provides extremely fine adjustment capability
- High power dissipation: 1.0W at 70°C
- Sealed to withstand wave soldering and immersion cleaning processes

SPECIFICATIONS

Resistance Range	10 ohms to 2 Megohms
Tolerance	±10%
Residual Resistance	1% or 2 ohms max. whichever is greater
Power Rating	1W at 70°C. Derated to 0W at +150°C
Max. Working Voltage	300 VDC max.
Operating Temperature Range	−55°C to +150°C
Contact Resistance Variation	3% or 3 ohms max. whichever is greater

muRata ERIE

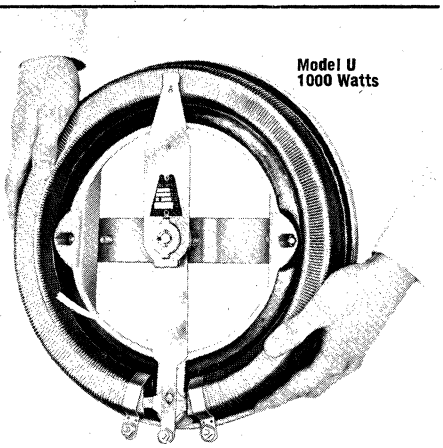
OHMITE® Vitreous Enameled Rheostats (Potentiometers)

Now, Ohmite offers TWELVE sizes in its line of famous rheostats.

In all Ohmite rheostats, the resistance wire is wound on a solid ceramic core. The turns are locked in place with tough, protective vitreous enamel or Ohmicone® silicone ceramic. Pivoted, universal action mounting of the brush, assures perfect contact. Metal-graphite contact brushes, varied to fit current and resistance, insure good contact with negligible wear of the wire. Terminals at each end of the winding permit connection of the unit as a potentiometer.

NOW, FOR IT'S RATING, INDUSTRY'S SMALLEST RHEOSTAT!

Model C
7½ Watts



Model U
1000 Watts

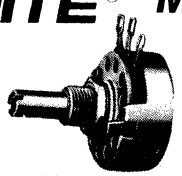
OHMITE® Molded Composition Potentiometers

STYLE CMU
MIL STYLE
RV4N



Ohmite molded composition potentiometers (Type AB) provide high quality and dependable performance.

Because the resistance element is a thick, solid-molded ring, longer life and smoother operation are obtained. This is due also to the molded composition contact. Units are dust and splash proof, fungus and corrosion resistant and meet the requirements of military specification MIL-R-94.

Type AB is rated 2 watts at 70°C ambient.

TYPE AB IS AVAILABLE WITH:

⅞" slotted shaft (CMU)
2" unslotted shaft (CU, CA, CB, CCU) and in a slotted shaft with locking type bushing (CLU)

TYPE AS AVAILABLE WITH:

- Locking type bushing and slotted shaft (Style AS)
- Standard bushing with longer, slotted shaft (Style ASM)

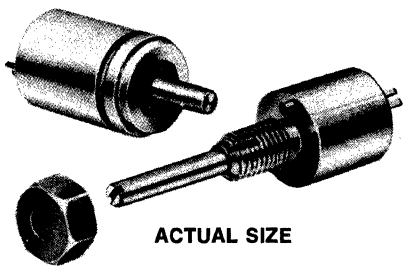
PRECISION POTENTIOMETERS

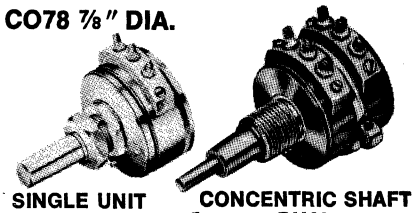
C-050 ½" DIA.



ACTUAL SIZE

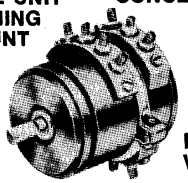
Available in resistance values to 500K. Dual Gang Units available both Bushing & Servo Mt.

CO78 ⅞" DIA.



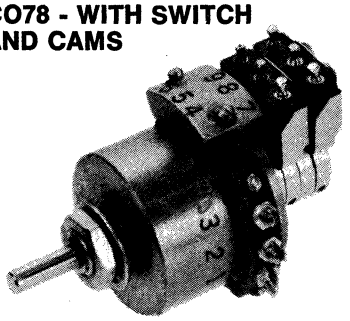
SINGLE UNIT BUSHING MOUNT

CONCENTRIC SHAFT DUAL



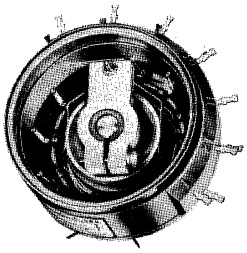
DUAL UNIT WITH TAPS

CO78 - WITH SWITCH AND CAMS



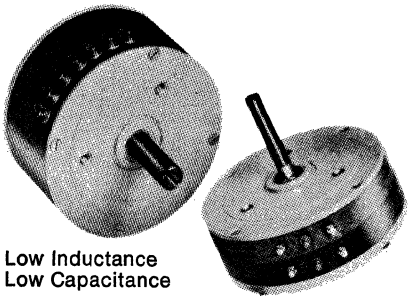
Designed for aircraft and commercial applications.

BC200 - C200P 2" DIA.



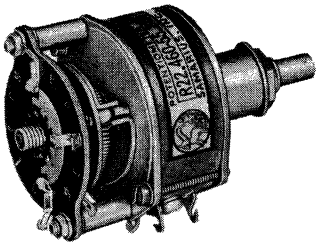
Most versatile unit- all resistance values. Taps economically supplied. Gangable and available in both Bushing & Servo Mount.

M300, M301, M400 INSTRUMENT POTENTIOMETERS



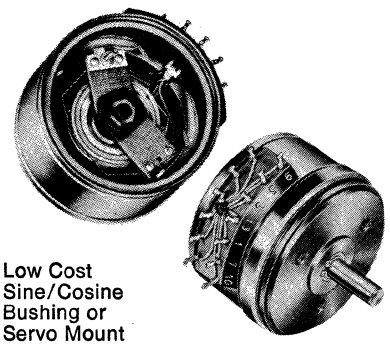
Low Inductance
Low Capacitance

MODEL L140 LOOP CONTROL



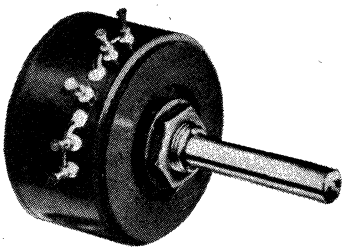
Spring return to center with or without switch and center tap. Used in Satellite and Radar Antennas. Also Medical, Robot and Comparators.

BC200 - C200P SINE/COSINE



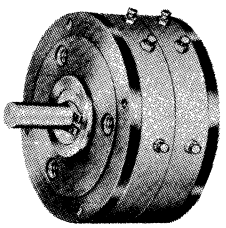
Low Cost Sine/Cosine Bushing or Servo Mount

M158 - CP158 1⅝"



Low Cost Industrial Wirewound & Conductive Plastic Units

SERIES HP-200, HP-300, HP-500 2", 3", 5" HIGH RESOLUTION



Ideal for Tight Linearity Long Elect Angles

HIGH PRECISION POTENTIOMETER AND RESISTOR ASSEMBLY

Samarius, Inc. furnish their clients with a custom winding service for wire wound potentiometer elements in card and mandrel types. Linear or functional requirements are achieved through cooperative R & D with customers. Card profiles are ground with exact duplication from master templates on our own engineered and built machines to tolerances to meet all specifications. We can supply card windings for ¼" miniature potentiometers to cards 12 feet long and 4 inches wide. Mandrel windings are available up to 16 feet long in any type of wire needed. Over 30 years' experience in supplying high precision potentiometer windings to the field. Call on our engineering staff for their help in solving your winding or potentiometer problems.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

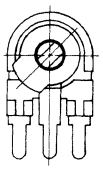
ROTARY

Angle of Rotation Ranges: 260° ±5° through 300° ±5°
Resistance Range: 500Ω through 2MΩ
Power Rating: .05W through .25W
Voltage Rating: 150V through 500V
Torque: 200 through 350g—cm
For Switch, Gang Error and Electrical Tap Specifications please consult Shogyo directly.



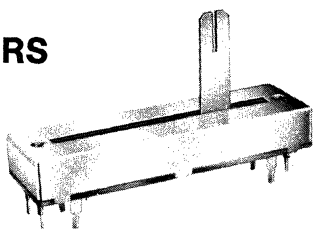
SEMI-FIXED

Resistance Range: 100Ω through 2KΩ
Resistance Tolerance: ±20%
Taper: Linear
Rated Power: 0.1W
Maximum Operating Voltage: 100V
Rotating Angle: 260 ±15%
Rotating Torque: 40 — 250g—cm
Rotating Life: Maximum 10% resistance change @ 50 rotations

Temperature Characteristic: +5 — 20% resistance change after 5 hours at 70°C
Load Characteristic: ±5% resistance change after 5 hours @ normal temperature
Moisture Characteristic: 7 — 15% resistance change after 5 hours at 95% humidity, 40°C

SLIDE & VARIABLE RESISTORS

The products illustrated and listed are only a small representation of the full range of items available.



Travel: 20 ±0.5(mm) through 60 ±0.5(mm)
Mounting Pitch: 65(mm) — 31 ±0.3(mm) through 85(mm)
Resistance Range: 500Ω — 1MΩ, 5KΩ through 1MΩ
Power Rating: 0.1W through 0.5W
Voltage Rating: 150V through 500V
Sliding Force: 50 — 350g
Single and Double Types available.

RESISTANCE CHARACTERISTICS

TAPER	CHECK POINT	$\frac{V1\text{-}2}{V1\text{-}3}$ x 100 (%)	$\frac{V2\text{-}3}{V1\text{-}3}$ x 100 (%)

Spectrol

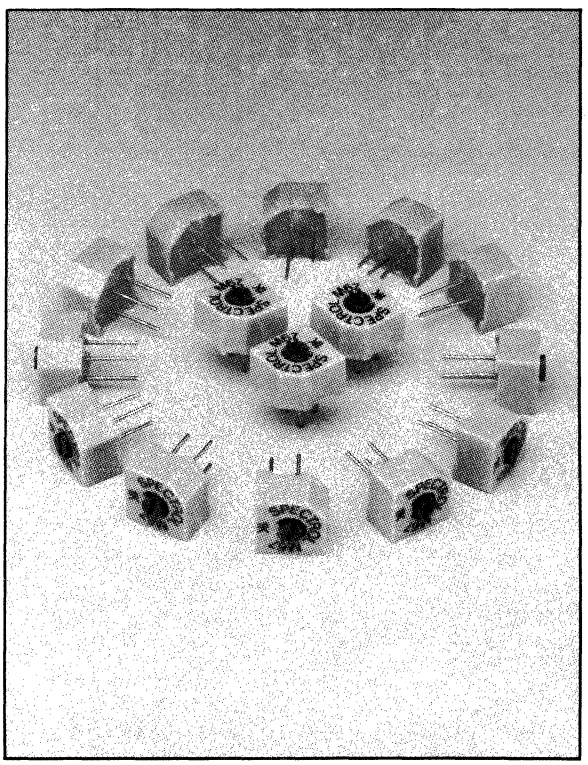
SPECTROL MODEL 67

New Product

New competitive high quality ¼" square single turn trimmer with a unique feature*

Features

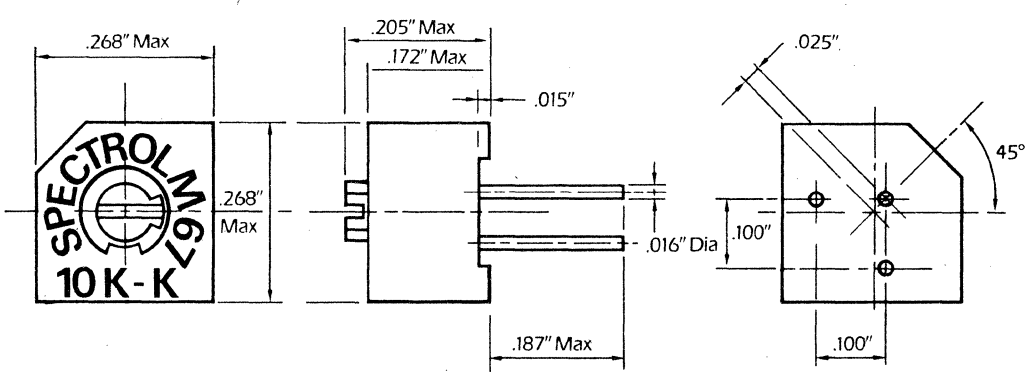
- Solid Stop Mechanism
- Thermal Swaged Terminations
- Visual Setting
- Sealed (85°C for 1 minute)
- Will fit in envelope of similar pin configurations using round body
- 0.016" (0.406mm) Tin Plated Terminal Pins



Technical Data

Resistance Range	100Ω to 1 Megohm
Mechanical Adjustment	270°
Resistance Tolerance	±20%
Tempco	±100 PPM/°C
Setability	±0.05% RT
Power Rating	0.5 Watt at 70°C

* Pin Configuration identified by "Flat" on housing



Spectrol Electronics 17070 E. Gale Avenue, City of Industry, CA 91745; phone: (818) 964-6565.

TYPICAL SWITCH APPLICATIONS

● Logic switching. ● Internal switching device for optional equipment add-ons. ● Test point switching. ● Adapting main-frame computers to peripheral equipment. ● Standardizing printed circuit boards. ● Selecting operational voltages. ● Selecting calibration resistors.

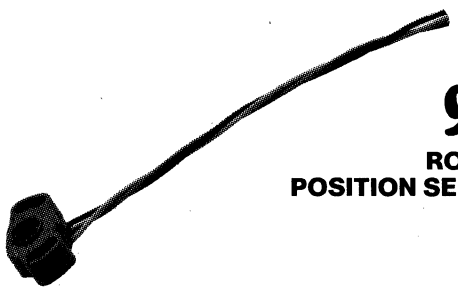
MOTION AND POSITION SENSORS

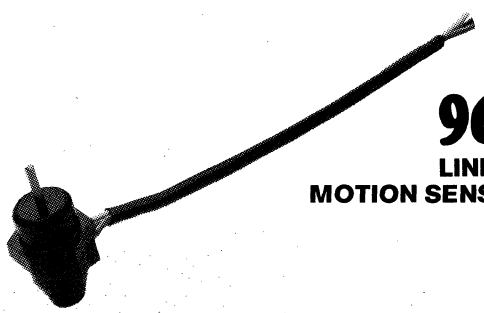
New Product

SPECIFICATIONS:



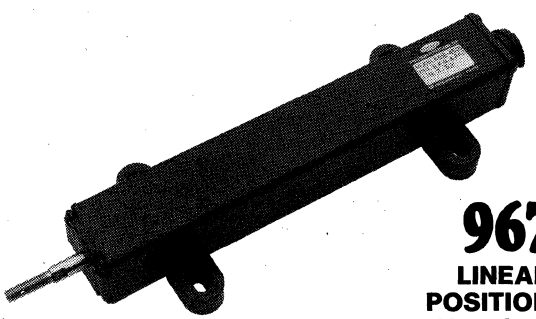
961
ROTARY POSITION SENSOR

Total Resistance
5K ohm ±20%
Linearity (Independent)
±2% over electrical angle
Active Electrical Angle
85° ±2°
Power Rating
1 Watt @ 40°C derated to zero at 135°C
Mechanical Rotation
120° ±5° rotor spring return to ccw stop
Nominal Size
1.600 long X .540 wide



962
LINEAR MOTION SENSOR

Total Resistance
10K ohm ±20%
Linearity (Independent)
±3%
Electrical Travel
.405 ±.015
Power Rating
1 Watt @ 40°C derated to zero at 135°C
Mechanical Travel
.425 ±.015 shaft spring return to extended position
Nominal Size
2.432 long X 1.250 hex



967
LINEAR POSITION TRANSDUCER

Total Resistance Range
See Table
Linearity (Independent)
±0.5% std.
Resistance Tolerance
±20% Std., ±10% available
Power Rating
0.4 Watts/cm of travel @ 40°C to 0.1 Watt/cm @ 125°C

Complete with connector and mounting clamps

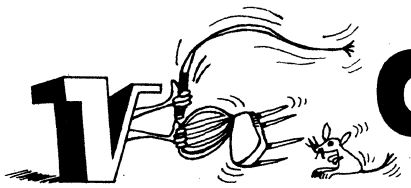
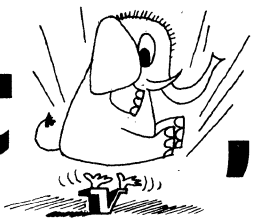
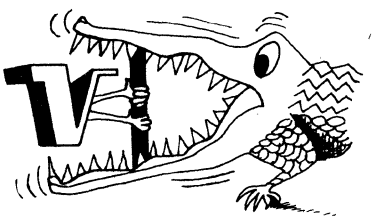
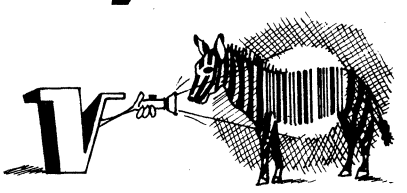
If you want to move it, control it, sense it, stop it, or scan it, call Vernitech.



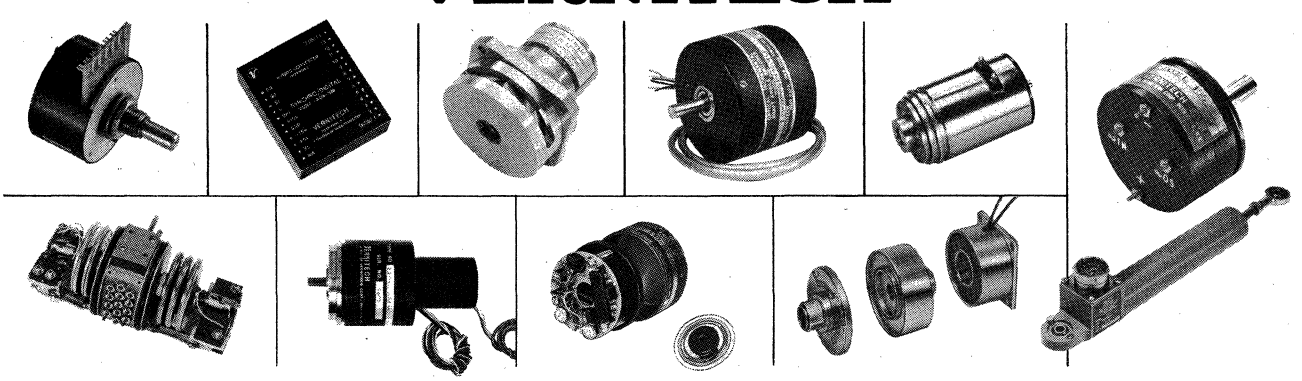






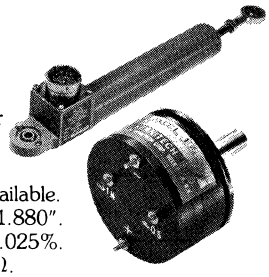
That is, if you're looking for instrument motors, optical and contacting shaft angle encoders, rotary and linear potentiometers, potentiometric pressure transducers, industrial precision brakes or clutches, or laser scanning motors, we'll probably have just what you're looking for. Just look on the opposite page. And if you *don't* find what you want, call Vernitech, give us the particulars, and we'll make it for you.

VERNITECH



VERNITECH, a division of Vernitron Corp., 300 Marcus Blvd., Deer Park, NY 11729 • 516-586-5100 • TWX 510-227-6089

POTENTIOMETERS



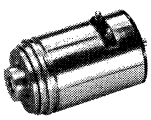
employing Vernitech's unique conductive film and precious metal wipers... respond to wiper motions as small as .000005".

Rotary Single Turn
Linear, non-linear, sine/cosine available.
Sizes 0.5", L 0.5" to Dia 5.0", L 1.880".
Linearity or conformity ±2% to 0.025%.
Resistance range 1KΩ to −250KΩ.

Rotary Multi-Turn
10 to 100 turns available.
Sizes Dia 0.5", L 1.5" to Dia 2.0", L 2.625".
Linearity or conformity ±0.5% to 0.015%.
Resistance range 1KΩ to 500KΩ.

Linear Motion
Electrical stroke lengths 1" to 60".
Linearity or conformity ±0.2% to 0.01%.
Resistance range 250Ω/in to 250KΩ/in.

CLUTCHES AND BRAKES
(electromagnetic)



hundreds of models and sizes available from stock.

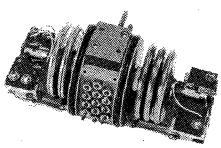
Precision Instrument Type
Sizes 5, 8, 11, 13, 15, and 18.
Standard length and wafer types. Spring and magnetic.
Meet MIL-E-5272C. Zero backlash.
Torque 5 to 150 oz. in. Response time 5 to 142 ms.

Industrial Types — open frame
Sizes 8, 12, 17, 22, 26. Torque to 75 in. lb.
Response time 6-30 ms at rated voltage.

Industrial Types — enclosed frame
Hybrid or special units designed for particular applications when MIL-SPECS and close tolerances are not essential, but where having a complete "self-contained" unit is desirable: cassette tape decks, analog devices actuators, etc.

Fail Safe
Braking action occurs 10 ms after coil is de-energized or power fails. Sizes 8, 17, 30, and 45.
Torque up to 50 in. lb. Zero backlash. Adjustable to compensate for wear.

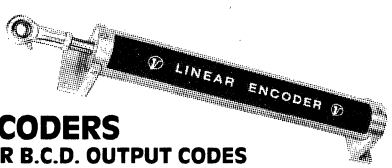
PRESSURE TRANSDUCERS
potentiometer type,



featuring infinite resolution, long life, and high reliability through the use of conductive film resistance elements, multiple wipers, and direct coupling of pressure sensing element to potentiometer wipers.

Pressure ranges from 0.1 to 10,000 psi in gage, absolute and differential types.

Linearity to ±0.3%. Air speed, altitude and low cost types available.



LINEAR ENCODERS
BINARY, GRAY OR B.C.D. OUTPUT CODES
1", 2", 4", 8", 12", 24", 36" and 48" STROKE LENGTHS
RESOLUTIONS TO 12 BITS.

VERNITECH

MOTORS

Over 1500 Standard Designs or Custom Designed to your requirements.

Synchronous — for laser scanning
Sizes 5, 8, 11, 15, 18, 20, 25, 35.
Speeds 100 to 48,000 rpm.
5 through 1600 Hz. 2, 4, 8, 12 poles.

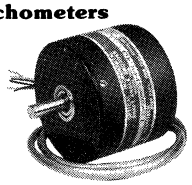
Servo
Viscous damped — sizes 8, 10, 11, 15, 18.
Speeds 3000 to 10,000 rpm.
Inertially damped — sizes 8, 11, 15, 18.
Speeds 3000 to 9500 rpm.

Stepper
Sizes 5, 8, 11, 15. Stepping angles 7.5°, 15°, 45°, 90°.
Stepping rates 100, 110, 125, 130, 175, 180, 225, 240, 260, 400, 725, 800, 1000 pps.

Precision Motor Generators Sizes 8, 10, 11, 15, 18, 23.

Integrating and Computer Motor Tachometers
Sizes 8, 10, 11, 15, 18, 23.

SHAFT ANGLE ENCODERS



featuring precision chrome on glass discs for highest accuracy.

Optical Incremental
VOE 005 — Dia. 0.500", 0.510" L. To 256 pulses (modular)
VOE 05 — Dia. 0.500", 0.820" L. To 256 pulses
VOE 11 — Dia. 1.062", L. 1.80". To 1024 pulses
VOE 015 — Dia. 1.510", L. 0.88". To 1024 pulses (modular)
VOE M15 "Dial Coder" — panel mounted, 1.500" dia., L. 1.08" 127-256 pulses
VOE 023 — Dia. 2.25", L. 80". To 1250 pulses (modular)
VOE 23 — Dia. 2.250", L. 1.875". To 1250 pulses (available sealed)
VOE L23 "Thrift-Line" Dia. 2.250" L. 1.875". To 600 pulses
VOE 25 — Dia. 2.500", L. 2.500". To 3000 pulses (available sealed)

Optical Absolute
VOE 23: Binary, Gray or BCD to 512 counts per turn. Counting speed: 3000 rpm.
VOE 30: Single or multi-turn; Binary, Gray or BCD. To 1024 counts per turn. Max count (2^{19}) in 512 turns. Counting Speed: 30KHz.

Contacting Absolute
Sizes 11, 18, 23, & 31. Binary, Gray, and BCD. Single or multi-turn. Max count (2^{19}) in 2048 turns. 64 to 1024 counts per turn. Operating speed 200 rpm max.

SYNCHRO CONVERTER MODULES

Tracking Synchro-to-Digital and Resolver-to-Digital Converters
Economy Series VSD/VRD. Precision Series VSDH/VRDH
Compact, solid state, high performance converters employing type 11 servo loops for lag free tracking at rates to 3600°/sec. Resolution 10 bits, 12 bits, or 14 bits.

Digital-to-Synchro and Digital-to-Resolver Converters Series VDS/VDR:Accept shaft angle data in digital form for conversion to analog at accuracies up to ±4'.

Tracking Synchro-to-Linear DC Converter Module
Series VSDCH/VRDCH:Accept 3-wire synchro or 4-wire resolver input data, convert it to DC analog voltage proportional to synchro angle of input. Accuracy ±6' (typ.).

Tracking Angle Position Indicator
VNST-104: Tracking Synchro-to-Digital Converter, can also be used as a control element. Four decade 0.8" red LED display. Display accuracy ±6' arc (typical). Tracking rate 3600°/sec max. Parallel binary or BDC output. Self contained line operated power supply.

Custom designs available to your specifications.

VERNITECH, a division of Vernitron Corp., 300 Marcus Blvd., Deer Park, NY 11729 • 516-586-5100 • TWX 510-227-6089

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

VISHAY RESISTIVE SYSTEMS GROUP

TRIMMERS

Precision Trimming Potentiometers

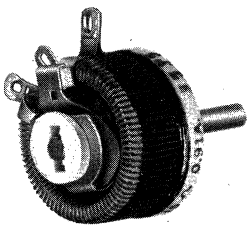
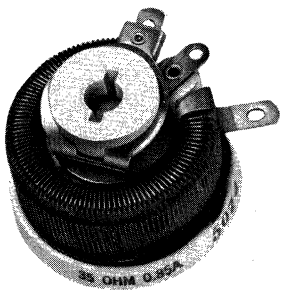
VISHAY-ANGSTROHM

Vitreous Enameled Power Rheostats

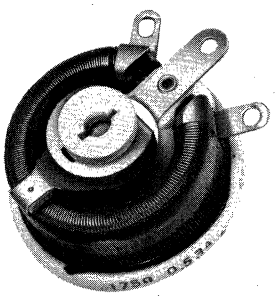
TYPE MP06 12.5 WATT



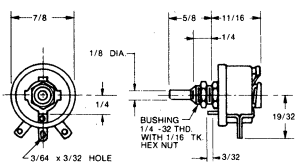
TYPE MP10 25 WATT



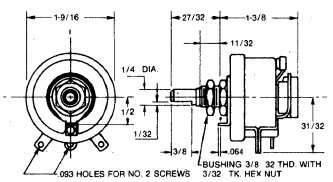
TYPE MP15 50 WATT



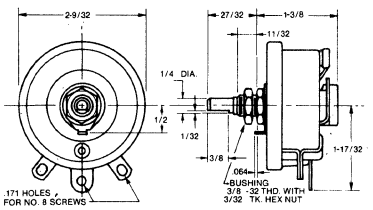
DIMENSIONS



Diameter 7/8" . . . Depth behind panel 11/16" . . . Shaft 1/8" diameter . . . Rotation 300°, ±5°. Mounts on panels up to 1/8" by means of 1/4"-32 bushing and hex nut . . . Non-turn lugs require 1/8" hole 1/4" below center of shaft (Type "A" shaft). WEIGHT: .037 lb., 17 Gms.



Diameter 1 9/16" . . . Depth behind panel 1 3/8" . . . Shaft 1/4" diameter . . . Rotation 300°, ±5°. Mounts on panels up to 1/4" by means of 3/8"-32 bushing and hex nut . . . Non-turn lugs require 3/16" hole 1/2" below center of shaft. (Type "A" shaft). WEIGHT: .180 lb., 82 Gms.



Diameter 2 9/32". . . Depth behind panel 1 3/8 . . . Shaft 1/4" diameter . . . Rotation 300°, ±5°. Mounts on panels up to 1/4" by means of 3/8"-32 bushing and hex nut . . . Non-turn lugs require 3/16" hole 1/2" below center of shaft. (Type "A" shaft). WEIGHT: .321 lb., 145 Gms.

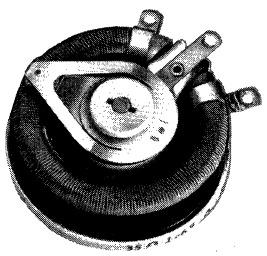
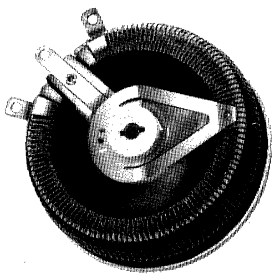
VISHAY-ANGSTROHM

Angstrohm's broad line of vitreous enameled power rheostats is designed to provide exceptional reliability through the application of the most modern manufacturing techniques and sophisticated materials. These same techniques have resulted in a line of power rheostats that feature a very compact size for their dissipation rating. Furthermore, many standard value rheostats are available for off-the-shelf delivery while special devices are available with short delivery cycles. Rheostats are also available in tapered windings, in tandem assemblies, with off positions and with special shaft assemblies.

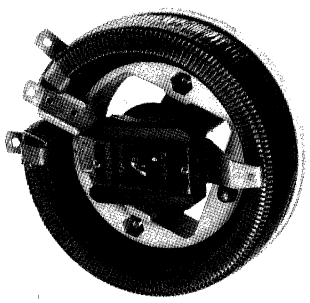
TYPE MP25 100 WATT



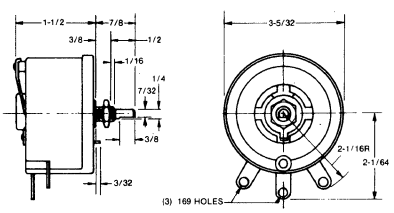
TYPE MP30 150 WATT



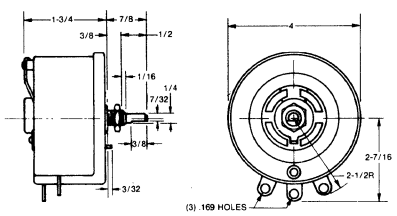
TYPE MP40 300 WATT



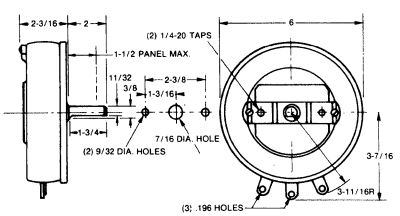
DIMENSIONS



Diameter 3 5/32". . . Depth behind panel 1 1/2" . . .Shaft 1/4" diameter . . . Rotation 300°, ±5°. . . Mounts on panels up to 1/4" by means of 3/8"-32 bushing and hex nut . . . Non-turn lugs require a 3/16" hole 1/2" below center of shaft. (Type "A" shaft) WEIGHT: .594 lbs., 268 Gms.



Diameter 4" . . . Depth behind panel 1 3/4" . . . Shaft 1/4" diameter . . . Rotation 300°, ±5°. . . Mounts on panels up to 1/4" by means of 3/8"-32 bushing and hex nut . . . Non-turn lugs require a 3/16" hole 1/2" below center of shaft. (Type "A" shaft) WEIGHT: 1.014 lbs., 460 Gms.



Diameter 6". . . Depth behind panel 2 3/16". . . Shaft 3/8" diameter . . . Rotation 315°, ±5°. . . Mounts on panels up to 1 1/4" by means of mounting bracket with two 1/4"-20 flat head screws. (Type "A" shaft) WEIGHT: 2.625 lbs., 1.191 Kg.

CONTACT FACTORY OR LOCAL SALES OFFICE FOR MORE DETAILS

100

½" Round Wirewound Single-Turn Trimmer
Power rating: 1W @ 70°C
Standard resistance range: 20Ω to 20KΩ
Resistance tolerance: ±5% std.
Temperature coefficient: ±50ppm/°C max.
Noise during adjustment: 100Ω max.
End resistance: 1Ω or 2% (W.I.G.)
Dielectric strength: 1500VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: .25% or 1Ω (W.I.G.)

150

½" Round Cermet Single-Turn Trimmer
Power rating: 0.75W @ 85°C (300V max.)
Standard resistance range: 50Ω to 2MΩ
Resistance tolerance: ±10% std.
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 20Ω or 3% (W.I.G.)
End resistance: 5Ω max. or 2% (W.I.G.)
Dielectric strength: 1500VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1Ω or .25% (W.I.G.)

170

¼" Round Cermet Single-Turn Trimmer
Power rating: 0.5W @ 85° (300V max.)
Standard resistance range: 10Ω to 2 MΩ
Resistance tolerance: ±10% 100Ω to 2MΩ
(±20% below 100Ω)
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω max. or 2% (W.I.G.)
Dielectric strength: 400VAC
Insulation resistance: 100MΩ
Absolute minimum resistance: 2Ω or 1% (W.I.G.)

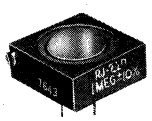
180

¼" Square Cermet Single-Turn Trimmer
Power rating: 0.5W @ 85°C (300V max.)
Standard resistance range: 10Ω to 2MΩ
Resistance tolerance: ±10% 100Ω to 2MΩ
(±20% below 100Ω)
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 2Ω or 1% (W.I.G.)

205

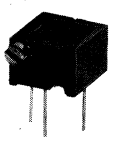
½" Square Wirewound Multi-Turn Trimmer
Power rating: 1W @ 70°C
Standard resistance range: 10Ω to 20KΩ
Resistance tolerance: ±5% std.
Temperature coefficient: ±50ppm/°C max.
Noise during adjustment: 100Ω max.
End resistance: 2Ω max. or 2% (W.I.G.)
Dielectric strength: 1000VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1% or 1Ω (W.I.G.)

255



½" Square Cermet Multi-Turn Trimmer
Power rating: 1.0W @ 70°C
Standard resistance range: 20Ω to 2MΩ
Resistance tolerance: ±10% std.
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1Ω or 3% (W.I.G.)

260

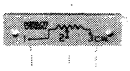


¼" Square Cermet Multi-Turn Trimmer
Power rating: ¼W at 70°C derate to zero at 125°C
Standard resistance range: 10Ω to 1MΩ
Resistance tolerance: ±10% standard
Temperature coefficient of resistance of potentiometer:
±100 ppm/°C (±50 ppm/°C available consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
Insulation resistance: 1000 meg ohms at 500VDC
Dielectric strength: 900VAC

400

1¼" Rectangular Wirewound Multi-Turn Trimmer
Power rating: 1W @ 70°C
Standard resistance range: 10Ω to 20KΩ
Resistance tolerance: ±5% std.
Temperature coefficient: ±50ppm/°C max.
Noise during adjustment: 100Ω max.
End resistance: 1Ω or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1Ω or .25% (W.I.G.)

450

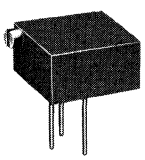


1¼" Rectangular Cermet Multi-Turn Trimmer
Power rating: 1W @ 70°C (300V max.)
Standard resistance range: 10Ω to 2MΩ
Resistance tolerance: ±10% std.
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 2Ω max.

700

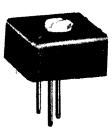
⅜" Square Wirewound Multi-Turn Trimmer
Power rating: 0.75W @ 70°C
Standard resistance range: 10Ω to 20KΩ
Resistance tolerance: ±5% std.
Temperature coefficient: ±50ppm/°C max.
Noise during adjustment: 100Ω max.
End resistance: 1Ω or 2% (W.I.G.)
Dielectric strength: 1000VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1Ω or 0.25% (W.I.G.)

752



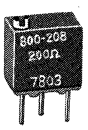
⅜" Square Cermet Multi-Turn Trimmer
Power rating: 0.5W @ 85°C (300V max.)
Standard resistance range: 20Ω to 2MΩ
Resistance tolerance: ±10% 100Ω to 2MΩ
(±20% below 100Ω)
Temperature coefficient: ±100ppm/°C max.
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ min.
Absolute minimum resistance: 1Ω

780



⅜" Square Cermet Single-Turn Trimmer
Power rating: 0.5W @ 85°C (300V max.)
Standard resistance range: 10Ω to 2MΩ
Resistance tolerance: ±10% 100Ω to 2MΩ
(±20% below 100Ω)
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 2Ω max.

800



5/16" Square Wirewound Multi-Turn Trimmer
Power rating: 0.6W @ 70°C
Standard resistance range: 10Ω to 20KΩ
Resistance tolerance: ±5% std.
Temperature coefficient: ±50ppm/°C max.
Noise during adjustment: 100Ω max.
End resistance: 1Ω or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1Ω or 0.25% (W.I.G.)

850

5/16" Square Cermet Multi-Turn Trimmer
Power rating: 0.3W @ 70°C (300V max.)
Standard resistance range: 20Ω to 2MΩ
Resistance tolerance: ±10% std.
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω max. or 2% (W.I.G.)
Dielectric strength: 900VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1Ω

910

¾" Rectangular Wirewound Multi-Turn Trimmer
Power rating: 1W 40°C
Standard resistance range: 10Ω to 20KΩ
Resistance tolerance: ±10% std.
Temperature coefficient: ±50 ppm/°C nominal
Noise during adjustment: 100Ω max.
End resistance: 1Ω or 2% (W.I.G.)
Dielectric strength: 1000VAC
Insulation resistance: 100MΩ
Absolute minimum resistance: 1Ω or .5% (W.I.G.)

960

¾" Rectangular Cermet Multi-Turn Trimmer
Power rating: 0.75W @ 70°C (300V max.)
Standard resistance range: 10Ω to 2MΩ
Resistance tolerance: ±10% std.
Temperature coefficient: ±100ppm/°C max.
(±50ppm/°C available — consult factory)
Contact resistance variation: 3Ω or 3% (W.I.G.)
End resistance: 2Ω or 2% (W.I.G.)
Dielectric strength: 1000VAC
Insulation resistance: 1000MΩ
Absolute minimum resistance: 1Ω or 3% (W.I.G.)

PRECISION POTENTIOMETERS

MODEL	DESCRIPTION
5001	**½" Diameter Single-Turn Wirewound** **Power rating:** 2W @ 40°C **Standard resistance range:** 10Ω to 50KΩ **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±5% **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 150°C **Mechanical rotation:** Continuous **Electrical rotation:** 320° ±5°
 **5000**	**½" Diameter Multi-Turn Wirewound** **Power rating:** @ 40°C 1W (5000) 1.5W (5005) **Standard resistance range:** 100Ω to 100KΩ (5000) 50Ω to 50KΩ (5005) **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.5% std. (closer upon request) **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 125°C **Mechanical rotation:** 3600° +6° −0 (5000) 1800° +6° −0 (5005) **Electrical rotation:** Same as mechanical
7501	**¾" Diameter Single-Turn Wirewound** **Power rating:** 2.25W @ 40°C **Standard resistance range:** 50Ω to 50KΩ **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±1% **Noise (ENR):** 100Ω max. **Operating temperature range:** −55 to 125°C **Mechanical rotation:** Continuous **Electrical rotation:** 320° ±5°
7561	**¾" Single-Turn Conductive Plastic** **Power rating:** 1W @ 70°C **Standard resistance range:** 100Ω to 200KΩ **Resistance tolerance:** ±20% **Temperature coefficient:** ±500ppm/°C **Linearity (Ind.):** ±1% std. (closer available) **Output smoothness:** .5% std. **Operating temperature range:** −65 to 125°C **Mechanical rotation:** Continuous **Electrical rotation:** 340° ±5°
7400/ 7500	**¾" Diameter Multi-Turn Wirewound** **Power rating:** @ 40°C 3W (7400) 2W (7405) **Standard resistance range:** 100Ω to 100KΩ (7400) 100Ω to 50KΩ (7405) **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** .25% (7400) .5% (7405) **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 125°C **Mechanical rotation:** 3600° +6° −0 (7400) 1800° +6° −0 (7405) **Electrical rotation:** Same as mechanical
 **0871**	**⅞" Diameter Single-Turn Wirewound** **Power rating:** 1.25W @ 70°C **Standard resistance range:** 100Ω to 10KΩ **Resistance tolerance:** ±3% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.5% **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 150°C **Mechanical rotation:** Continuous **Electrical rotation:** 350° ±2°
8400/ 8500	**⅞" Diameter Multi-Turn Wirewound** **Power rating:** @ 40°C 3W (8400/8500) 2W (8403-05/8503-05) **Standard resistance range:** 100Ω to 100KΩ (8400/8500) 50Ω to 50KΩ (8403-05/8503-05) **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.25% (8400/8500) ±.5% (8403-05/8503-05) **Noise (ENR):** 100Ω max. **Operating temperature range:** −55 to 125°C **Mechanical rotation:** 3600° +10° −0 (8400/8500) 1800° +10° −0 (8405-8505); 1080° +10° −0 (8403/8503) **Electrical rotation:** Same as mechanical

Most singleturn models are available with cermet or conductive plastic elements. All styles are supplied with linear taper as standard. Many are available with non-linear tapers. All styles are available in a bushing mount. Many are available in a servo mount option.

MODEL	DESCRIPTION
7800	**⅞" Diameter Multi-Turn Wirewound** **Power rating:** 2W @ 40°C **Standard resistance range:** 100Ω to 50KΩ **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.25% **Noise (ENR):** 100Ω max. **Operating temperature range:** −55 to 105°C **Mechanical rotation:** 3600° +10° −0 **Electrical rotation:** Same as mechanical
1000/ 1220	**1" Diameter Multi-Turn Wirewound** **Power rating:** @ 40°C 3W (1000) 2W (1005) 4W (1215) 5W (1220) **Standard resistance range:** 500Ω to 250KΩ (1000) 250Ω to 100KΩ (1005) 500Ω to 450KΩ (1215) 1KΩ to 600KΩ (1220) **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.5% (1000/1005) ±.1% (1215/1220) **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 125°C **Mechanical rotation:** 3600° +4° −0 (1000) 1800° +4° −0 (1005) 5400° +4° −0 (1215) 7200° +4° −0 (1220) **Electrical rotation:** Same as mechanical
 **1061**	**1 1/16" Diameter Single-Turn Wirewound** **Power rating:** 1.5W @ 40°C **Standard resistance range:** 50Ω to 50KΩ **Resistance tolerance:** ±3% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.5% **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 150°C **Mechanical rotation:** Continuous **Electrical rotation:** 350° ±2°
1441	**1 7/16" Diameter Single-Turn Wirewound** **Power rating:** 2W @ 40°C **Standard resistance range:** 100Ω to 40KΩ **Resistance tolerance:** ±3% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.5% **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 150°C **Mechanical rotation:** Continuous **Electrical rotation:** 350° ±2°
 **151**	**1½" Diameter Single-Turn Wirewound** **Power rating:** 3.5W @ 40°C **Standard resistance range:** 100Ω to 100KΩ **Resistance tolerance:** ±5% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.5% **Operating temperature range:** −65 to 150°C **Mechanical rotation:** Continuous **Electrical rotation:** 350° ±5°
 **HD150**	**1½" Diameter Multi-Turn Wirewound** **Power rating:** @ 40°C 5W (HD150) 3W (HD153) 4W (HD155) **Standard resistance range:** 500Ω to 500KΩ (HD150) 200Ω to 250KΩ (HD153) 200Ω to 500KΩ (HD155) **Resistance tolerance:** ±3% (HD150) ±5% (HD153/155) **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.25% (HD150) ±.5% (HD153/155) **Noise (ENR):** 100Ω max. **Operating temperature range:** −55 to 100°C **Mechanical rotation:** 3600° +4° −0 (HD150) 1080° +4° −0 (HD153) 1800° +4° −0 (HD155) **Electrical rotation:** Same as mechanical
1751	**1¾" Diameter Single-Turn Wirewound** **Power rating:** 2.5W @ 40°C **Standard resistance range:** 50Ω to 50KΩ **Resistance tolerance:** ±3% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.25% **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 150°C **Mechanical rotation:** Continuous **Electrical rotation:** 350° ±2°
 **2000/ 3000**	**2" and 3" Diameter Single-Turn Wirewound** **Power rating:** @ 40°C 4W (2000) 6W (3000) **Standard resistance range:** 100Ω to 60KΩ (2000) 200Ω to 100KΩ (3000) **Resistance tolerance:** ±3% **Temperature coefficient:** ±20ppm/°C **Linearity (Ind.):** ±.25% **Noise (ENR):** 100Ω max. **Operating temperature range:** −65 to 150°C **Mechanical rotation:** Continuous **Electrical rotation:** 350° ±2°

Terminals: L, Insulated Flexible Leads; P, Printed Circuit Pins Base Mounted; W, Printed Circuit Pins Edge Mounted 180° from Screw; X, Printed Circuit Pins Edge Mounted 90° from Screw; Y, Printed Circuit Pins Base Mounted.

Failure Rate Designation: In percent/1000 Hours M=1.0, P = 0.1, R = 0.01, S = 0.001

Specifications Subject to Change Without Notice.

Military Part Number: Consists of the document number and a dash number with letters which signify - Terminal Type and Failure Rate.

Example: M39015/1 - 001 L M

- M39015/1 - Document number
- 001 - Dash number from table
- L - Terminal type
- M - Failure rate level

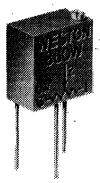
RTR12 D L 101 M

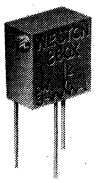
- RTR12 - Style
- D - Characteristics
- L - Terminals
- 101 - Resistance Mil-Code
- M - Failure rate level

SANGAMO

SERIES 860 POTENTIOMETERS ¼" LOW COST CERMET

SANGAMO WESTON
Schlumberger





- Sealed to guard against contaminants: Sealed to withstand "Flow" Soldering and Industrial type immersion cleaning
- Wide resistance range, 10 ohms to 1 megohm
- Weston hi-stability cermet element
- Mechanical protection, stop and clutches
- Resolution, essentially infinite
- Adjustments ratio 16 to 1

SPECIFICATIONS

ELECTRICAL

Standard Resistance Range: 10 ohms to 1 megohm

Resistance Tolerance: ± 10%

Contact Resistance Variation: 3% or 20 ohms, whichever is greater

Temperature Coefficient: ± 100 P.P.M./°C max.

Power Rating: 0.5 watt at 85°C

Insulation Resistance: 1000 megohms minimum (500 V.D.C.)

Dielectric Strength: 600 V.A.C. room conditions

Maximum Working Voltage: 200 V.D.C. (RMS) or within power rating, whichever is less

Continuity: Maintained for full mechanical range

Resolution: Essentially infinite

MECHANICAL

Mechanical Protection: Slip clutch, wiper idles

Mechanical Adjustment: 16 turns nominal

Rotational Life: 200 cycles min. with no discontinuity

Torque: 3 oz. in. maximum

Weight: .5 gram maximum

ENVIRONMENTAL

Operating Temperature Range: -55°C to + 150°C

Moisture Resistance: MIL-R-22097, MIL-STD-202, Method 106

Shock: 100 G's per MIL-R-22097

Vibration: 20 G's 10 to 2000 cycles per MIL-R-22097, Test Condition D

Load Life: 1000 hrs. @ rated power per MIL-R-22097

High Temperature Exposure: MIL-R-22097

Low Temperature Operation: MIL-R-22097

Evaluation samples available upon request.

Motorola surface-mount technology slashes system size and weight to one-tenth or less of what's acceptable now. Packages aren't much bigger than the chips they contain. Layers are cut in half, costs plunged 75% or more, higher frequencies optimized through short, uniform trace lengths.

You can mass-place them at up to 200K/hour.

We already offer the broadest line of easy, automatable, testable, surface-mount semiconductors--over 800--with more coming.

Pick and place in a fraction of discrete space.

Choose from most-popular switching transistors, Darlingtons, HV and low-noise types, RF, JFETs, tuning diodes, thyristors, rectifiers and PINs, plus numerous other discrete functions. All are SOT-23 packaged, with many in SOT-89 and MLL outlines for application flexibility. All SOT-23s are ready for placement; no lead forming is required. SOT-23/SOT-89 packaging is laser-marked. And, we'll encapsulate almost any discrete in a SOT package, depending on die compatibility and requirements. Low-profile, too.

MLL. Most economical of all.

Think of a DO-35 or DO-41 without leads and you've got the MLL (Motorola leadless) package...optimized for very high-volume, very low-cost application. Whereas SOT-23s are ideal for transistors, reliable MLL packaging is perfect for our full line of 0.5 to 1 W zeners and rectifiers in an extensive voltage range because of minimized space, ease of placement and second-to-none economy.

SOIC. Space-saving linear alternative.

Get standard linear DIP performance in tiny SOICs from Motorola and give yourself a 2.5:1 delta in board space savings.

Out lineup includes op amps, comparators, voltage regulators, TRIMFETs™, DACs, arrays and timers.

All current and future linear ICs are potential candidates for SO8, SO14 or SO16 packaging as long as chip size and power dissipation are within viable parameters.

SOICs pass the same assembly procedures as DIPs and offer identical performance at both 0° to 70°C and -40° to 85°C ranges. Device reliability is inherent because industry studies show it to be so...and because it's Motorola. A 20-times improvement in quality over manually-inserted units not only enhances reliability but saves rework and returns.

Automate it with tape and reel.

T1 or T2 options in industry-accepted 8 mm and 12 mm tape and reel format, 3,000 devices per reel, enable immediate placement of most discretes on automatic or semi-automatic lines. All can be wave or reflow soldered.

Write for our new Surface-Mount brochure BR127REVI. Motorola Semiconductor Products, Inc., Box 20912, Phoenix, AZ 85036.

The squeeze is on.

Series PTC

High Voltage NPN Darlington Transistors

FEATURES

- High Voltage Ratings
- Fast-Switching Capabilities/Fast Turn-Off Time
- Glass Passivated Die to Provide Excellent High Temperature Stability
- Thermally Stable Structure for Reliability in Power Cycling
- No Parasitic Diode on Output Transistor

APPLICATIONS

- High Voltage Switching Power Supplies
- Inverters/Regulators
- Deflection Circuits
- Pulse-Width-Modulated (PWM) System Control Circuitry

For more information request PTC Publications.

HIGH VOLTAGE NPN DARLINGTON TRANSISTORS

Series PTC 6000/6001/6002/6003 — 15A-500V
Series PTC 6022/6023 — 40A-600V
Series PTC 6060/6061/6062/6063 — 20A-500V
Series PTC 6072/6073 — 40A-400V
Series PTC 7000/7001/7002/7003 — 50A-500V
Series PTC 9000/9001/9002 — 20A-750, 850, 900V
Series PTC 10000/10001 — 20A-400V
Series PTC 10002/10003 — 10A-400V
Series PTC 10004/10005 — 20A-400V
Series PTC 10006/10007 — 10A-400V
Series PTC 10008/10009 — 20A-500V
Series PTC 10015/10016 — 50A-500V
Series PTC 10020/10021 — 60A-400V
Series PTC 10022/10023 — 40A-400V

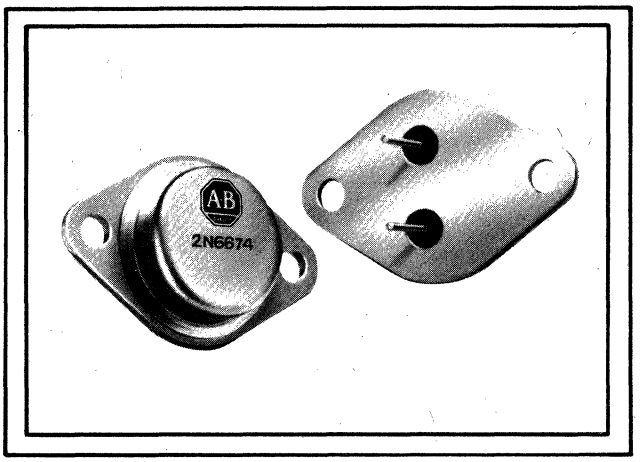
High Voltage NPN Transistors

FEATURES

- High Voltage Ratings
- Glass Passivation
- Superior Resistance to Thermal Fatigue
- Industrial and Military Applications

APPLICATIONS

- Switching Regulators
- PWM Inverters
- Deflection Circuits
- Motor Controls
- Solenoid Drivers



HIGH VOLTAGE NPN TRANSISTORS

Series PTC 401/402 — 3A-700V
Series PTC 403/409 — 3.5A-400V
Series PTC 410/411 — 3.5A-300V
Series PTC 413/423 — 3.5A-400V
Series PTC 424/425 — 3.5A-700V
Series PTC 430/431 — 7A-400V
Series 2N6674/2N6675 — 10A-400V
Series 2N6676/2N6677/2N6678 — 15A-400V

AB QUALITY **ALLEN-BRADLEY**

Series PTC

Fast Recovery Power Rectifiers

FEATURES

- Low Forward Voltages
- High Voltage Ratings
- Fast Reverse Recovery Time
- Glass Passivated Die to Provide Excellent High Temperature Stability
- High Surge Capability

APPLICATIONS

- Switching Power Supplies
- Inverters/Regulators
- Free Wheeling Diodes

FAST RECOVERY RECTIFIERS

Series PTC 862/864/866
40 Amperes — 200-600 Volts

Series PTC 872/874/876
50 Amperes — 200-600 Volts

Series PTC 920/921/922/923
50 Amperes — 900-1200 Volts

Series PTC 940/941/942/943
100 Amperes — 900-1200 Volts

Series PTC 950/951/952/953
130 Amperes — 900-1200 Volts

General

The Powermode rectifier line features high voltage, high current and fast recovery times. These rectifiers are intended for use in switching power supplies and as freewheeling diodes in inverter circuits. The ratings of the rectifier line range from 40 to 130 amperes with voltages of 200 to 1200 volts.

For more information request PTC Publications.

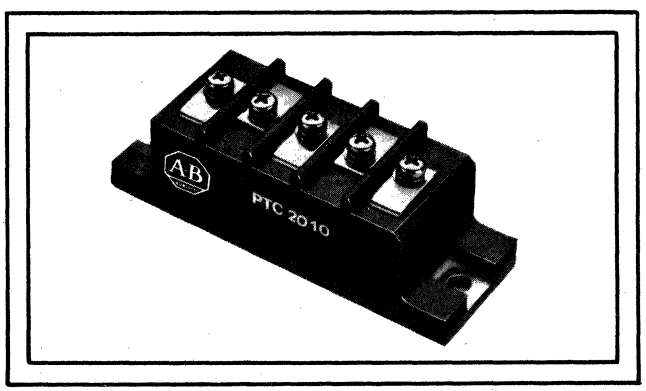
Power Darlington Modules

FEATURES

- Isolated Collectors
- High Voltage Rating
- Glass Passivated Die to Provide Excellent High Temperature Stability

APPLICATIONS

- High Current Switching Power Supplies
- Inverters/Regulators
- Pulse-Width-Modulated (PWM) System Control Circuitry



MODULES

Series PTC 2000/2001
50 Amperes-1000 Volts

Series PTC 2010/2011
30 Amperes-1000 Volts

Series PTC 2050/2051
50 Amperes-900 Volts

Series PTC 2200/2201
30 Amperes-600 Volts

Series PTC 2400/2401
50 Amperes-600 Volts

Series
BxxC 800
BxxC 1000
BxxC 1500

GENERAL PURPOSE

△ Single-phase full-wave bridges for general purpose low-power applications.

FEATURES:

△ High current
△ High surge current capability
△ Low forward voltage drop
△ Economical plastic package

MECHANICAL DATA

Case: Potted epoxy encapsulated
Lead: MIL-STD-202 — method 208C
Dimensions: (mm)

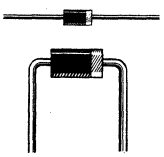
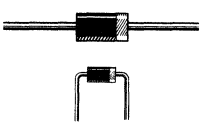
DIODES by International C

ICC has created a line of diodes that satisfies a broad range of requirements. Included are Plastic Silicon Rectifiers, Fast Recovery Rectifiers, Bridges, Switching and Zener Diodes. We invite inquiries about the types described here as well as any other diode you may require.



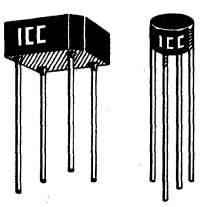
Plastic Silicon Rectifiers — General Purpose Cathode Band I.D.

1N4001 - 1N4007	1.0 AMP - 50V to 1000V	Case DO-41
1N5391 - 1N5399	1.5 AMP - 50V to 1000V	Case DO-15
1N5400 - 1N5408	3.0 AMP - 50V to 1000V	Case DO-27



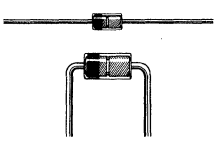
Plastic Silicon Rectifiers — Fast Recovery — 150ns to 500ns Cathode Band I.D.

ICC1001 - ICC1007	1.0 AMP - 50V to 1000V	Case DO-41
ICC1501 - ICC1507	1.5 AMP - 50V to 1000V	Case DO-15
ICC3001 - ICC3007	3.0 AMP - 50V to 1000V	Case DO-27



Bridge Rectifiers

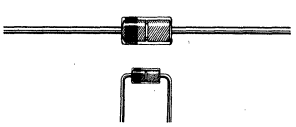
BRR101M - BRR107M	1.0 AMP - 50V to 1000V
BRR151M - BRR157M	1.5 AMP - 50V to 1000V



Silicon Switching Diodes — Cathode Band I.D.

1N4148 - 1N4536

Peak Inverse Voltage 25V to 75V
Reverse Recovery Time 2.0ns to 4.0ns
Capacitance - 2.0 pF to 4.0 pF
Case DO-35



Zener Diodes — Cathode Band I.D.

1N5231B - 1N5257B	0.5 watt	5% Tolerance	Case DO-35
1N4733A - 1N4752A	1.0 watt	5% Tolerance	Case DO-41

Packaging

- Tape & Reel
- Cut & Form

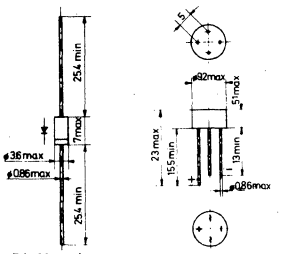
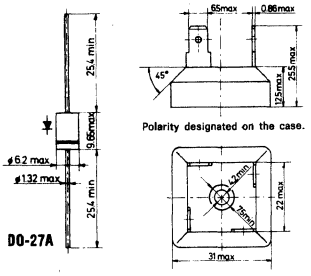
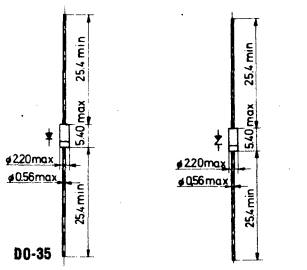
Reverse recovery time:

1. I_F=10 mA U_R=6V R_L=100Ω measured at I_R=1 mA
2. I_F=10 mA U_R=1V R_L=100Ω measured at I_R=1 mA
3. I_F=30 mA I_R=30 mA R_L=100Ω measured at I_R=3 mA
4. I_F=10 mA I_R=1 mA measured at I_R=0.1 mA







Index of symbols

- α — Conduction angle
- C — Capacitance
- I_F — Forward (DC) current
- I_{FAV} — Average forward current 40 to 1,000 Hz of one halfsine wave at T_{amb} or T_{case}
- I_{FSM} — Surge forward current, peak value 10 ms
- I_Z — Zener (reverse) current
- I_R — Reverse current, maximum value at T_j and U_{RRM}
- L — Distance from case
- P_{tot} — Total power dissipation
- R — Resistance
- t_{rr} — Reverse recovery time, typical value
- T_{amb} — Ambient temperature
- T_{case} — Case temperature
- T_j — Junction temperature
- T_L — Lead temperature
- T_{op} — Operating temperature
- T_{stg} — Storage temperature
- U_{BR} — Breakdown voltage
- U_F — Forward voltage drop, maximum value at rated I_F
- U_{RMS} — RMS voltage
- U_{RRM} — Repetitive Peak reverse voltage
- U_{RSM} — Peak reverse voltage, 10 ms
- U_Z — Zener (reverse) voltage

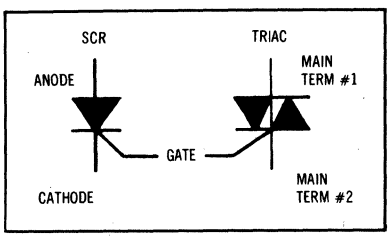
eem MINIGLOSSARY THYRISTORS/ HIGH POWER DIODES

THYRISTORS

A thyristor is a four-layer semiconductor (pnpn) that can be switched from an OFF to an ON state. This is usually done by a voltage or current pulse to the gate terminal. The device will then continue to conduct so long as the principal current of the device flows through the thyristor's two main terminals.

In many respects a thyristor is analogous to an electromechanical latching relay. In fact, thyristors have largely replaced these relays in newer equipment designs. But, misapplications and/or failure to fully understand the parameters of these and other solid state devices often leads to catastrophic field failures.

The terminology shown on this page has been condensed from common industry data books and is intended to be a guide for the engineer.



di/dt: *Critical rate of rise of ON state current* is the user's maximum design limit (Fig. 1).

di_R/dt: *Rate of decay of ON state current* (Fig. 1 & 2).

dv/dt (critical): *Rate of rise of OFF state voltage*. Lowest voltage rate of rise to cause a thyristor to turn ON.

dv/dt (reapplied) : *Rate of rise of reapplied OFF state voltage.*

I_{FSM}: *Nonrepetitive ON state surge current in diodes.* Maximum peak value of ½ cycles (60 Hz) a diode can withstand up to 100 times in its lifetime.

I_{TSM}: *Nonrepetitive ON state surge current in thyristors*. Maximum peak value of 60 Hz cycles a thyristor can withstand up to 100 times in its lifetime.

I_{DRM}/I_{RRM}: *Maximum peak forward/reverse leakage current* at specified temperature and repetitive conditions.

I_{GDM}: *Continuous gate current not to trigger*. Highest dc gate current that will *not* cause thyristor to switch from OFF to ON at a specific temperature.

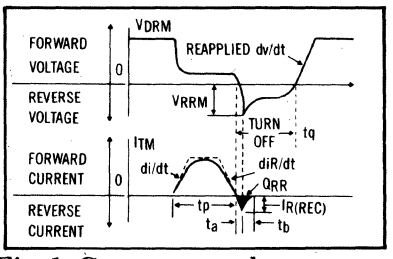


Fig. 1. Concurrent voltage and current waveforms

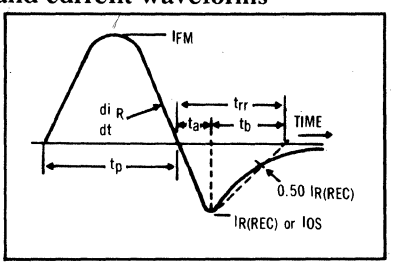

Fig. 2. Recovery current waveform

I_{GT}: *Continuous gate trigger current.* Absolute minimum gate current required to switch thyristor from OFF to ON.

I_H: *Holding Current*. Minimum current required to hold thyristor ON.

I_L: *Latching current*. Minimum current required to hold thyristor ON after removal of gate drive.

$I_{(REC)}$; *Recovery current*. Peak value of reverse current during recovery or turn OFF (Fig. 1 & 2).

I_{OS}: *Overshoot current*. See $I_{R(REC)}$.

I^2t: Maximum ON state, short time thermal capacity of the silicon element for operations less than ½ cycle of 180° conduction angle.

$I_{T(AV)}$: *Average ON state current* (max.)

Q_{RR}: *Reverse recovered charge* (Fig. 1).

$R_{\theta JC}$: *Junction-to-case thermal resistance* in degrees C per watt.

$T_{C(MAX)}$: *Max. allowable case temperature.*

$T_{J(MAX)}$: *Maximum allowable junction temp.*

t_d: *Delay time*. Interval between a specified point at beginning of gate pulse and the instant at which the principal voltage drops to a specified value. (OFF-ON) (Fig. 3)

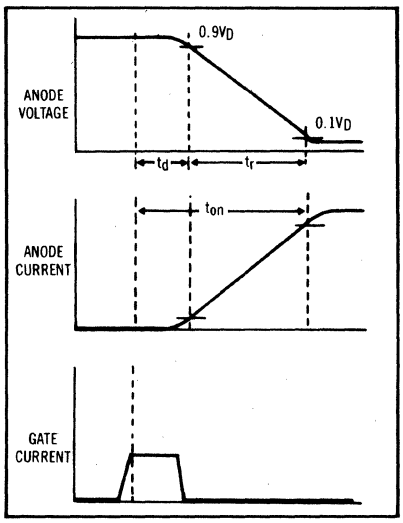

Fig. 3. Turn-on time waveforms

t_{on}: *Turn-on time*. The sum of delay time and rise time. (OFF-ON) (Fig. 3)

t_q: *Turn-off time*. Time between principal current reaching zero and the instant thyristor can block forward voltage without turning ON. (Fig. 1)

t_r: *Rise time*. Time between principal voltage dropping from one value to a second lower value when thyristor turns from OFF to ON. (Fig. 3)

t_{rr}: *Reverse recovery time*. (Fig. 2)

V_{DRM}/V_{RRM}: *Maximum repetitive peak OFF state/reverse voltage* excluding non-repetitive transients.

V_{DSM}/V_{RSM}: *Maximum nonrepetitive peak OFF state/reverse voltage.*

V_{FM}/V_{TM}: *Maximum forward voltage drop* at a specific forward current and case temp.

V_{GDM}: *Gate nontrigger voltage*. Highest dc voltage that will *not* cause thyristor to switch from OFF to ON.

V_{LATCH}: *Latching voltage*. Voltage required for thyristor to latch ON at a given gate current and junction temp.

$V_{TM(DYN)}$: *Dynamic ON state voltage*. Transient ON state voltage of thyristor when triggered into conduction for a given load and time.

Miniaturization is becoming an increasingly important aspect of modern electronic equipment. Until recently, miniaturized electronics took the shape of hybrid circuits, using various forms of unencapsulated semiconductor "chips" as the basic elements. Now, advances in packaging technology yield fully encapsulated semiconductor components which, when mounted on a circuit board, impose only a very small penalty on overall space requirement. These surface-mount packages are being adopted to a variety of devices, including integrated circuits as well as discrete components.

As an alternative to chips in miniaturized equipment, surface-mount components offer an array of imposing improvements:

- **Complete Pretest Capability** — Unlike unecapsulated die, which can only be partially tested in wafer form by probing, surface mounts are 100% electrically tested after die separation, wire bonding, and encapsulation, giving performance comparability to their largest discrete counterparts.
- **Handling and Assembly Ease** — Surface mount standard package outlines permit both transistors and diodes to be placed on substrates using automated handling equipment. Contact pads can also be standardized throughout the layout.
- **Preformed Leads** — ready for placement onto the substrate, with no intermediate lead forming steps required (SOT-23s).
- **Reliability** — Discrete chips used are nitride passivated of glassivated, and are epoxy encapsulated for superior mechanical strength and moisture resistance.
- **Excellent RF Performance** — Microminiature leads reduce RF parasitics.
- **Marking Capability** — A multi-digit code is laser marked on SOT-23 and SOT-89 devices for easy identification.

A wide variety of discrete components from Motorola's repertoire of reliability-proven semiconductor processes and geometries are available in many different surface mount packages including SOT-23, SOT-89, MLL34, MLL41, SO-8, SO-14, and SO-16.

Motorola offers devices in the following product lines in surface mount packages:

Small Signal Bipolar Transistors	general-purpose, switching, VHF/UHF amplifiers, mixers, oscillators, choppers, Darlingtons, low-noise, high-voltage, drivers, and RF.
Small Signal Field Effect Transistors	general-purpose, RF JFETs, TMOS FETs, and chopper/switches.
Diodes	zener, tuning, and switching.
Thyristors	SCRs, and PUTs.
Rectifiers	general-purpose, and Schottky.
Amplifiers	operational, and FM IF.
Regulators	5 V, 12 V, 15 V, and fixed voltage.
Communications Circuits	electronic telephone chip, telephone speech network & tone dialer, speakerphone, IC, and telephone tone ringer.

Motorola will also encapsulate almost any discrete die in a SOT package, depending on die compatability and volume requirements. Inquiries regarding custom production runs are invited.

POWER TRANSISTORS

Low Frequency

Equal Competency and product availability in the growing new field of MOS power transistors, and the expanding established field of bipolar power transistors have solidified Motorola's position as the world's number one supplier of power semiconductors. With more than 1100 standard device types in inventory, supplemented by several thousand "specials" being routinely manufactured with these technologies, the ability to supply the just-right device for any application is a foregone conclusion.

Motorola Power Semiconductors . . . In Brief

TMOS POWER TRANSISTORS

Metal Packaged Power MOSFETs are all housed in the industry-standard TO-204AA (formerly TO-3) package, offering a current range from 1 amp to 60 amps, breakdown voltages up to 1000 volts and power dissipation as high as 250 watts. Both N-channel and P-channel devices are available to increase circuit-design flexibility.

Plastic Packaged Power MOSFETs, in three different packages, offer current ratings to 40 amps with breakdown voltages up to 1000 volts. N-channel and P-channel availability and rapidly dwindling prices are influencing increased market penetration.

Plastic Packaged ENERGY MANAGEMENT SERIES MOSFETs increase the power capabilities of conventionally packaged devices. Current ratings up to 200 amps and voltages as high as 600 volts open new applications for high-power, high-speed switching regulators and motor control. The top-leaded package allows bussing that meets UL spacing requirements.

BIPOLAR POWER TRANSISTORS

NPNs and PNPs, single and multiple (Darlington) transistor structures, and metal and plastic packages covers the widest range of specifications for virtually every potential applications requirement. With current ranges from 0.5 to 300 amperes, voltage ranges from 25 to 1500 volts, and power dissipation ranges from 5 to 500 watts, this line of bipolar transistors is one of the most pervasive in the industry.

Darlingtons

Consisting of two transistors, two resistors, and (up to) two diodes, Darlington transistors achieve gain figures up to 20,000 in a single package. Rapid line expansion, and the resulting widespread implementation make Motorola Darlingtons highly cost-effective in a fast growing number of applications.

GEMFETs — a combination of bipolar and MOS features

Recently, Motorola has introduced the first of a new series of power transistors (GEMFETs) that combine the low voltage drop of bipolar transistors with the high input impedance of MOSFETs. Suitable primarily for low-speed applications at present, the devices are available with 5 A and 20 A current ratings. Prices are relatively low due to a space efficient structure that permits small die geometries.

SMARTpower™ Devices

An offshoot of discrete power technology, SMARTpower ICs combine power transistors with integrated circuit technology to yield high-density power integrated circuits. Already, SMARTpower devices utilizing various combinations of processes have been introduced. These harbingers of a rapidly expanding capability promise to add a new dimension to system design alternatives.

Typical of Motorola's SMARTpower devices is the MPC2000 series of overvoltage/overtemperature protection circuits designed to protect systems from overvoltage transients and extreme temperature variations. The devices combine CMOS logic with TMOS output structures. Designed to protect 5-, 12- and 15-volt bus systems, the devices "crowbar" the bus system if either voltage or temperature exceeds preset levels. Devices are available with 7.5 A, 15 A and 35 A (continuous) current ratings.

Chips, Chips, Chips!

Designing a hybrid? Motorola's wide range of power transistors is available . . . UNENCAPSULATED: Check with your Motorola Sales representative for price and delivery quotations.

Specials Unlimited

Need a unique transistor with specifications not available off-the-shelf? Chances are Motorola can produce it quickly and inexpensively. Routine use of four major power processes and more than two decades of experience in the pioneering of new structures and geometries provide the insight and capability to meet any required specification within the limits of state-of-the-art technology.

Available Literature

DL111 — The Bipolar Power Transistor and Thyristor Data Book offers a compilation of data sheets and selection guides on bipolar silicon power transistors, thyristors and triggers.

DL135 — Motorola's TMOS Power MOSFETs Data Book provides the designer with complete data sheets on TMOS products. Also, nearly 200 pages are devoted to device theory and applications information.

SG48 — The Power Leader selector guide provides basic specifications comparisons and also an industry cross reference to Motorola's broad line of bipolar and MOS field effect power transistors.

BIPOLAR MULTIPLE PACKAGES

Bipolars and FETs, singles and multiples, low frequency and RF, amplifiers and switches, plastic and metal (packages) — no semiconductor product line offers the specifications selection and no manufacturer matches Motorola in production capacity for small-signal transistors. Military qualifications to JAN, JANTX, JANTXV, and JANS of selected devices attest to the reliability of Motorola's small-signal product lines.

BIPOLAR TRANSISTORS

Metal Package

Motorola's Small-Signal Metal Can Transistors are designed for use as general-purpose amplifiers, high-speed switches, high-voltage amplifiers, low-level/low-noise amplifiers, high-frequency oscillators, choppers, and Darlingtons. These devices are manufactured in a variety of packages with specifications that match any design requirement.

Plastic Package

Small-Signal TO-92 Plastic Transistors encompass hundreds of devices with characteristics for general-purpose, amplifier, RF, and switching applications. General purpose transistors have minimum breakdown voltages from 25 to 80 volts and maximum currents (I_C) from 100 mA to 2 A. The switching transistors have a breakdown voltage range from 12 to 15 V, while the amplifying transistors have voltages from 12 to 80 V.

The popular high-volume, low priced TO-92 package combines proven reliability, performance, economy and convenience to provide the perfect solution for industrial and consumer design problems.

Multiple Transistors, Metal and Plastic

A variety of multiple small-signal transistors to compete with the increasing influx of integrated circuits. Included are quad, dual, and Darlington transistors for off-the-shelf delivery. These transistors vary in collector current (I_C) from 30 mA to 1.5 A with V_{CEO} ranging from 12 to 250 V.

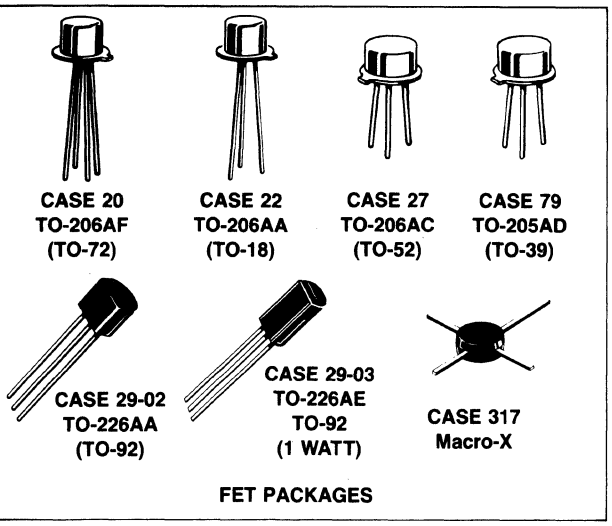
The chips used in the quad and dual transistors are those that have emerged as the most popular ones for discrete transistor applications. But even beyond that, Motorola offers its entire vast repertoire of discrete small-signal transistors for multiple-device packaging. For special applications, special configurations can be supplied with quick turnaround time and at low premiums.

Bipolar Small-Signal RF Transistors

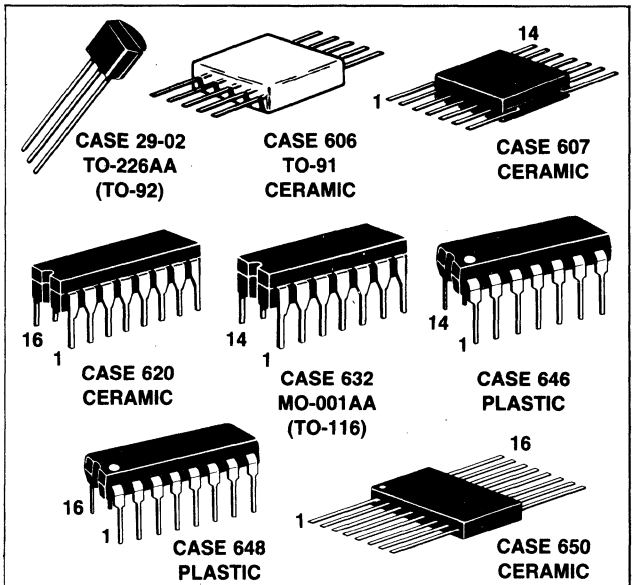
Small-signal TO-92 RF bipolar transistors with gain-bandwidth products from 1.0 GHz to 8.0 GHz operate with currents from 0.25 mA to over 50 mA. These devices are available for low-noise/high-gain amplifier mixer and multiplier applications, UHF and microwave oscillator applications, high-frequency current-mode switches, and Class A linear CATV, MATV applications.

MOTOROLA
SEMICONDUCTORS
P.O. BOX 20912 • PHOENIX, ARIZONA 85036

SMALL-SIGNAL TRANSISTORS (CONT)



FET PACKAGES



DIODE PACKAGES

FIELD-EFFECT TRANSISTORS

A line of field-effect transistors encompasses the latest technology and covers the full range of FET applications. Included here are junction FETs, MOSFETs (with P- and N-channel polarity with both single and dual gates) and TMOS FETs. These FETs include devices developed for operation across the frequency range from dc to UHF in switching and amplifying applications. Package options from low cost plastic to metal TO-72 packages are available.

JFETs. JFETs are available in both N- and P-channel and in metal and plastic packages. Applications include general-purpose amplifiers, switches and choppers, and RF amplifiers and mixers. These devices are economical and very rugged and offer a lower noise figure than standard MOSFETs.

With a constant I_D of 1 A, switching JFET devices have a range of $r_{DS(on)}$ from 8 to 300 ohms. Low frequency/low noise devices range in $I_{DSS(max)}$ from 0.6 to 30 mA, and high frequency amplifiers range from 5 to 60 mA.

MOSFETs. Small-signal MOSFET transistors are available either in the depletion/enhancement or the enhancement mode and both single and dual gate construction. Low frequency/low noise single gate devices range in $I_{DSS(max)}$ from 0.25 to 25 mA and from 11 to 40 mA for dual gate MOSFETS.

MOSFET applications include use in smoke detectors, RF amplifier and mixer applications, and VHF/UHF amplifier and mixer applications.

TMOS FETs. TMOS FETs are field effect transistors with an oxide insulated gate which controls vertical current flow. These devices exhibit higher input impedance, faster switching, enhanced thermal stability, and easier paralleling than bipolar transistors. In addition, they have lower "on" resistance and higher power handling capability than conventional horizontal MOSFETs or JFETs. These TMOS devices are available in either single or quad packages with most of the $r_{DS(on)}$ ratings from 1.4 to 4 ohms maximum with an I_D of 1 A.

SMALL-SIGNAL DIODES

A limited number of small-signal diodes are included in Motorola's small-signal device lines. These include dual diodes, designed for low cost biasing, steering, and voltage doubler applications, and diode arrays, for high-current, fast-switching core-driver applications.

The dual diodes offer minimum reverse breakdown voltage ratings of 70 and 100 V at breakdown currents of 100 μA. The reverse currents for these devices are rated at 0.1 μA at reverse voltages of 50 V.

The diode arrays are multiple junctions fabricated by a planer process and mounted in integrated circuit packages. These arrays offer many of the advantages of ICs such as high-density packaging and improved reliability. They are available in dual 10-diode, dual 8-diode, and 8-diode arrays with reverse breakdown voltages of 40 and 50 V and reverse currents of 0.5 and 1 μA.

Available Literature

DL126 — The Small-Signal Data book contains complete device specifications for nearly 2,000 bipolar and field-effect transistors in the form of data sheets and selector guides.

SG97 — The Small-Signal Metal Transistors selector guide provides preliminary data in the form of specifications tables to allow for quick design decisions.

SG21 — The Plastic Encapsulated Small-Signal Transistors selector guide offers package characteristics and device specifications listed by application for quick reference.

This literature is available free from your local Motorola Sales Office or Distributor.

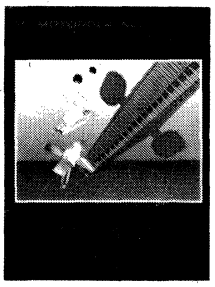
RF PRODUCTS

SG46R2



DL110

While Motorola is considered the supermarket for semiconductor products, nowhere is the selection more diverse, or more complete, than in products designated for RF communications systems design. Motorola offers device categories that serve the designer's needs from tuning and switching diodes in receiver front ends, to power and small-signal transistors extending into the microwave range.

Bipolar RF Power Transistors

Bipolar RF Power Transistors are specified for HF, VHF, UHF, 800 MHz, and Microwave applications in military and commercial land mobile, avionics, and marine transmitters. The devices are available in many frequency ranges:

RF Bipolar Power Transistors

APPLICATION	FREQUENCY RANGE	OUTPUT POWER (WATTS)
HF	1.5–30 MHz 14–30 MHz 27–50 MHz	3.0–250 PEP/CW 0.5–80 1.0–70
VHF	30–200 MHz 66–88 MHz 136–174 MHz 225 MHz	1.0–100 1.5–25 1.0–75 1.0–13
UHF	225–400 MHz 407–512 MHz 806–960 MHz	0.02–125 0.5–80 0.5–40
MICROWAVE	960–1215 MHz 1.7–2.3 GHz 2.0 GHz	0.2–325 1.0–16 1.0–10

RF Power Field Effect Transistors

RF Power FETs provide high gain, improved high order intermodulation distortion, high input impedance, and built-in gain control for ALC and manual power output control. Motorola offers FETs in many frequency ranges including HF for fixed, mobile, and marine transmitters, and VHF and VHF/UHF for military and commercial aircraft radio transmitters.

RF Power FETs

APPLICATION	FREQUENCY RANGE MHz	OUTPUT POWER (WATTS)
HF/SSB	1.5–150	30, 150
VHF	2–200	5–125
VHF/UHF	2–400	5–25

Small-Signal RF Transistors

Small-Signal RF Transistors include GaAs FETs and Bipolar Transistors characterized for low noise amplifiers, mixers, oscillators, multipliers, non-saturated switches, and low-power drivers.

Gallium Arsenide FETs. Motorola Gallium Arsenide FETs offer low noise, high gain RF performance in addition to the high input impedance and direct AGC capability associated with field-effect transistors.

Medium Power RF Transistors. Small-Signal and medium power RF transistors with gain-bandwidth products from 1.0 GHz to 8.0 GHz operate with currents from 0.25 mA to over 140 mA. Motorola offers these transistors in a wide range of transistor/package combinations. Special matching of complimentary transistors is available upon request.

Hybrid Amplifiers

Motorola's Hybrid Amplifiers allow compact, simple designs due to their impedance matching and small size. Their consistency and reliability stem from thin-film hybrid construction, all gold metallization, laser-trimmed nichrome resistors and MOS capacitors. These hybrids are designed and specified for land mobile power, CATV distribution, and general purpose wideband amplifiers.

For the land **mobile devices,** the frequency ranges from 407 to 512 MHz and from 806 to 960 MHz; for the **CATV distribution devices,** the frequencies are 330 MHz and 450 MHz for forward amplifiers and 200 MHz for reverse amplifiers; for the wideband amplifiers, frequencies range from 0.1 to 1000 MHz.

RF Diodes

Motorola also offers a wide variety of RF diodes that are designed for electronic tuning, mixing and switching high frequency signals. RF diodes include general purpose tuning diodes, FM radio and TV hyper-abrupt tuning diodes, AM tuning diodes, hot carrier diodes, PIN diodes, and high capacitance tuning diodes. These devices are available in the hermetic DO-204AA (DO-7) and low cost TD-226AA/AC (TO-92) packages.

Available Literature

DL110 — The RF Device Data book contains technical information on over 500 devices in the form of data sheets, 19 application notes, and 22 engineering bulletins. Also included is an industry cross reference and a selector guide to make design decisions easier.

SG46 — The RF & Microwave Products Data Selector Guide and Cross Reference offers an easy solution to bulky catalogs and data books while providing the designer the necessary information to make preliminary component choices quickly and accurately.

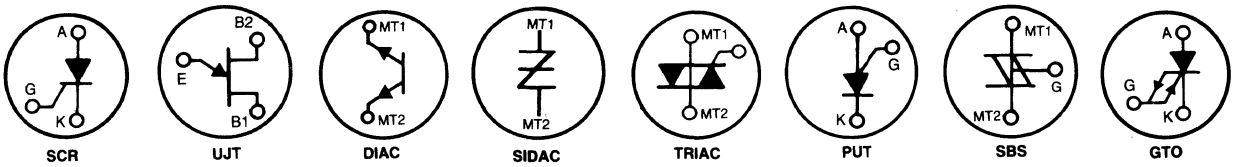
THYRISTORS



One-stop shopping for thyristors and related products is one of the benefits of Motorola's extensive power semiconductor line. For example:

- A full line of Triacs and SCRs covering a forward current range from 0.5 to 55 amperes and blocking voltages from 15 to a new 1000-volt limit.
- Two basic package categories — plastic for lowest cost; metal for hermetically-sealed requirements in high-reliability projects.
- An extensive line of trigger devices that includes UJTs, PUTs, Diacs, SBS, Sidacs — even optically-coupled triac drivers from Motorola's optoelectronic product line.

SCRs

Silicon-Controlled Rectifiers (SCRs) are thyristors intended to switch load currents in one direction only, making them useful for dc and half-wave ac applications as well as full-wave applications in which bidirectional current is routed in one direction through the SCR via a bridge rectifier.

Motorola offers SCRs with blocking voltages from 25 to 1000 volts, on-state RMS currents from 0.5 to 55 amperes, and gate currents from 0.1 mA to 8 mA.

Additionally, Power FET technology is now extended to include a two-transistor equivalent to latching silicon controlled rectifiers, the MCR1000 series. This first-generation TMOS SCR has very fast switching times, high line transient voltage rejection (DV/DT) and asymmetrical blocking. Possible applications are laser drivers, printers, switching power supplies and inverters, and direct-drive-from-logic robotics.

GTOs

Motorola's Gate Turn-Off thyristors (GTOs) are designed primarily for dc power switching applications such as motor drives, switching power supplies, inverters — or wherever a need exists for high surge current capabilities and fast switching speeds.

The MGTO series contains asymmetrical gate turn-off thyristors with blocking voltages ranging from 1000 to 1400 volts, on-state RMS current ratings of 18 A and a gate current rating of 300 mA.

Triacs

Triacs are bidirectional thyristors in which a single trigger source turns the device on for load current in either direction. Because they do not require a bridge rectifier in order to handle full-wave ac, triacs are useful in power applications that require full source power control capability to be applied to the load.

Motorola offers triacs with on-state RMS current ratings from 0.6 A to 40 A with blocking voltages up to 1000 V.

THYRISTOR TRIGGERS

Unijunction Transistors

Motorola unijunction transistors (UJTs) are highly stable devices for general-purpose trigger applications and as pulse generators (oscillators) and timing circuits. They are available in low-cost plastic package TO-92 and in hermetically sealed metal package Case 22A.

Programmable Unijunction Transistors

Programmable UJTs (PUTs) are similar to UJTs except that I_V, I_P and intrinsic standoff voltage are programmable (adjustable) by means of an external voltage divider. This stabilizes the circuit performance for variations in device parameters. The general operating frequency is from 0.01 Hz to 10 kHz, making them suitable for long-duration timer circuits.

Silicon Bidirectional Switch (SBS)

Applications similar to DIAC, but has gate electrode that permits synchronization.

SIDACs

High voltage trigger devices similar in operation to a Triac. Upon reaching the breakover voltage in either direction, the device switches to a low-voltage on-state.

Bilateral Triggers — DIACs

Specifically designed as low-cost bidirectional triggers in line-operated Triac control circuits such as light dimmers, motor controls, and temperature controls.

Optically Isolated Triac Driver

An infrared LED and a bidirectional photodetector in one 7500 V isolated plastic DIP allows safe, economical triggering of Triacs and SCRs from logic sources as low as 3 Volts, 15 mA.

Available Literature

DL111 — The Bipolar Power Transistor and Thyristor Data book supplies complete specifications in the form of data sheets while accompanying selection guides provide a quick comparison of characteristics to simplify the task of choosing the best device for a circuit.

SG34 — The Thyristor Selection Guide and Cross Reference provides specifications and outline dimensions for many of Motorola's SCRs, TRIACs and Triggers.

In every language under the sun, the name most commonly associated with solid-state regulator and reference devices is Motorola. A pioneer in Zener diode development, Motorola has consistantly led the industry in parameter improvements, packaging proliferation and specifications innovation. Today, Motorola serves the industry with an incomparable line of zener and avalanche diodes, transient suppressors and temperature compensated reference devices designed to provide the exact degree of regulation required, at the point in the circuit or system where it can be used most conveniently at the lowest cost.

Motorola's standard **Zeners and Avalanche diodes** comprise the largest inventoried line in the industry. Continuous development of improved manufactured techniques have resulted in computerized diffusion and test, as well as critical process controls learned from surface-sensitive MOS fabrication. Resultant high yields lower factory cost which is passed on to the customer.

Some of the features associated with Motorola's Regulator and Reference diodes are:

- Wide selection of package materials and styles:
  Plastic (surmetic) for low cost, mechanical ruggedness.
  Glass for highest reliability, lowest cost.
  Metal for highest power.
  Leadless for surface mount technology.
- Power ratings from 0.25 to 50 watts.
- Zener voltages from 1.8 to 200 volts.
- Tolerances from 10% (low cost) to as tight as 1% (critical applications) with off-the-shelf delivery.
- Special selection of electrical characteristics available at low cost due to high-volume lines (check your Motorola sales representative for special quotations.
- JAN/JANTX(V)/JANS availability.
- Special glass now used in DO- type packages is compatible with low temperature alloy processes, yielding sharper breakdown and low leakage.

Motorola offers **temperature compensated reference devices** for applications where output voltage must remain within narrow limits during changes in input voltage, load resistance and temperature. These are available with Zener voltages from 6.2 to 11.7 volts.

Field Effect Current Regulator Diodes are high impedance diodes whose "constant current source" characteristics complements the "constant voltage" of the Zener line. Currents are available from 0.22 to 4.7 mA with usable voltage compliance as high as 100 V.

Transient suppressors are designed for applications requiring protection of voltage sensitive electronic devices in danger of destruction by high energy voltage transients. These devices are offered with peak power dissipations of 600, 1500 and 8000 watts for 1.0 ms.

Automotive transient suppressors are designed for protection against over-voltage conditions in the auto electrical system that typically occurs when the battery open circuits while the car is running.

Available Literature

DL125 — The Rectifiers and Zener Diodes Data book provides complete technical data for the broad line of Motorola's silicon rectifiers and zener diodes. A comprehensive selector guide and industry cross reference are included to simplify the task of choosing the best set of components required for a specific application.

SG44 — The Rectifier and Zener Diode Selector Guide and Cross Reference supplies extensive tables of technical information and an alphanumeric industry cross reference to Motorola's line of devices.

Power Tap

Typical of the product and package selection associated with Motorola rectifiers is this line of case variations for Ultrafast Rectifiers.

Motorola rectifiers embody the same precision technology as the most advanced ICs, and are capable of passing stringent environmental testing, including under the hood of an automobile. In addition to improved quality, rectifier product trends are toward higher operating temperature, faster switching times, plastic packages (translate lower costs) and use of dual rectifier modules.

Schottky Power Rectifiers

SWITCHMODE Schottky Power Rectifiers with the high speed and low forward voltage drop characteristics of Schottky's metal/silicon junctions are produced with ruggedness and temperature performance comparable to silicon-junction rectifiers. Ideal for use in low voltage, high frequency power supplies and as very fast clamping diodes, these devices feature switching times less than 10 ns, and are offered in current ranges from 0.5 to 300 amperes, and reverse voltages to 60 volts. Guardrings are included in all Schottky die for reverse voltage stress protection from high rates of dv/dt to virtually eliminate the need for snubber networks and they also act as zeners and avalanches when subjected to voltage transients.

Ultrafast Rectifiers

Expanding the SWITCHMODE Rectifier family are ultrafast devices (MUR family) with reverse recovery times of 25 to 100 nanoseconds. They compliment the broad Schottky offering for use at higher voltages (to 600 V) and in switching power supplies as operating frequencies increase from 20 kHz to 250 kHz.

Fast Recovery Rectifiers

Fast Recovery Rectifiers are available for designs requiring a power rectifier having maximum switching times ranging from 200 ns to 750 ns. These devices are offered in current ranges of 1.0 to 50 amperes and in voltages to 1000 volts.

General Purpose Rectifiers

For lowest cost, Motorola offers a wide variety of general purpose rectifiers, packaged to meet diverse mounting requirements. Avalanche capability is available in the axial lead 1.5, 3 and 6 amp packages to provide protection from transients. Higher power packages provide current ratings up to 50 amperes at voltages up to 1000 volts.

Bridge Rectifiers

Motorola SUPERBRIDGES offer cost effectiveness and reliability in single phase applications. Chip/leadframe techniques are used for lower-current types, while the higher current assemblies combine pretested "button" rectifier cells for low assembly cost and high yields. Performance of four individual diodes is achieved at the cost of only two, with reliability of the whole assembly comparable to that of a single unit.

Available Literature

DL125 — The Rectifier and Zener Diode Data book provides complete data sheets, a selection guide, and an industry cross reference to simplify the task of selecting the best components for a specific application.

SG44 — The Rectifier and Zener Diode Selector Guide and Cross Reference offers the designer a quick solution to finding the right device to fill the requirements of system designs.

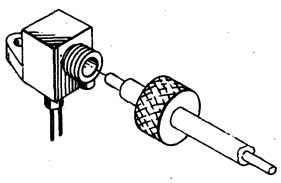
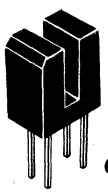
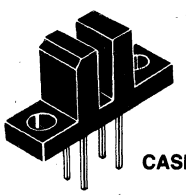
OPTOELECTRONICS COMPONENTS



FIBER OPTIC SYSTEM

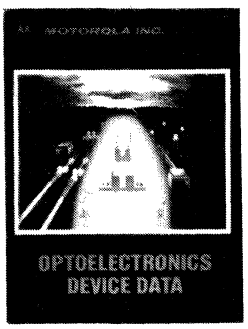


CASE 354

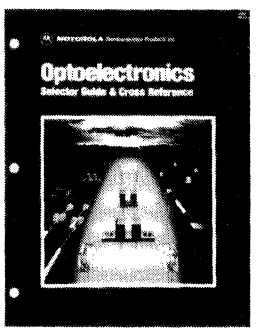


CASE 354A

SLOTTED COUPLERS



DL118



SG87

Motorola offers a range of optoelectronic components . . . from fiber optic emitters/detectors to optoisolators, optocouplers, and infrared emitters/detectors.

Fiber Optic Components

Fiber optic devices are available for high performance systems requiring greater than 100 MHz analog bandwidth over several kilometers, and also for very low-cost systems requiring bandwidths of less than 10 MHz over short distances. Infrared emitters are available with typical output power ratings from 0.9 mW to 3.5 mW at forward currents of 100 mA. Photodetectors are available with responsivities from 0.05 to 10,000 $\mu A/\mu W$ at wavelengths of 820 or 900 nm. All of Motorola's fiber optic packages fit directly into standard connector systems and are spectrally matched to minimize attenuation regions of most fiber optic cables.

The FLCS System. The Fiber optic Low Cost System (FLCS) consists of an infrared emitter and several detectors in a complete package with the fiber alignment and locking mechanism and the means for attaching to a board. Each package has a molded lens which efficiently couples the light to and from the cable.

Optocouplers/Isolators

Motorola's line of optocouplers/isolators consists of Gallium Arsenide infrared emitting diodes optically coupled to silicon photodetector/output devices in light-shielding packages. These provide a range of current transfer ratios (CTR) from 2% to 1000%. The variety of output devices includes a choice of transistors, Darlingtons, Triacs, SCRs and Schmitt triggers, as well as a complete preamplifier output, which adapt them easily to specific end-use requirements. Standard devices are available in the popular 6-pin DIP package.

Optointerrupters/Slotted Couplers

Optointerrupters/slotted couplers consist of an infrared emitting diode facing a photodetector in a molded plastic housing. A slot in the housing between the emitter and the detector provides a means of interrupting the signal. Standard devices range in CTR from 5% to 20% (min) at forward currents of 20 mA with a V_{CE} of 5 volts. Motorola offers a wide selection of emitters and detectors (see below) that can be installed in custom housings for specific applications.

Infrared Emitting Diodes

Motorola's infrared emitting diodes are made by the liquid phase epitaxial process for long life and stability. They provide high power output and quick response at 820 nm and 930 nm with low power input drive current.

Photodetectors

A variety of silicon photodetectors are also offered, varying from simple PIN diodes to complex, single chip 400 volt triac drivers. They are available in packages offering choices of viewing angle and size in either economical plastic cases or rugged, hermetic metal cans. These photodetectors are spectrally matched for use with Motorola infrared emitting diodes.

Available Literature

DL 118R1 — Up-to-date specifications on infrared devices, GaAs emitters, silicon detectors, high-technology optocoupler/isolators, and Fiber Optic components.

SG87 — This selector guide enables the designer to make preliminary decisions on optoelectronic devices.

TEMPERATURE SENSORS

Motorola's line of pressure transducers and temperature sensors provide solid-state reliability, while affording cost advantage due to high volume processing technologies.

Pressure Transducers

Pressure sensors using unique piezoresistive shear stress design give voltage outputs that are directly proportional to pressure, with high sensitivity, accuracy and linearity. This piezoresistive technology allows the device to produce a change in output voltage when a sensing element's resistance changes. In the conventional pressure sensor, the sensing element is one of four resistors in a wheatstone bridge. The values of the resistors must be closely matched in order to allow ease of temperature compensation. Motorola's "X-ducer" piezoresistive shear stress strain guage utilizes a single p-type diffused silicon resistor. This resistor is strategically placed in an etched silicon diaphram to maximize shear stress and sensitivity to shear stress. This technological advancement yields a sensing element with improved part reproducibility by eliminating the need to match resistors, allowing batch processing at low cost.

These devices have pressure ranges from 0 to 30 PSI and are available in packages 344, 350, and 352 as shown above.

The MPX10, 11, and 12 series of pressure sensors provides typical outputs of 35 to 55 mV for highly accurate pressure measurements from 0 to 1.5 PSI with linearity deviations of less than ±1.0% of full scale (FS). These transducers are designed for use in air movement control, environment control systems, fluid level measurement, leak detection, medical instruments and various types of industrial controls.

The MPX50, 51 and 52 series offers typical outputs of 45 to 60 mV from 0 to 7.5 PSI with linearities from ±0.05 to ±.5% FS. They are designed for automotive, industrial, medical and other applications.

The MPX100 series of pressure sensors provides as low as ±0.05% FS linearity for pressures from 0 to 14.5 PSI for applications in the automotive, industrial and medical industries.

The MPX200 and 201 series offers pressure sensing from 0 to 29 PSI with linearities as low as ±0.05% FS. These devices are also designed for automotive, industrial and medical applications.

Temperature Compensated Pressure Transducers

Motorola offers the **MPX2000 SERIES on-chip temperature compensated pressure sensors** which features the same silicon shear-stress strain guage design as the other MPX sensors. These devices afford excellent temperature stability and highly accurate pressure measurements for critical applications in industrial, automotive, medical and environmental controls.

With a differential pressure range of 0 to 7.3 PSI, deviation from straight line linearity is less than 40 μV for the MPX2050 and less than 100 μV for the MPX2051. The MPX2100 and MPX2101 offer a pressure range of 0 to 15 PSI and the MPX2200 and MPX2201 offer a 0 to 30 PSI range. These devices are also available in packages 344, 350, and 352.

Temperature Sensors

Motorola's line of temperature sensors yields very linear voltage outputs verses temperature over temperature ranges from −40°C to +150°C and with response times as fast as 400 ms. These devices offer temperature matching accuracies from ±2°C to ±5°C depending on the needs of the designer. These devices are available in case 29-02 and 318-02 as shown above and are designed for temperature sensing applications in automotive, consumer, and industrial products requiring low cost, small size, and high accuracy.

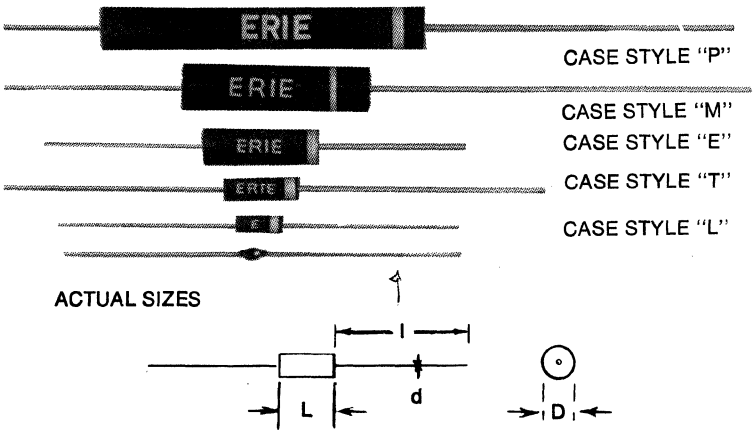
high voltage silicon rectifiers fast recovery, HX / low leakage, HV

MURATA ERIE NORTH AMERICA, INC.



Murata Erie high voltage silicon rectifiers are available with peak reverse voltage rating from 1KV to 30KV, in either transfer molded or epoxy protected packages. Features include nanoampere leakage, compact design and high reliability over a wide temperature range. These rectifiers have found applications in numerous military, industrial and aerospace projects.

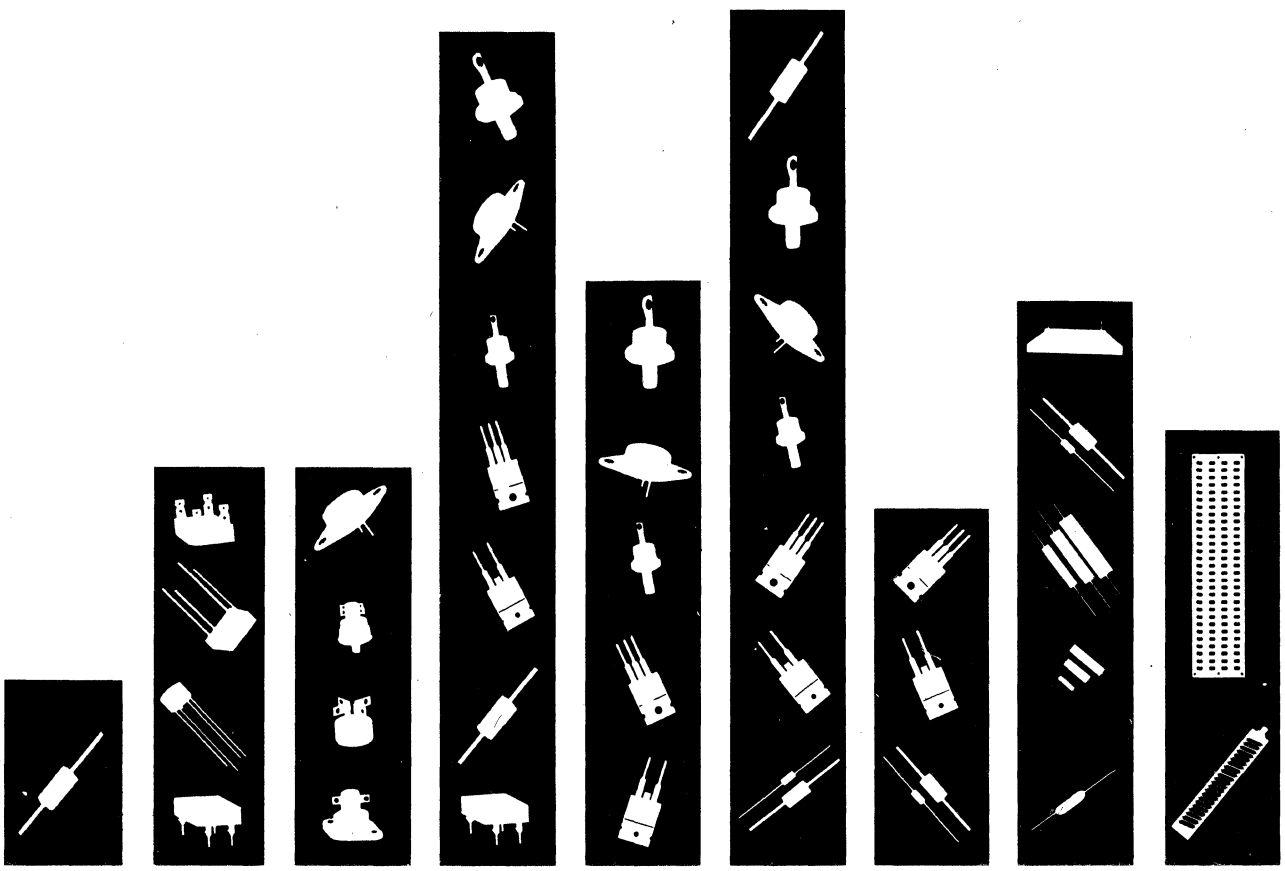
DO-7 (400 mW)

(7) Suffix denotes zener voltage tolerance: A = ±5%, B = ±2%

Power. Speed. Packages.

Varo offers you the best choice of silicon rectifiers and bridges.



Epoxy Axial Lead: V3 Series; 3a w/100-200a surge; 50v to 1000v; Fast Recovery (200 ns)

Epoxy Bridge: VM, VE, VS, VH, VJ, VK Series; 1a-30a; 25v to 1000v; Fast Recovery (200 ns)

Integrated Bridge: IN, VT, VY, R700 Series; 10a to 36a; 200v to 600v; Fast Recovery (200 ns)

Schottky Barrier: VSB, VSK Series; 750ma-60a; 20v to 45v; Ultra Fast Recovery (< 10 ns)

High Temp Schottky: VSK Series; 10a to 75a; 20v to 50v; Ultra Fast Recovery (< 10 ns)

EPI High Schottky: VHE Series; 1a to 70a; 50v to 600v; Fast Recovery (35-50 ns)

Very Fast Recovery: TG Series; 1a to 16a; 400v to 1000v; (100 ns)

HV Silicon: H, VA, VB, VG, VF, VC Series; 3ma to 2a; 1kV to 50kV; Fast Recovery (100-250 ns)

HV Assemblies: H series; X-Ray; Pollution Control; 7 kV to 360kV; Fast Recovery (100-250 ns)

VARO®

The World's Leading Rectifier Company

For application information, specs or a sample device, call 214/487-4300
VARO Semiconductor, Box 469013, Garland, TX 75046-9013, Telex: 163-135

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

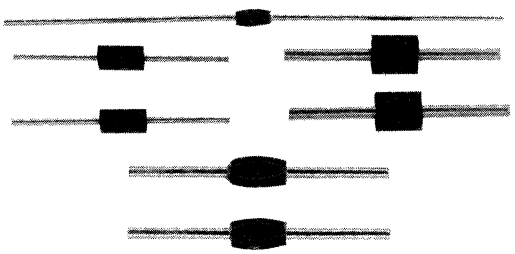
V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

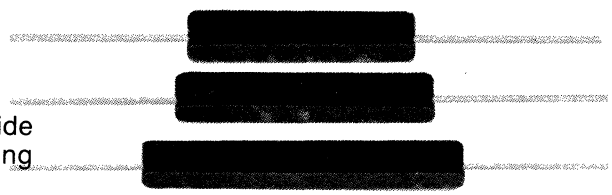
Z
ZIF zero insertion force

HIGH VOLTAGE DISCRETES 1.5 KV to 10 KV



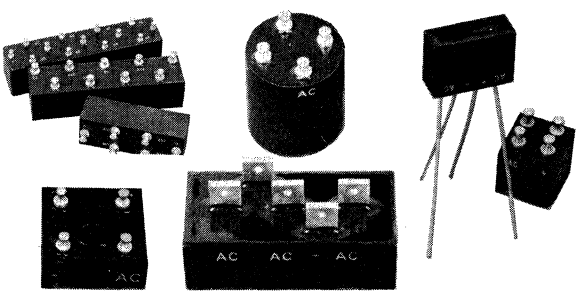
- 25 MA - 80 MA to 100 NS Recovery Time (Body Size .090" x .250")
- 100 MA - 250 MA to 100 NS Recovery Time (Body Size .125" x .250")
- 500 MA - 2 AMP to 100 NS Recovery Time (Body Size .200" x .250")

HIGH VOLTAGE RECTIFIER STACKS



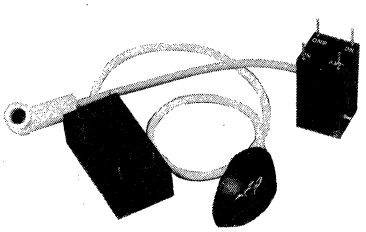
Stacked High Voltage Discretes repotted to provide the PIV needed. Size made depending on operating in air or oil media.

HIGH or LOW VOLTAGE ASSEMBLIES



Single bridge or multiple bridge configurations available or to your package criteria. Low voltage with or without MIL QPL Rectifiers.

HIGH VOLTAGE MULTIPLIERS



Multipliers made with number of stages to yield output to 150 KV+.

CUSTOM PACKAGING/PROCESSING

- Packaging can be tailored to characteristics and space.
- Processing of discretes or assemblies can be to specs or MIL.

VMI VOLTAGE MULTIPLIERS, INC.

abbott TRANSFORMERS — 60 Hz Power Transformers — MODEL 6B

SPECIFICATIONS

INPUT PRIMARY: 115 VAC standard. 230 VAC at 10% additional cost. Specify by suffixing "A" to model number. 115/230 VAC dual input at 10% additional cost. Specify by suffixing "B" to model number.

INPUT FREQUENCY: 50 to 400 Hz, 1 phase.

REGULATION: 15% max. from no load to full load (6% on units size 8 and larger).

SECONDARY VOLTAGE TOLERANCE: Within 5% of listed output voltage when measured at full load and 115 VAC input.

INSULATION TEST: 1500 VAC.

OPERATING TEMPERATURE: 80°C maximum ambient (70°C on units size 8 and larger).

APPROXIMATE EFFICIENCY: Ranges from 80% to 90%.

CONSTRUCTION: Commercial grade using Silicon Iron for core and heavy insulated synthetic film magnet wire with class "B" rating impregnated with a high quality insulating varnish having a class "H" rating. Other outputs and/or inputs available on request.

MODEL 6D

SPECIFICATIONS

INPUT PRIMARY: **WYE:** 120V L-Com. Suffix A
WYE: 208V L-L Suffix B
DELTA: 120V L-L Suffix C
DELTA: 230V L-L Suffix E
DELTA: 440V L-L Suffix F

NOTE: To order a specific input voltage add suffix to model number.
(EXAMPLE: 6D ( ) 15-200E has input 230V L-L (3 wire DELTA)).

INPUT FREQUENCY: 50 Hz to 60 Hz.

OUTPUT: See specific models listed.

OUTPUT VOLTAGE TOLERANCE: Within 5% when measured at full load and nominal VAC input.

REGULATION: 10% max. no load to full load. (6% on size 3 thru 6).

INSULATION TEST: 1500 VRMS

EFFICIENCY: Ranges from 90% to 95%.

OPERATING TEMP.: +80°C ambient max.

CONSTRUCTION: Industrial Grade (open frame): Specify the letter "F" in the model number. (Example: 6DF 15-200 ( )). MIL-T-27D (Grade 5 Class S). Specify the letter "M" in the model number. (Example: 6DM15-200 ( )). NOTE: MIL-T-27D add .20 to Dim. A, B, C. Other inputs and/or outputs available.

abbott TRANSFORMERS

60 Hz Transformers

MODEL **P**

SPECIFICATIONS

INPUT PRIMARY: 115 VAC, 60 Hz ±5 Hz, 1 phase.

REGULATION: 10% no load to full load.

SECONDARY VOLTAGE TOLERANCE: Within 3% of listed output voltage when measured at full load and 115 VAC input.

CONSTRUCTION: To MIL-T-27D, grade: 4 class: "S", Case: steel.

ENVIRONMENT: To operate in 95°C maximum ambient temperature. Encapsulated to meet MIL-STD-810C for vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum). NOTE: For high altitude operation, encapsulate terminals.

INSULATION TEST: 1750 VAC.

SECONDARY: See output voltage and current of specific models listed. For 50 Hz operation, reduce secondary current by 10% of ratings listed. These units are capable of 400 Hz operation; however, see Abbott's distinct line of miniature 400 Hz transformers.

abbott TRANSFORMERS

400 Hz Transformers

MODEL **E**

SPECIFICATIONS

Input Primary
115V, 400 Hz ±20 Hz, 1 phase

Regulation
10% no load to full load

Secondary Voltage Tolerance
Within 5% when measured at full load and 115 VAC input

Construction
To MIL-T-27D, grade 5, class: "S" Molded Diallyl Phthalate

Environment
Encapsulated to meet MIL-STD-810C, including vibration, ambient temperature ot 85°C, shock, sand, dust, humidity, saltspray, fungus, sunshine, rain, explosion, and altitude (to a vacuum).

Output Secondary
See voltage and current of specific models listed.

Other models are available. Contact our nearest office for complete information.

abbott TRANSFORMERS

400 Hz Power Toroid Transformers

MODELS TM TF

SPECIFICATIONS

INPUT PRIMARY: 115V, 400 Hz ±20 Hz, 1 phase for 230V operation add the suffix "A"

REGULATION: 5% or less, no load to full load

SECONDARY VOLTAGE TOLERANCE: Within 5% when measured at full load and 115 VAC input

INSULATION TEST: 1000 VAC

OPERATING TEMPERATURE: MODEL TM 90°C Maximum ambient/MODEL TF 80°C Maximum ambient

APPROXIMATE EFFICIENCY: 90% to 95%

OUTPUT SECONDARY: See voltage and current of specific models listed

CONSTRUCTION: MODEL TF — Open frame, Industrial Grade with Teflon leads 6" long MODEL TM — to meet MIL-T-27D, Grade 5, Class S, MIL-type Designation TF5S03ZZ

OPTIONS: "A" option is for 230V input primary. Add suffix "A" to model number (i.e. TF10-1A). "C" option is for center tapped output. Add suffix "C" to model number (i.e. TF10-1C)

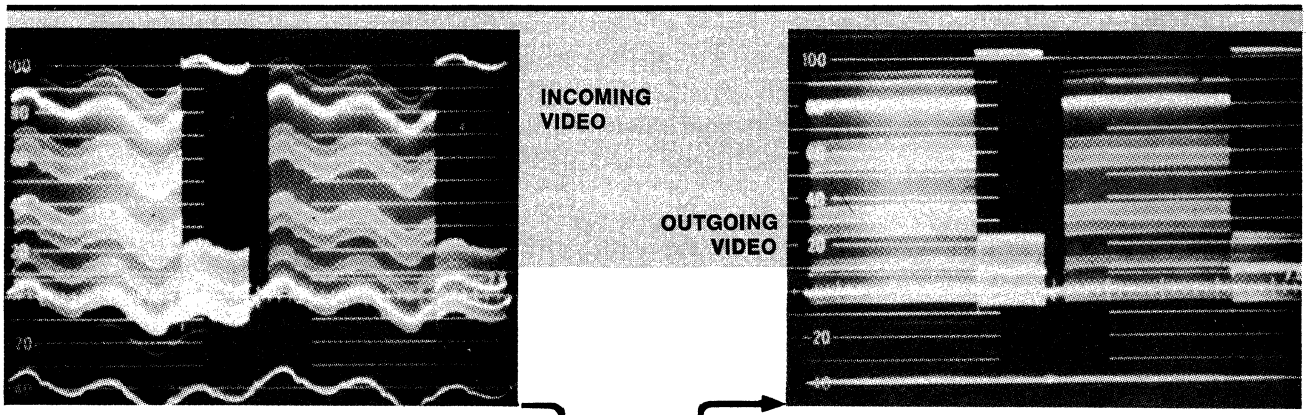
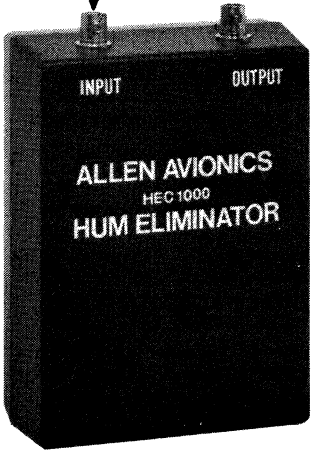
HUM ELIMINATOR HEC1000



ELIMINATES HUM AND OTHER INTERFERENCE in Video Lines caused by differences in Ground Potential



- FLAT - DC to 10 MHz
- For Color and Black & White
- No Low Frequency or High Frequency Roll-Off
- No Differential Gain Distortion
- No Differential Phase Distortion
- Passive Device - Failure Free
- Reversible
- Small Compact Package
- Low Price

IN FIELD:

Between Remote Truck & Telco
Between Remote Truck & Microwave
For Intertruck Hookup
For VTR Units
For Monitoring Lines

IN STUDIO:

Between Buildings
On long runs in Buildings
Between Studios & Transmitter
On incoming Telco Circuits
On outgoing Telco Circuits

SPECIFICATIONS:

Impedance	75 ohms, unbalanced
Connectors	Type BNC
Bandwidth	DC to 10 MHz (0.6 dB @ 10 MHz)
Hum Reduction	to 50 dB depending on system
Dimensions	5.3″ x 4.0″ x 2.0″ (135 x 102 x 51 mm)
Weight	Approx. 3 lbs. (1.36kg)
Insertion Loss	< 0.2 dB

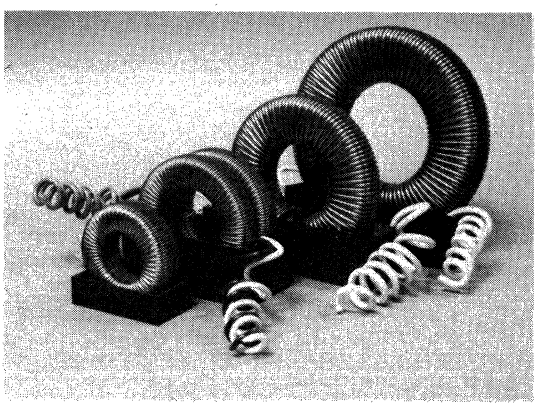
ADVANCED HEAVY DUTY TOROIDAL FILTER INDUCTORS

FOR PROFESSIONAL LIGHT DIMMERS: THEATRICAL, TOURING & ARCHITECTURAL FOR E.M.I/R.F.I SCR CONTROLS, MOTOR CONTROLS, LINE FILTERS, ETC.

- Open • semi enclosed • totally enclosed styles
- Horizontal & vertical mounting
- All "UL" recognizable materials
- From 1,000 to 18,000 watts at 120 v. & 2,000 to 36,000 w. @ 240 v.
- Absolutely latest "State of the Art" materials, production & testing technologies are employed throughout all phases of this product line, which is designed for peak performance.



VERTICAL MTG. SHOWN LEFT TO RIGHT.
10A, DUAL 20A., 50A & 100.A.

TOROIDAL CURRENT SENSE TRANSFORMERS

- Designed for switching power supply applications.
- Cost effective design.
- Operating frequency 20KHZ above.
- Pri Peak current up to 20 amps
- Available with open winding type, pvc sealed, and totally epoxy encapsulated.
- All our SMPS components backed by 19 yrs. of experience.

SWITCHING MODE POWER SUPPLY FILTER INDUCTORS

- Minimum possible size • Low profile
- Performance verified in 25KHZ switching power supply
- Large selection of sizes available
- Available with open winding type or encapsulated and semi-encapsulated constructions.
- Custom designs are available up to 200 AMPS.
- Advanced materials
- Best production technologies, with 19 yrs. of SMPS expertise

LARGEST SELECTION OF HEAVY DUTY 50/60Hz TOROIDAL POWER TRANSFORMER

SOME ADVANTAGES OF TOROIDAL POWER TRANSFORMERS COMPARED TO LAMINATED TRANSFORMERS

- Lower mechancial hum
- Lower electrical noise
- Lower magnetic leakage
- Easier to electrostatically shield
- Lower weight
- Smaller dimensions
- Higher efficiency
- And most important price competitive vs. old fashioned laminated transformers

IMPORTANT NOTES:

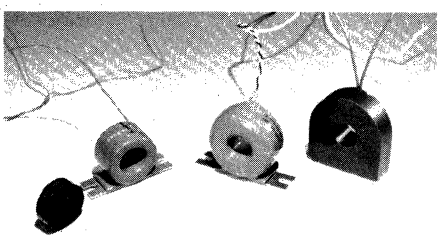
1. All transformers have been designed for 50/60HZ.
2. 60HZ to 400HZ. Designs available upon request.
3. Custom designs tailored to your specs. are made & evaluated on a 2 wk. cycle.
4. 100% electrostatic shielding available on all transformers with a small power derating.
5. Magnetic shielding & lower magnetic leakage designs for sensitive areas such as encountered in computers & audio equipment, are available on all transformers.
6. Low profile designs are available upon request.
7. Amecon has the world's most complete toroidal mfg. facilities. We can machine wind toroids in excess of 50" dia. & 2000 lbs.

AMECON

QUALITY MAGNETIC COMPONENTS • DESIGNED WITH 25 YRS. OF EXPERTISE

1900 CHRIS LANE / ANAHEIM, CA 92805 / TEL 714-634-2220/800-392-2292

Amecon quality components for current sensing, metering & relaying. From small economical units for op amps & switched mode power supplies to very large units (i.e. over four feet in diameter) for the power distribution & switch gear markets. These are all precision wound machine made transformers . Most larger units are multitap and have evenly distributed windings. Amecon, the people with over 100 years of collective engineering toroidal expertise.



Amecon can pack more regulation and VA into toroidal power transformers than most any one else . Just weigh them.You'll find ours to be heavier. Power range: 5VA to 50 KVA, 50 to 400HZ. P.S. We can toroidally wind copper ribbon and heavy rectangular conductors.

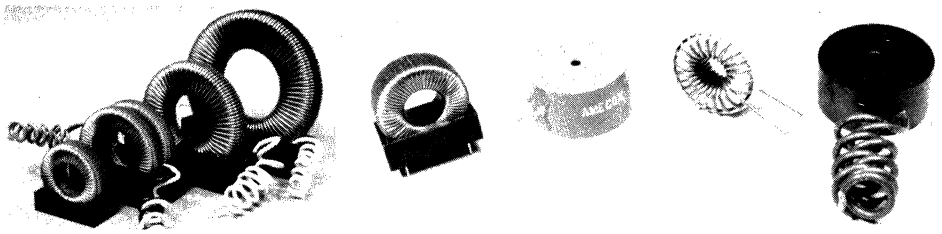
QUALITY MAGNETIC COMPONENTS • DESIGNED WITH 25 YRS. OF EXPERTISE

1900 CHRIS LANE / ANAHEIM, CA 92805 / TEL 714-634-2220/800-392-2292

Amecon has many times been referred to as the Toroidal Filter Inductor People; we were absolutely first in introducing the so called heavy-duty toroidal filter inductors to the electronic controls markets *and*, at extremely competitive prices. Through the years, we have built probably the largest selection of filter inductors anywhere. ½ amp to 300 amps, for many applications (SCR's, EMI / RFI, precision filters,etc.).



Amecon was the first company, circa 1977, to standardize commercial grade (i.e. lower prices) switched mode power supply magnetics. We have over 45 years of collective engineering experience, all of which is clearly visible in our end products, especially in the consistent quality of our switching inverter transformers.

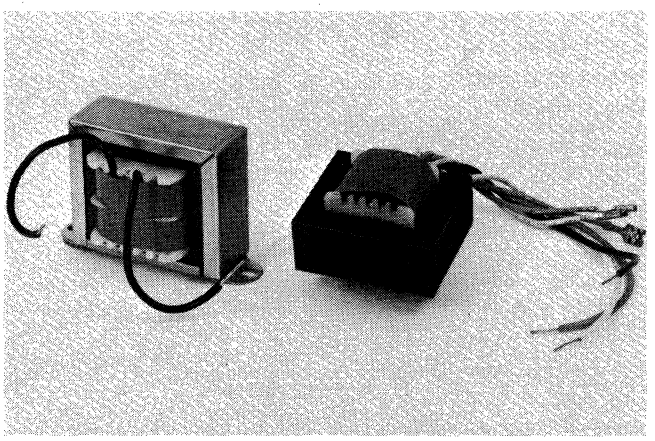
ARSTAN POWER TRANSFORMERS TO 100 WATTS OUR SPECIALTY

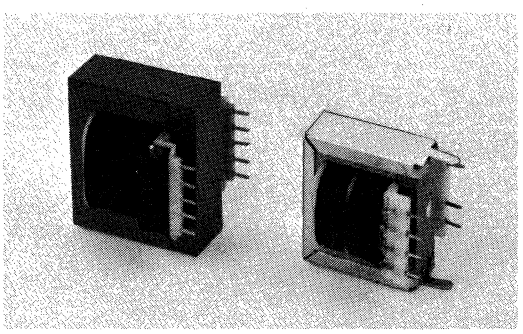
Our products are manufactured in the **FAR EAST** and are competitively priced. We can cross reference to standard designs or our engineers will help you select the features which will best fit your application.

AVAILABLE FEATURES

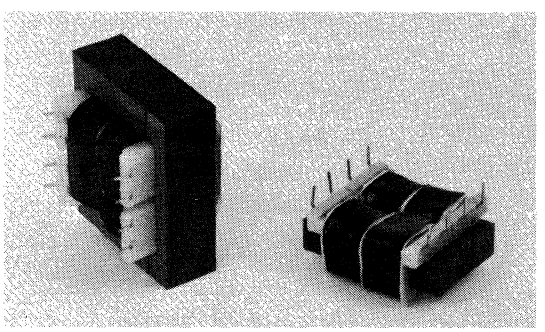
- ☐ Any combination of output voltages and load currents
- ☐ Single and dual primaries 120/240 volts
- ☐ 50/60 Hz operation
- ☐ Single or split secondaries
- ☐ Split bobbin or concentric winding
- ☐ Vertical or horizontal mounting
- ☐ Leads or terminals
- ☐ Specified breakdown voltage 500-3500 VAC
- ☐ High efficiency, specified power dissipation
- ☐ Designed to meet UL/CSA/VDE as required



STYLE HMV **STYLE HMH**



STYLE PCV1 **STYLE PCV2**



STYLE PCH **STYLE PCL**

STYLE AND SIZE SELECTION GUIDE (SIZE IN INCHES — LxWxH)

POWER VA	HMV/HMH	PCV	PCH	PCL
1 - 1.5	✲	1.375 x 1.125 x 1.187	1.375 x 1.125 x .937	✲

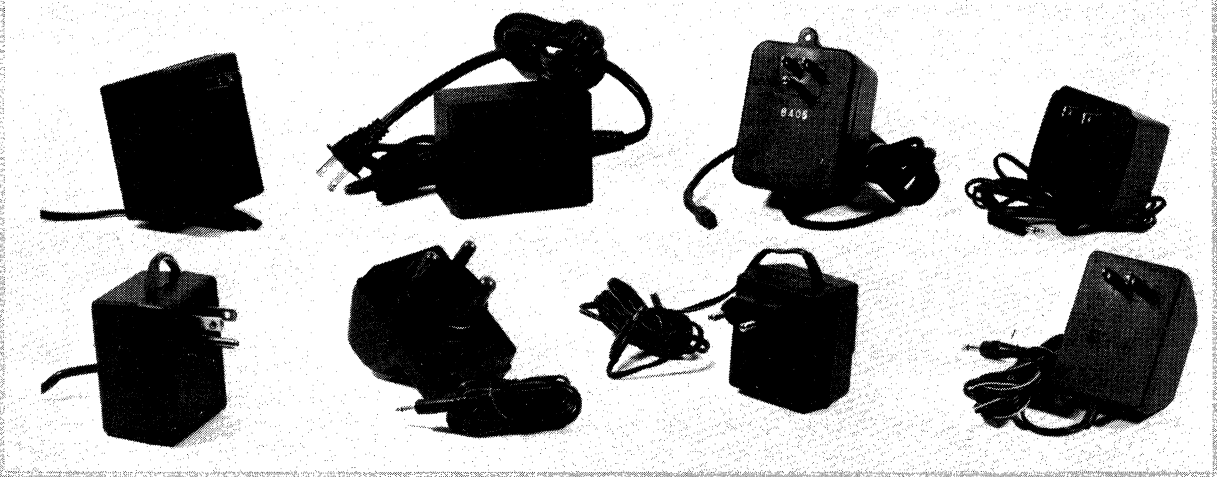
ARSTAN AC TO AC AND AC TO DC WALL PLUG-IN ADAPTERS

Our products are manufactured in the **FAR EAST** and are competitively priced. Selection available from a variety of designs which are UL/CSA recognized or have our engineers help you select a custom design for your application.



AVAILABLE FEATURES

- ☐ Any combination of voltage and load current
- ☐ Selection of input voltages for domestic or overseas use
- ☐ Center tap for AC adapters
- ☐ Specified regulation
- ☐ Selection of cords and connectors
- ☐ Table top option for large adapters
- ☐ UL/CSA recognized or designed as required

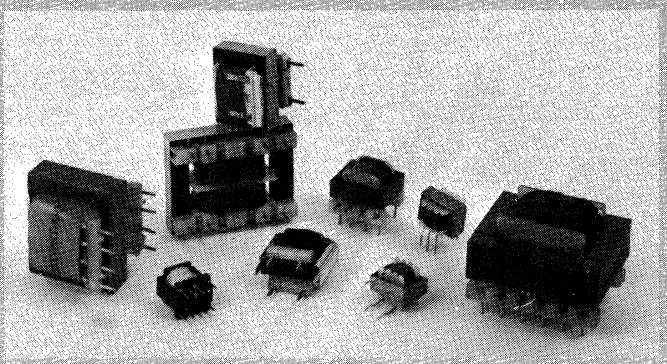
TRANSFORMERS FOR PULSE, COMMUNICATIONS AND TELEPHONE APPLICATIONS

We can cross reference to standard designs or our engineers will help you select the features which will best fit your application.



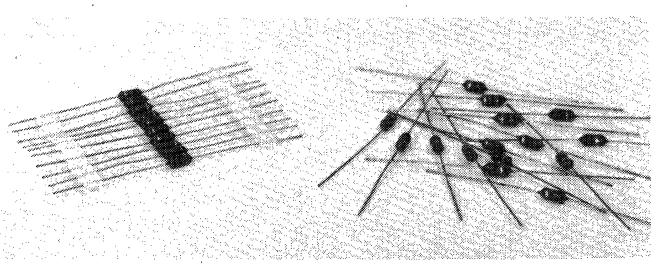
AVAILABLE FEATURES

- ☐ Choice of input/output impedance
- ☐ Optimum tradeoff between DC current, DCR insertion loss, frequency response and return loss
- ☐ Wide selection of sizes
- ☐ Pulse transformers, optimum design for band width and rise time specifications

TYPICAL AVAILABLE DESIGNS

	COUPLING NO DC	COUPLING WITH 100 MA DC	PULSE
Input/output impedance	600/600 ohms	600/600 ohms	120/120ohms
Insertion loss	1.0 db	2.5 db	0.5 db
Frequency response	± .5 db	± .5 db	± .5db
Return loss	26 db	20 db	———
Bandwidth	———	———	500-500,000 Hz
Rise time	———	———	.5 microsecond

We have a full line of molded choke inductors for unwanted signal suppression and a variety of other applications.



Inductance range	.22-1000 microhenry
Tolerance	± 10%
DCR range	.1-20 ohms✲
Min Q range	35-50✲
DC current range	100-3000 MA✲
Temperature range	-20 to +90°C
Coating	Epoxy
Leads	Tinned copper

✲Depends on inductance value

FIXED AND VARIABLE INDUCTORS

A variety of inductors and high frequency transformers for a wide array of applications.

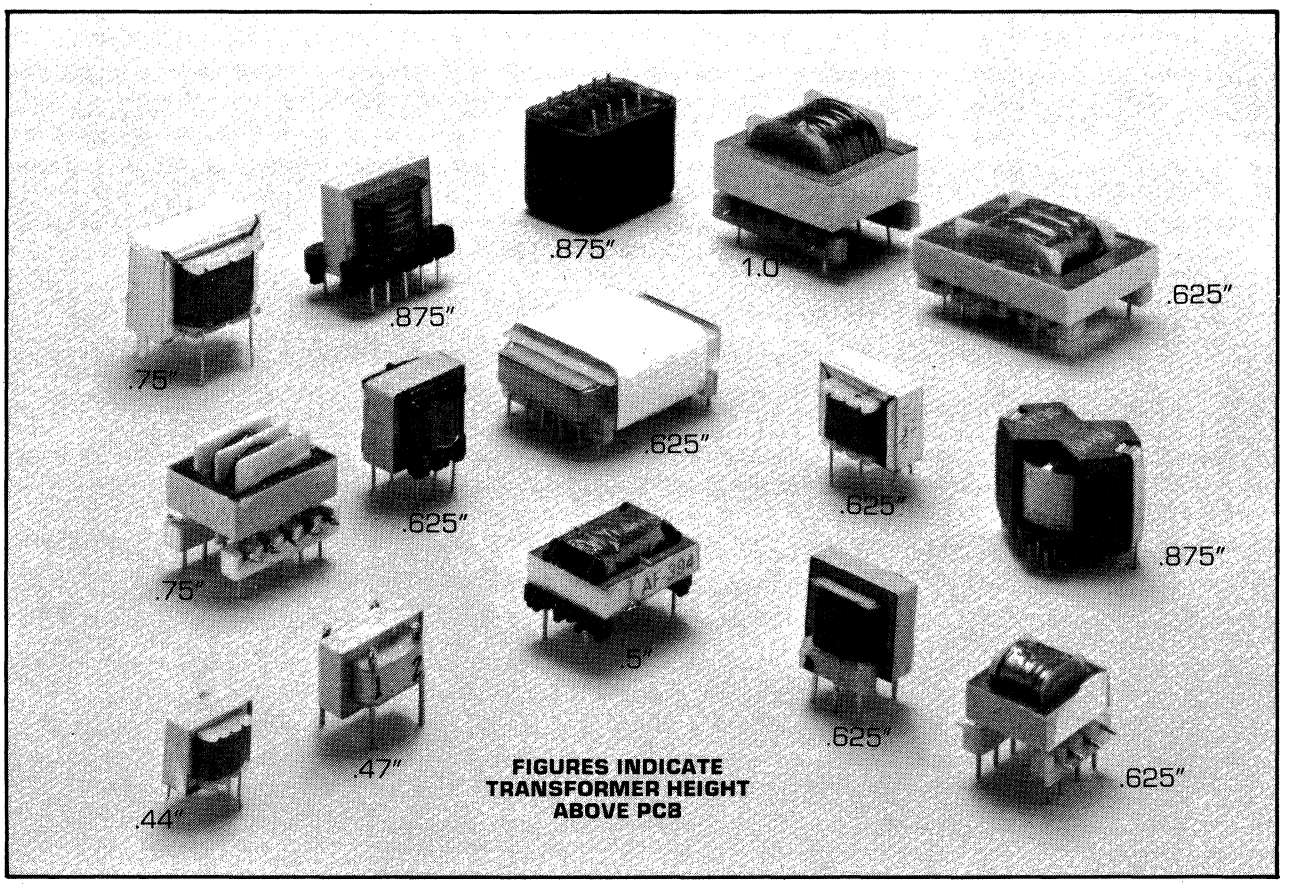
KEEP A LOW PROFILE WITH OUR COUPLING/ MATCHING/HYBRID TRANSFORMERS

TELEPHONE LINE INTERFACE FOR VOICE/DATA PER FCC PART 68

Our products are manufactured in the **FAR EAST** and are competitively priced. We can cross reference to standard designs or our engineers will help you select the features which will best fit your application.

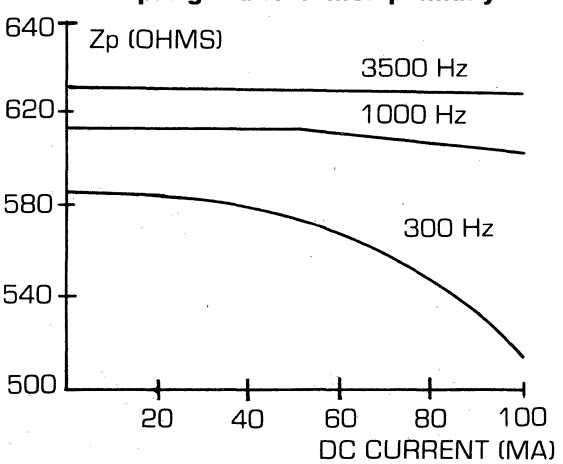


RANGE OF PARAMETERS-SELECTION GUIDE:

Impedances 50/100/150/300/600/900/1200/ 1500 Ohms
Impedance Matching 5-25% inside range of 200-5000 Hz
Return Loss ..... 10-36 DB
DC Current ..... 0-120 MA
DCR ..... 10-300 Ohms
Frequency Response ..... .3-3 DB
Insertion Loss 3-6DB
Max. Power Level ..... 0 to +12 DBM
Logitudinal Balance ..... 40-80 DB
Cross Talk ..... 60-90 DB
Breakdown Voltage ..... 250-4000 VRMS

*We will help you select the optimum design in the smallest package based on your exact parameters.

Typical reflected impedance Vs DC Current in coupling transformer primary



We are transformer specialists! You get technical assistance from our engineers here and top performance at low prices from our factories in the FAR EAST. We provide approval samples on quantity orders prior to production. TECHNICAL EXPERTISE, PERFORMANCE, PRICE... It's all here!

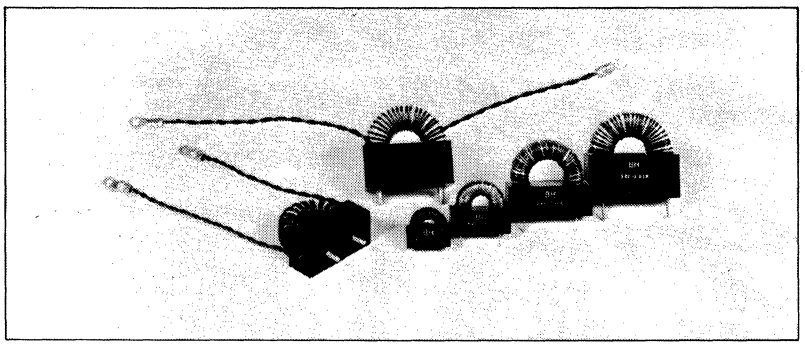
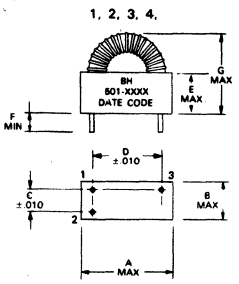
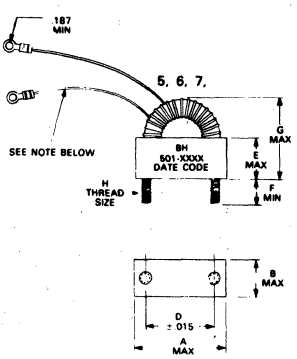
BH Electronics, Inc.

TOROID INDUCTORS FOR SWITCHING POWER SUPPLIES





- Current Range, 1 AMP To 50 AMPS
- Cost Effective Design
- Wide Range Of Inductance
- Maximum Temperature Rise, 40°C Above Ambient
- PC Mount



NOTE: Style 5, 6, 7 Leads Cut to 6" Length/Custom Lengths Available Upon Request

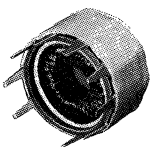
DALE® CONVERTER TRANSFORMERS



MODEL TC

FEATURES

- High conversion efficiency from DC input to filtered DC output
- Designed especially for low-power solid state circuits • Designed for mounting on printed circuit boards • Miniature size for minimum space
- Choice of encapsulated or open (impregnated) styles

SPECIFICATIONS

ELECTRICAL

Transformer Power Rating: 3 watts

Isolation, Primary-Secondary: 500 volts 60 Hz, operating characteristics may be varied to suit specific applications by appropriate selection of circuit components

ENVIRONMENTAL

Operating Temp. Range: −20°C to +80°C, intended for use in enclosed commercial and industrial applications

MECHANICAL

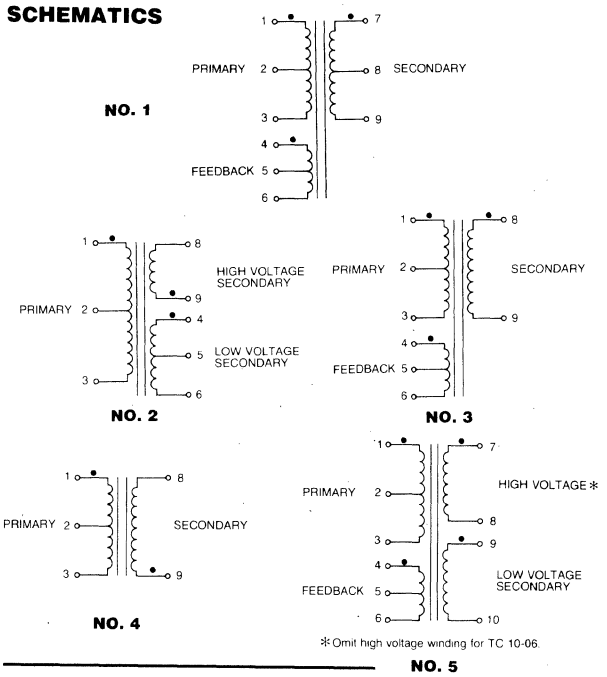
Coating: Varnish dip coat or epoxy encapsulated

Terminals: .015″ thick, solder plated, varnish-free. Intended for P.C. board mounting

TYPICAL APPLICATIONS

Power supply for gas discharge display, battery-operated portable instruments, operational amplifier power supplies.

SCHEMATICS



*Omit high voltage winding for TC 10-06.

OPERATING CHARACTERISTICS*

MODEL NO.	INPUT	OUTPUT	FREQUENCY ±20%	EFFICIENCY MIN.	TEST CIRCUIT	SCHEMATIC NO.
TC 10-01	3.6 VDC	+7.2 ± .2 VDC at 150 MW - 7.2 ± .2 VDC at 150 MW	7.5 KHz	50%	1	1
TC 10-02	5 VDC	200 ± 10 VDC at 250 MW	11 KHz	64%	2	4
TC 10-03	5 VDC	200 ± 10 VDC at 250 MW +15 ± .4 VDC at 125 MW - 15 ± .4 VDC at 125 MW	11 KHz	60%	2	2
TC 10-04	5 VDC	+15 ± .4 VDC at 500 MW - 15 ± .4 VDC at 500 MW	8 KHz	75%	3	1
TC 10-05	5 VDC	+170 ± 5.1 VDC at 850 MW +32 ± 1.0 VDC at 510 MW	11 KHz	75%	4	5
TC 10-06	5 VDC	+35 ± 1.0 VDC at 610 MW	11 KHz	70%	4	5
TC 10-07	7.5 VDC	16.3 ± .4 VDC at 330 MW	7 KHz	65%	5	1
TC 10-08	12 VDC	15 ± .4 VDC at 1 watt	7.5 KHz	72%	3	1
TC 10-09	12 VDC	160 ± 5 VDC at 1.5 watts	10 KHz	75%	6	3
TC 10-10	12 VDC	14.2 ± .7 VDC at 3 watts	10 KHz	70%	5	1
TC 10-11	12 VDC	+24 ± .5 VDC at 2.0 watts	10 KHz	80%	5	1
TC 10-12	24 VDC	170 ± 5.1 VDC at 850 MW 32 ± 1.0 VDC at 510 MW	11 KHz	70%	4	5

*Characteristics relate to transformer when operated in applicable test circuit and at specified load power.

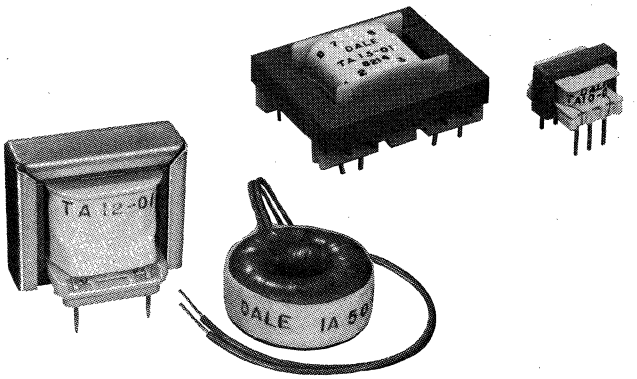
TELEPHONE COUPLING AUDIO TRANSFORMERS AND HOLDING COILS

MODELS TA and IA



FEATURES

- Designed and built to meet telephone company requirements for data and voice access on leased private telephone lines or through the dial-up switched telephone network.
- Provides line isolation, impedance matching, line balance, hybrid and holding coil applications.

SPECIFICATIONS

ELECTRICAL

Frequency Response: ±.5 DB from 300 to 3500 Hz

Power Level: −45 DBM to +7 DBM

Impedance Matching: ±10% from 300 to 3500 Hz

Return Loss:
22 DB min. = TA 10-03
13 DB min. = TA 13-01
14 DB min. = TA 14-01
26 DM min. = TA 10-01, TA 10-02, TA 10-04, TA 10-05, TA 10-06, TA 10-07, TA 11-01

Longitudinal Balance: Per FCC 68.310

Distortion: .5% max.

Dielectric Test: 1500V Peak Per FCC 68.310

MECHANICAL

Coating: TA = Vacuum impregnated with polyester varnish.
IA = Tough vinyl coating.

Terminals: TA = Precision spaced PC type plug-in terminals.
IA = #28 AWG teflon coated insulated terminals.

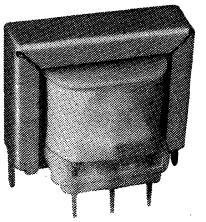
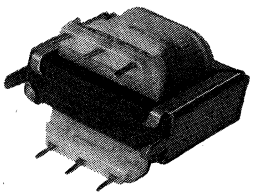
SINGLE PRIMARY, INPUT 115 VOLTS
LOW POWER TRANSFORMERS





PL SERIES
Dual Secondary: PL-11, PL-12, PL-13, PL-14
Single Secondary: PL-32, PL-33, PL-34

COMMON FEATURES

- P.C. pin mounting
- Recognized under the Component Program of Underwriters Laboratories, Inc. (U.L. File E71961). For general purpose transformers (U.L. Standard 506)
- Provides isolation from power line
- Laminated construction for low-cost industrial applications, including power supplies, controls, and instrumentation
- Mounting frames and bobbin standoff are available
- Modification to these standard items are available as specialty products

UNIQUE FEATURES

PL-11, PL-12, PL-13, PL-14
- Dual secondaries for **series connection** to obtain twice voltage with center tap or, **parallel connection** for twice current rating

PL-32, PL-33, PL-34
- Single secondary
- Lower cost construction

SPECIFICATIONS

Output Power Rating:
PL-11 = 0.75VA
PL-12, PL-32 = 1.50VA
PL-13, PL-33 = 4.50VA
PL-14, PL-34 = 10.0VA

Output Voltage: (See table)

Excitation Current at 120V 60Hz:
PL-11, PL-12, PL-32 = 25 MA max.
PL-13, PL-33 = 35 MA max.
PL-14, PL-34 = 45 MA max.

Dielectric Strength: All models are 1500V 60Hz from primary to secondary windings and all windings to core

Temperature Rise: 35°C max.

Temperature Class:
Insulation Class A, +105°C
Operation Ambient −55°C to +65°C
Storage Ambient −55°C to +105°C

MECHANICAL

Terminals: Brass, solder coated

Weight:
PL-11 = 35 grams
PL-12, PL-32 = 100 grams
PL-13, PL-33 = 160 grams
PL-14, PL-34 = 240 grams

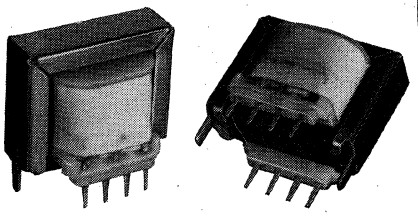
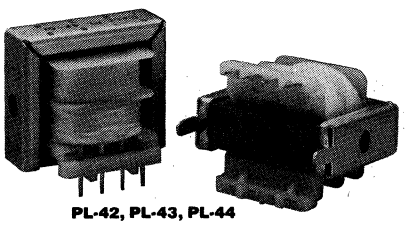
DUAL PRIMARY–DUAL SECONDARY LOW POWER TRANSFORMERS

PL SERIES–115/230 Volts
PL-22, PL-23, PL-24, PL-42, PL-43, PL-44





PL-42, PL-43, PL-44

COMMON FEATURES

- P.C. pin mounting
- Dual Primary for operation at 115V or 230V, 50/60Hz
- Dual Secondary for **series connection** obtains twice winding voltage with center tap, or for **parallel connection** obtains twice winding current rating.
- Provides isolation from power line
- Mounting brackets and bobbin standoff are available
- Laminated construction for low-cost industrial applications, including power supplies, controls and instrumentation
- Modification to these standard items are available as specialty products

UNIQUE FEATURES

PL-22, PL-23, PL-24

- Concentric windings for increased coupling, decreased leakage reactance and improved regulation
- Recognized under the Component Program of Underwriters Laboratories, Inc. (U.L. File E71961)

PL-42, PL-43, PL-44

- Split-section winding for increased dielectric strength between primary and secondary windings plus reduced interwinding capacitance
- Designed to meet U.L. requirements

SPECIFICATIONS

Output Power Rating: PL-22, PL-42 = 1.50VA
PL-23, PL-43 = 4.50VA
PL-24, PL-44 = 10.0VA

Output Voltage: (See table)

Excitation Current at 120V 60Hz:
PL-22, PL-42 = 25 MA max.
PL-23, PL-43 = 35 MA max.
PL-24, PL-44 = 45 MA max.

Temperature Rise: PL-22, PL-23, PL-24 = 35°C
PL-42, PL-43, PL-44 = 40°C

Dielectric Strength:
Between primary windings and secondary windings and core:
PL-22, PL-23, PL-24 = 1500V
PL-42, PL-43, PL-44 = 2500V
Between secondary windings to core: All Units = 1000V
Between primary to primary windings: All Units = 500V
Between secondary to secondary windings: All Units = 500V

Temperature Class:
PL-22, PL-23, PL-24
Insulation Class A, 105°C
Operation Ambient −55°C to +65°C
Storage Ambient −55°C to +105°C
PL-42, PL-43, PL-44
Insulation Class B, 130°C
Operation Ambient −55°C to +85°C
Storage Ambient −55°C to +130°C

MECHANICAL

Terminals: Brass, solder coated

Weight: PL-22, PL-42 = 100 grams
PL-23, PL-43 = 160 grams
PL-24, PL-44 = 240 grams

DALE® CUSTOM INDUCTIVE PRODUCTS

Can't find it in the catalog? Dale has the custom capability to design and produce a wide range of magnetic components to your requirements.

POWER TRANSFORMERS: 50 to 400 Hz, VA ratings to 100 VA. Specialty models in Low Profile and PC Mount

INDUCTORS: Inductance values to 20 H, current ratings to 60 amps. Capability of many styles, including: Toroidal, Laminated, E Core, Pot Core, Slug Core, Air Core

AUDIO TRANSFORMERS: Coupling Transformers and Hybrid Transformers available in PC Mount, Leadset and Low Profile

SWITCH MODE MAGNETICS: Switching Converters, Power Transformers, Current Sense Transformers, Inductors

• UL, CSA & VDE Capabilities • Designs to Military Specifications

TOUGH COIL JOBS

Whether you need a hundred pieces or a million, we offer:

- Complete facilities to design, engineer and produce prototype quantities.
- Faster turn-around on custom samples and short run production quantities.
- Close production coordination including cost-saving statistical control on high volume items.

ENGINEERING AND DEVELOPMENT

When engineering assistance is required, Dale is staffed and equipped to perform...

1. Production Engineering to translate your specifications into a product with **optimum quality** and **economy.**
2. Development Engineering to provide the electrical function you require.
3. Design Engineering to transform your basic idea into parts.

PRODUCTION

Ability to move quickly in converting your order to finished parts is a Dale trademark. Facilities are available for everything from high volume commercial parts to highly sophisticated military items requiring specialized production and test equipment. In dealing with Dale, you draw on a background of production experience which can provide a definite advantage in accelerating availability.

QUALITY CONTROL

Full time quality control personnel and the facilities of Dale's company-wide reliability and quality control organization enable fast action in establishing military test procedures and in meeting other government requirements—including MIL-Q-9858.

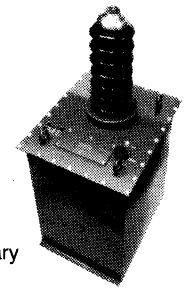
High Voltage Line Isolation Transformers In Oil Insulating Tanks



Model 3–TR–150–11

FEATURES:

- ▼ Complete varnish impregnation under vacuum
- ▼ Epoxy anchoring
- ▼ Immersed in high grade insulating oil*
- ▼ Electrostatic shield between primary and secondary windings
- ▼ "AN" type connector provided for input connections
- ▼ Good regulation

*Note: Shipped without oil to minimize transportation charges, except when otherwise specified in order.

SPECIFICATIONS:

- ▼ Each model available with porcelain output insulator
- ▼ Models also available with two shielded polyethylene output cables in place of porcelain insulator
- ▼ Standard types available for 120V and 240V input lines in 1:1, 1:2, and 2:1 voltage ratios with other input and output voltages available upon request
- ▼ Recommended for industrial, research, and developmental applications

Standard 60Hz Types				
Model No.*	Max. kVA	kV dc Insulation	Tank Size (in.) (W X D X H)**	Insulator Height (in.)***
1-TR-30-XX	1	30	10 X 12 X 11	6
1.5-TR-30-XX	1.5	30	13 X 13⅞ X 16½	6
1-TR-50-XX	1	50	13 X 13⅞ X 16⅜	8½

Transformer, High Voltage—Line Isolation Open Type Construction—Epoxy Coated

FEATURES:

- ▼ Designed for continuous operation at rated voltage and power
- ▼ Epoxy coated, air insulated up to 30kV dc, oil insulated over 30kV dc
- ▼ Well suited to applications requiring reliable isolated line voltage at power ratings up to 1kVA
- ▼ Other higher voltage and power units available upon request

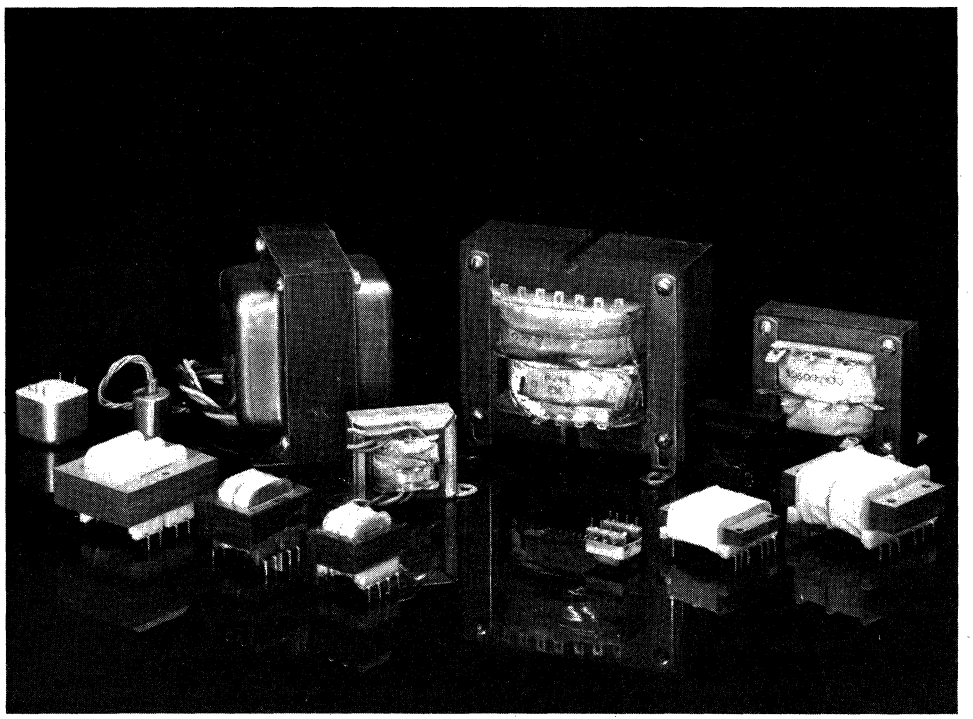
Electromech

TRANSFORMERS

FULL LINE OF QUALITY MAGNETIC COMPONENTS • TAILORED TO YOUR EXACT NEEDS



- **POWER**
- **ISOLATION**
- **CONTROL**
- **AUTO**
- **STEPUP**
- **STEPDOWN**
- **CURRENT**
- **C.V.T.**
- **CHOKES**
- **HI FREQ**
- **INDUCTORS**

FEATURES

TRANSFORMERS

Power—.5VA to 50KVA

115V, 57 to 63 Hz
115/230V, 47 to 63 Hz
International power input, 47 to 63 Hz
400 Hz
Single or multi outputs
For power supply, control, filament & rectifier circuits (+5, ±12, ±15 or any combination)
• Non concentric winding technique • Minimum inter-winding capacitance • Excellent isolation • Very low leakage • Minimum electrical noise • High efficiency • UL recognized components for Class B (130°C)

Hi Freq—Up to 40 KHz

Ferrite cores
Switching power supply
AC-DC converter
DC-DC converter
Inverter

Current—Up to 500 Amp

Sense
Instrumentation
Measuring devices
AC and DC

INDUCTORS

Power—50, 60, 400 Hz

1 μH to 50H of inductance
1μ Amp to 60 Amp of current

Hi Freq—Up to 40 KHz

1 μH to 50H of inductance
Switching power supply
Ferrite cores
Converter
Inverter

FORMATS

PC MOUNT

(Hi Pot 2500 VRMS)

• Low profile • Split pack
• Horizontal • Vertical

CHASSIS MOUNT

(Hi Pot 2500 VRMS)

• Low profile • Split pack
• Quick connect, solder tab, lead wire, or any type of termination
Open frame/Closed frame

SERVICES

• Design to your specifications • Design to UL standards • First article engineering sample within one week • No engineering set up charge • O.E.M. services • 100% Q.C.—guaranteed reliability • Our CAD system eliminates the need for a catalog

ELECTROMECH — THE LAST WORD IN TRANSFORMERS

ELECTROMECH, INC. • 528 Elm Street • Kearny, New Jersey 07032 • (201) 997-0950

From Endicott

Magnetic Components To Your Specs.

When you need transformers, solenoids, coils, torroids or similar magnetic components, ECC has the experience, personnel and facilities to design, build and deliver your parts . . . on time.

Whatever techniques your magnetic components require:
HIGH SPEED WINDING • HAND WINDING • ASSEMBLY
MOLDING • POTTING • VACUUM IMPREGNATION

We are ready to put our facility to work for you.
For a complete capabilities brochure, call us at:

ECC
Endicott Coil Co., Inc.

24 Charlotte Street • P.O. Box 67 • Binghamton, NY 13905
607-797-1263

Economy Line of Split-Bobbin Miniature Power Transformers

Recognized Component Underwriters Labs, Inc.

For printed circuit plug-in applications

ATTRACTIVE PRICE SAVINGS IN QUANTITIES OF 500 AND OVER!

Available only in three types of channel frames as shown and in three different VA ratings these units are priced lower than our standard PC/DPC series and will afford substantial savings in larger quantity ranges. Additional savings can be realized if single secondary can be used in lieu of dual secondaries as shown.

Electrical characteristics differ from our standard PC/DPC series.

Style "C" channel frames supplied hot tin dipped to assure proper solderability. Other styles supplied electro tin plated.

Miniature Plug-In Power Transformers

Recognized Component
Underwriters Labs, Inc.

For triple-output regulated supplies

IDEAL FOR MICROPROCESSOR APPLICATIONS

This line was designed around our standard PC and LP Series and is specified in terms of DC output.

Size "V" available with single primary only.

Sizes "X" and "Y" available with single or dual primary.

Sizes "6" and "12" available with dual primary only.

1500V hipot is standard on Sizes "V", "X" and "Y".

1500V hipot is standard on Sizes "6" and "12".

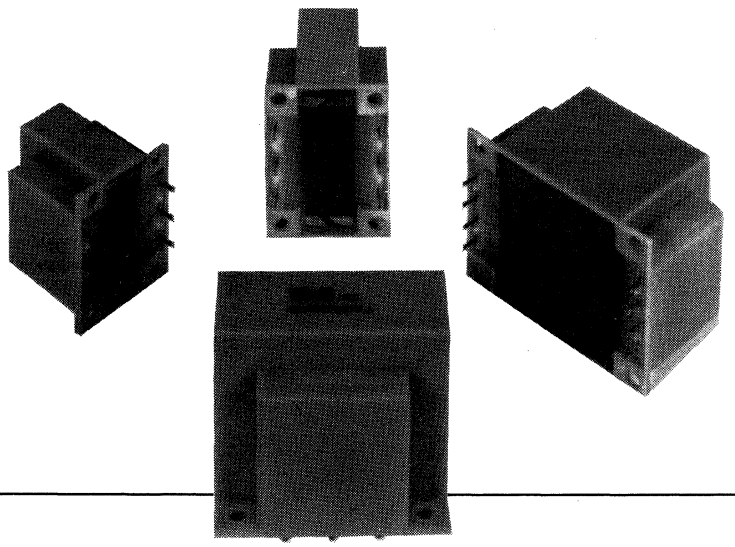
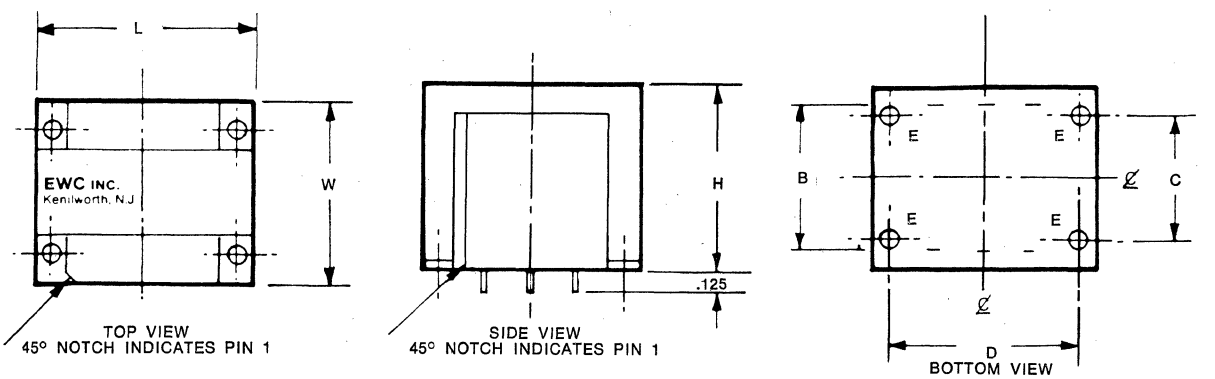
FORM-TRAN™

For military style packaging of printed circuit board plug-in transformers — at commercial prices



FEATURES

- Assures greater reliability.
- Encapsulated in form fitting shells to protect against possible damage due to use of water soluble and other fluxes as well as electrolytic corrosion experienced on open type construction
- Enhances physical appearance of your printed circuit board.
- In addition to UL recognition modified "Form-Tran" packaging can be provided that will meet safety requirements valid in all member countries of the European Community and Canada.



FORM-TRAN PACKAGING CAN BE PROVIDED FOR OUR STANDARD LINES OF

PC/DPC*
EL/DEL*
MPC/DMPC*

Simplify by inserting the letter "P" for mechanical configuration.

* See preceeding pages for part numbers and details.

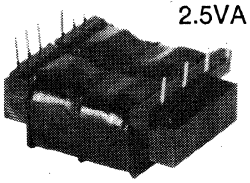
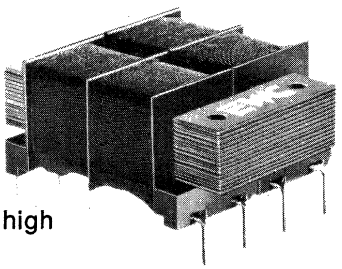
Miniature LO-PROFILE Plug-In Power Transformers

Recognized Component Underwriters Labs, Inc.

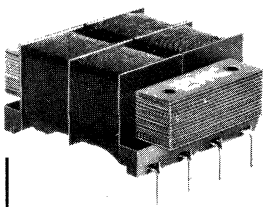
For printed circuit applications

2.5VA — 0.650 inches high

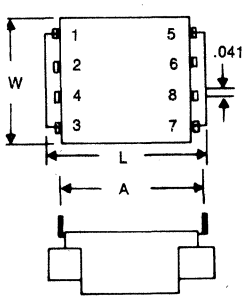


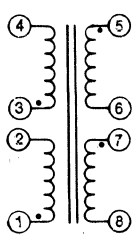


12VA — 1.065 inches high



6VA — 0.850 inches high





PRIMARIES
115/230V
50/60 Hz

* INDICATES LIKE POLARITY

Size	L	W	H	A	B	Oz.
2	1⅞	1⅜	0.650	1.600	0.375	5
6	1⅞	1⅜	0.850	1.600	0.375	7
12	2½	2	1.065	2.000	0.500	11

*Regulation of Size 2 and 6 units is 30%, i.e., no load-secondary voltage is 30% higher than full load. Regulation of Size 12 units is 20%.

THREE SIZES:

EWC's lo-profile, plug-in power transformers are designed for low height, critical pc board applications in semiconductor control and instrumentation. Interchangeable with those of other manufacturers, the units are for use in single, dual or reference dc supplies, or isolated control circuits.

EWC TRANSFORMERS FEATURE

- Non-concentric winding, achieved by secondary being wound alongside primary rather than directly over it, to lower inter-winding capacitance, thus eliminating the use of an electro-static shield.
- Hum-bucking (semi-toroidal) construction to diminish radiated magnetic field and balance winding.
- Lo-profile design permitting close card spacing: ¾″ for 2.5VA units, 1″ for 6VA units and 1¼″ for 12VA units.
- Dual Primaries: 115/230V, 50/60 Hz
- 1500V RMS HIPOT

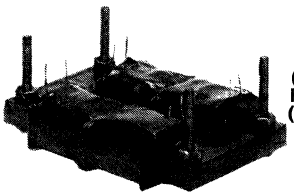
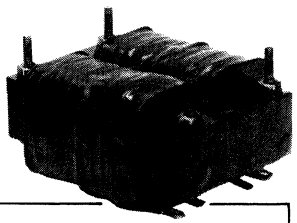
LO-PROFILE Hi-Power Humbucking Transformers



Varnish Finish (Standard)

(Plug-In P.C. Leads)
H.B. Size I
(20VA — .85" High)



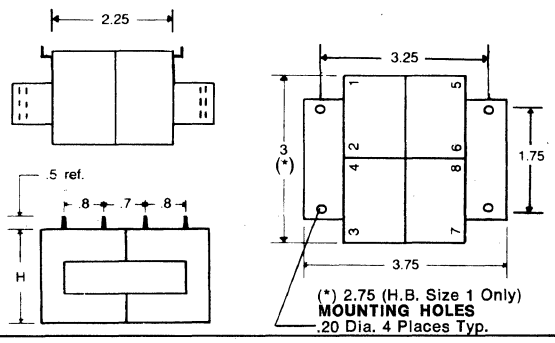
(Solder Terminals)
H.B. Size IV
(135VA — 1.85" High)

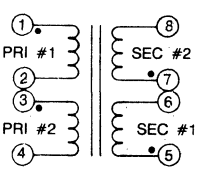
- PLUG-IN P.C. LEADS OR SOLDER TERMINALS
- SIDE-BY-SIDE BOBBINS
- 20VA TO 200VA • 115/230V @ 50/60Hz
- 1.5KV RMS HIPOT • CLASS B (130°C)

ADVANTAGES:

- Side-By-Side Bobbins (Secondary Wound alongside of Primary) Lower Interwinding Capacitance — eliminates the need for electro-static shield
- Hum-bucking (Semi-Toroidal) Construction [Lower Radiated Magnetic Fields, Balanced Wdgs., Larger Heat Radiating Surface and Lower Center of Gravity]
- High Power for Low Panel Heights and Narrow Card Spacing

P.C. LEADS LAYOUT (.03 Dia-Typ < 2.5A)
SOLDER TERMINALS (.5-1-.5) Approx. Spacing





H.B. Size	H (Max.)	Wt. (lbs.) (Approx.)	VA (Nom.)	Reg. (%) (Typ.)	T. Rise (°C) (Typ.)
I	.850	1.00	20	30	25
II	1.25	1.75	50	30	45

IV	1.85	3.00	135	20	65
V	2.35	4.25	200	15	75

PLUG IN PC LEADS: Standard for currents up to 2.5A.

SOLDER TERMINAL: Standard for currents over 2.5A but available on all units.

MOUNTING: (4) Lamination Holes .20 Dia. Insulated hardware required.

RATINGS PER SECONDARY OUTPUT: VA-SEC = 0.5 x VA (Output) • V-SEC = V-SEC (Parallel) • I-SEC = I-SEC (Series)

NON-STANDARD RATINGS: Tapped primaries, secondaries different voltages, currents or frequencies can be furnished.

Units with higher VA ratings up to 1.25 KVA can also be supplied.

EWC, Inc. reserves the right to make changes without notice in design and specifications in order to effect product improvement.

TRANSFORMERS WOUND ON A SPLIT BOBBIN PERMIT THE PRIMARIES AND SECONDARIES TO BE WOUND SIDE BY SIDE RATHER THAN ONE OVER THE OTHER.

FEATURES ARE:

2500V RMS Hipot
Elimination of electro-static shield
No cross-overs of primary and secondary leads
Class S insulation — 130°C

Transformers can be supplied with single 115V or 115/230V, 50/60 Hz dual primaries. Secondaries can be series or parallel connected.

Size	VA	L	W	H	ML	A	B	C	Lbs.
2	1.1	1 3/8	1 1/8	15/16	—	.250	.250	1.200	0.17

EWC® INC. 725 FEDERAL AVENUE, KENILWORTH, NJ 07033 • (201) 245-3200 TWX 710-996-5993 800-526-4048

Military and Commercial

Toroidal Transformers and Inductors

TOROIDAL INDUCTORS

- Light dimming reactors
- High Q inductors MPP and powdered iron
- Switch mode inductors
- Custom LC networks

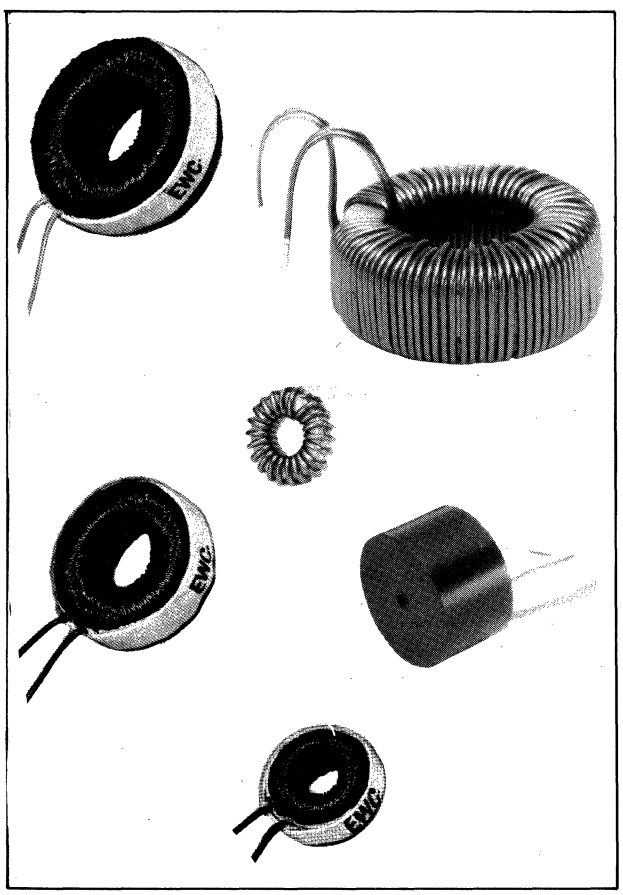
TOROIDAL TRANSFORMERS

- Power transformers 50/60Hz
- Power transformers 400Hz
- Switch mode transformers to 100 KHz
- Pulse transformers
- Data buss transformers

ENGINEERING — experienced engineers available to discuss your requirements. Inspection System approved to Mil-I-45208 Listed on the current QPL-27

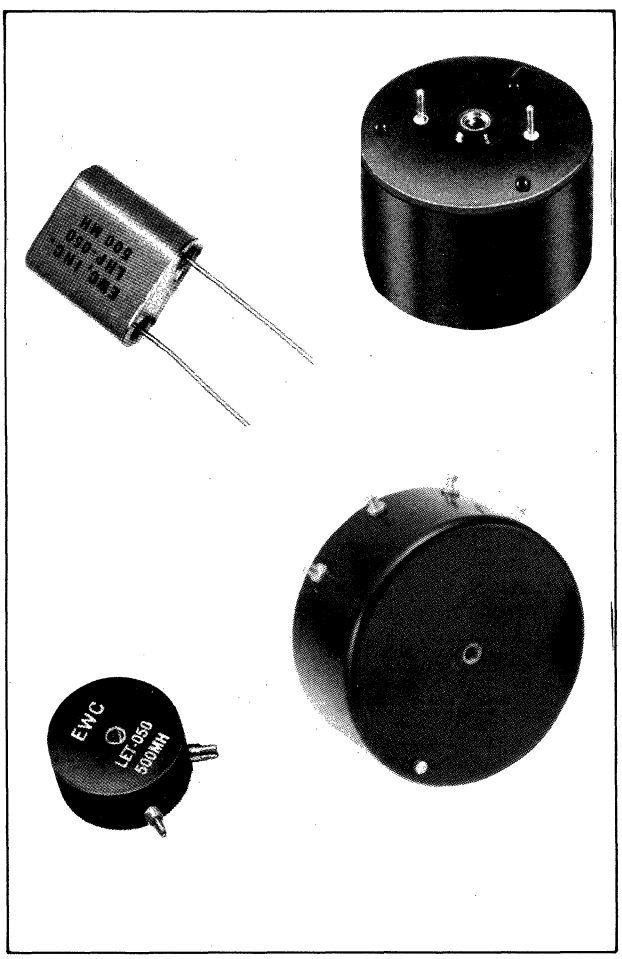
COMMERCIAL

- High quality
- Large selection
- Competitive prices
- Sizes from subminiature to 100 lbs.
- Offshore facilities for large production runs



MILITARY

- Experience — over 20 years on programs such as B1B, F16, JTIDS, Space Shuttle, etc.
- Facilities — modern efficient plant



CUSTOM ORDERS WELCOMED

Depend on EWC for quality components, delivered on time. Put more than 20 years experience making quality components to work for you. Call or write EWC today.

QUICK CONNECT POWER TRANSFORMERS

2500 Volt RMS Hipot in a variety of practical sizes. Maximum operating temperature 130°C available with either single 115 or dual 115/230V primary.

EWC's split bobbin and non-concentric winding provide better insulation and high signal isolation, thus eliminating the need for electrostatic shielding.

Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.

11"	1¼"	1½"	13½"

DESCRIPTION: This split-core current transformer was designed for easy installation on large bus or wire conductors in order to make electrical load surveys or for continuous monitoring of current.

APPLICATION: To be used with any 5 amp indicating or recording ammeter or amp or watt transducer. Also useable with indicating or recording clamp-on ammeter.

CONSTRUCTION: Directional silicon steel is used for the flexible core. Secondary windings are of copper. Unit is encapsulated in silicon rubber which protects against moisture, dirt, oil and corona. Remains flexible from −45° to +200°C.

INSULATION LEVEL: 600VAC — can be used over insulated conductors on higher voltage circuits.

SAFETY FACTOR: Secondary voltage limited to less than 50VAC when secondary leads are open circuited.

SECONDARY LEADS: 12 feet long with spade connectors.

COLOR: Transformer (red) — leads (yellow).

MIL-T-27 COMPONENTS

TRANSISTOR SUPPLY TRANSFORMERS
TST SERIES

Manufactured and Guaranteed to Specifications MIL-T-27

TST-6 — Frequency 57 Hz to 63 Hz — Primary 115 volts units with * primary 115 and/or 230 volts

TST-4 — Frequency 380 Hz to 1000 Hz — Primary 115 volts

TST units can be supplied in commercial type construction (channel or shell type with leads).

**When ordering specify (6) for 57 to 63 Hz and (4) for 380 to 1000 Hz

FREED TRANSFORMER CO., INC.

HERMETICALLY SEALED MINIATURE AND SUB-MINIATURE FILTERS TO MIL-F-18327

Freed Standard Filters are **Hermetically Sealed Miniature and Sub-Miniature** high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency • **ILP-ILM Interstage Low Pass Filter.** Characteristic impedance 10,000 ohms, in and out • **LLP-LLM Line Low Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **High Pass Filters:** The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency • **IHP-IHM Interstage High Pass Filter.** Characteristic Impedance 10,000 ohms, in and out. • **LHP-LHM Line High Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **Band Pass Filters:** The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency • **IBP-IBM Interstage Band Pass Filter.** Normal input impedance — 10,000 ohms. Output impedance .5 megohms. Effective voltage step-up 2:1. (Output voltage to source voltage.) • **LBP-LBM Line Band Pass Filter.** Nominal input impedance 500 to 600 ohms. Output impedance .5 megohms. Effective voltage step-up 5:1. (Output voltage to source voltage.)

Special filters in all six types are available upon request.

MINIATURE

Low Pass Filters — attenuation ≧35 Db at 1.5 x Fc ≧40 Db at 2 x Fc

NULL "T" FILTERS SERIES 1950

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of ±2%.

All Null T Filters are hermetically sealed.

Prices on request.

Catalog No.	Frequency
NTF- 30	30 Hz
NTF- 60	60 Hz
NTF-120	120 Hz

FREED TRANSFORMER CO., INC.

TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin.** Both hermetically sealed and molded units meet the latest military specification MIL-T-27A(graded 1 or 4 and 2 or 5 respectively.)Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores

1. Temperature Stabilization:

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

SF Non-stabilized cores, ±2½% inductance variations from —55°C to +85°C.
SN Non-stabilized cores, +2% inductance variations from —55°C to +85°C.
SE Temperature stabilized cores, +0.1% to —0.4% inductance variations from —1.5°C to +54°C.
SB Temperature stabilized cores, ±0.1% inductance variations from +13°C to +35°C.
SD Temperature stabilized cores, ±0.1% inductance variations from —1.5°C to +54°C.
SW Temperature stabilized cores, ±0.25% inductance variations from —54°C to +85°C.
SM Temperature stabilized cores, ±.25% —65°C to +125°C.
SP Temperature stable carbonyl iron cores, ±0.3% inductance variations from —55°C to +85°C.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.

*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.

$$\text{Normalized } V_{AC} = \frac{V}{F}\,\frac{1}{\sqrt{L_H}}$$

$$\text{Normalized } I_{AC} = I_{AC}\sqrt{L_H}$$

$$\text{Normalized } I_{DC} = I_{DC}\sqrt{L_H}$$

where F —operating frequency in Hz
L_H —inductance in henries
Iac—A.C. current in MA
Idc—D.C. current in MA
V —A.C. voltage across the core

FREED TRANSFORMER COMPANY. INC. 1795 WEIRFIELD ST., RIDGEWOOD, N.Y. 11385

FREED TRANSFORMER CO., INC.

COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment.

The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum impregnation with a non-hygroscopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance.

230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series.

All units, with only a few exceptions, are uncased or of shell-type construction.

Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

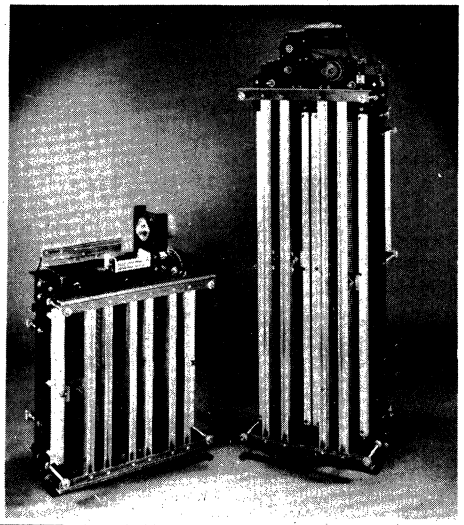
AVAILABLE UPON REQUEST

MAGNETIC AMPLIFIERS AND SATURABLE TRANSFORMERS

FREED TRANSFORMER COMPANY. INC. 1795 WEIRFIELD ST., RIDGEWOOD, N.Y. 11385

PESCHEL VARIABLE TRANSFORMER™



ELECTRICAL FEATURES

- NO SHORTED TURNS
- 1-3% IMPEDANCE
- NO THREE-PHASE IMBALANCE
- 15 TIMES OVERLOAD CAPABILITY
- CONTINUOUSLY ADJUSTABLE OUTPUT
- LINE ISOLATION AVAILABLE
- 25% AND 100% STEP-UP AVAILABLE

MECHANICAL FEATURES

- STANDARD SINGLE OR THREE-PHASE CORE
- EPOXY ENCAPSULATED COIL FACE
- PLATED COIL TAPS/TURNS
- SLIDING COPPER CONTACTS
- SINGLE CORE ASSEMBLY UP TO 240 AMPS
- LESS SIZE AND WEIGHT THAN COMPETITION
- CLASS H, HIGH TEMPERATURE COPPER WIRE
- UPPER LIMIT, LOWER LIMIT, AND ZERO START MICRO SWITCHES
- MOTORIZED CONTROL; FIXED OR VARIABLE SPEED

The patented Peschel Variable Transformer is a linearly wound, continuously adjustable auto-transformer. A sliding copper contact traverses the coil face to provide variable voltage control.

The PVT can provide **variable ac voltage from 240V to 13.8 kV**, one or three phase and variable **dc voltage from 300V to 40 kV.** Flexibility in design enables the PVT to meet varied applications. Applications include: primary voltage control of high voltage and high current power supplies; ac or dc test equipment; motor, furnace and oven control; industrial and laboratory use; line stabilization; transformer testing; and much more.

SERVING APPLICATIONS NEVER BEFORE POSSIBLE WITH A VARIABLE TRANSFORMER

VARIABLE TRANSFORMER

DESIGN HISTORY

Variable Transformers have been built for over 50 years by many companies around the world. There are two basic designs of electromechanical variable tranformers, linear and toroidal. The linear variable transformer is constructed in a vertical, or linear manner while the toroidal is constructed on a ring core, or "donut." The toroidal variable tranformer is the most common device used.

They are both single layer windings on a laminated steel core. The turns on one face of the coil are exposed. A carbon brush traverses the coil face to provide for voltage adjustment. In order to provide continuous, noninterrupted output voltage, the carbon brush must contact the next turn before leaving the previous turn. This creates a shorted turn condition. When the two turns, at different voltages, are bridged, or shorted, a circulating current results. This current, flowing through the shorted wire loop and carbon brush, creates heat. This heat must be dissipated through the coil and brush holder. This inherent design flaw severely limits the capability of these devices. To build a toroidal variable transformer capable of commutating greater than their limit of 8 kVA of power, would require larger wire sizes and more brushes. Both of these changes would increase the short circuit current, thus rendering such a device impossible, without extravagant heat sinks, forced air, or oil cooling.

In order to use the devices for applications greater than 8 kVA single-phase or 29 kVA three-phase, it becomes necessary to multi-stack or "gang" many core/coil assemblies in a series/parallel configuration. This becomes not only cumbersome, but also less reliable due to the multiple brush and motor drive system required. Serviceability is also difficult with such a "mechanical monster."

Other variable voltage control devices designed for high power voltage control, above 100 kVA, have other design or operational flaws. These devices sacrifice efficiency, size and weight, waveform purity, power factor, and/or cost.

What the industry needed was a variable autotransformer, which is the most efficient variable voltage device, that is smaller, lighter, more reliable, easy to service and reasonably priced.

THE PESCHEL SOLUTION

Having tried every device available, Hipotronics sought to design the perfect voltage control device. What had to be done was to design a variable transformer that eliminated the shorted turn problem. The result of our efforts was the **PESCHEL VARIABLE TRANFORMER.**

Having eliminated the short circuited turn problem, through our patented diode switching technique, it is now possible to build a variable tranformer capable of commutating greater kVAs and voltages than ever before possible. Most PVTs are constructed on a standard single-phase or three-legged, three-phase core. With no series or paralleling of core/coil assemblies necessary (most models), the PVT is generally smaller, lighter, more efficient and more reliable than any other means of variable voltage control.

Construction in a linear fashion affords greater design flexibility; core size, wire size, winding length. This allows for the design and construction of almost any kVA or MVA and any voltage, **enabling the PVT to be used in applications previously impossible with other variable transformers.**

DESIGN

The Peschel Variable Transformer is a continuously adjustable autotransformer. It is constructed of copper coils wound on a linear, laminated steel core. One face of the coil is epoxy encapsulated, then sanded to expose the turns. The exposed coil turns, or taps, are then plated. Each coil is wound in such a fashion as to expose two separate tracks of turns; one track of all the odd turns, the other even. Each track is traversed by a sliding copper contact. The sliding contacts are thinner than the distance between adjacent turns of the same track, thus not shorting the turns. Between the contacts is a series of back-to-back diodes. Using the diodes solely for their forward voltage drop (FVD), the voltage required across the diode before it will conduct current, and maintaining transformer volts per turn less than the total FVD, essentially no current can circulate between the two contacts. As the contacts traverse the coil, the current flow to the load alternates between contacts, depending upon which turn of the transformer is being used, odd or even.

This patented method provides for continuous voltage control with no shorted turns.

PESCHEL VARIABLE TRANSFORMER

Hipotronics

USES:
- DC Motor Speed Controller
- Chemical Processes
- Electro-Magnets
- Electropainting

ADVANTAGES:
- No Electronics
- No Waveshape Chopping
- No Effect on Power Factor
- No EMI
- Same Ripple, Any Voltage

Hipotronics

TRANSFORMERS "RM" SERIES

Hipotronics RM Series of high quality transformers are basically designed for air or oil environment. Models RM 17-3, RM 21-3 & RM 25-3 are manufactured for oil environment only.

Models RM 6-1, RM 7-1, RM 8-1, RM 9-1 and RM 10-1 are available manufactured in an epoxy incloser on special request.

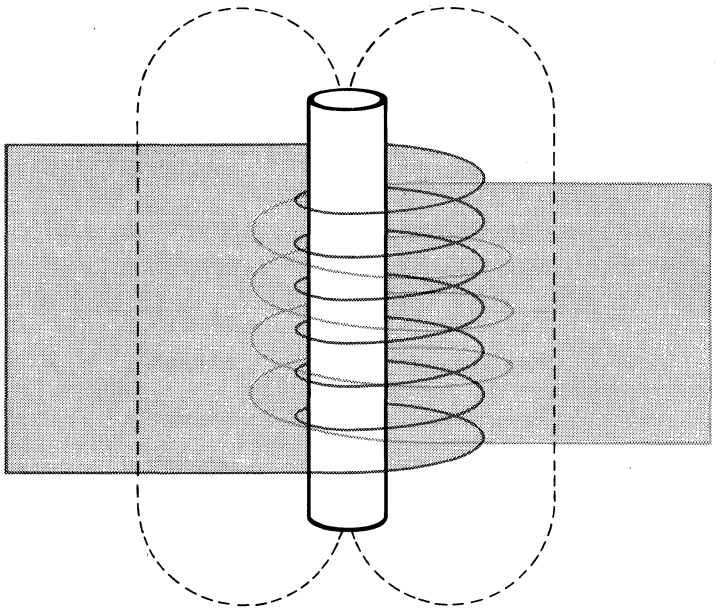
Hisonic... specialists in custom and standard inductor and transformer components



The control of electric current is only as good as the components that carry it.

INDUCTORS: Our manufacturing capabilities are the result of experience dating back to 1950 and now include virtually every known construction your special applications may require . . . and at reasonable prices.

TRANSFORMERS: Hisonic's special power/converter and signal/matching transformers for both audio and wide video ranges are used in airborne comm/nav and ground communications systems. Included are toroidal, pot core, and laminated core types manufactured to commercial and MIL specifications. Our 30 year experience is at your disposal to help solve your transformer and inductor problems.

Key source for reliable magnetic components, power supplies and control systems for over 40 years.

300 VA TO 3000 KVA STANDARD & SPECIALTY MAGNETIC COMPONENTS

STANDARD TRANSFORMERS

DIT SERIES — Drive Isolation Transformers. (12-550KVA, U.L. Listed)

Designed to provide electrical isolation and voltage transformation for SCR adjustable-speed motor drives. Dry type. 600V class. Single phase and three phase. 50HZ and 60Hz. 5% FCAN and FCBN primary taps. Open frame or NEMA 1 enclosed, 150°C rise/220°C insulation class standard, 115°C or 80°C or 55°C rise/220°C insulation class optional.

Size Range (KVA)

Single Phase

• 1, 1½, 3, 5, 8, 12, 15, 20, 27, 30, 34

Three Phase

• 8, 12, 15, 20, 27, 34, 40, 51, 63, 75, 93, 120, 150, 180, 220, 280, 330, 440, 550, 660, 760, 870, 980, 1100.

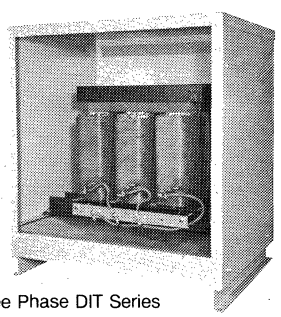
Standard Voltages Available

Single Phase

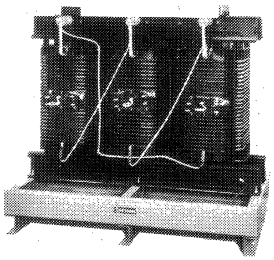
• Primary or Secondary 208, 230, 380, 460, 575, 230/460, 415

Three Phase

• Primary (△) 208, 230, 380, 460, 575, 230/460, 415
• Secondary 208Y/120, 230Y/133, 380Y/220, 460Y/266, 575Y/332, 230x460Y/133x266, 415Y/240



Three Phase DIT Series



1500KVA HVDT 15KV Class Transformer

GPT SERIES — General Purpose Transformers

Designed to provide electrical isolation and voltage transformation for lighting, electric heating and industrial motor loads. Dry type, 600V class, single phase and three phase, 50Hz and 60Hz. FCAN and FCBN primary tap arrangements are standard. 150°C rise/220°C insulation class standard, 115°C or 80°C or 55°C rise/220°C insulation class optional.

Size Range (KVA)

Single Phase

• 3, 5, 7½, 10, 15, 25, 37½, 50, 75, 100, 167

Three Phase

• 3, 6, 9, 15, 30, 45, 60, 75, 112½, 150, 225, 300, 400, 500, 750, 1000

Standard Voltages Available

Single Phase

• Primary (3KVA-15KVA) 240/480, 208, 277, 480, 600
(25KVA-167KVA) 240x480, 480, 600
• Secondary (All KVA sizes) 120/240

Three Phase

• Primary (△) 240, 480, 600
• Secondary 208Y/120, 240△, 480Y/277

HVDT SERIES—High Voltage Distribution Transformers

Designed for in-plant distribution and voltage step-down. Conventional dry type or resin cast coil. 5KV through 15KV class. Single phase and three phase. 50Hz and 60Hz. FCAN and FCBN primary tap arrangements are standard. 150°C rise/220°C insulation class standard, 115°C or 80°C or 55°C rise/220°C insulation class optional.

Size Range (KVA)

Single Phase

• 3, 5, 10, 15, 25, 37½, 50, 75, 100, 167, 200, 250, 333, 500

Three Phase

• 15, 30, 45, 75, 112½, 150, 225, 300, 400, 500, 750, 1000

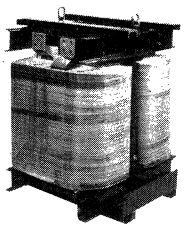
Standard Voltages Available

Single Phase

• Primary
5KV Class: 2400/4160Y
8.66KV Class: 4160/7200Y
15KV Class: 7200/12470Y
7620/13200Y, 7960/13800Y
• Secondary (All KVA Sizes)
120/240

Three Phase

• Primary (△)
5KV Class: 2400, 4160, 4800
8.66KV Class: 7200
15 KV Class: 12000, 12470, 13200, 13800
• Secondary
208Y/120, 240△, 480Y/277



DC Link Choke

5 KV Class

SPECIALTY MAGNETIC COMPONENTS

Also see our catalog pages under AC POWER SOURCES and DC POWER SOURCES.

Transformers

• Convection, forced air or water cooled.
• Dry type, liquid filled, cast-resin.
• Low voltage, high voltage to 300KV.
• High current to 20,000 Amperes.
• High frequency to 10KHz.
• Low temperature rise, high efficiency.
• Ferroresonant transformers - conventional constant voltage and harmonic-neutralized.
• Computer grade isolation transformers to 0.001 picofarads.
• Low capacitance transformers, electrostatic shielded.
• High reactance transformers - short circuit current limited.
• Modulation (Output) transformers to 50KW.
• Rectifier and filament transformers.

Inductors

LC Series - Link Chokes (DC)

Designed for use as a smoothing inductor in the DC link between rectifier and inverter in variable-speed AC motor drives from 15 to 1000 HP. Dry type, 600V class.

LR Series - Line Reactors (AC)

Designed for use as a line reactor in the three phase input lines supplying variable-speed AC motor drives from 15 to 1000 HP. Dry type, 600V class; three phase; 50Hz and 60Hz.
Other specialty inductors include:
• AC, DC.
• Iron-core, air-core.
• Linear, swinging.
• AC current limiting reactors.
• AC power factor correction reactors.
• DC filter chokes.
• AM modulation reactors.

Saturable Reactors:

Low voltage, High voltage to 15 KV. Sizes to 1000 KVA.

Split Bobbin Transformers

The use of a Split Bobbin allows winding to be nonconcentric (side-by-side), consequently high isolation is achieved at low cost.

- Better insulation — 2500 VRMS hipot is standard.
- Lower capacitance — no need for electro-static shield.

Also available:

- **Units with 4000 VRMS hipot**
- Steel covers
- Flexible leads
- Multiple outputs
- Tapped primaries
- Quick disconnect terminals
- Consult factory for any other configurations you may require

CUSTOM PROTOTYPES AVAILABLE WITHIN ONE WEEK. CHECK OUR LOW PRICES.

WE SPECIALIZE IN POWER TRANSFORMERS FOR MEDICAL ELECTRONICS (PATIENT ATTACHED EQUIPMENT) FOR DOMESTIC AND FOREIGN APPLICATIONS

112 FLORIDA STREET, FARMINGDALE, NY 11735 • (516) 293-0475 **J M Transformer Co., Inc.**

Split Bobbin PC Board Transformers

The use of a Split Bobbin allows winding to be nonconcentric (side-by-side), consequently high isolation is achieved at low cost.

- Better insulation — 2500 VRMS hipot is standard.
- Lower capacitance — no need for electro-static shield.

Please note that the standard items listed below utilize 6 or 8 pins, while 12 pins are available. We would like to quote your more complex requirements . . . you may save cost and space by combining two less complex Transformers into one.

We would also be glad to quote your less complex requirements. For example, if only a Single Primary and Single Secondary are needed, you can save considerable cost by utilizing only 4 Pins.

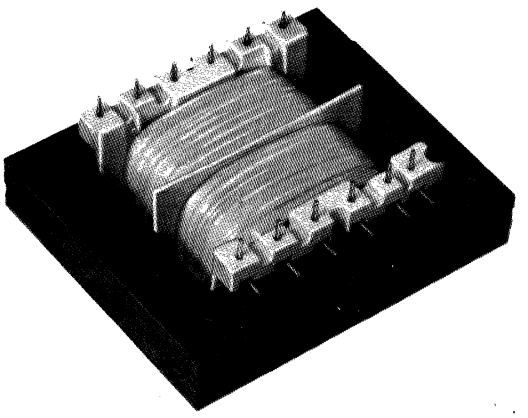
J M Transformer Co., Inc. 112 FLORIDA STREET, FARMINGDALE, NY 11735 • (516) 293-0475

Low Profile Split Bobbin PC Board Transformers

• Only 1.13″ high

XL Series transformers offer a particularly low profile for 18VA, allowing for 1.25″ card spacing.



The use of a split bobbin allows winding to be non-concentric (side-by-side), consequently high isolation is achieved at low cost.

- Better Insulation — 2500 VRMS hipot is standard.
- Lower Capacitance — no need for electro-static shield.

If the standard items shown here do not fit your requirements, we would be glad to quote on your custom needs. Often this can save space and considerable cost.

BOBBIN WINDING

PRODUCTION TESTING

LENCO, dedicated to transformer design, product improvement, cost reduction and fast delivery to meet your specifications and most critical production schedule. An endless variety of types, sizes and performance capabilities for a wide variety of industries.

Experienced personnel with specially developed electronic skills for an exacting technology to meet the most critical requirements. Manufactured to conform to UL, CSA, VDE, FCC-Part 68, etc.

Our specialty is your special application and we invite you to send or call for your custom requirements. For no obligation quotes, engineering, design consultation and manufacture, contact Lenco, the performance people.

LAYER WINDING MACHINES

AUDIO Impedance matching — Isolation —Broad frequency response — Low insertion loss — FCC Part 68.

CONSTANT VOLTAGE Regulating transformers built to your specifications for DC power supplies or low distortion AC.

CONTROL Custom designed to UL, VDE, CSA, etc. specifications.

CONVERTER High Conversion efficiency from DC input to filtered DC out. Toroidal, Laminated, Ferrite, (Switch-Mode) etc.

CURRENT Toroidal, Laminated, Core, Impregnated, or Encapsulated.

FILAMENT Dry type, Laminated core.

HIGH TEMPERATURE Vacuum impregnation with temperature material to 200°C. Epoxy encapsulated.

INDUCTORS Filter, A.C. Noise filtering, Switch-mode.

INPUT AND OUTPUT Designed to your specifications.

ISOLATION Audio, Step-down, Step-up, Foil electrostatic shielded, Electromagnetic shielded.

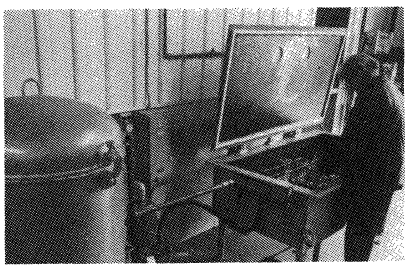
LOW PROFILE PC mount, Split bobbin, Vacuum varnish or epoxy impregnated.

MEDICAL UL 544 Patient connected, or non-patient connected. Power.

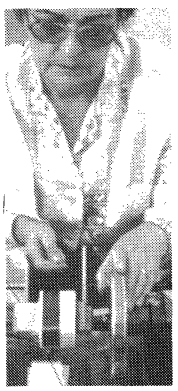
POT CORES PC mount, Frame mount, Encapsulated or Impregnated.

SWITCH-MODE POWER Dry type, Air cooled, Laminated or Ferrite.

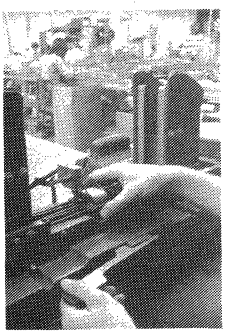
THREE PHASE 50-60-400 Hertz up to 1 KVA.



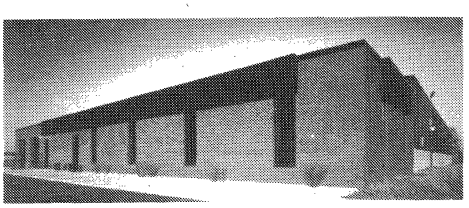
VACUUM IMPREGNATION SYSTEM



HAND WINDING



AUTOMATIC LAMINATING



Modern new 20,500 square foot facility for the production and manufacture of high quality transformers.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

MCI TRANSFORMER

MCI Transformer Corporation GUARANTEES DELIVERY

TOLL FREE:
1-800-MCI-TRAN

- **Delivery of 1 to 5 stock transformers within 48 hours**
- **Delivery of 1,000 transformers in four weeks**

IF we don't keep these promises, we will pay the freight on the delivery. Many manufacturers promise prompt delivery but no one else is truly guaranteeing delivery in this manner.

Our modern U.S. manufacturing facilities enable us to service promptly both large and small users. We maintain an extensive inventory of all items so that we can ship small quantities immediately from stock. Since all of our products are manufactured at one location, we can quickly respond to volume requirements and are able to hold our costs to an absolute minimum and pass these savings along to you.

STANDARD STOCK LINE MCI maintains an extensive inventory of Horizontal, Vertical and Low Profile printed circuit board transformers and quick-connect Power Transformers which are recognized under Underwriters Laboratories File No. E86403 (M). MCI promises "Guaranteed Delivery" of 1 to 5 transformers within 48 hours and 1,000 transformers in four weeks.

ENGINEERING AND CUSTOMER SERVICE Many times only one source is listed on an engineering blueprint. The next time you have a requirement, let us assist you. Perhaps you will be able to use one of our stock transformers. If so, you will benefit by saving substantially and having the convenience of off-the-shelf delivery. If your requirements cannot be satisfied by using one of our standard stock units, MCI will assist you in designing the exact transformer you require and, as always, at a competitive price. Start saving today—put MCI on all your transformer prints.

NEW PRODUCTS MCI was founded in 1959. Our experience and technology have enabled us continually to introduce the most innovative designs to accommodate the changing needs of our customers. MCI's encapsulated transformers, series 4-11, 4-12 and 4-15 are perfect examples. These transformers were designed for low power requirements for high volume users. Production of this series is highly automated and MCI can favorably compete with any source in the world, eliminating the need to purchase transformers off-shore. We are pleased to announce that we are introducing a new line of V.D.E. transformers for world wide use.

VALUE ANALYSIS You can be confident when you order an MCI transformer, as only the highest quality materials are ever used in all MCI products. All our transformers are made with strict quality control and each unit is inspected and tested at the end of each manufacturing operation and then tested 100% for output voltages and exciting current in order to comply with our rigid standards.

All MCI products are manufactured in the U.S.A. at one location in the most modern automated manufacturing facilities available. There are no hidden transportation costs from additional manufacturing facilities and no extended delivery times. MCI's decision to have only one location was made with you in mind so that we can offer you the fastest possible response time and the lowest prices in the industry.

You will enjoy dealing directly with MCI without having to deal with sales representatives or distributors. This is another way in which MCI cuts costs and reflects the savings directly in lower costs to you.

MCI is dedicated to bringing our customers only the best quality and service at highly competitive prices.

MCI eventually...why not now?

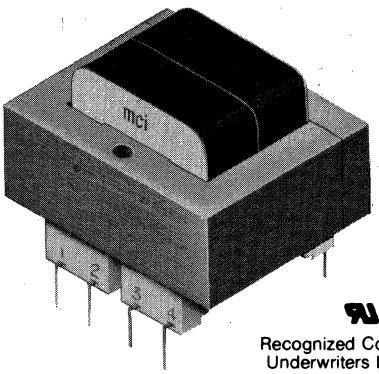
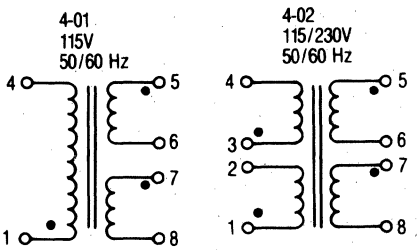
HORIZONTAL PC TRANSFORMERS

SERIES 4-01 & 4-02





Recognized Component
Underwriters Labs Inc.

2,500-volt RMS Hipot, available in a variety of sizes. Maximum operating temperature 130°C. Available with either single 115V, or dual 115/230V primary. MCI's pin configuration is designed for ease of connection in printed circuit boards. Heavier transformers are provided with mounting holes for additional mounting security. Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.

HOW TO ORDER A HORIZONTAL PC TRANSFORMER

MCI uses a Seven Digit Part Number

First Digit	4	MCI Product Identification
Second & Third Digits	01	Single 115V Primary
	02	Dual 115/230V Primary
Fourth Digit	2 to 7	Transformer size *(See current rating chart)*
Last three Digits	010 to 120	Secondary voltage *(See current rating chart)*

Example: 4-01-4016 is a 115V primary 6VA transformer with two 8 volt secondary windings to be used as either 16V CT or 8V.

HOW TO ORDER A QUICK CONNECT POWER TRANSFORMER

MCI uses a Seven Digit Part Number

First Digit	4	MCI Product Identification
Second & Third Digits	06	Single 115V Primary
	07	Dual 115/230V Primary
Fourth Digit	3 to 8	Transformer size *(See current rating chart)*
Last three Digits	010 to 120	Secondary voltage *(See current rating chart)*

Example: 4-06-6016 is a 115V primary 30VA transformer with 16V CT secondary.

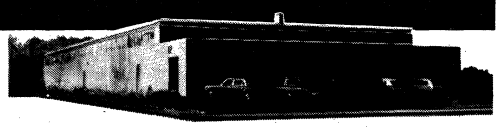
QUALITY TRANSFORMERS AT COMPETITIVE PRICES



Founded a quarter-century ago, MCI Transformer Corporation is an established leader in the manufacture of horizontal, vertical and low profile transformers for printed circuit boards. Recently, the line has been expanded to include quick-connect and encapsulated models.

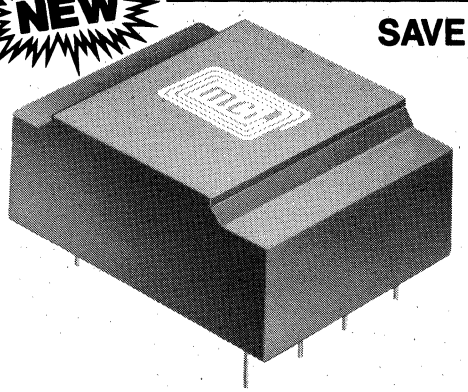
At MCI, the very latest production automation techniques are employed to ensure the highest possible quality at low competitive prices.

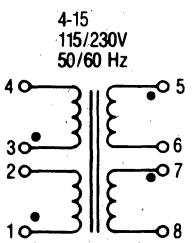
- Made in U.S.A.
- UL-Recognized
- In stock for fast delivery
- Custom designs available
- Shipped in protective vacuum-formed trays

LOW PROFILE PC ENCAPSULATED TRANSFORMERS SERIES 4-15

NEW

SAVE UP TO 40% IN VOLUME





Our encapsulated design offers high reliability because of its mechanical strength, electrical insulation and moisture resistance. The internal construction consists of 2 split bobbins which isolates the primary and secondary thereby eliminating any need for an electrostatic shield. The construction will pass requirements of U.L., C.S.A. and V.D.E.

VDE HORIZONTAL P.C. TRANSFORMERS

SERIES 4-41& 4-42

Series 4-41, 4-42

4000 Volt RMS Hipot. In a variety of sizes. Maximum operating temperature 130° C. Available with either 115V or dual 115/230V primary.

MCI's split bobbin and non-concentric winding provide better insulation and high signal isolation, thus eliminating the need for electrostatic shielding.

These transformers are designed to pass VDE's strict creepage distance requirements.

Adaptations of standard transformers are also available. Dots on schematics shown below indicate like polarity.

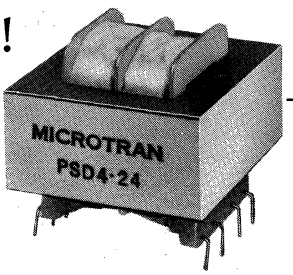
POWER TRANSFORMERS
PRINTED CIRCUIT

MICROTRAN company, inc.

SPLITFORM® split bobbin power transformers

For PC Board Solid-State Power, Control, and Instrumentation Applications

NEW!



Recognized Component Underwriters Labs Inc.

- Split Bobbin Construction
  - Center Flange Insulation Barrier
  - High Isolation for Low Leakage Applications
  - Low Capacitive Coupling Minimizes Line Noise and False Triggering
- 2,500V RMS Hipot
- 115V Single or 115/230V 50/60 Hz Dual Primary
- Dual Secondaries may be either Parallel or Series Connected
- Precision Spaced Molded-in Terminals
  - Terminal Numbers are Molded on Bobbin
- Class S 130°C Insulation
- Attractive Pricing — Superior Quality

POWER TRANSFORMERS
PRINTED CIRCUIT

MICROTRAN company, inc.

Flat Stack® low profile power transformers
115/230V 50/60 Hz

For Low Height PC Board Solid-State Power, Control, and Instrumentation Applications

- TWO SIZES
  6 VA Types 0.85″ high for 1″ Card Spacing
  12 VA Types 1.065″ high for 1¼″ Card Spacing
- SPLIT BOBBIN — Primaries and Secondaries Wound Side by Side.
  1500V Hipot.
  High Isolation for Low Leakage Applications.
  Low Capacity Coupling Minimizes Line Noise and False Triggering.
- HUM-BUCKING SEMI-TOROIDAL CONSTRUCTION
  Balanced Windings Reduce Magnetic Field Radiation.
- PRECISION SPACE MOLDED-IN TERMINALS
- DUAL PRIMARIES: 115/230V, 50/60 Hz.

POWER TRANSFORMERS
PRINTED CIRCUIT

MICROTRAN company, inc.

printed circuit power supply transformers

For Microprocessor Logic and Op Amp Power Supplies

PLUG-IN PC POWER TRANSFORMERS FOR +5V AND ±15V DC POWER SUPPLIES

For construction of low cost, miniaturized, regulated and unregulated DC power supplies for latest solid-state digital and linear circuitry. Permits packaging flexibility unobtainable with prepackaged power supplies. Low-profile, miniaturized construction permits close stacking of PC boards. Precision spaced molded-in terminals.

TRANSFORMERS FOR +5V DC SINGLE OUTPUT UNREGULATED AND REGULATED POWER SUPPLIES

* All primaries 115V 50/60 Hz except PCL6605 and PCL6610 which have 115/230V 50/60 Hz primaries.

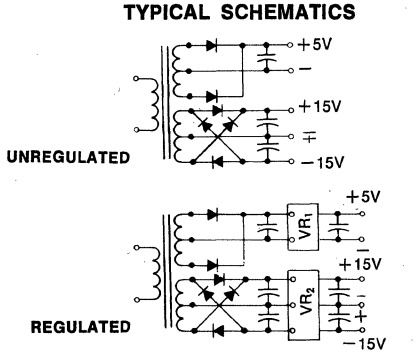
** +8.5 and ±20 DC output volts are for inputs to +5V and ±15V IC Voltage Regulator, see Typical Schematic-Regulated.
* 115/230V primary.

TYPICAL SCHEMATICS



ALL TRANSFORMERS ARE SUPPLIED WITH ENGINEERING BULLETIN LISTING SUGGESTED COMPONENTS

Bulletin provides typical schematics and suggested components for low-cost, miniaturized, unregulated and regulated power supplies. Regulated units have short circuit, thermal overload and overvoltage protection, and have the following typical specifications: Input 105-125V; Output ±0.1V; Load and Line Regulation 0.1% each; Ripple 1 mV RMS.

MINIATURIZED AUDIO TRANSFORMERS

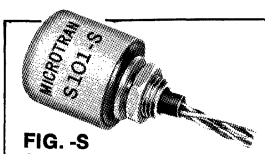

FIG. -S
SINGLE THREADED STUD MOUNTING
Double Mu-metal shielding. 3" color coded leads. 5/16"D. stud provided with nut. 5/8"D x 13/16" H. Wt. 0.55 oz.

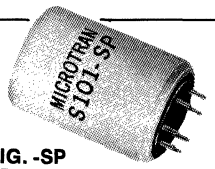

FIG. -SP
PRINTED CIRCUIT MOUNTED
Double Mu-metal shielded. 3/4" D x 1 1/16"H. 7-.040 pins 1/8" H. Wt. 0.62 oz.

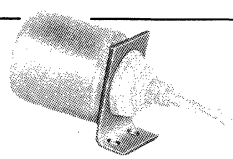

FIG. -FB
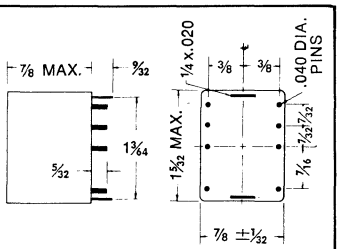
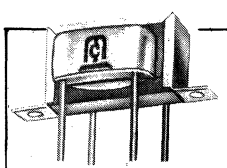
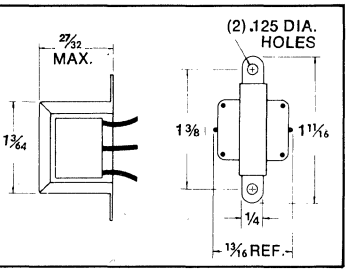
RIGHT ANGLE MOUNTING BRACKET
For mounting of -S series transformers. M.C. 3/8".

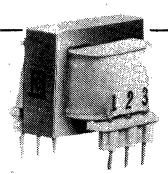
MOLDED M-M
To order add -M to Part No. For plug-in printed circuit applications. Epoxy resin provides resistance to extremes of ambient. Wt. 1.75 oz.



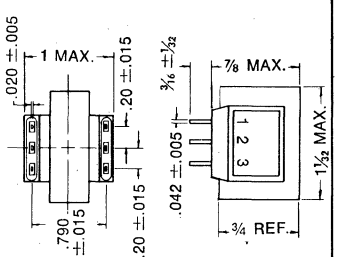


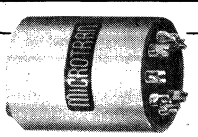
OPEN FRAME WITH CHANNEL M-FB
To order add -FB to Part No. Leads 4" long. #28 PVC Wt. 1.13 oz.



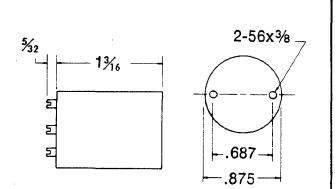


OPEN FRAME PRINTED CIRCUIT M-PC
To order add -PC to Part No. Units with more than 6 pins have 7 or 8 — .025 x .015 pins on .150 centers. Wt. 1.2 oz.





ALUMINUM CASED M-A
To order add -A to Part No. Supplied with 2-56 screws. Wt. 1.25 oz.



MICROPHONE/TRANSDUCER INPUT

FOR: PROFESSIONAL SOUND STUDIOS — BROADCAST MIXING CONSOLES — CONTROL AND INSTRUMENT AMPLIFIERS

EQUIVALENT TO IMPORTED EUROPEAN STUDIO GRADE TRANSFORMERS

- WIDE BANDWIDTH — BROAD FREQUENCY RESPONSE
- EXTREMELY LOW DISTORTION
- NEGLIGIBLE HUM PICK UP
- SUBMINIATURE SIZE
- EASE OF MOUNTING AND ORIENTATION
- POLARIZING VOLTAGE CONNECTION FOR CONDENSER MICROPHONES
- LOW MICROPHONICS
- ELECTROSTATIC SHIELDING

* Add -M, -PC, -A, or -FB to Part No. to designate construction.
• These items not available in -PC construction.
‡ For telephone line coupling or hybrid telephone line.
† Broadcast fidelity line matching transformer. Frequency response ±0.5 dB.

TELEPHONE INTERCONNECT TRANSFORMERS

MICROTRAN company, inc.

line coupling-hybrid-holding coils

FOR INTERCONNECT OF VOICE/DATA MODEM TERMINALS TO TELEPHONE LINES

Provides line isolation and matching — Prevents line imbalance — Wide dynamic signal capability — Low distortion
Permits Optimum use of Voice-Grade Telephone Lines for Broadband Data Signals — Designed to meet FCC Part 68

- Frequency Response: 300-3500 Hz ±0.5 dB
- Longitudinal Balance: Per FCC 68.310
- Impedance Matching: ±10% over entire frequency range
- Level: −45 dBm to +7 dBm
- Distortion: 0.5% Max.
- Return Loss: 26 dB Min.

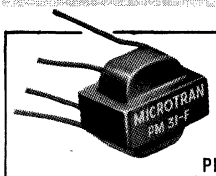
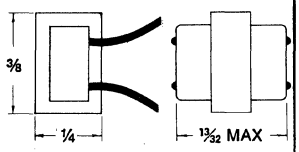
MINIATURIZED AUDIO TRANSFORMERS

PICO—ULTRA VERI-MINIATURE

OPEN FRAME PM-F

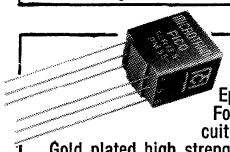


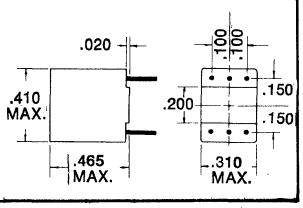


4 inch #30 Plastic color coded leads. Thorough resin impregnation and baking assures reliable life. To order add -F to Part No., i.e. PM33-F. Wt. .05 oz.

MIL Designation: TF6R21ZZ

MOLDED PM-M

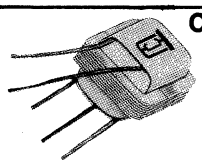


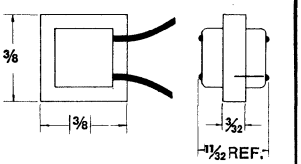


Epoxy molded. For printed circuit application. Gold plated high strength nickel alloy leads .020 x ¾" for reliable soldered joints and high-density welded lead packaging. Wt. .1 oz. To order add -M to Part No., i.e. PM12-M.

MIL Designation: TF5R21ZZ

OPEN FRAME UM-F

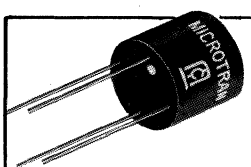


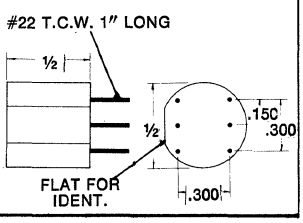


To order add -F to Part No., i.e. UM22-F. Wt. 0.08 oz. 4" color coded leads.

MIL Designation: TF6R21ZZ

MOLDED UM-M

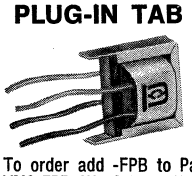


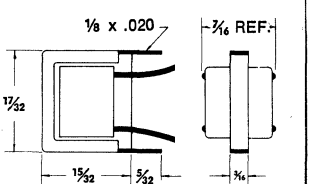


To order add -M to Part No., i.e. UM22-M. Wt. 0.14 oz.

MIL Designation: TF5R21ZZ

PLUG-IN TAB MOUNTED CHANNEL VM-FPB

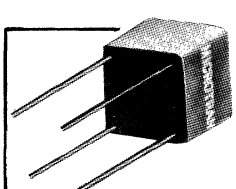


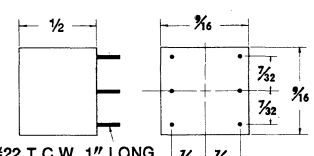


To order add -FPB to Part No., i.e. VM2-FPB. Wt. 0.2 oz. 4" color coded leads.

MIL Designation: TF6R21ZZ

MOLDED VM-M





Epoxy molded. Wt. 0.25 oz. To order add -M to Part No., i.e. VM2-M.

MIL Designation: TF5R21ZZ

PICO-MINIATURE — PM SERIES

Frequency Response ±2 dB 300 Hz to 100 kHz†

For maximum utilization of space in miniaturized printed circuit board applications. Manufactured per MIL-T-27.

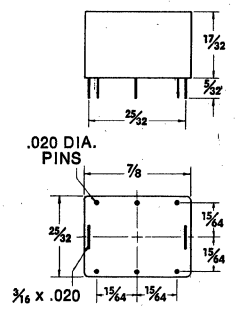
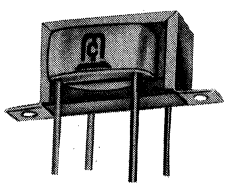
MINIATURIZED AUDIO TRANSFORMERS

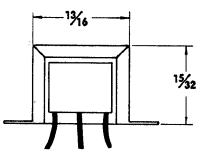
MICROTRAN company, inc.

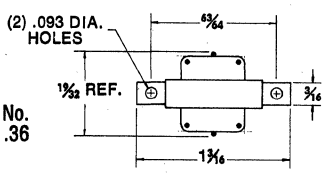


MOLDED MM-M

To order add -M to Part No. For plug-in printed circuit applications. Epoxy resin provides resistance to extremes of ambient. Wt. .5 oz.

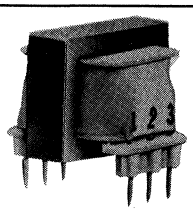


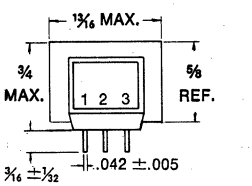


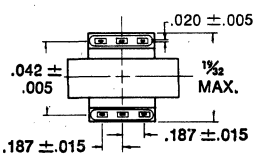


OPEN FRAME WITH CHANNEL MM-FB

To order add -FB to Part No. Leads #28 PVC 4" long. Wt. .36 oz.







PRINTED CIRCUIT — DCM SERIES

Industrial/Commercial grade miniature printed circuit transformers. Rigid terminals provide fixed mounting centers usually found in expensive molded transformers. Wt. .5 oz.

MICRO-MINIATURE TRANSFORMERS MM & MMT SERIES

Primary and secondary windings may be interchanged to obtain required impedance matching. These units can be used as input, interstage, output, isolation and other impedance matching requirements. Also available in hermetic construction.
The low profile design of this series makes them ideal for use on plug-in printed circuit boards.

Part No.	Primary Impedance	Secondary Impedance	Pri. Unbal. mA DC	Oper. Level dBm	Frequency Response ±2 dB

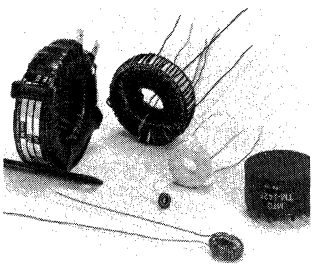
EEM PRODUCT SELECTION GUIDES

Use the EEM Product Selection Guides. There are 34 Guides in this edition of EEM. See page 2 (A•2, B•2, C•2, D•2) of each volume to locate the Product Selection Guides that pertain to your needs.

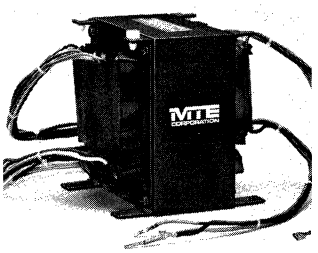
TRANSFORMERS

Toroidal



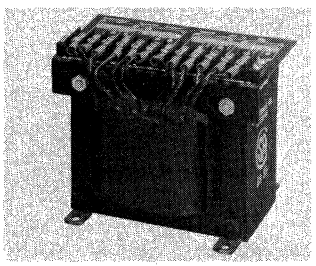
Power, inductor, reactor, current, audio.
Sizes from .125″ I.D. to 5.5″ O.D. automatic winding, larger sizes by special procedures.
High power to weight ratio.
Power to 100 VA.
Standard or custom core.
Impregnated, encapsulated.
Hermetically sealed.

Ferro-Resonant



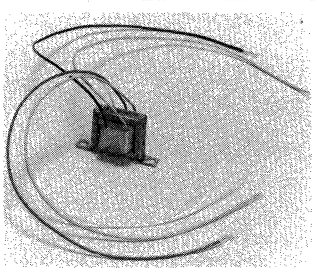
Excellent for DC power supplies.
Nearly square wave outputs.
Minimum additional components required for constant voltage output.
Open or closed construction.

Power

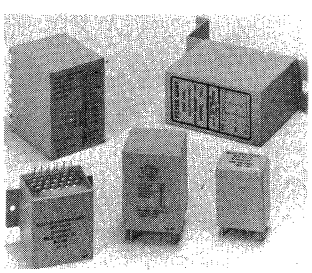


Single phase to 20 Kva. Three phase to 50 Kva.
Frequency up to 1000 Hz — Voltage to 5000 VAC
Multiple primaries and secondaries with or w/o Taps.
Electrostatic shielded windings available.
Thermal cut offs optional.
Choice of insulation, class or temperature rating.
PCB, encapsulated, open, or hermetically sealed.
U.L. to 5 Kva — CSA to 15 Kva.

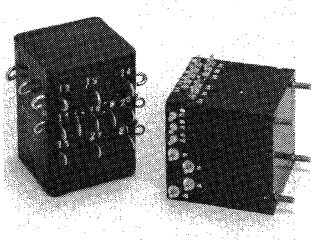
Audio



Frequencies from 25 Hz to 20,000 Hz.
For impedance matching, isolation, low-insertion loss, broad frequency response.
Interstaging and other custom designs to application.
PCB, encapsulated, open and hermetically sealed versions.



Power Supplies



Military Hi-Rel

The 4700 Series "Hi-Pot" Tester is designed to stress the insulation under test to a predetermined voltage, and indicate a non-conforming condition.

Mec "Hi-Pot" Testers
Double as Bench Instruments

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

MPI is one of the most reliable suppliers, on a large scale, of transformer and magnetic components to the computer, data processing, communications & medical and recreational electronics OEMS. All units meet MPI's stringent QC standards and are UL CSA & VDE listed as required.

The product categories below provide general specification information for our basic product lines. However, our ability to design and manufacture custom components, to your specs, makes us the industry's true "super source".

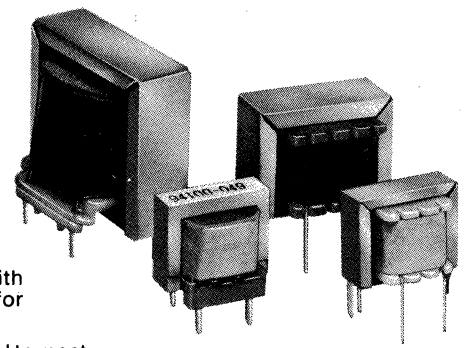
AUDIO/MATCHING TRANSFORMERS



MPI's miniature audio transformers are highly reliable and extraordinarily economical. All can be supplied vacuum epoxy impregnated with either standard leads or plug-in printed circuit construction. There are several standard bobbins with various pin spacings permitting optimum use of voice-grade telephone lines for broadband data signals.

Our newest line of extremely small telephone coupling transformers were designed to meet FCC Part 68 specifications for use with telephone equipment, modems and a variety of communications products.

They feature a frequency response of 300-3500 Hz ± 0.5dB; wide dynamic signal level of -45dBm to +7dBm; low distortion (0.5% max.); impedance matching of ± 10% over entire range; return loss of 16 dB min.

Depending on your requirements, any of several standard cores can be used in the construction of specific high quality designs.

Custom designs for your special requirements necessitating other ratings and construction can be met by our MPI design engineers.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

high voltage components

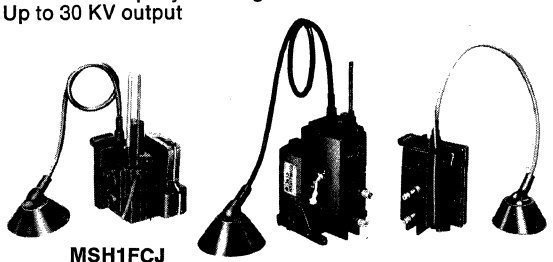
MURATA ERIE NORTH AMERICA, INC.

Miniature Flyback Transformers

For 14″-20″ color TV and data display

FEATURES

- Integral HV multiplier circuitry
- Small size
- HV resistant epoxy moldings
- Up to 30 KV output

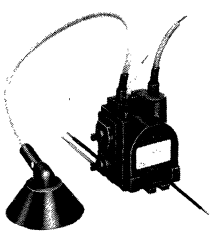


MSH1FCJ MSH1FBM MSH1FBT

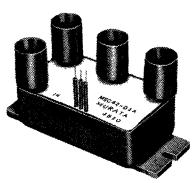
FBT, High Voltage Capacitor and Focus Adjusting Resistor Integrated type.

High Voltage CR Blocks & Multipliers

MSC26-01 (for CRT Display)



MSC42-01 (for Projection TV)



MSL4539 (for TV Camera)

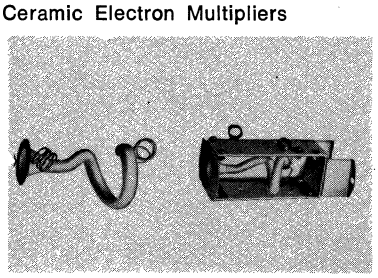
CERATRON

Ceramic Electron Multipliers



These units are completely solid-state and may be substituted for standard vacuum-type electron multipliers in a variety of applications including ion, gamma ray, electron, photon and soft x-ray detection. They offer high gains to 10^6 min. and are extremely linear at up to 1 microamp. Noise figures are very low.

NP-4951	1B	300 CT	180.0	3.0	11.00	900	300

NOTES: 1) Electrical specifications are at 25°C.
2) Amp-micro second (A μSEC) rating of primary equals Volts- Micro Second (V μSEC) rating of secondary when secondary is terminated in rated resistance
3) Maximum operating temperature 130°C
4) Peak sense current = 20 A max. @ 40% duty cycle

5) $V_{OUT} = \frac{Ip\ (Rt)}{Ns}$

Ip = Primary current
TT = Terminating Resistance
NS = Secondary Turns

WIDEBAND BALUN TRANSFORMERS

North Hills

Baluns, consisting of one unbalanced primary and one DC-isolated center-tapped balanced secondary winding, transfer power bi-directionally and are matched in both directions.

North Hills' baluns are precision-engineered for low insertion and return losses. Bandwidths extend from low-frequency cut-off (LCO), where response is down no more than 3 dB with respect to that at mid-band to high-frequency cut-off (HCO), where the VSWR does not exceed 1.25. Mid-band insertion loss < 0.5 dB.

50:200 75:300	0510 1508	Balanced to balanced, DC coupled

APPLICATIONS

- Impedance matching between balanced and unbalanced circuits
- Measurement/test system load matching
- Computer Local Area Network
- Cable impedance matching
- Antenna coupling
- DC isolation and common-mode noise rejection

FEATURES

- Extremely wide, flat frequency response
- Broadest selection of products available from stock
- 120 dB isolation at power frequencies
- Low VSWR (< 1.25) and flat loss (< 0.5 dB)

1120-CC	75:75	dc — 25 MHz	40 dB

CALL US ABOUT YOUR SPECIAL APPLICATIONS OR WRITE FOR OUR FULL CATALOG

APPLICATIONS

- Studio and remote video lines
- Security systems/CCTV
- Industrial process control systems
- Computer data lines
- Local Area Networks
- Medical equipment

FEATURES

- Eliminates data/video transmission line problems due to:
  - — induced common-mode noise (hum)
  - — differences in ground potentials
- Extremely wide bandwidth
- Insulated BNC connectors standard
- 120 dB isolation at power frequencies
- 500 Vrms withstanding voltage, winding to winding to case
- Flat frequency and linear phase response

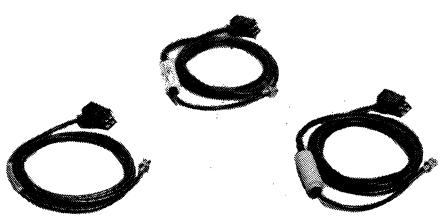
SPECIAL IBM CABLING SYSTEM BALUNS



APPLICATIONS

Low insertion loss interconnection of coaxial cables of different impedances:

- Data transmission cabling/LANs
- Communications systems
- Test/measurement instrumentation

FEATURES

- Small size
- Standard BNC conectors in any combination of male/female
- Bi-directional matching and power transfer
- 5-Watt power capacity
- Phase reversing available
- Special 93:124 ohm models available for telecommunication/data line interfacing

WIDEBAND POWER DIVIDERS/COMBINERS, HYBRID TRANSFORMERS, & TERMINATIONS

North Hills

POWER DIVIDERS/COMBINERS

0.2 - 110 and 30 - 225 MHz
2, 4, and 8-way
50 and 75 ohms

Series 01 and 10 Power Dividers are designed for low power applications in the 0.2 to 110 and 30 to 225 MHz frequency ranges.
Hybrid Junction Techniques are employed to assure superior isolation and minimal insertion loss. VSWR is optimized at all ports.
50 and 75 ohm impedances are standard. Other impedances available on special order.

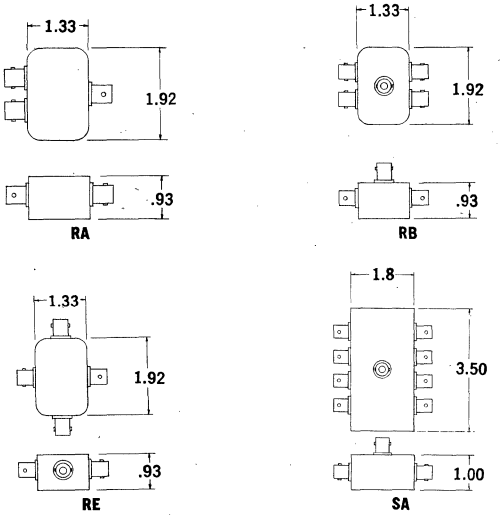
CASE STYLES



BNC Connectors are standard. Other connectors available on special order. Stud mounting standard.

Different case styles, including printed circuit types with solder terminals, available on special order.

SPECIAL UNITS — 10 Hz to 1 GHz

In addition to our standard lines, North Hills custom designs to specific requirements. Examples of these include:

- Active unity – or high-gain power splitters, adders and combiners.
- High power dividers.
- Resistive dividers from dc to 500 MHz
- Power dividers for video applications with response down to 1 kHz.
- Non-standard impedances.

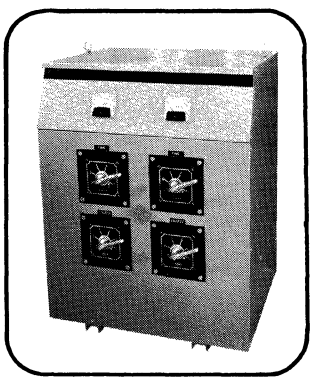
NWL ...the source for industrial and electronic transformers

FROM WATTS to MEGAWATTS

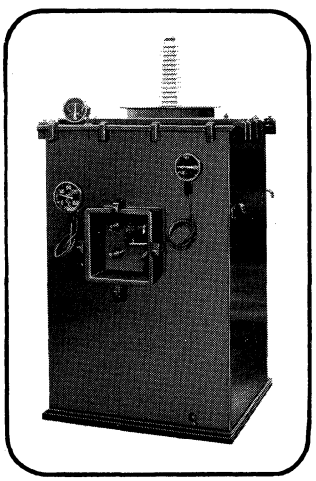
Since 1929, NWL has consistently been in the forefront of transformer design and manufacture.

High voltage, high frequency and high current transformers are particular strengths at NWL — whether for prototype, standard or special applications.

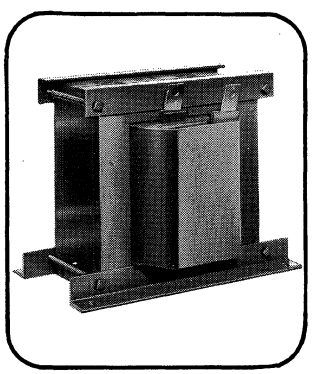
There's another reason you should look to NWL for solutions to your specific transformer problems. We've never hesitated to tackle the tough design problems head-on. In fact, NWL's technological superiority is a recognized fact in the precipitator, furnace, desalting, nuclear, and other fields requiring high technology.



Heating transformers for resistance and induction furnaces

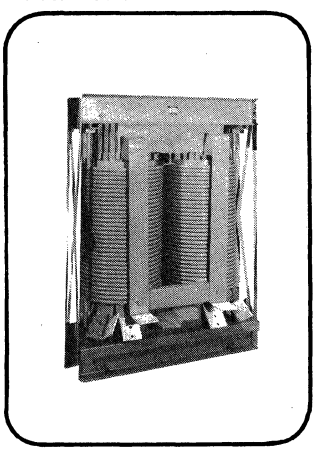


Oil-filled, high voltage Transformer/Rectifier Sets

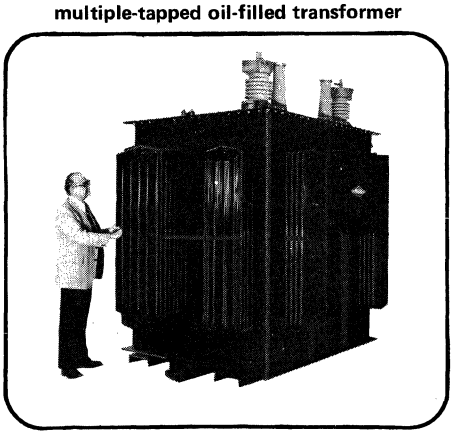


Current limiting reactors

High power and high current water cooled transformers



15 KV Class, 3,000 KVA-equivalent multiple-tapped oil-filled transformer



NWL ...the source for:

TRANSFORMERS ● Furnace ● Filament ● Heating ● Lighting ● SCR Controls ● Plate ● High Frequency ● Instrument ● Phase Changing ● Welding ● High Voltage ● Testing ● High Reactance ● Output ● Constant Voltage

PLUS ● Saturable Core Reactors ● Chokes ● Packaged Controls ● AC Reactors ● Air Core Reactors

MANUFACTURING RANGE

Up to 200 KV
1 ma to 50,000 AMP
4 Hz to 50 kHz
1 VA to 6,000 KVA
Dry, Oil-Filled, Silicone Fluid-Filled, Water Cooled, and Epoxy Cast Units Available.

NWL TRANSFORMERS

Rising Sun Road ● P.O. Box 358
Bordentown, N.J. 08505
(609) 298-7300 ● TWX: 510-685-3645
Call us for quote or specs

NWL also designs and manufactures custom built AC/DC power supplies, laboratory and industrial types. See our ad under DC POWER SOURCES.

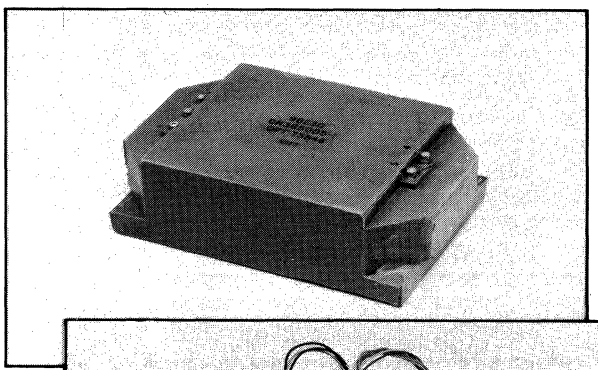
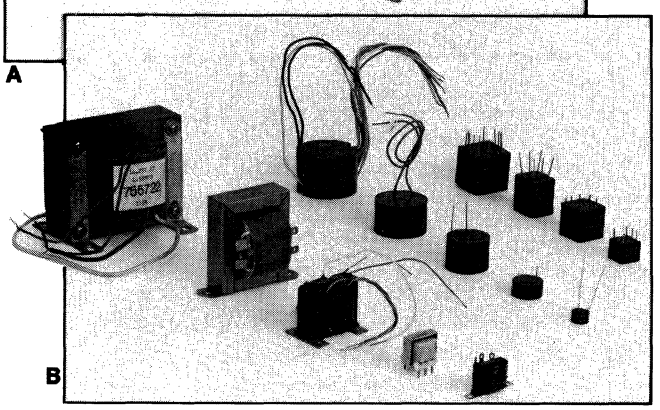
CUSTOM MILITARY INDUSTRIAL HIGH-TECH TRANSFORMERS



A



B

A Encapsulated C-Core MIL-T-27 Grade 5 Transformer utilizing silastic compound

B Grade 5 Encapsulated Transformers

IF YOUR MAGNETICS APPLICATIONS INCLUDE:

MILITARY

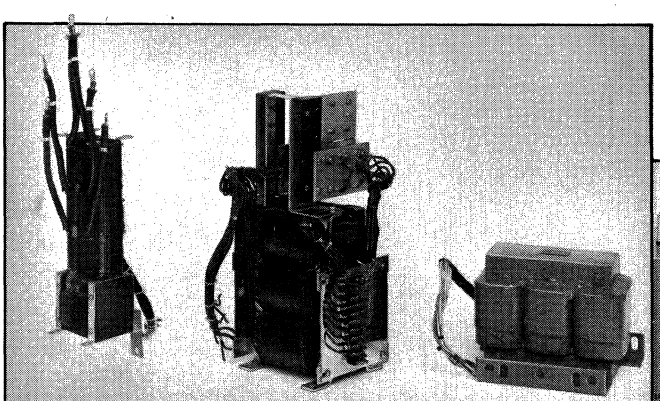
- Ground Communications
- Airborne Communications
- Electronic Counter Measures
- Sonar
- Secure Communications
- Space Applications

INDUSTRIAL

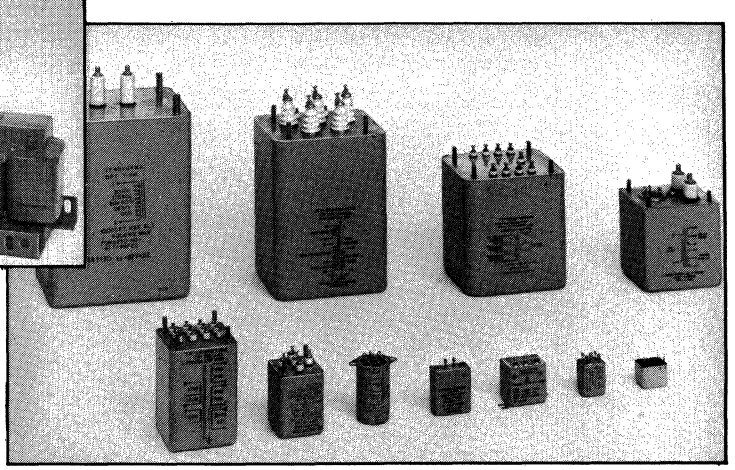
- Computer
- Computer Peripheral
- Industrial Control Equipment
- High-rel Power Supply
- Satellite Communications
- Local Area Networking

OPT Industries is ready to serve you with its experienced engineering and manufacturing staff. Modern facilities having the latest manufacturing and test equipment, are supported by our engineering staff utilizing CAD optimization techniques combined with the experience acquired as a result of approximately 3500 prior designs. Our experience in designing product to meet the requirements of MIL-T-27, MIL-STD-981, UL/CSA and VDE specifications are your assets.

OPT specializes in designing and building both low and high frequency transformers for severe environmental and service applications utilizing state of the art polymer and silastic encapsulating/potting materials technology.



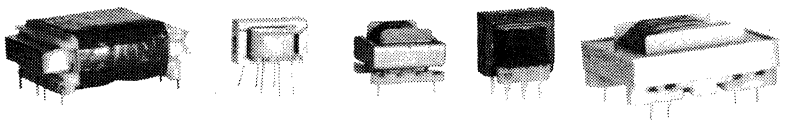
Computer and Computer Peripheral Transformers



Grade 4 Hermetically Sealed Transformers

TTC SERIES
COUPLING TRANSFORMERS - HYBRID TRANSFORMERS - HOLDING COILS

The **TTC SERIES** has been developed to meet telephone interconnect, coupling, matching and bridging requirements for use in voice, instrumentation and modem applications. **This series meets FCC PART 68 requirements.**

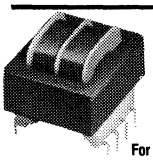


For Details See A-2214 & A-2215

DP SERIES
ENCAPSULATED AUDIO TRANSFORMERS

The **DP SERIES** is cost effective for applications involving severe environments. This series is tested to the requirements of **MIL-T-27** and several part numbers meet **FCC PART 68.**

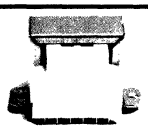
For Details See A-2216



3-FLANGE BOBBIN POWER TRANSFORMERS
UL CLASS B INSULATION SYSTEM
UL CLASS II & CLASS III TRANSFORMERS - FILE #E95844
UL GENERAL PURPOSE TRANSFORMERS - FILE #E91239

The **3F SERIES** offers 2500V RMS dielectric breakdown testing primary-to-secondary (side-by-side winding type).

For Details See A-2219

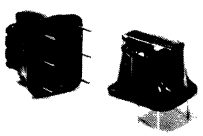


PEP SERIES
UL-1411 RECOGNIZED POWER TRANSFORMERS

This series complies with the safety requirements of most **WORLDWIDE AGENCIES** (UL, CSA, Europe-IEC 65 and Japan-MITI) including 4000V RMS dielectric breakdown testing primary-to-secondary.

FILE NUMBER
E59673
TAMRADIO

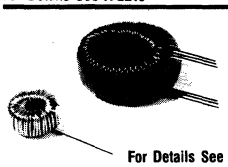
For Details See A-2218



STT SERIES
ENCAPSULATED SCR AND TRIAC TRIGGER TRANSFORMERS

The **STT SERIES** provides line isolation in SCR and Triac controlled circuits. **STT TRIGGER** transformers pass **2600V RMS** dielectric breakdown testing and are completely encapsulated for applications involving severe environments.

For Details See A-2216



POWER AND NOISE ABSORBING INDUCTORS

The **SKC SERIES** of toroidal power inductors are gapped for energy storage circuits with DC ratings from **5 to 50A DC.**

The **SKL SERIES** is functionally gapped for circuits requiring high "L" at low DC amps and nominal "L" at rated DC amps.

The **SKP SERIES** is designed on powered iron toroidal cores for RFI and EMI filtering and noise absorbing applications.

For Details See A-1265

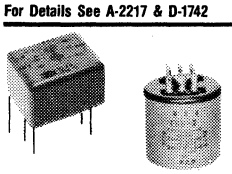
WALL PLUG-IN AC TO DC POWER SOURCES

This series of wall plug-in AC-to-DC battery chargers, battery eliminators and power supplies are available in a complete variety of input plug-in styles and comply with worldwide safety agency requirements.

AC-to-AC Wall Plug-in Transformers Are Available

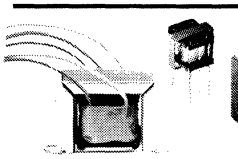
FILE NUMBERS
UL E82180
CSA LR36236
VDE F-7969-331
TAMRADIO

For Details See A-2217 & D-1742



PROFESSIONAL AUDIO TRANSFORMER SERIES

This series is widely used in high performance applications and meets most requirements of communications, broadcasting, recording and measuring apparatus. Available in solder lug, lead and printed circuit mounting styles; these transformers are metal cased. Several part numbers are electrostatic and MU-metal shielded.

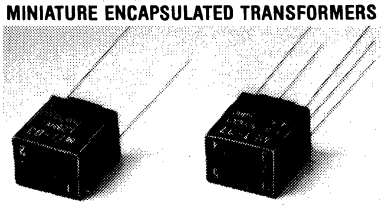


ATT SERIES
AUDIO TRANSFORMERS

These cost effective, volume produced transformers are available for impedance matching circuits and sound distribution systems. They are available as printed circuit, solder lug and lead styles.

Quality magnetic components at competitive prices . . . including COILS, POWER & AUDIO TRANSFORMERS, INDUCTORS, PULSE TRANSFORMERS, NOISE SUPPRESSION COILS, DC-DC CONVERTER TRANSFORMERS, PLUG-IN BATTERY CHARGERS and SWITCH-MODE POWER SUPPLY TRANSFORMERS & INDUCTORS. Our diversified manufacturing facilities are located in Taiwan, Malaysia and Japan. For details on standard and special requirement products, pricing and delivery—contact our headquarters.

MINIATURE ENCAPSULATED TRANSFORMERS



Small Size . . . . . 0.310" x 0.410" X 0.465"
Gold Plated Leads . . . . . 0.020" Nickel
Response . . . . . ±2dB, 300 Hz to 100 KHz
Impedance Range . . . . . 3.2 to 200K Ohms
Meets Requirements of MIL-T-27 as TF5S21ZZ

STT SERIES
ENCAPSULATED SCR & TRIAC TRIGGER TRANSFORMERS

The **STT SERIES TRIGGER TRANSFORMERS** are designed for low cost source isolation in half and full wave **SCR** or **TRIAC** control circuits. The **STT TRIGGER TRANSFORMERS** are encapsulated for environmental protection and pass **2600 V RMS** dielectric breakdown testing.

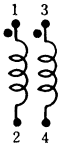

DIAGRAM 2

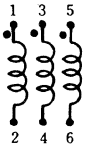
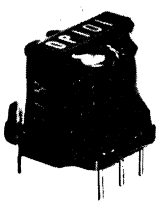


DP SERIES ENCAPSULATED AUDIO TRANSFORMERS

The **DP SERIES** of encapsulated audio transformers are cost effective for applications involving severe environments. Completely encapsulated, these small audio transformers eliminate environmental and board washing problems associated with open style transformers. The environmental quality of the **DP SERIES** is established through testing for humidity, immersion, solvent resistance and temperature cycling to the exacting reqirements of MIL-T-27. Several part numbers meet the requirements of **FCC PART 68** for telephone or modem applications. All **DP SERIES** audio transformers have frequency response characteristics within ±2dB from 200 Hz to 20 KHz.

EI 19 DP SERIES



+ Meets requirements of **FCC PART 68**
*Insertion loss 0.9db typical and frequency response ±0.1db, 300 to 3400 Hz and with electrostatic shield.

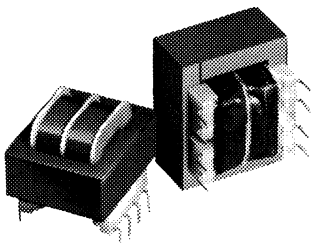
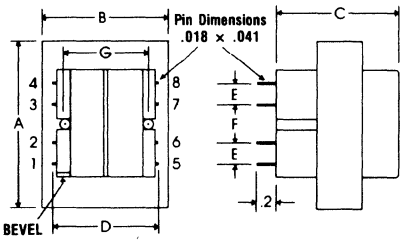
3F SERIES — 3 FLANGE BOBBIN PRINTED CIRCUIT BOARD POWER TRANSFORMERS

The **3F SERIES POWER TRANSFORMERS** are designed to include the most desirable features required for printed circuit board mounted applications. The 3F Series is constructed on a three flanged bobbin which is molded with UL listed material providing low capacitive coupling without electro-static shielding.



- **UL 1585 Class II & III Transformers — File No. E95844.**
- **UL General Purpose Transformers — File No. E91239.**
- **UL Class B Insulation System**

. . .**2500 VAC Hipot, Primary to Secondary Isolation**
. . .**115V Single or 115/230V Dual Primary**
. . .**Terminal Numbers are Molded on Bobbin.**
. . .**Complies with Most UL Safety Standards.**



NOTE: #4 Clearance Hole — 2 Places

3 FLANGE BOBBIN TRANSFORMER FOR UNREGULATED & REGULATED POWER SUPPLIES

The **LPP SERIES LOW-PROFILE PLUG-IN POWER TRANSFORMERS** offer the circuit designer a variety of options including dual output which may be connected in series or parallel, secondary voltages for unregulated or regulated power supplies, and dual output voltages.

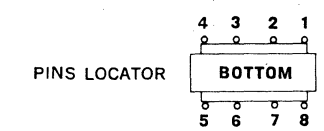
SIZE
TOTAL SERIES VOLTS



Paraline manufactures a wide variety of power transformers. They are stocked in 11 different sizes with 32 available secondary voltages totaling over 1600 different types.

There are five general series designations, each series designed to suit the requirements of your particular application.

A brief description of each series is as follows:

- The "SS" series has a single 115V primary and a single center-tapped secondary. Also available with a 230V primary.
- The "CS" series has a single 115V primary and two identical and separate secondaries. Also available with a 230V primary.
- The "DS" series has dual primaries for 115V or 230V operation and two identical and separate secondaries.
- The "MS" series has dual primaries for 115V or 230V operation and two center-tapped secondaries designed for 5V and 15V logic and OP amp power supplies.
- The "TT" series includes a number of coupling transformers, holding coils, and telephone associated devices for use in interconnective data modem terminals.

All Paraline stock power transformers may be used for 50 Hz or 60 Hz applications.

PARALINE CS SERIES

THE PARALINE CS SERIES WITH STANDARD 117V (50-60 Hz) PRIMARIES IS AVAILABLE FROM STOCK WITH SINGLE PRIMARY AND DUAL SECONDARY 6 PIN PRINTED CIRCUIT CONFIGURATION.

PARALINE
TRANSFORMER SPECIALISTS

The Paraline DLP & MLP Series are available in sizes 4, 5, & 6 with dual primary and dual secondary 12 pin printed circuit configuration. All have 2 separate center tap secondaries.

Available total series voltages and current ratings of secondaries.

LOW PROFILE SPLIT BOBBIN PRINTED CIRCUIT POWER TRANSFORMERS

- Low profile — allows closer printed circuit board stacking
- Split bobbin construction — center flange insulation barrier provides 2500 VRMs Hipot — non concentric coil winding results in low interwinding capacitance, eliminates need for electro-static shielding.
- Class S (130°C) insulation system
- Single 115V and dual 115V/230V primaries are standard.
- Dual secondaries for variety of utilization
- 12 pin bobbin design increases available options for multi-winding special orders
- Low regulation
- **Units are inspected and tested 100%**
- **Low prices — no minimum quantity requirements**

LOW PROFILE SPLIT BOBBIN MICROPROCESSOR PRINTED CIRCUIT POWER TRANSFORMERS

- Low profile — allows closer printed circuit board stacking
- Split bobbin construction—center flange insulation barrier provides 2500 VRMs Hipot—non concentric coil winding results in low inter-winding capacitance, eliminates need for electro-static shielding
- Class S (130°C) insulation system
- Single 115V and dual 115V/230V primaries are standard
- DC output combinations — ±12 and 5V or ±15 and 5V rated at the regulator output with allowance for line variations up to ±13%
- Packaging Flexibility
- Units are inspected and tested 100%
- Low prices — no minimum quantity requirements

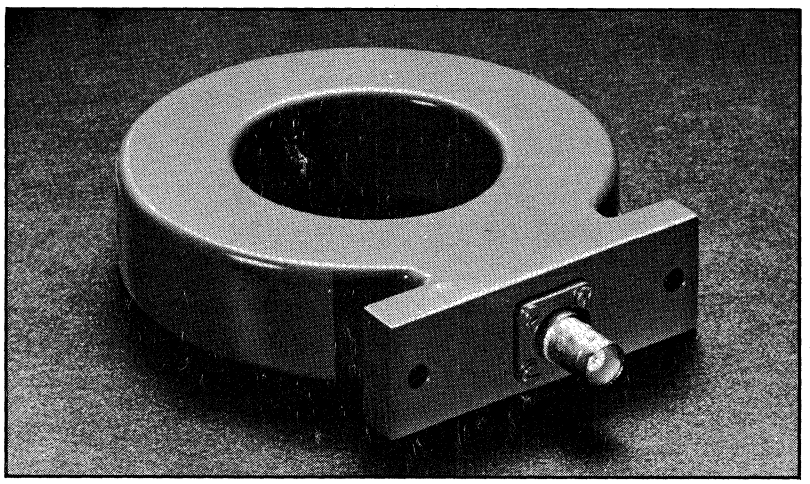
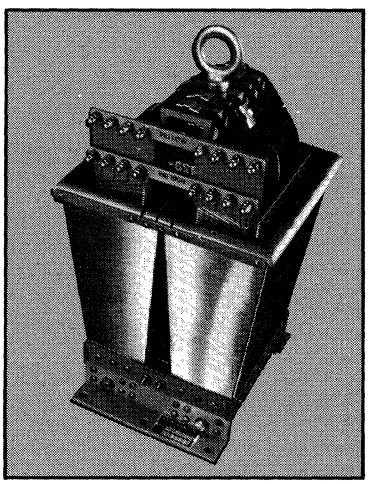
PEARSON ELECTRONICS, INC.





Wide Band, Precision Current Monitor Transformers

With a Pearson current monitor and an oscilloscope, you can measure pulse or ac currents from milliamperes to kiloamperes, in any conductor or beam of charged particles, at any voltage level up to a million volts, at frequencies up to 250 MHz or down to below 1 Hz.

The monitor is physically isolated from the circuit. It is a current transformer capable of highly precise measurement of pulse amplitude and waveshape. The one shown above, for example, offers pulse-amplitude accuracy of + 1%, − 0% (typical of all Pearson current monitors), 20 nanosecond rise time, and droop of only 0.5% per millisecond. Three db bandwidth is 1 Hz to 35 MHz. Whether you wish to measure current in a conductor, an electron device or a particle accelerator, it is likely that one of our off-the-shelf models (ranging from ½" to 10¾" ID) will do the job. In addition to our standard models, we build many custom designed current transformers to meet special needs and applications.

Very High Voltage & Very High Current

Pulse Transformers

Pearson Electronics specializes in the development, design and manufacture of high and super high voltage pulse transformers. Typical of the applications for which we have designed and manufactured pulse transformers are units for supplying beam power to high power microwave tubes such as klystrons and traveling wave tubes, units providing pulse voltage to particle accelerator injection systems, pulsed x-ray tubes and high power lasers.

The New

PENN-TRAN

Penn-Tran reaches beyond mere component manufacturing by creating High Voltage Modules (Horizontal Drive Boards) of matched magnetic components. These two examples package the Flyback Transformer, Yoke, Width Coil, Linearity Coil and Drive Transformer. The addition of an appropriate Penn-Tran High Voltage Power Supply, featured in EEM Section 4000, completes the system. Also see our stator yokes in EEM Section 1800.

Let our component teams and our 39 years of deflection experience save time, money and the difficulty of matching random components from multiple manufacturers. All we need is the parameters of your display's horizontal drive section. Penn-Tran engineering does the rest.

PRECISION TOROIDAL TRANSFORMERS

- INPUT SCOTT T
- REFERENCE ISOLATION
- OUTPUT SCOTT T
- DIGITALLY TAPPED
- COMBINATION
- PRECISION RATIO
- RESOLVER ISOLATION
- CUSTOM DESIGNS

The Electronic Products Department of the Perkin-Elmer Corporation is in a unique position to provide Custom Precision Signal Transformers as a result of 20 years of experience designing and manufacturing very special transformers for the Vernistat® a.c. potentiometer and allied products. **High Performance in small size has always been a successful objective.** Our State of The Art Winding Equipment and Techniques enable close control of turns and taps for close matching of windings and repeatibility of product.

Perkin-Elmer can provide Custom Signal Transformers with high accuracies over the full MIL temperature range. For example, exponential function units with 80 taps to an accuracy of ±0.003% can be provided. SCOTT T Transformers have been built to an accuracy of 5 seconds of arc with a null of 0.1 millivolt. The transformers are fully encapsulated toroidal units and are available with contact pins for PC board mounting. They are manufactured in accordance with MIL-T-27C Grade 5. High input impedance and low output impedance can be matched to specifications. Operating frequency can also be per specifications.

SCOTT T TRANSFORMERS

The SCOTT T input transformers converts 3 wire synchro inputs to 4 wire resolver outputs (sin θ and cos θ) with high transformation accuracy and minimum quadrature. SCOTT T Transformers for converting 4 wire resolver inputs to 3 wire synchro outputs can also be supplied. Our output SCOTT T Transformers maintain high accuracies even under heavy load conditions. These units are useful in solid state synchro to digital and digital to synchro converter applications and are particularly applicable in multiplexed conversion systems.

PICO Catalog Contents

22 PAGES OF MINIATURIZED TRANSFORMERS OPERATING OVER THE FREQUENCY RANGE OF 20 Hz TO 250 KHz, WITH PULSE TRANSFORMERS OPERATING TO 32MHz.

AUDIO TRANSFORMERS ARE ARRANGED ACCORDING TO SIZE WITH 1/4" X 1/4" (400 Hz-250 KHz) SHOWN FIRST, AND THE 3/4" X 13/16" (20 Hz-25 KHz) SHOWN LAST.

PULSE TRANSFORMERS .05μSEC TO 100μSEC WITH MINIATURIZED PLUG-IN CONSTRUCTION.

400 Hz POWER TRANSFORMERS. PRIMARY VOLTAGES OF 115V OR 26V. PLUG-IN CONSTRUCTION. ULTRA-MINIATURE SIZE.

ULTRA MINIATURE D C —D C CONVERTER TRANSFORMERS.

MICROPHONE/TRANSDUCER AUDIO INPUT TRANSFORMERS.

MINIATURIZED POWER INDUCTORS

EMI COMMON MODE SUPPRESSION INDUCTORS

MINIATURE HIGH "Q" INDUCTORS

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

SPECIFICATIONS

- **MIL-T-27:** . . . . . All Units Meet MIL-T-27, Military Designation is TF5R21ZZ for Transformers, TF5R20ZZ for Inductors.
- **FREQUENCY RESPONSE:** . . . . -3dB, 400 Hz-250 KHz at 1.0 Milliwatt.
- **MAXIMUM DISTORTION:** . . . . 5% With Rated Power Level at 1 KHz and 400 Hz.
- **DIELECTRIC STRENGTH:** . . . All Units Tested at 200 V RMS.
- **INSULATION RESISTANCE:** . . . Greater Than 10,000 Megohms at 300 V DC.
- **WEIGHT:** . . . . . 1.1 Grams.
- **OPERATING TEMPERATURE:** . . -55°c to +105°c (All Units Can Be Supplied to Class S Requirements, +130°c).
- **TERMINALS:** . . . . . Solid .012 Diameter Conductor. Conductor is copper clad steel, Tinned 100%. Electroplated Per MIL-T-10727A and ASTM CCS B452.
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

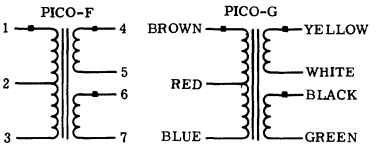
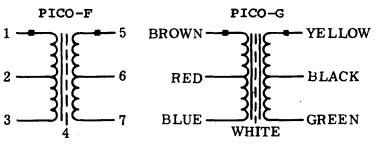
F SERIES Plug-In

G SERIES Insulated Leads

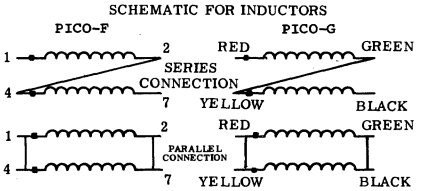
SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- 5 MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

This Product is Patented

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS. TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF D.C. CURRENT, ARE LISTED FOR EACH INDUCTOR.

*For immediate engineering assistance or to place an order—**Call Toll Free 800-431-1064***

Delivery—stock to one week

SPECIFICATIONS

- MIL-T-27: . . . . . All Units Meet MIL-T-27. Military Designation is TF5R21ZZ for Transformers, TF5R20ZZ for Inductors.
- FREQUENCY RESPONSE: . . . . . ±3dB, 400 Hz-100 KHz at 1.0 Milliwatt.
- MAXIMUM DISTORTION: . . . . 5% With Rated Power Level at 1 KHz and 400 Hz.
- DIELECTRIC STRENGTH: . . . . All Units Tested at 200 V RMS.

INSULATION RESISTANCE: . . . Greater Than 10,000 Megohms at 300 V DC.

- WEIGHT: . . . . . 2.5 Grams.
- OPERATING TEMPERATURE: . . -55°c to $+105^{\circ}$c (All Units Can Be Supplied to Class S Requirements, $+130^{\circ}$c)
- TERMINALS: . . . . . Solid .016 Diameter Conductor. Conductor is Copper Clad Steel. Tinned 100%. Electroplated Per MIL-T-10727A and ASTM CCS B452.
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107D, MIL-STD-202E, Test Condition A-1.

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS. TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF D.C. CURRENT, ARE LISTED FOR EACH INDUCTOR.

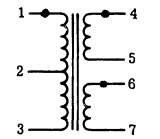
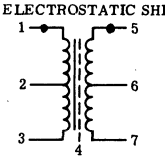
PICO's ultra-miniature transformers

W SERIES Plug-In

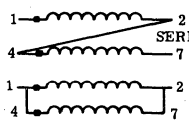
SCHEMATICS FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

This Product is Patented

Y SERIES Plug-In

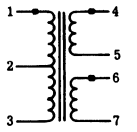
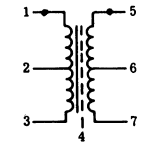
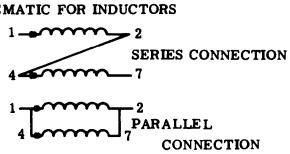
SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



SCHEMATIC FOR INDUCTORS



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS

This Product is Patented

Delivery— stock to one week

INDUCTORS

ALL INDUCTORS HAVE SPLIT WINDINGS AND MEASUREMENTS ARE LISTED FOR BOTH SERIES AND PARALLEL CONNECTIONS.

TWO VALUES OF INDUCTANCE, EACH AT A PARTICULAR VALUE OF DC CURRENT, ARE LISTED FOR EACH INDUCTOR.

Y-Series Plug-In	INDUCTANCE HENRIES	DC CURRENT ma	DC RESISTANCE OHMS	PRICES 1-9***
Y-27750	SERIES .075 / .06	10 / 30	10.5	13.22
	PARALLEL .018 / .015	20 / 60	2.6	
Y-27760	SERIES .3 / .15	4 / 20	25	14.69
	PARALLEL .075 / .04	8 / 40	6.2	
Y-27770	SERIES 3.5 / 1.0	2 / 5	560	14.69
	PARALLEL 0.9 / 0.25	4 / 10	140	
Y-27780	SERIES 6.0 / 1.5	2 / 5	2100	14.69
	PARALLEL 1.5 / 0.38	4 / 10	525	
Y-27790	SERIES 20 / 8	1 / 3	5100	18.06
	PARALLEL 5 / 2	2 / 6	1275

SPECIFICATIONS

- **MIL-T-27** . . . . . All Units Meet MIL-T-27 and are Hermetically Sealed in a Metal Case. Audio Transformers are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** . . . . ±3db, 300 Hz - 75 KHz At 1.0 Milliwatt
- **MAXIMUM DISTORTION:** . . . . . 5% With Rated Power Level at 1 KHz, 400 Hz and 300 Hz
- **DIELECTRIC STRENGTH:** . . . . All Units Tested at 200 V RMS
- **INSULATION RESISTANCE:** . . . Greater than 10,000 Megohms at 300 V DC
- **WEIGHT:** . . . . . 5 Grams
- **OPERATING TEMPERATURE:** . . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c maximum)
- **TERMINALS:** . . . . . Solid .016 Diameter Conductor. Conductor is Copper Clad Steel, Tinned 100%, Electroplated Per MIL-T-10727A and ASTM CCS B452.
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

This Product is Patented

*** Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%
Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

*INCLUDES ELECTROSTATIC SHIELD
**MINIATURIZED TELEPHONE COUPLING APPLICATION

Delivery— stock to one week

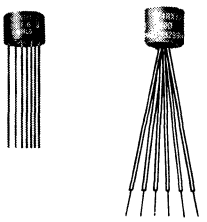
*** Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%

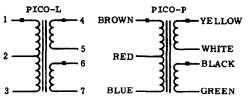
Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

L SERIES Plug-In

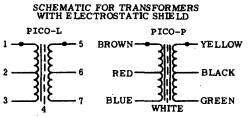
P SERIES Insulated Leads



SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

PICO Electronics, Inc.

453 N. MacQuesten Pkwy.

SPECIFICATIONS

- **MIL-T-27** . . . . . All Units Meet MIL-T-27, and Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- **FREQUENCY RESPONSE:** . . . ±3 db, 150 Hz - 75 KHz at 1.0 Milliwatt (When Primary Impedance ≥ 50K Ohms, ±3 db 150 Hz to 20 KHz)
- **MAXIMUM DISTORTION:** . . . . 5% With Rated Power Level at 1 KHz 400 Hz and 150 Hz
- **DIELECTRIC STRENGTH:** . . . . All Units Tested at 200 V RMS
- **INSULATION RESISTANCE:** . . . Greater Than 10,000 Megohms at 300 V DC
- **WEIGHT:** . . . . . 7.5 Grams
- **OPERATING TEMPERATURE:** . . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c maximum)
- **TERMINALS:** . . . . . Solid .016 Diameter Conductor. Conductor is Copper Clad Steel, Tinned 100%, Electroplated Per MIL-T-10727A and ASTM CCS B452.
- **THERMAL SHOCK:** . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

Delivery: Stock to one week

This Product is Patented

*INCLUDES ELECTROSTATIC SHIELD
**MINIATURIZED TELEPHONE COUPLING APPLICATION

*** Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%
Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

*For immediate engineering assistance or to place an order—**Call Toll Free 800-431-1064***

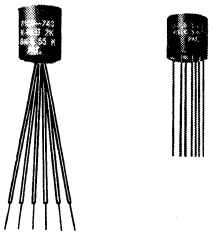
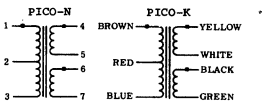
K SERIES Insulated Leads

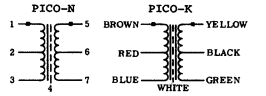
N SERIES Plug-In



SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

PICO Electronics, Inc.

453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552

914-699-5514

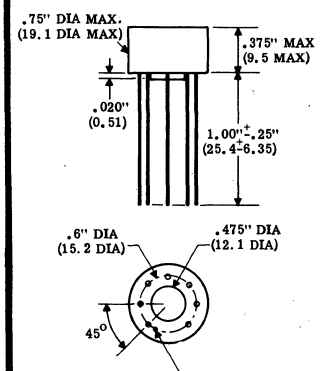
PICO's ultra-miniature transformers

R SERIES Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27: . . . . . All Units Meet MIL-T-27 And Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- FREQUENCY RESPONSE: . . . ± 3 db, 75 Hz - 30 KHz at 1.0 Milliwatt.
- MAXIMUM DISTORTION: . . . 5% With Rated Power Level at 1 KHz, 300 Hz and 75 Hz
- DIELECTRIC STRENGTH: . . . All Units Tested at 200 V RMS.
- INSULATION RESISTANCE: . . Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: . . . . . 12 Grams
- OPERATING TEMPERATURE: -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c Maximum).
- TERMINALS: . . . . . Solid .016 Diameter Conductor. Conductor is Copper Clad Steel, Tinned 100%, Electroplated Per MIL-T-10727A and ASTM CCS B452.
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

This Product is Patented

Delivery— stock to one week

PICO's ultra-miniature transformers

R SERIES Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES

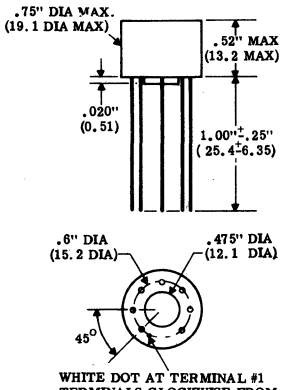
PICO's ultra-miniature transformers

S SERIES Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27: . . . . . All Units Meet MIL-T-27 And Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- FREQUENCY RESPONSE: . . . ± 3 db, 50 Hz - 30 KHz at 1.0 Milliwatt. (±0.5 db, 300 Hz-5 KHz)
- MAXIMUM DISTORTION: . . . 5% With Rated Power Level at 1 KHz, 300 Hz and 50 Hz.
- DIELECTRIC STRENGTH: . . . All Units Tested at 200 V RMS.
- INSULATION RESISTANCE: . . Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: . . . . . 17 Grams
- OPERATING TEMPERATURE: . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c Maximum).
- TERMINALS: . . . . . Solid .020 Conductor, Copper Clad Steel Tinned 100%, Electroplated Per MIL-T-10727A and ASTM CCS B452
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

*INCLUDES ELECTROSTATIC SHIELD
**MINIATURIZED TELEPHONE COUPLING APPLICATION

*** Discount Prices: 1-9 Net; 10-24 less 10%; 25-49 less 16%; 50-99 less 23%; 100-499 less 30%

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

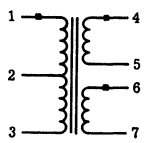
PICO's ultra-miniature transformers

S SERIES Plug-In

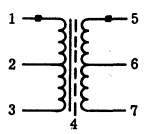
FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

SCHEMATIC FOR TRANSFORMERS WITH SPLIT SECONDARIES



SCHEMATIC FOR TRANSFORMERS WITH ELECTROSTATIC SHIELD



PICO Electronics, Inc.
453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552
914-699-5514
TWX 7105620113

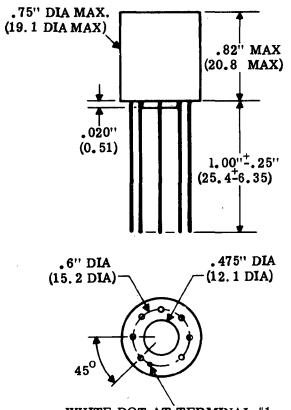
PICO's ultra-miniature transformers

T SERIES Plug-In



Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-27: . . . . . All Units Meet MIL-T-27 And Are Hermetically Sealed in a Metal Case, Audio Transformers Are Type TF5R21ZZ.
- FREQUENCY RESPONSE: . . . ± 3 db, 20 Hz - 25 KHz at 1.0 Milliwatt.
- MAXIMUM DISTORTION: . . . 5% With Rated Power Level at 1 KHz and 300 Hz. 10% Distortion at 20 Hz.
- DIELECTRIC STRENGTH: . . . All Units Tested at 200 V RMS.
- INSULATION RESISTANCE: . . Greater Than 10,000 Megohms at 300 V DC.
- WEIGHT: . . . . . 28 Grams
- OPERATING TEMPERATURE: . -55°c to 105°c (All Units Can Be Supplied to Class S Requirements 130°c Maximum).
- TERMINALS: . . . . . Solid .020 Conductor, Copper Clad Steel Tinned 100%, Electroplated Per MIL-T-10727A and ASTM CCS B452
- THERMAL SHOCK: . . . . . 25 Cycles, Method 107C, MIL-STD-202D, Test Condition A-1

This Product is Patented

PICO's ultra-miniature transformers

T SERIES Plug-In

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- PICO IS APPROVED QPL SOURCE (MIL-T-27)
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- PRIMARY AND SECONDARY WINDINGS CAN BE USED EITHER AS INPUT OR OUTPUT
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

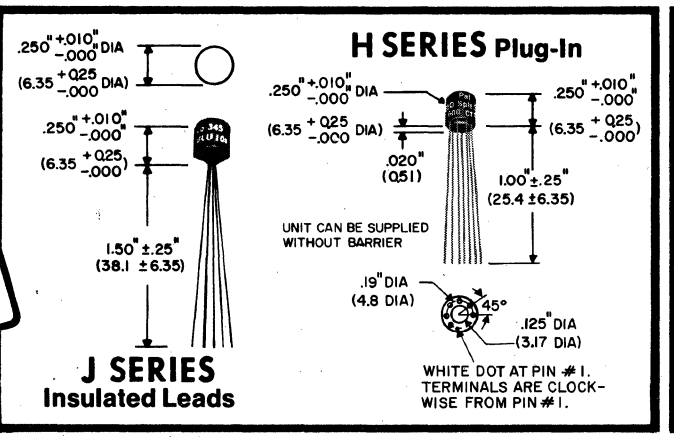
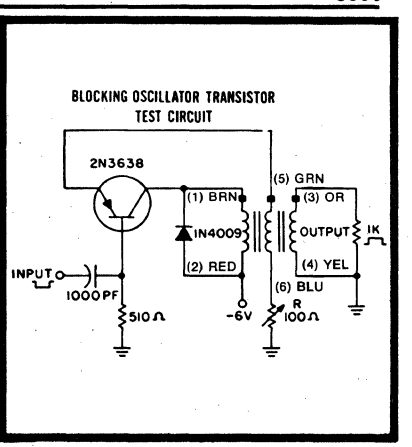
PICO's ultra-miniature PULSE transformers

1/4" x 1/4"





Dimensions are in inches (MM)

SPECIFICATIONS

- MIL-T-21038: Units Meet MIL-T-21038 and are Hermetically Sealed in a Metal Case
- DIELECTRIC STRENGTH: All Units tested at 200 V RMS
- INSULATION RESISTANCE: Greater than 10,000 Megohms at 300 V DC
- WEIGHT: 1.1 Grams
- OPERATING TEMPERATURE: -55°c to 105°c (All Units Can be Supplied to Class S Requirements 130°c maximum)
- **TERMINALS: . . . . . Solid .012 Diameter Conductor. Conductor is copper clad steel, Tinned 100%. Electroplated Per MIL-T-10727A and ASTM CCS B452.**
- THERMAL SHOCK: 25 Cycles, Method 107C, MIL-STD-202D. Test Conduction A-1

FEATURES

- EXTREME RESISTANCE TO THERMAL SHOCK
- ULTRA MINIATURE SIZE
- BUILT TO MIL-T-21038
- MAGNETIC SHIELDS AVAILABLE
- ELECTROSTATIC SHIELDING CAN BE ADDED
- VARIATION OF STANDARD DESIGNS AVAILABLE
- SPECIAL PRODUCTION TECHNIQUES ENSURE UNIFORM SIZE AND LEADS WHICH ARE FREE OF ENCAPSULANT. NO MENISCUS IN LEAD AREA.
- EVERY UNIT IN THIS CATALOG CAN BE MADE WITH A 300 THERMAL CYCLE GUARANTEE USING PICO'S SPECIAL SR CONSTRUCTION. CONTACT FACTORY FOR DETAILS.

Ultra Miniature DC-DC Converter Transformers

Input Voltages of: 5V, 12V, 24V and 48V

Power Levels up to 40 Watts

All units are magnetically shielded

All units can be supplied with higher or lower output voltages. Delivery- stock to one week, special voltages 9 days.

Note: Sizes 5 and 6 - pins 5, 8 and 9 are omitted

FEATURES

1) Units can be used as self-saturating or for linear switching applications. Operation over ambient temperature range from −55°c to +105°c. All units meet the requirements of MIL-T-27 (TF5S40ZZ)
2) All units can be supplied with higher or lower secondary voltages at the same power levels.
3) Secondary can be connected for full-wave bridge or dual bridge.
4) All units are magnetically shielded.

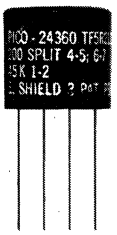
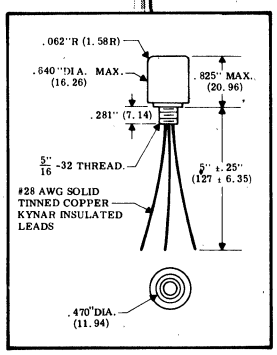
PICO Electronics, Inc. 453 N. MacQuesten Pkwy., Mt. Vernon, N.Y. 10552

PICO Microphone/Transducer Audio Input Transformers

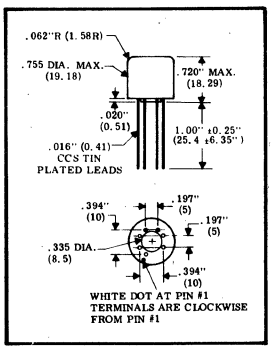
Used for Professional Sound Studios/Broadcast Mixing Consoles/Control and Instrument Amplifiers.

Interchangeable with transformers made by Beyer Dynamic of Germany.





NOTE:
ALL DIMENSIONS ARE IN INCHES, ( ) = MM



NOTES:
ALL DIMENSIONS ARE IN INCHES, ( )-MM.
CCS-COPPER CLAD STEEL, TINNED 100% ELECTROPLATED PER MIL-T-10727A AND ASTM CCS B452.

- ***Large step-up ratios with flat frequency response over the entire audio range.***
- ***Gapless laminations provide wide bandwidth with extremely low distortion. Use of two magnetic shields made with extra thick mu-metal and gapless core provide negligible hum pick up. All units provided with electrostatic shield.***
- ***Your choice of two package styles, stud mounting with flying leads or low profile plug-in. Identical electrical performance regardless of package style.***
- ***Frequency response ±1 dB, 30 Hz – 15 kHz.***
- ***Low profile plug-in (24000 series) meets MIL-T-27D (TF5R21ZZ).***
- ***Because of gapless laminations, unbalanced DC current should be avoided.***
- ***Typical distortion of 1% at power level of 0 dBm (1 Milliwatt), 30 Hz – 15 kHz. If the low frequency is raised, the power level for 1% distortion is as follows:***

50 Hz - 3 Milliwatts (4.7 dBm)
100 Hz - 10 Milliwatts (10 dBm)
300 Hz - 150 Milliwatts (21.7 dBm)

For immediate engineering assistance or to place an order—
Call Toll Free 800-431-1064

All units have two extra thick mu-metal shields.

Delivery-Stock to 1 week

Modification of standards 9 days!

S	.52	.75	.6	.475
T	.82	.75	.6	.475

FEATURES

- 400 Hz Aerospace Application
- Smallest Possible Size
- Printed Circuit Plug-In Construction
- Secondary Has Split Winding (Secondary can Be Used at Half Voltage Twice the Current.)

SPECIFICATIONS

- MIL-T-27D (TF5S03ZZ)
- 90 °c Ambient
- Input Primary 115v-400 Hz ±20 Hz or 26V-400HZ-±20 Hz (Your Choice-Just Choose The Proper Part No.)
- Regulation is 24% (T Units Have Regulation of 17%)
- Secondary Voltage Adjusted to Nominal Value at Half Load.

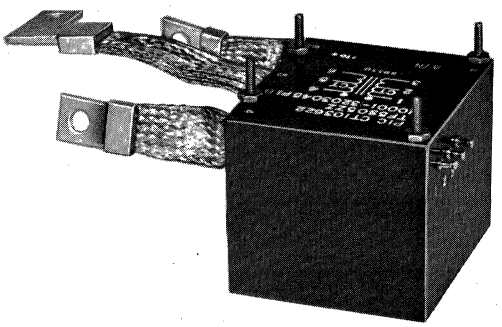
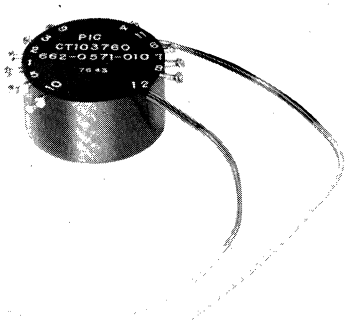
converter transformers

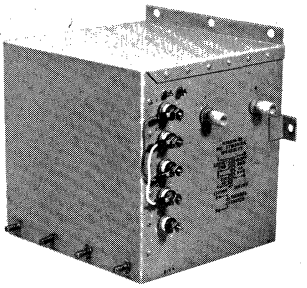
SOME SPECIFIC DESIGN EXAMPLES



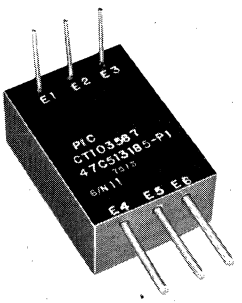
Designed for use in a fire control system for a fleet ballistic missile, PIC CT103622 is driven by a pair of Darlingtons from a 130 VDC line at 25 K Hz. The secondary is full wave rectified with Schottky rectifiers to supply a 100 ADC load at 5 VDC. Ambient temperature is between 0° and 85° C. Cooling is by conduction and by natural radiation and convection. The transformer measures 2.28″ x 2.53″ x 2.09″ (58 x 64 x 53) and weighs 1.6 pounds (.73 kg).



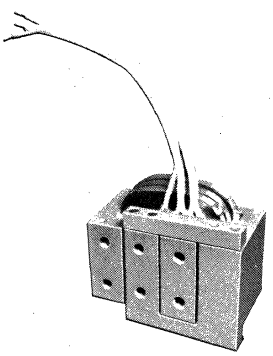
This transformer, PIC CT103760, is used in airborne equipment. It is driven by a pair of transistors from a 15 VDC line at 8 K Hz. The secondaries supply, after rectification, 5 VDC at 0.8A, −15 VDC at 0.1 A, −65 VDC at 10 MA, and +1750 VDC at 10 MA. In addition, a heater load of 5.7 VRMS at 1 A is accommodated. Ambient temperature range is from −55° C. to +71° C. Operating altitude is 55,000 feet maximum. The transformer measures 1.63″ dia. x .75″ high (41ϕ x 19) and weighs 3.5 ounces (0.1 kg).



Used in a Klystron power supply for a satellite communications system, PIC CT103412 accepts input from a rectified 3-phase power line (200 VDC to 800 VDC) via bridge connected transistor banks. The secondary voltage is bridge rectified, L-C filtered. The resultant DC output voltage is 8.5 KV at 1A. The power supply uses pulse width control at a switching frequency of 20 K Hz. The transformer is oil-filled. Dimensions are 7.5″ x 7.5″ x 7″ (191 x 191 x 178).



A typical example of Converter Transformer using gapped nickel-alloy core, PIC CT103567 was designed for use with radiation hardened semi conductors in a major defense missile system. The converter in which this transformer is used operates from a 22 VDC source and delivers 6 VDC at 25 A. Operating frequency is 20 K Hz. Size is 1.60″ x 2.25″ x 1.00″ (40 x 57 x 25.4). Weight is 7.2 oz. (.205 kg).



Pushing the state of the art to the extreme, PIC CT103508, is the result of close co-operation between PIC engineering and its customer. This transformer, when used with sophisticated drive circuitry (pulse-width modulation at high frequency), delivers via Schottky rectifier banks and inductor input filter, 5 VDC at 700 A.

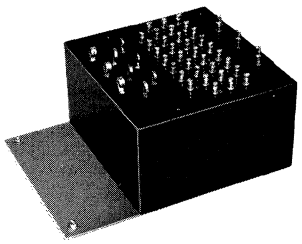
rectifier transformers

TYPICAL EXAMPLES



Designed for an airborne application, PIC R103806 is a 400 Hz rectifier transformer of a most complex kind:

Input: aircraft 3-phase power per MIL-STD-704 category B

Output: 14 isolated, 3-phase secondaries to supply a multiplicity of 3-phase bridge rectifiers to yield various DC voltages, with DC current ranging from 0.2 A to 30 A.

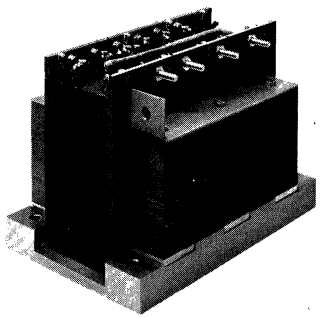
VA rating: 2.1 KVA

Size: 5″ x 5¼″ x 3⅛″ (127 x 140 x 80)

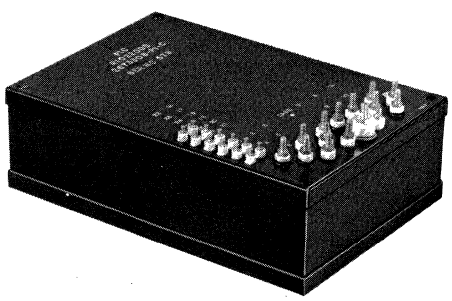
Weight: 10 lbs. (4.54 Kg)

Efficiency: 96%

Cooling: by conduction through bottom plate, aided by radiation & natural convection.



PIC R103994 is a 3-phase rectifier transformer used in a shipboard application. It operates from 440 V., 3-phase, 60 Hz line to deliver, via 6-phase, half-wave SCR's, 150 VDC @ 80 A into a high performance DC motor. Major cooling is by conduction through the base plate. Carefully placed thermal shunts in the windings enable its use in an enclosed cabinet without forced air. Size is 16″ x 10″ x 11″ (406 x 254 x 280). Weight is 270 lbs. (122Kg.)



The PIC R102200A was designed for use on a nuclear submarine. It is an example of a "12-pulse" circuit:

Input: 115V, 400 Hz, 3-phase

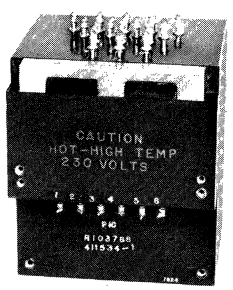
Output: 12-phase quadruple zig-zag WYE with three built-in interphase transformers, to supply, via half-wave rectifiers, 32 VDC at 20 A.

VA rating: 880VA

Size: 5½″ x 8″ x 2½″ (140 x 203 x 84)

Weight: 14.3 lbs. (6.5 Kg)

Cooling: by natural means



An airborne application required the design of a PIC R103786. This is an example of a parallel double WYE circuit:

Input: 400 Hz 3-phase power per MIL-STD-704 category B

Output: Parallel double-WYE with two built-in interphase transformer, to supply, via twelve rectifiers, 9 VDC at 110 A. Note that each rectifier has to handle only 30 A peak repetitive and 10 A average current.

Size: 3¾″ x 3¾″ x 4½″ (95 x 95 x 115)

Weight: 5.4 lbs. (2.45 Kg)

Cooling: by conduction through bottom plate, aided by natural means

PIC's experience in rectifier transformers ranges from very routine industrial types delivering a few watts—to high powered, SCR controlled applications supplying 50 KW of peak power, including highly sophisticated, high-reliability, high-performance airborne units.

Backgrounding PIC's success in rectifier transformer design are versatile computer aided design programs, developed and constantly up-dated by our own engineers, custom fitted to our type of business. Many of our customers consult with us for such design services as size and weight estimates, feasibility studies, weighing of alternatives, etc. This service can result in significant savings of your engineering time. Unless your application is very simple there is no reason to search through catalogues for a "standard" when the "custom" solution is only a phone call away.

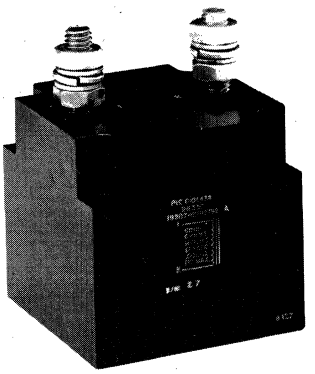
inductors

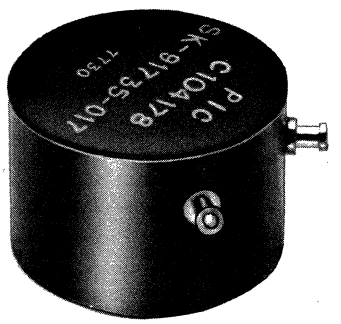
Polyphase can furnish one of the widest selections of custom inductor designs available to the electronic industry. These are just a few of the major types used in modern circuits:

- Power inductors, smoothing and swinging, for rectifier circuits
- Ripple filter inductors for DC-DC converters
- Energy storage inductors for switching regulators
- Integrating inductors for pulse-width modulated DC-DC converters
- Surge limiting inductor for DC-DC converters
- Tuning Power inductors for power filters and switching type DC-AC inverters
- Charging inductors for line type pulser
- High current, line inductors (EMI protection)
- Audio frequency inductors for use in precision filters

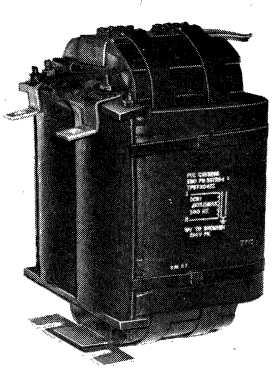
The following examples illustrate some of the many specialty applications we have designed:



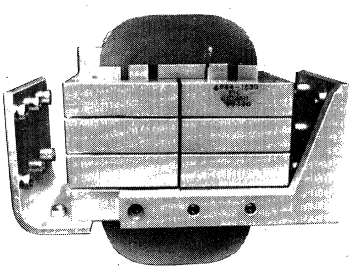
PIC C104438 is a 50uH filter inductor of heavy duty construction to MIL-T-27 grade 5, Class T for use in combat vehicles. It is rated at 120 ADC continuous duty, with DCR of 1.5 m Ω max. Cooling is by natural means, aided by conduction through an aluminum base plate. Size is 3″ x 3″ x 3″ (76 mm x 76mm x 76mm), excluding the terminals.



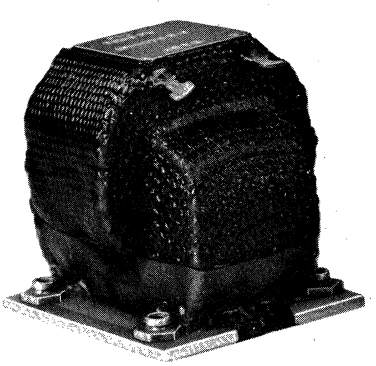
PIC C104178 is a toroidal inductor with superior energy storage capacity specially designed for use in pulse-width modulated DC-to-DC converter circuit. The inductance is 570 μh at 4 ADC with DC resistance of 0.03Ω max. Size is 1.375″ diameter x .875″ high (35ϕ x 22.2). Weight: 2.8 oz (80 gm).



A sonar system uses a PIC C103269 as a filter inductor capable of delivering 1000A peak current at 10% duty. Inductance of this inductor is 80 μh.



Made for use with CT103508 converter transformer, PIC C103511 is an integrating choke used in a pulse width modulator DC-DC converter. Inductance is 16 μh at 20KHz, 600 ADC. DCR: 150 μΩ. The coils are made from light weight aluminum alloy.



Used in a vehicular application, PIC C101929 is a routine filter inductor. It is manufactured with a proprietary technique using a glass-reinforced conformal coating, capable of surviving severe thermal shock.

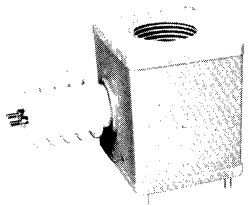
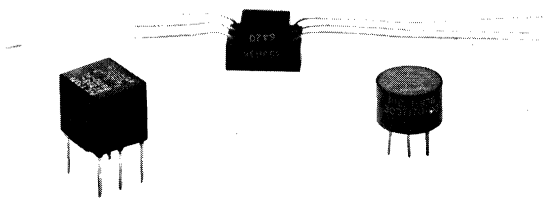
pulse transformers

EXAMPLES OF PULSE DESIGNS

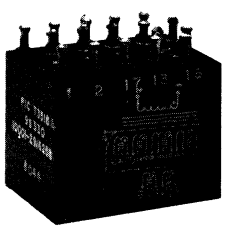


PULSE ISOLATION TRANSFORMERS: used in the ground portion of a TACAN System, PIC PL103044 is a high-fidelity pulse isolation transformer used to couple a couplex pulse train from a ground-level source to a high voltage platform sitting at 26KV DC. The signal consists of 1 to 2.6 μs pulses which must be transmitted with less than 2% degradation in amplitude under a variety of pulse bust conditions. This transformer is oil-filled with an expansion bellows.

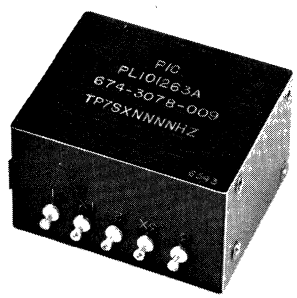


PULSE TRANSFORMERS

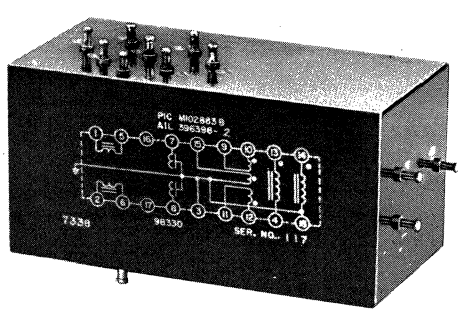
Polyphase pioneered in the design and development of custom, miniature, low voltage pulse transformers. These are available in three standard case styles (shown here) engineered to your requirements.



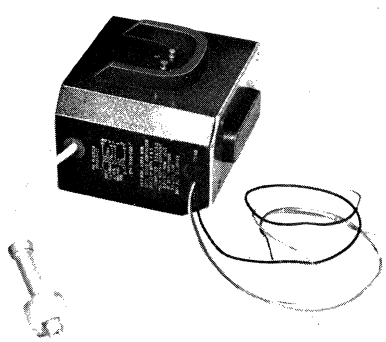
PIC T3516A is a blocking oscillator transformer used to provide auxiliary power to a sophisticated shipboard power supply. It operates in the fly-back mode, with tightly controlled primary inductance. Nominal operating frequency is 30kHz; energy storage per cycle is 1.2 MJ; MIL-T-27 grade 5 class T. Size is 1″ × 1.4″ × 1.25″ (25.4mm × 35.6mm × 31.8mm). Weight is 75 gm.



PULSE FORMING TRANSFORMER: used in an airborne TACAN, PIC PL101263A generates pseudo-gaussian pulse pairs when used with appropriate energy storage capacitors and SCR's. The output pulses measure 2200 V in amplitude, 4-μsec wide; peak power is 4.8 KW. Pulse amplitudes of the pairs are matched to within 2% of each other.



PULSE FORMING PACKAGE: used in an instrument landing system, PIC M102883, which contains two charging chokes, two pulse forming networks and a pulse modulation transformer, delivers 3600V, 0.3 μs pulse bursts into a magnetron. Peak power is 10 KW. Pulse duty cycle is from 0.3 to 0.5%.



PULSE MODULATION TRANSFORMER: used in an airborne radar, PIC PL103126, delivers 8 KV, 3 μs pulses into the cathode of an L-3890-A magnetron. Peak power is 66 KW. It is corona-free at 50,000 feet. A proprietary casting method was used to minimize problems often encountered at insulation interfaces.

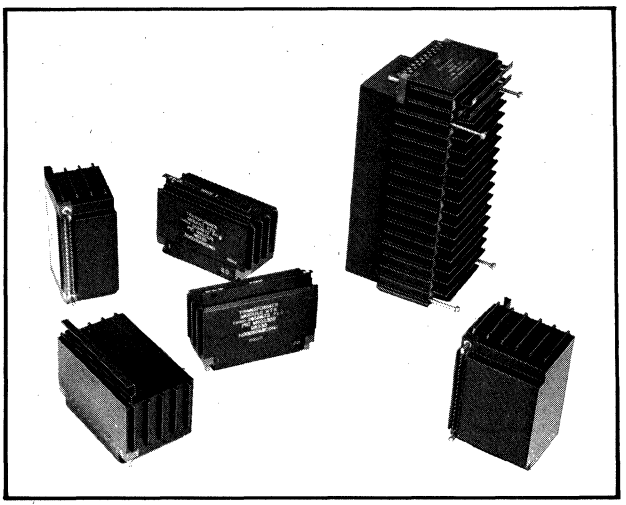
sem modules



PRECISION PACKAGING FOR TRANSFORMERS FILTERS & NETWORKS

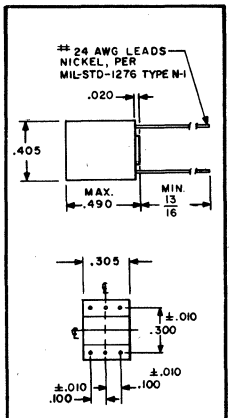
Many of Polyphase custom engineered SEM Modules have been JAN-certified to MIL-M-28787. As a pioneer Vendor on the Standard Hardware Program, Polyphase has packaged Filters, Transformers, Inductors and Networks in the SEM configuration for Poseidon, Trident, Dimus, SAMAC, etc. We can design your specified magnetic component to utilize one of the many standard module sizes available in our tooling. MIL-STD-1389, MIL-STD-1378, and MIL-HDBK-239 are the key reference documents to the Standard Hardware Program.

audio and wide band transformers

Unless the circuit designer is looking for maximum power transfer from a linear transducer or similar device with a definitive internal impedance, or he is working from or into a transmission line, the traditional way of specifying transformers, by impedance ratio, does not mean much.

Because of the availability of low cost semi-conductor devices, the use of transformers for coupling purposes should be restricted to circuits where nearly absolute isolation is needed; or where passive impedance transformation is a must. Most of the low level coupling applications we have seen during the past few years work from an emitter follower or an IC op-amp, where the source impedance is low. We have also found that circuit designers are much more concerned with phase and/or group delay characteristics, in addition to frequency response. Our new JM series is rated with modern users in mind.

This listing is designed to show what can be available. We stock the materials necessary for quick delivery of sample quantities so that the circuit designer can have a custom unit made to fit his application.

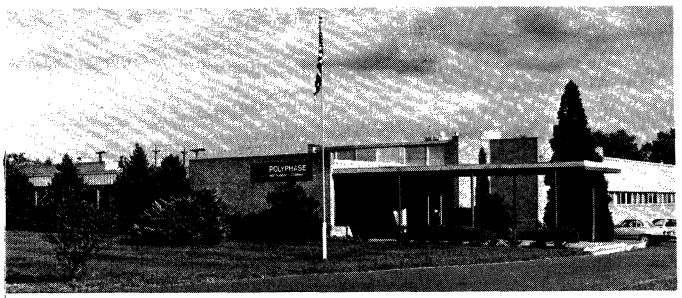


JM CASE

Type	Turns Ratio	L(PRI) HY	DC R(Ω) PRI	DC R(Ω) Sec	L_L (mH) ref. to PRI	Max. PRI Voltage (f in KHz)	Max. Load (MA)	Series Resonance (MHz)	Min.* Load Resistance
JM 11	1:1	3.2	340	450	5.0	13.5 f or 50 V	7	.38	6 K
JM 12	1:1	0.8	85	110	1.3	6.7 f or 25 V	15	.67	4 K
JM 13	1:1	0.2	22	28	.31	3.4 f or 13 V	30	1.2	2 K
JM 14	1:1	.05	5.5	7	.08	1.7 f or 3 V	60	2.0	1 K
JM 21	2:1	3.2	340	110	5	13.5 f or 50 V	15		
JM 22	2:1	0.8	85	28	1.3	6.7 f or 25 V	30		
JM 23	2:1	0.2	22	7	.31	3.4 f or 13 V	60		
JM 24	2:1	.05	5.5	2	.08	1.7 f or 3 V	120		

All values are typical.
*Min. load resistance will restrict peaking at series resonance to within 3 DB of mid-band response

polyphase...
a closer view



engineering

Polyphase is that rare vendor who can help you with both effective engineering design and unique manufacturing techniques, involving magnetic components for power conversion and/or regulation; A source a step beyond the commonplace in capability to serve you within the following parameters:

Power: microwatts to over 20-kw
Voltage: a few volts to 20-kv
Current: microamperes to 700 A
Frequency: power line to above 100 KHz
Size: IC-compatible to large oil-filled units
Environment: space, airborne, shipboard and industrial

Our broad engineering capability has qualified us as a vendor on major space, defense, and industrial programs since 1948. The credibility Polyphase has earned with design engineers throughout the electronic industry, for effective answers to magnetic component circuit problems, insures your satisfaction. At Polyphase, authoritative, computer-aided engineering and prototype service is the heart of the company.

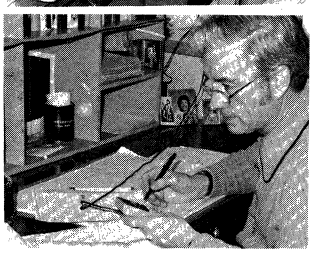
quality control

Polyphase manufactures MIL, NASA and U/L quality magnetic components—assured quality and reliability are a must. Our quality standards are governed by MIL-Q-9858, NHB 3400.4(1c), MIL-I-45208, MIL-T-27, MIL-T-21038 and MIL-F-18327. An approved Quality Control Manual blueprints procedures and standards to be followed. All products are monitored and controlled by this system from incoming materials through production tests, to the final Quality Assurance check at the time of shipment. The plant is completely equipped with the latest test instrumentation. Our calibration system conforms to MIL-C-45662. A DLA inspector is available.

production

Our concentration on quality-demanding programs dictates an efficient production department staffed by quality-minded people. Over 40,000 square feet, (of a total of 43,000 square feet of floor space), is our production area, with the balanced capability to handle large or small orders.

As all our products are custom designed to your specifications this Guide is formatted, as a discussion and illustration of some key magnetic components used in modern electronic circuits.



WARRANTY

Supplier warrants products of its own manufacture against faulty workmanship or the use of defective materials for a period of one year from the date of shipment. This warranty is the only warranty made by the supplier, and is in lieu of all other warranties, expressed or implied, and can be amended only by a written instrument signed by an officer of the Supplier. The liability of the Supplier under this warranty is limited solely to replacing, repairing, or issuing credit (at Supplier's discretion) for any products which are returned by Buyer during the warranty period provided that (a) Supplier is promptly notified in writing upon discovery of such defects by Buyer, (b) the defective unit is returned to Supplier, transportation charges prepaid by Buyer, and (c) Supplier's examination of such unit shall disclose, to it's satisfaction, that such defects have not been caused by misuse, neglect, improper installation, repair, alteration or accident. In no event shall Supplier be liable to Buyer for loss of profits, loss of use, or damages of any kind based upon a breach of warranty.

RENCO ELECTRONICS, INC.

Custom Transformers AT STANDARD PRICES For Your Switching Power Supplies RL 1287

The driver, interstage, and inverter transformers in all switching power supplies should be custom designed by experts. If they're not, they're apt to be overrated, bulky, and difficult to manufacture.

Custom design, however, is usually expensive. And takes time.

That's why we developed the Renco SC&B (Standard Core & Bobbin) System, which enables us to give you custom transformers at the prices you'd pay for standards. And deliver them almost as fast as we deliver our standard products.

After extensive research, we selected six standard ferrite "E" cores which are good for most applications at all popular switching frequencies; and glass filled nylon bobbins, which have excellent rigidity and high temperature performance, and can easily be mounted on printed circuit boards.

With these cores and bobbins we can custom-design your transformers, and normally ship prototypes to you within ten days. Since we always have large stocks of cores and bobbins on hand, you'll get fast delivery on your complete order. And since we buy in volume, you're never charged a premium, even for small quantity orders.

And your transformers are wound on custom engineered equipment that ensures conformance to requirements.

Other companies have copied this system. But none offer nearly as much engineering assistance as we do. All you have to do is give us your bare specs, and we'll translate them into transformers.

And none have nearly as much experience as we do. We've been exclusively engaged in the design and manufacture of coil wound products for over 30 years. So when you come to us you can be certain that your transformers will be exactly right for your application.

Just call our Engineering Hotline (800-645-5828 outside of New York State; in New York, call 516-586-5566) and tell us your requirements. Note: a small charge may be required on some designs.

RL-1287-6	1.300	.300	1.500	2.000	.250	2.300	12*	.025 SQ.

All Dimensions in Inches *Pin 1 — 2 spacing is less for polarity

DESIGN NOTES:

1 - Primary to secondary isolation 1500V RMS Min.
2 - All designs meet Class B requirements (130°C).
3 - Encapsulation available.
4 - Winding to core isolation 2500V RMS Min.
5 - Higher isolation voltages available.
6 - Higher temperature classes available.

TOLL-FREE ENGINEERING HOTLINE 800-645-5828 • RENCO ELECTRONICS, INC. • 60 Jefryn Blvd., East • Deer Park, N.Y. 11729 • (516) 586-5566 • RCA Telex No. 220-883

MADE IN USA
SHIPPED WORLDWIDE

RENCO ELECTRONICS, INC.

FREE SAMPLES!
ENGINEERING HOTLINE!
LARGE-ORDER TREATMENT FOR SMALL ORDERS!

These are the kinds of services that have helped us become probably the leading firm exclusively in the business of making coil-wound products.

FREE SAMPLES just for the asking.

Think you could use any of the chokes described on pages A•1274-A•1276? Then call our TOLL-FREE engineering Hot-Line (800-645-5828 outside of New York State; in New York State call 516-586-5566) and tell us your specs — and we'll send you a free sample. If your specs hit squarely on one of our standards (and since our line has 1428 standard values, they frequently do), we'll ship out your sample the same day.

If your specs do not exactly match any of our standards — in fact, even if they're nowhere near any of our standards — give us a call and we'll make up a custom sample. We have a special prototype and sampling laboratory that does nothing but make up custom samples. So unless you need something exceptionally complex, we'll ship your sample within 10 days.

Our Engineering Hotline is for you!

800• 645• 5828

Please feel free to use it even if you have no intention of giving us an order.

Use it if, for example, you're having any kind of problem with any coil wound product — ours or anyone else's. We have, after all, been making chokes, inductors, toroids, and transformers for 29 years now, so we have considerable expertise in that line. When you call the Hotline you'll be talking to an expert who won't try to sell you a thing. He'll just be helping you work out a solution to your problem, and if that solution involves a competitor's product, that's fine, too!

Even if you don't have a problem; even if there's just something you'd like to know about magnetics; or if there's something you'd like to tell us — we'd be delighted to hear from you. We actually established the Hotline because we've found, over the years, that a vital factor in our growth has been the continuous exchange of ideas with engineers who are using chokes and transformers.

Small orders get large order treatment.

Don't hesitate to call us even if you only want to order a few chokes or transformers. You'll get the same attention — and your order will go out just as fast — as if you were ordering thousands.

The reason is that we have a separate, completely independent small order department, staffed with people who are capable of handling orders for just about any kind of coil-wound product. If you order any of our standard products, our small order people go into the stockroom, take your order off the shelf, and ship it out. And if it's a special, they'll make it themselves, no matter how complex or unusual it may be.

They're really a little factory within a factory. They can read drawings. They have the machines and equipment they need to do their own winding, soldering, and testing (and years of experience in using them). When they finish your order all they have to do is bring your finished parts to QC for a final AQL, and ship it out.

And because we're set up this way, you don't have to pay a penalty for ordering small!

UL/CSA APPROVED PLUG-IN TRANSFORMERS

The plug-in transformers listed here represent only a small selection from our full line of transformers. Any input/output voltage and current ratings may be ordered. A wide variety of terminations, mating connectors and jacks as well as custom designs to your specifications are also available. Please see our section in EEM on Connectors and Terminals.

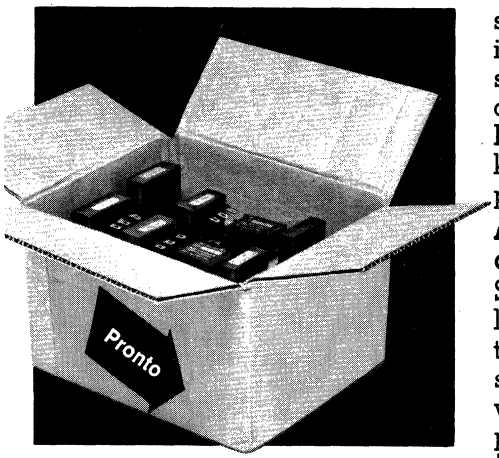
THE SIGNAL WAY OF DOING BUSINESS



PRONTO 48-Hour Shipment

We have long recognized that, in most instances, engineers and buyers need immediate delivery of transformers and chokes. To meet this challenge, Signal maintains an extensive inventory of every item in this catalog – over 1,000 different transformers and chokes. More importantly, we're dedicated to shipping out each and every order (moderate quantities) within 48 hours: and we can usually fill your entire order. We call this service "PRONTO."

Last year we shipped over 10,000 such orders and we didn't disappoint anyone.

How and Why We Are Able to Maintain Our Low Price Policy

At Signal, we sell direct. There are no salesmen or distributors – no middlemen, no extra mark-ups. We pass the savings on to you. We answer your questions directly. There is no chance of misinterpretation and you get fast, accurate answers. We maintain larger inventories than any distributors could. We're able to react to your order requirements more quickly and efficiently. These savings have enabled us to install modern machinery, specify better materials and continuously invest in new R & D. In this manner, our prices are kept as low as possible. We both profit from this policy.

Advanced Technology and Innovation

Signal has always been the leader in recognizing future trends in the industry. And have successfully pioneered the development of revolutionary new products such as:

■ **SPLIT/TRAN®** Split bobbin PC Board Transformers featuring non-concentric windings

■ **FLATHEAD®** Low profile, split bobbin designs for low height and closer board stacking

■ **2-4-1 Series** Lower cost/more efficient power transformers

All of these have subsequently become industry standards. Now we are pleased and proud to announce two new series of transformers designed to meet all international standards as well as the new, emerging generation of UL standards.

Our **ONE-4-ALL™** Series uses dual bobbins and an insulating shroud to meet international standards. It withstands a 4,000 VRMS test voltage and gives even better isolation and performance than our previous split bobbin types. At lower cost.

The same principle has been extended to our **MORE-4-LESS™** line featured on the opposite page.

Our FLATHEAD Series has been expanded to higher power levels to accommodate the demand for higher PC board power densities.

All of this is renewed confirmation of Signal's leadership in setting the standards for the entire electronic transformer industry.

Custom Requirements Are Welcome

We also recognize that no matter how hard we try, it is impossible to anticipate everyone's needs. Therefore, we are eager to discuss and evaluate your transformer and choke requirements. If we can't recommend a standard product that will do the job and save you money and time, we'll gladly quote on your requirement. Many times all that is needed is a modification of one of our standards. Again, you will get consistently high quality and very competitive prices, whether your order is for 10 or 10,000 pieces.

We don't have anyone out in the field telling you how good we are. We have to prove it to you by deed. Thank you for considering Signal.

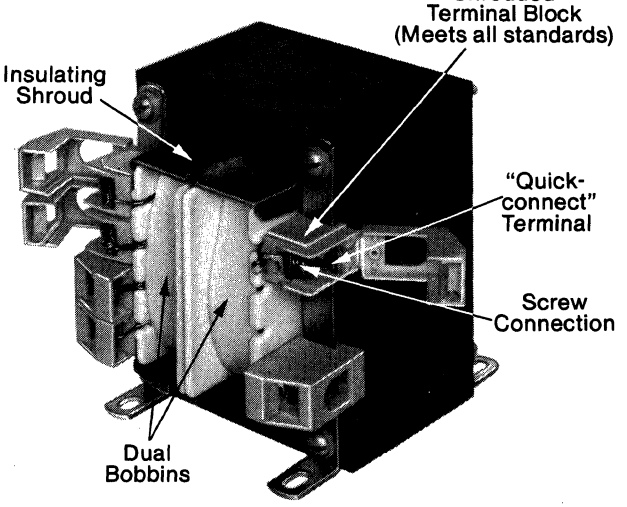
GET MUCH MORE PERFORMANCE IN LESS SPACE WITH
more-4-less™ high power transformers



Signal's M4L Line is designed with the following "ingredients":
- Grain-Oriented Low Loss, High Saturation Steel
- High Temperature Magnet Wire
- Dual High Temperature Bobbins & Insulating Shroud
- Rugged Dual Terminals (Screw or Quick-Connect) that have international approvals (VDE, IEC, etc.) **AND**
- **Superior Electrical & Manufacturing Engineering to meet UL, CSA, VDE, IEC and all international standards.**

Which accomplish further savings by:
- Reducing the amount of steel and copper required for a given power rating
- Eliminating hand applied tapes, pads or cross-over insulation
- Reducing winding & lead terminating time.

All of which leads to more:
- ■Efficiency
- ■Isolation (4000v RMS TEST)
- ■Safety Standards (designed to meet UL, VDE, IEC, etc.)

AND Approximately ⅓ less space & weight. Hence, we call it the More-4-Less Series.

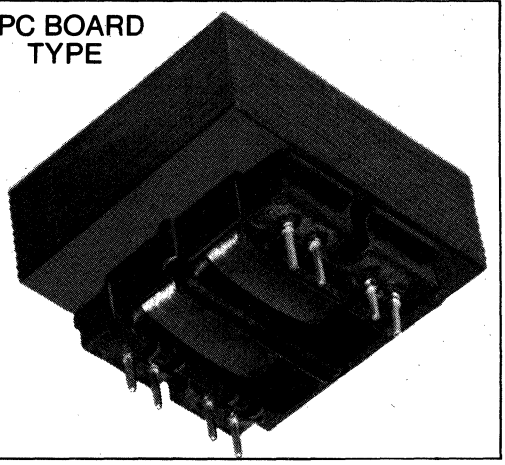
one-4-all™ international

DESIGNED TO MEET UL, VDE, IEC, CSA AND COST & BETTER PERFORMANCE THAN

PC BOARD TYPE



Signal's International Series of transformers is designed and constructed to meet all U.S. and international standards such as UL, VDE, IEC and CSA. This is accomplished by two factors:

1. The dual bobbin construction including an overall insulating shroud as indicated in the exploded view of constructional details.
2. The use of highly stable, high temperature material which more than meets UL flammability requirements.

The insulation system results in very high isolation between primary and secondary windings and from either to the core (or ground). **Hipot Test is 4000v RMS.** The dual bobbin non-concentric design reduces capacitance and eliminates the need for an electrostatic-shield.

These parts are available in both PC Board and Chassis Mount types from 2.5 to 175 va. Coil winding and wire termination are simplified by the bobbin construction and the method of winding. The dual windings are wound "bifilar" so that **all anchor and insulating tapes are eliminated.**

Also, since the windings are electrically balanced, there are no primary circulating currents and, if the secondaries are series-connected for a FWCT rectifier, the balance makes filtering easier.

The bobbin wall slots allow for all leads to be brought out of the winding area for termination. As a result, **all wire crossovers and insulating pads are eliminated.** The insulating shroud positions both bobbins accurately for core stacking and also provides the barriers for the 4000v RMS Test Voltage.

These design improvements lower manufacturing costs. As a result, the series is truly universal and can be sold at lower prices than previous "split bobbin" and "PC" types.

Again, Signal is there first - with the best - and at lower cost.

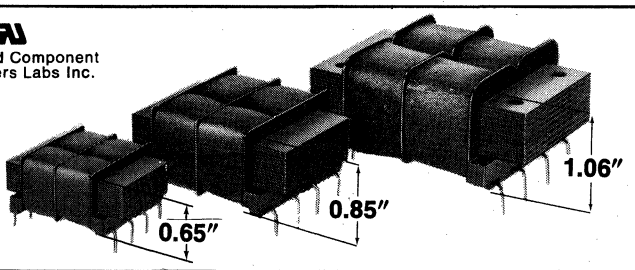
flathead® plug in power transformers

FOR PRINTED CIRCUIT APPLICATIONS

ORIGINAL SIZES
- 3 — 2.5VA — 0.650 inches high
- 6VA — 0.850 inches high
- 12VA — 1.065 inches high

Recognized Component Underwriters Labs Inc.



LOW PROFILE: Allows ¾" card spacing for 2.5va units, 1 inch card spacing for 6va units, or 1¼" inch card spacing for 12va units.

DUAL PRIMARIES: 115/230v, 50/60 Hz.

NON-CONCENTRIC WINDING: Where secondary is wound alongside primary rather than directly over it. This added isolation reduces inter-winding capacitance and **eliminates the need for an electro-static shield.**

1500V. RMS HIPOT: Is standard because of the advantage of non-concentric windings.

HUM-BUCKING CONSTRUCTION: (Semi-toroidal) results in reduced radiated magnetic field and balanced windings.

The LP line of transformers is ideal for low height, critical pc board power applications in semi-conductor control and instrumentation. They are used extensively in single or dual output dc supplies and isolated control circuit and reference supplies.

...in 2 new larger sizes

24 VA - 1.250 INCHES HIGH
48 VA - 1.375 INCHES HIGH

Signal has expanded its Flathead® Series because of the trend toward higher power usage on PC boards. Two new sizes (24 and 48 VA) are described on this page.

Basic design, layout and construction specifications have not changed. The only exception is that more rugged plug-in pins, using square wire, have been incorporated in order to properly handle the weights and currents required.

p.c. board transformers for triple-output regulated supplies

IDEAL FOR MICROPROCESSOR APPLICATIONS

"MP" types have been developed specifically for use in triple-output regulated DC supplies that are commonly used in **Microprocessor Circuits** and other logic, op-amp combinations. Two output combinations have been provided, namely 5V and ±12V, and 5V and ±15V.

All "MP" units are rated in terms of the final **DC** output after a standard three terminal IC regulator. They are designed to provide these outputs with AC line inputs of 100 to 130V 50/60 Hz (or 200 to 260V for nominal 230V lines).

Two basic mechanical configurations are available. Standard PC types (MPC or DMPC) are tested to pass 1500V RMS hipot. Optional mounting brackets are available. MPL types are based on Signal's "flat-head" style and feature low profile, 115/230V primaries, hum-bucking construction, 1500V RMS hipot and the advantages of non-concentric winding (low inter-winding capacitance, high isolation, and no need for an electro-static shield).

All MP's are stocked in depth for immediate delivery. In addition, special variations can be supplied with reasonable delivery times.

BLACK DOT ON LABEL INDICATES POSITION OF TERMINAL #1.

* Available from Signal: Part No. ST-MS (Screw) & Part No. ST-MN (Nut).
† Size 7 has 4 mtg. holes on 2 3/16 x 1 3/4 centers for a #6 screw. Need not be nylon.

"Split-Tran" transformers combine the best features of our "2-4-1" Series and Signal's pioneering line of pc board miniature transformers.

The use of a "split bobbin" allows the primaries and secondaries to be wound non-concentrically, i.e., side by side rather than one over the other. This results in cost savings and superior performance, namely:

- High isolation — **2500V** hipot is standard.
- Low capacitive coupling — no electro-static shield necessary.
- Less manufacturing time — no cross-overs of primary and secondary leads.
- PC pins — allow direct insertion in PC boards.
- Class S insulation — 130°C.

Each transformer is available with single 115V or dual 115/230V primaries. In addition, secondaries are split so that they can be series or parallel connected.

Special variations will be quoted and shipped promptly.

An Insilco Company

. . . for printed circuits applications

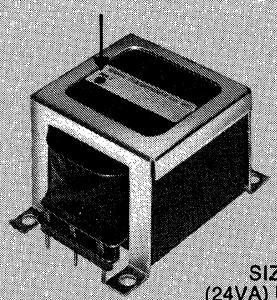
Signal has the most complete and diversified selection of miniature plug-in power transformers.

Primary ratings of 115V (Style PC - 6 Pin) or Dual 115/230V (Style DPC -8 Pin) are standard for the entire line. 1500V. Hipot is standard.

Size 1.0 is used extensively where height is a limiting factor since its height of 0.83 inches allows 1 inch spacing of PC boards. Size 24 is unusual since 24 watt PC transformers are not readily available, especially with a height of 1⅜ inches.

The RMS current ratings are based on a load regulation of 15-20% and not on temperature rise (except for the largest item, size 24). Therefore, these ratings may be exceeded without overheating, if the additional drop in full load voltage is acceptable. There is, of course, a limit and it would be best to check with our engineering department on specific units.

BLACK DOT ON LABEL INDICATES POSITION OF TERMINAL #1.



SIZE 24 (24VA) UNIT WITH 24-BR SLIDE-ON MOUNTING BRACKET

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.

cut size and weight with "2-4-1".....

The 2-4-1 series is an illustration of the use of creative design applied to small power transformers. The result is a line where, for a given va rating, size and weight are reduced almost 50%. Hence the name "241" series.

- GRAIN ORIENTED CORE — High Saturation Density — Lower Core Loss — Less Steel and Copper.
- BOBBIN WOUND — Maximum Utilization of Winding Area — Space and Size Reduced.
- SPLIT BOBBIN — NON-CONCENTRIC WINDING — Lower Capacitance — Better Insulation — 2500V RMS Hipot — No need for Electro-Static Shield — High Isolation and Insulation Resistance. No Cross-Overs of Primary and Secondary Leads.
- SPECIAL TERMINAL — Solder or Quick-Connect.

The series is available with single 115V or dual 115/230V primary, rated 50/60 Hz. Class S insulation is used for a maximum total temperature rating of 130°C continuous.

AVAILABLE WITH SINGLE (115V) OR DUAL (115/230V) PRIMARIES

Recognized Component Underwriters Labs Inc.

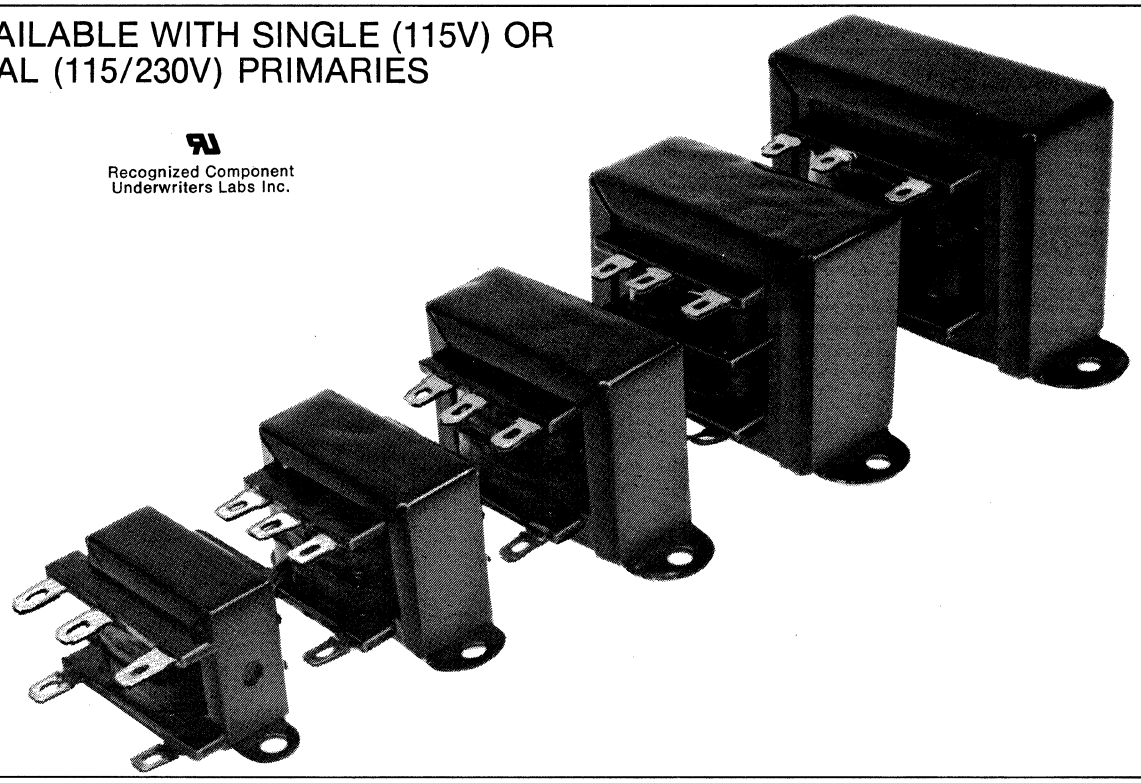
series of small power transformers

AVAILABLE WITH SINGLE (115V) OR DUAL (115/230V) PRIMARIES

Recognized Component
Underwriters Labs Inc.



METHOD OF DETERMINING SECONDARY CURRENT RATINGS

The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F. W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.

CUSTOM VARIATIONS

Signal is equipped to quote on Custom Variations of "241" types. The secondary combinations are restricted by the number of secondary terminals available, as follows:

Size	Maximum Number of Secondary Terminals	VA Rating
3	3	2.4
4	4	6
5	4	12
6	5	30
7	5	56
8	5	100

We answer requests promptly and can deliver prototypes in one to three weeks. Production lead times can be scheduled with very reasonable lead times.

△Available with dual primary only. Therefore, prefix "DL" is not required.
‡ Nominal 115V primary has added taps, I.E., 105/115/125V, Dual (DL) version is 115/230V only.

Items shown in shaded area are not normally in stock. They are standard designs generally available in 3-4 weeks.

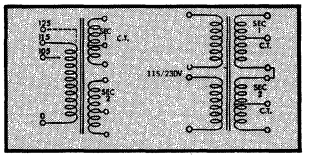
All transformers are designed conservatively and are rated for 50/60 Hz. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss varnish. The transformers and chokes are rugged in construction, well insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation. Hipot rating of 1500V RMS is standard.

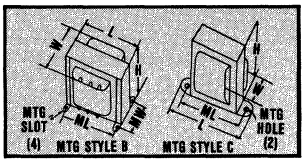
Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings, which may be series or parallel connected as indicated in rating chart.

*The secondary currents shown in the tables are RMS ratings. Depending upon rectifier circuit configurations, the RMS secondary current is different than the DC output current. This is indicated in the chart below:

Rectifier Type	Filter Type	RMS Secondary Current Is
Full Wave Center-Tap	Choke Input	= 0.7 x DC Amps
Full Wave Center-Tap	Capacitor Input	= 1 to 1.2 x DC Amps
Full Wave Bridge	Choke Input	= DC Amps
Full Wave Bridge	Capacitor Input	= 1.6 to 1.8 x DC Amps

For example, in a F.W. Bridge circuit with a capacitive filter, if the load is 1 Amp DC, the RMS Secondary current is 1.6 to 1.8 Amp RMS.





An Insilco Company Dept. EM, 500 Bayview Ave., Inwood, NY 11696 Telephone: (516) 239-5777 signal TRANSFORMER

filter chokes

1.0 TO 200 AMPS

Signal's line of filter chokes is the most extensive available. It is designed to complement the selection of Rectifier Power Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values. Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

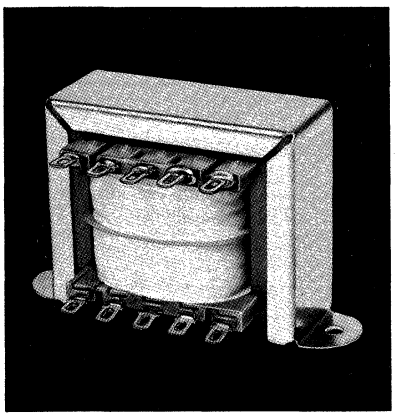
"2-4-1" style split-bobbin transformers for triple-output (μp) applications (type MT)



Signal has extended its line of triple-output transformers for microprocessor applications with three new sizes rated to 100VA (35 watts DC regulated). Similar to the split-bobbin design used in Signal's "2-4-1" series, the chassis-mounted style allows for these new higher power applications.

Two output combinations are provided: 5V and ±12V; and 5V and ±15V. Designated "MT" (single primary) and "DMT" (dual primary), these transformers are rated in terms of the final DC output after a 3-terminal IC regulator. They are designed to provide these outputs with AC line inputs of 100-130V, 50/60 Hz (or 200-260V for nominal 230V lines). All auxiliary components required to complete the DC supply are tabulated.

All MT types are stocked in depth for immediate delivery. In addition, custom variations can be supplied with minimal turnaround time.

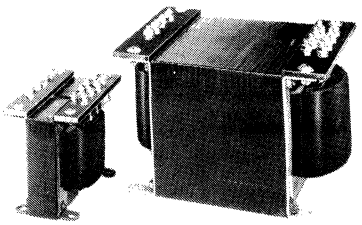
power isolation transformers

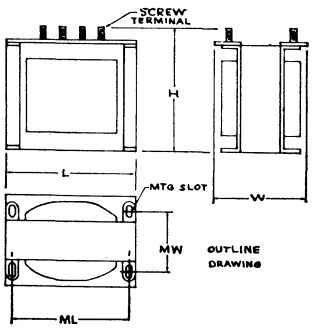
INDUSTRIAL GRADE/STEP-UP OR STEP-DOWN. MANY POSSIBLE VOLTAGE RATINGS.



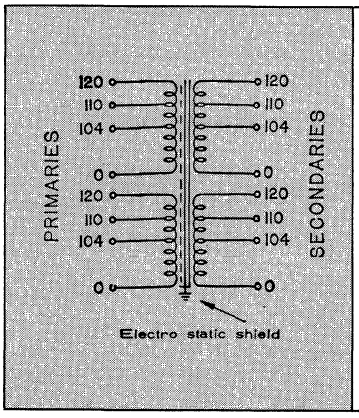
AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU" and "SU" lines are designed for a maximum of 55°C rise above ambient for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated and have a consistently uniform appearance. All ratings are at full load current, continuous operation. 2500V. RMS Hipot is standard.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers (10-32 on ¼ and ½ KVA, ¼-20 on larger sizes). Connections can be easily made with a nut driver. It is also simple to alter the interconnections to change transformer ratings. **Electro static shields are provided grounded to the core.** The connection is made with a lug to ground and may be opened if an ungrounded shield is desired.



DU SERIES 110/220 Dual Primary to 110/220V. Dual Sec. (Primary & Secondary may be reversed)



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts. It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is doubled.

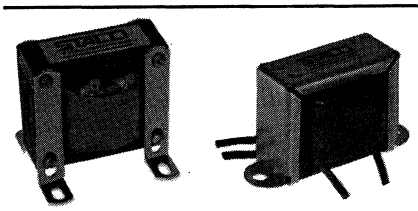
STACO TRANSPOWER® STANDARD-CUSTOM TRANSFORMERS

• AUDIOS • POWERS • CHOKES • CONTROLS • SWEEPS • IMPEDANCE • MINIATURES •

- **5 VA to 5 kVA, 1 ϕ & 3 ϕ**
- **CUSTOM SPECIALISTS FOR OVER 40 YEARS**
- **MEET UL, VDE, CSA & INTERNATIONAL SPECS**

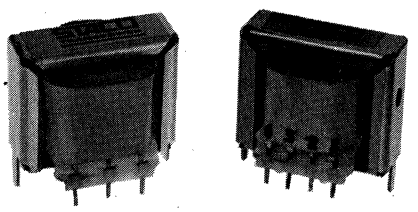
STACO transformers and chokes are available in a wide variety of standard styles and ratings to meet most normal requirements. However, STACO is also a custom specialist with nearly a half century of reliable service. It is easy to specify custom transformers or chokes to meet your specific needs. Simply send your specs to STACO, our design engineers will design a product to fit your needs. Ask for copies of the STACO Specification sheet and the current catalog. They are yours for the asking.



STYLE B STYLE C

RECTIFIER POWER

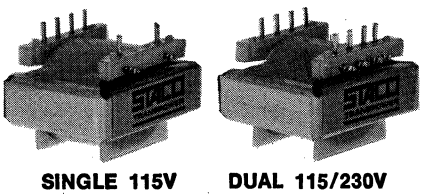
For single or dual output DC power supplies. Max. temp. rise above ambient 45°C. Standard units for single (115V) or dual (115/230V) inputs. (Some available with 105/115/125V). Outputs from 5V to 230V and from 1 to 4000 VA. Connect series or parallel. STACO type SP01A & SP01B.



SINGLE 6 PIN DUAL 8-PIN

MINIATURE P/C POWER

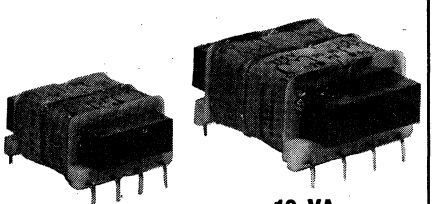
For P/C applications where between board spacing is critical. 63 standards in single (6 pin) and 63 in dual (8 pin). Ratings based on load regulation. Outputs from 5 to 230 VAC in 5 ranges from 1 to 24 VA. Connect series or parallel. STACO type SP02A & SP02B.



SINGLE 115V DUAL 115/230V

MULTI-SECTION BOBBIN P/C

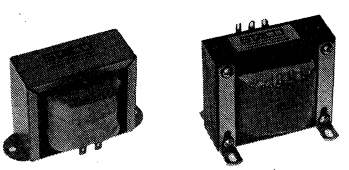
For high isolation (2500V hipot) and low capacitive coupling with superior performance at lowest cost. 60 duals and 60 singles standard in 6 VA ratings (1.1, 2.4, 6, 12, 20, 36 VA). Connect series or parallel for outputs from 5 to 120V. 6, 12, & 20 VA avail. with mtg. screw. STACO type SP03A & SP03B.



6 VA 12 VA

LOW PROFILE P/C POWER

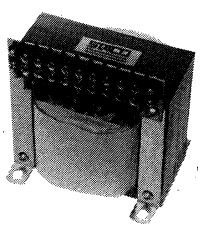
Ultra low profile in 6 & 12 VA types. 6 VA only 0.850″ high, 12 VA is 1.065″. 11 standard ratings in each for outputs from 5 to 230 V. Connect in series or parallel. Multi-section bobbin non-concentric winding eliminates need for shielding. STACO type SP04B.



SINGLE DUAL

SMALL POWER TRANSFORMERS

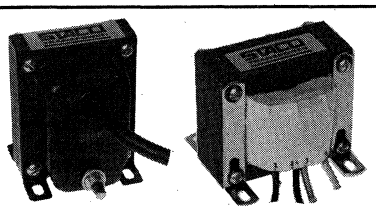
Made with grain oriented core lamination for maximum efficiency at least weight and size for low cost. 110 standard ratings in single or dual outputs from 10 to 120V CT and 2.5 to 100 VA. Choice of solder or QC terminals. For operation to 130°C. Hipot 2500V RMS. STACO SP05A SP05B.



BARRIER STRIP TERMINAL

POWER ISOLATION

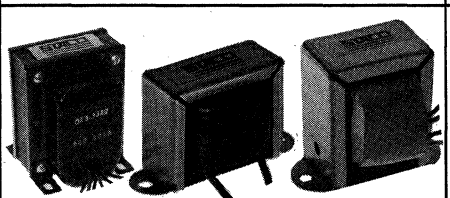
Step up or down industrial grade. Output .25 to 10 kVA. Either 110/220 dual primary to 110/220 secondary or 110/220 to 220/440 secondary (primary may be reversed). Supplied with rugged barrier block terminals. Hipot 2500V RMS. Tapped windings 104/110/120 and 208/220/240. STACO types SP06 & SP07.



ENCLOSED OPEN

STEP DOWN AUTOTRANSFORMERS

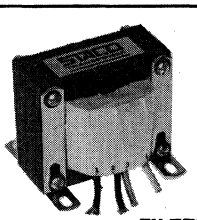
Enclosed, low regulation (ST01) or open frame (ST02) styles to 2 kVA are standard. Heavy duty to 6 kVA. Heavy duty may be used step-up or down. ST01 may be supplied with UL approved line cord and receptacle. ST02 and ST03 have 6″ leads.



A B C

AUDIO TRANSFORMERS

A wide variety of audio transformers is available from STACO. Although designed primarily for solid state applications, all models may be used in tube circuits for maximum reliability. There are 3 standard configurations as shown above plus plug in P/C models (see min. P/C above). STACO types SA01 to SA08.



FILTER

FILTER CHOKES

Both single and dual models are standard. Singles handle 0.5 to 1000 Amps, duals handle 1.0 to 50A and may be connected in series or parallel. Available in two mounting styles. 24 ratings are standard, but specials are readily available. Call for details. STACO types SC01 & SC02.

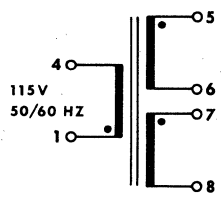
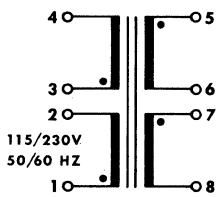
STANCOR TRANSFORMERS

"SIDE WINDER"

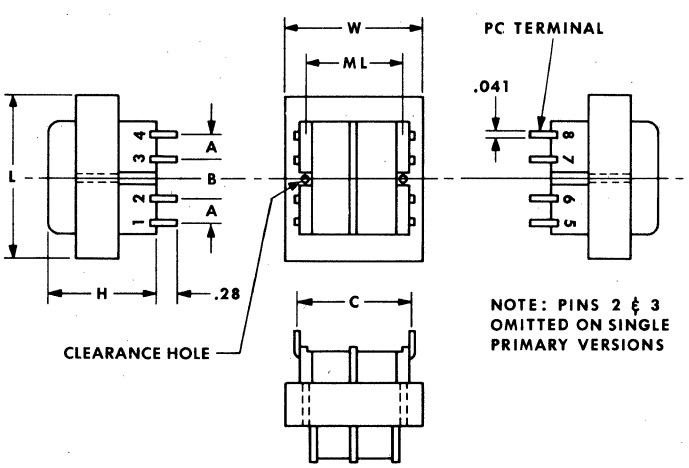
Split Bobbin— PC Mount Transformers



6 PIN
TYPE SW



8 PIN
TYPE DSW



Stancor offers this compact transformer with primary and secondaries wound side by side. The "Side Winder" is non-concentrically wound, to reduce size and cost.

Split bobbin winding and low capacitive coupling design eliminates electrostatic shielding requirement and expense.

- High isolation...2,500 V RMS. Hi-Pot Testing
- PC Pins...Precision spaced insert directly into PC Boards
- Class B Insulation...130°C

"Side Winders" are available with Single 115V or Dual 115/230V Primaries, plus, secondaries are split to permit series or parallel connection.

SIDE WINDER APPLICATIONS:

Electronic Game Systems.
Computer Peripherals.
Switching Power Supplies.
Medical Electronics.
Instrumentation Equipment.
Communications Equipment.
Computer "On Board" Power.
Machine Control Logic Systems.
ROBOTICS.
Consumer Electronics.

Consult Factory For Special Design Requirements.

STANCOR

TRANSFORMERS

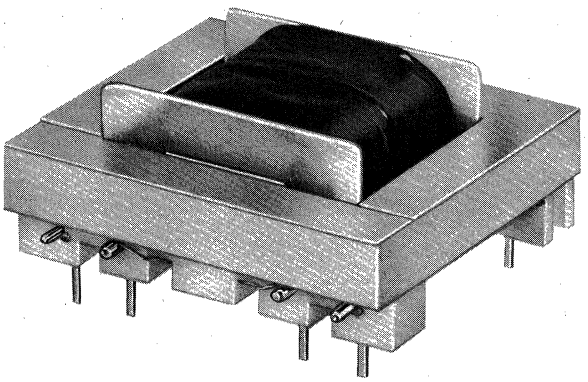
TELEPHONE COUPLING TRANSFORMERS



For Interconnecting Data/Voice Modem Terminals to Telephone Lines

Designed to Meet FCC Part 68

1500 Volt DIELECTRIC STRENGTH — Primary to Secondary — Primary to Core

Distortion: .5% Max. 300-3.5 kHz
Turns Ratio: ±2%
Frequency Response: ±.5 dB 300-3.5 kHz

Longitudinal Balance: 60 dB Min. @ 200-1kHz
40 dB Min. @ 4 kHz
Return Loss: 26 dB Minimum

APPLICATION DATA

Stancor's TTPC series transformers are designed to meet the high performance requirements of today's phone interconnect and instrumentation applications. Stancor has the broadest range of units for general use in impedance matching, circuit isolation, line balancing or bridging, and hybrid applications.

TTPC transformers are ideal for use in voice and data interconnect networks such as modem terminal connection to telephone lines. Stancor's units will handle 1500 volts dielectric breakdown and meet FCC Part 68 requirements.

√—New item—U.L. Recognition not available at time of catalog printing. * All primaries for 115-230 V., 50-60 Hz. ▲ R.M.S. values.

NEW!! MICROPROCESSOR POWERS

Developed especially for triple output regulated DC supplies that are used in microprocessor, logic and OP-amp circuit combinations. Outputs are listed in RMS values and will deliver popular ±12 and ±15 volts with 5V standby values included.

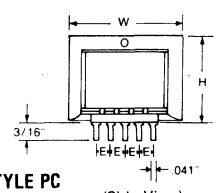
STYLE PC 10 PIN STYLE



(Side View)

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C
CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DC direct current
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM electrically programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J
JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K
kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L
LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
μF microforad
MHz megahertz
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOSIGT metal-oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM nuclear instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator

P
PC printed circuit
PCB printed circuit board
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLL phased lock loop
PPI plan position indicator
PROM programmable read only memory
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon controlled switch
SDA source & detector assemblies
SIDAC bidirectional voltage-triggered switch
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

STERLING TRANSFORMER

POWERSTAT® *Variable Transformers now*

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight,* only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

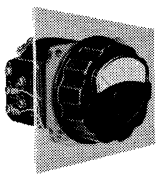
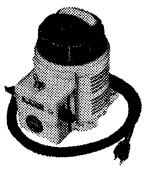
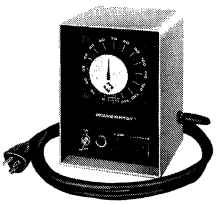
STATIONARY METERED KNOB TYPES

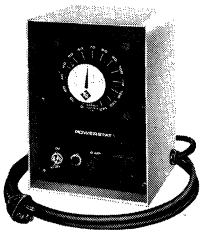




ENCLOSED TYPES



TYPE L10B



TYPE L116B

Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with metered knobs. Stationary voltmeter does not turn with knob. Voltmeter accurate within ±3% of full scale and insensitive to stray magnetic fields. When ordering, add VS prefix to type number. *Back-of-panel* mounted types in the 21-22 through 146-246 series can be combined with Metered Knob Assemblies. Existing models can be retrofitted also. Assembly type VS150 has a 0-150 volt scale and type VS300 has 0-300. Types VS116B, VS3PN116B and VS3PN136B are available off-the-shelf from distributor stock.

Designed to meet OSHA requirements. Portable 120 volt, single-phase units have grounded NEMA cord-plug assembly, on-off switch, grounded output receptacle, pilot light and fuse. Panel controls are recessed for protection from accidental bumping. Slots at rear for wall hanger brackets. Type L10B rated 0-132 volts, 1.75 amp; type L21 rated 0-140 volts, 4.5 amp; type L116B rated 0-140 volts, 10 amp. All available off-the-shelf from distributor stock.

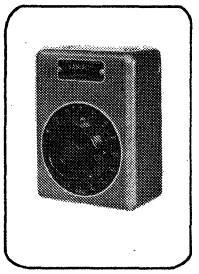
TECHNIPOWER® A Penril COMPANY

VARIAC® VARIABLE AUTOTRANSFORMERS

The industry standard for performance and reliability. 700 models and more than 1,000 variations to 'spec'. Overloadable to 1000% short term with output from 0 to line or above line voltage despite load size or power. Single and 3-phase models, manual and motor driven, 120 to 480V outputs. Militarized "400Hz" units also offered.

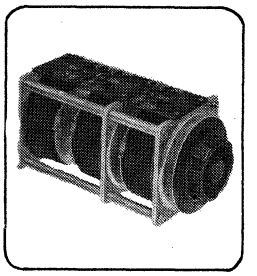
SINGLE PHASE VARIAC® AUTOTRANSFORMERS

In 120, 240, 480 V inputs, 50/60 Hz, many with UL and CSA listings and from 2.0-300.0 Amps. Choose from fully enclosed or open designs, in single phase or three phase configurations, 50/60 Hz and 400 Hz models. Connectable in parallel or series and single line.



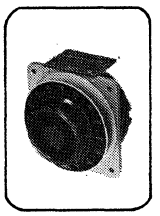
MANUAL 3-PHASE GANGED VARIAC® AUTOTRANSFORMERS

Control 3-phase power requiring 208, 240 or 480 V inputs. These Variacs come in 208, 240 and 50/60 Hz ratings and in 7.1, 8.5 and 10 Amps. 29 other units permit overvoltage use on an open Delta connection. 14 other models are Y connected. Ball bearings are also included.



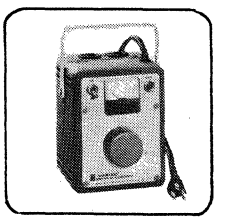
MILITARIZED "400 Hz" VARIAC® AUTOTRANSFORMERS

For ruggedized use from 350 to 1200 Hz. With excellent regulation, smaller and lighter than 60 Hz units, they conform to most mil-specs for harsh environments. Single Phase and 3-Phase configurations.



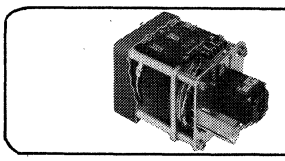
PORTABLE VARIAC® AUTOTRANSFORMERS

Metered, encased and available in 20 models featuring an autotransformer and overload protection. Some have Voltmeters, Ammeters, and Wattmeters. 120 V and 240 V models to 18.0A; 2 and 3 wire versions also offered.



MOTOR DRIVEN VARIAC® AUTOTRANSFORMERS

More than 60 motor driven models, single or ganged. Motors are fully enclosed, 2 phase, gear-reduction, servo types with motor speeds of 2, 4, 8, 16, 32, 64 and 128 secs at 60 Hz. All have ball bearings and adjustable limit switches.



TECHNIPOWER® A Penril COMPANY

VARIAC® AUTOMATIC VOLTAGE REGULATORS

Encourage peak performance and protect your equipment with Variac Voltage Regulators. Offering smooth control and fast response, they function up to 10X the rating for transient surges. They will not introduce distortion or noise, and will offset brownout effects. Choose from five basic models plus 100 custom variations.

TYPE 1591

Compact 1 kVA with 115 V ratings. Low cost, small and available in portable and rack mounted models.

TYPE 1592

Provides proper voltage for long term operation — remotely programmable. In 2 models, capacity to 5.3 kVA, handle 120-480 V and are used in single and three-phase applications.

TYPE 1571

Militarized, in 4 models, for use where shock or vibration is encountered. Available in 400 Hz or 50/60 Hz with 115 V outputs, rack mountable. 5.8 kVA.

TYPES 1581 and 1582

High capacity. Automatically compensate for line voltage fluctuations. 115 V and 230 V models, 19.7 kVA capacities. For industrial and lab use e.g. computers, transmitters and critical processes.

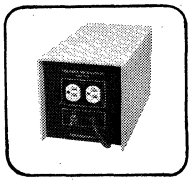
TECHNIPOWER® A Penril COMPANY

VOLTAGE REGULATORS/POWERLINE CONDITIONERS

MODELS 1594

Ferroresonant Voltage Regulators

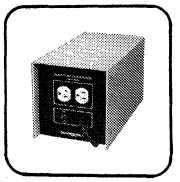
500VA and 1000VA models, line/load regulations to ±1%; 85% efficiency ratings. Economical, dependable, with excellent isolation. Clean, smooth response. For instruments, computerized controls, robotics. 1 year warranty.



MODELS 1595

Powerline Conditioners

For microprocessor based equipment and controls. 250VA, 500VA, 1000VA models. Line/load regulation ±3%; 3000V pk max. transient input; overload protection. Militarized 400Hz and 50Hz models available. 1 year warranty.



POWER SUPPLIES

See EEM page **D•1850** for Technipower Mil-Quad, Sealed and Partly Sealed, Modular Switchers, Linear Power Supplies, Sine Wave Inverters and others.

Custom transformers. Give us your tough jobs.

A Technitrol transformer is often one that no one else can make, or wants to. We're accustomed to the fine balancing of parameters to get optimum performance for each application. We find hidden solutions by asking you the right questions. When you need to make difficult choices, we help you make the right ones. A tough transformer design is never cut-and-dried.

MIL-T-27 transformers, Grades 4, 5, and 6

- Scott T.
- High-voltage.
- High-voltage pulse.
- 400 Hz.
- Voltage-regulating/ferroresonant.
- Custom, to your specifications.

MIL-T-21038 pulse transformers

- Grades 5 or 7, Class S, life expectancy X.
- Surface-mount and flat-pack available.
- Wide selection of standard models.
- Custom designs.

Mil-Std-1553 data-bus interface transformers

- Meet Mil-Std-1553B.
- Meet MAC Air specifications A3818, A5690, A5232, and A4905.
- Surface-mount and flat-pack available.
- Wide selection of standard models.
- Custom designs.

Mil-Std-1553 data-bus couplers

- Single- and dual-stub-terminal models.
- Single- and dual-bus-terminal models.
- Use of our Mil-Std-1553 interface transformers within the couplers provides a large choice of coupling characteristics.

General-purpose low-power pulse transformers

- IEEE 802.3 data interface transformers (10 Mb/s, Ethernet).
- 1.0 and 2.5 MHz data-interface transformers.
- Wide selection, bandwidths typically 10 kHz to 10 MHz.
- Commercial and military performance requirements.
- Isolation transformers.
- Impedance-matching transformers.
- Balun transformers.
- Chip-carrier and DIP packaging available.

Technitrol, Inc.

Technitrol products: Manchester encoder/decoders • pulse transformers • data bus couplers • pulse-width regulators • delay lines including digital, fixed-constant-distributed, fixed-lumped-constant, programmable, and trimmer types • transformers including audio, autotransformer, chopper, constant-voltage, dc-to-dc-conversion, decade, differential, discriminator, driver, ferroresonant, filament, 400 Hz, high-voltage, input, instrument, interstage, inverter, isolation, magnetic-amplifier, matching, microminiature, microphone, mixing, modulation, output, plate, power, pc-mounting, pulse, rf, rectifier, reference, Scott T, servo, synchro-control, telephone-coupling, toroidal, transistor, voltage-dividing, voltage-regulating, voltage-stabilizing, wideband, MIL-audio, MIL-power, MIL-rf, and MIL-pulse types • saturable reactors • filter reactors • square-wave oscillators • magnetic amplifiers • coils including foil-wound, high-Q/low frequency, toroidal, and transformer types.

DEFLECTION YOKE

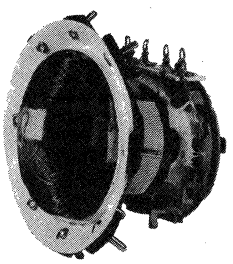
THORDARSON

THORDARSON CRT Display Products utilize advance design and construction techniques which meet or exceed all applicable standards. Development and production capabilities located in Mt. Carmel and Robinson, Illinois, are devoted primarily to producing custom requirements as well as standard flybacks and yokes for CRT Display and related applications.

We invite you to send us your specifications for deflection yokes and/or high voltage transformers (flybacks). We'll send you a professionally designed prototype. Our engineering staff wants to work with you to design transformers for your special projects.

20mm 90° Yoke With Adjustable Magnets (monochrome)

Applications for this yoke and the 29mm 110°:
- CAD/CAM Display Terminals
- Data Display Terminals
- Video Monitors
- Military Defense Terminals
- Instruments With CRT Displays
- Specific Custom Applications



20mm 90°

29mm 110° Yoke With Adjustable Magnets (monochrome)

Features for this yoke and the 20mm 90°:
- Adjustable Magnets Are Standard For Geometric Corrections
- Adapts to Any Size CRT
- High Resolution And Excellent Focus
- Frequency Up To 64 kHz
- Built to Customer Specifications
- Excellent Performance and Reliability
- Available With or Without Lead Wire
- Produced and Serviced in U.S.A.

DEFLECTION YOKES AND HIGH VOLTAGE TRANSFORMERS (FLYBACK)

THORDARSON

37mm 90° Color Yokes

Applications:
- CAD/CAM Display Terminals
- Data Display Terminals
- Military Defense Terminals
- Video Monitors
- Instruments With CRT Displays
- Special Custom Applications

Features:
- Adapts to Any Size CRT
- Good Convergence and Color Purity
- Built To Customer Specifications
- Excellent Performance and Reliability
- Produced and Serviced in U.S.A.

Fully Integrated Sweep, Horizontal Output Transformers

Features:
- Epoxy or Silicon Encapsulated
- Frequency Up To 32 kHz
- Retrace Time As Low As 5.5μ secs.
- Footprint Styles – Delta, Rectangular, Custom, "T" Print see pg. 20.
- Built to Customer Specification
- Excellent Performance and Reliability
- Produced and Serviced in U.S.A.

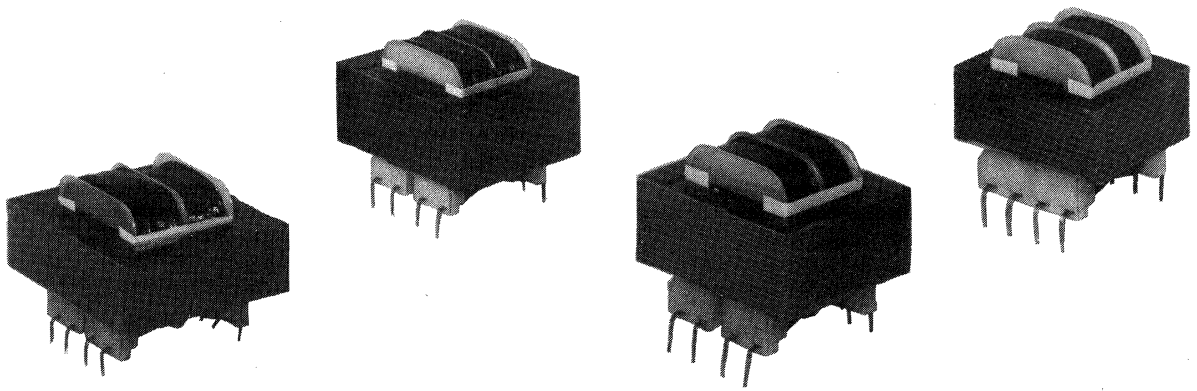
MINI-ISO-MITES

THORDARSON

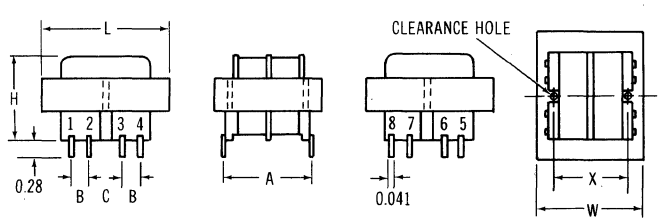
Low-Voltage Printed Circuit Plug-In Power Transformers



The MINI-ISO-MITES are low voltage, plug-in, power transformers added to THORDARSON'S printed circuit line. The Mini-Iso-Mite series are designed for ANY low voltage power supply application where tight space restrictions are a consideration. The single 115V or the dual 115/230V primaries and secondaries are wound non-concentrically meaning, side by side. This construction results in smaller units and eliminates the need for costly electro-static shielding.

The Mini-Iso-Mites are highly isolated units with 2500 HIPOT standard and are built to MIL-T-27 specifications.

The power ratings are: 2.4VA, 6VA, 12VA, 20VA, and 36VA. The tallest of the series is $1^{9}/_{16}$ inches and the smallest is $1^{3}/_{16}$ inches.



VA Size	H	L	W	X	A	B	C	Wt.

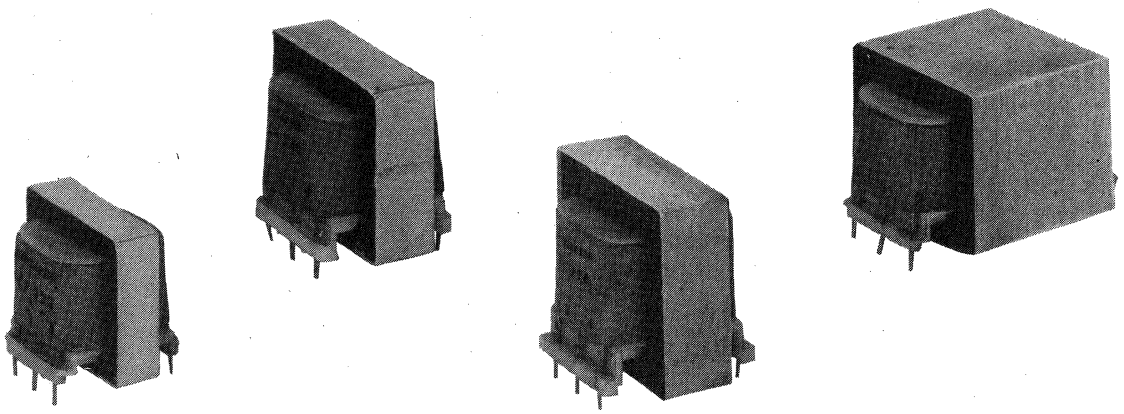
MINIATURE TRANSFORMERS

THORDARSON

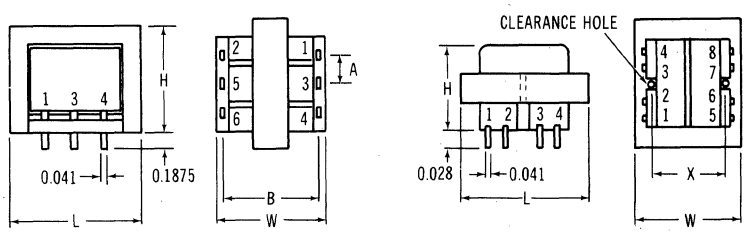
Printed Circuit Plug-In Power Miniature Transformers



Thordarson's new step down PCP transformer series is utilized in miniaturized equipment. 1.2, 4.4, 10, and 24 VA sizes are available.

All THORDARSON transformers are thoroughly impregnated and built to MIL-T-27 specifications to insure quality products.

The six and eight plug-in terminal pins are precisely placed with consistency for ease in mounting. The smallest of the PCP series is 3 oz., with a height of $1^{3}/_{16}$ inches. The largest unit weighs.12 oz., and is $1^{3}/_{8}$ inches in height. Additional statistical information is contained in the charts.



VA Size	W	L	H	A	B	Oz.
1.2	1.125	1.375	1.125	0.312	1.000	3
4.4	1.226	1.625	1.312	0.400	1.100	5

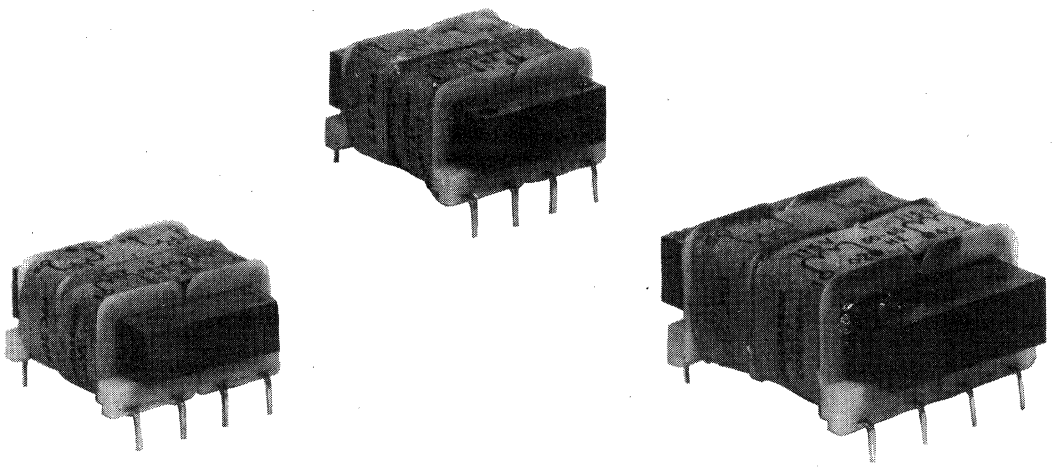
FLAT COMPACT TRANSFORMERS

THORDARSON

FLAT COMPACT Printed Circuit Power Transformers



Sleek design: The 6VA FLAT COMPACT permits 1 inch card spacing and is 0.850 inches high. The 12VA model permits $1^1/_4$ inch card spacing and is 1.065 inches high.

The electro-static shield has been removed. Why? It incorporates non-concentric windings which means the secondary is located next to the primary instead of being wound directly over it. The high isolation has diminished the capacitance between windings.

1500 V RMS HIPOT: High isolation is a standard feature.

The FLAT COMPACT Transformer was created for use in ANY low voltage application where space is critical. For single or dual output DC supplies and isolated control circuits and reference supplies, use the FLAT COMPACT.

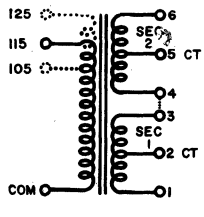
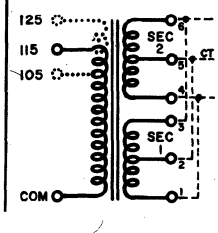
SERIES HOOKUP



PARALLEL HOOKUP



TODD SYSTEMS "HIGH CURRENT TRANSFORMERS & CHOKES" are designed for use in high power rectifier circuits, and high current A.C. applications. "TODD ENGINEERED" designs feature a nominal temperature rise of 45°C., at full load, thus providing outstanding overload capacity. All designs utilize extremely low regulation, varying from 10% in the smallest to 1% in the larger units.

Four styles . . . select the type best suited for your lab, test rigs, OEM or production equipment

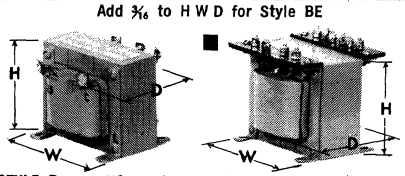
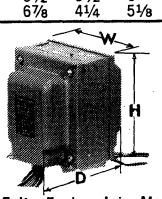
Add 3/16 to H W D for Style BE



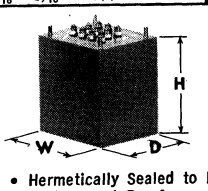
STYLE B: • "Open Frame" Bracket Mounted
• Double Vacuum Varnish Impregnated

STYLE BE: • Conforms to MIL-T-27B
• Epoxy Encapsulation added to Style B



STYLE V: • Fully Enclosed in Metal Shells
• Ease of "Wiring with Leads"
• Attractive Appearance
• Dbl Vacuum Varnish Impregnated

OUTLINE DRAWINGS AVAILABLE



STYLE CM: • Hermetically Sealed to MIL-T-27B
• Environment Proof
• Attractive Gray Finish
• Permanent Name Plate

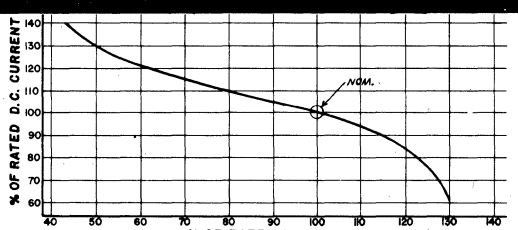
SCREW TERMINALS

HIGH CURRENT CHOKES — 50/500 HERTZ — DIMENSIONS REFER TO HIGH CURRENT XFMR SKETCHES



- **Matching styles complement high current transformers**
- **Wide variety of compatible current ratings**

INDUCTANCE VARIATION

Graph indicates typical variation of inductance (%) when used at D.C. currents (%) other than the rated values.

Chokes operated at D. C. currents higher than rated value must be run on an intermittent basis to avoid overheating.

POWER TRANSFORMERS OF TOROIDAL DESIGN

Advantages of toroidal design.	**Your Product advantages.**
LOW WEIGHT	Light end product. Low chassis weight and cost. Low packing and shipping cost.
SMALL, FLEXIBLE DIMENSIONS	Small, slim end product.
SINGLE BOLT MOUNTING	Low assembly cost.
LOW HUM	Quiet end products. No cost for hum insulation.
LOW STRAYFIELD	No shielding cost. Compact design with straightforward component layout.
HIGH EFFICIENCY	Equipment runs cool, reliability is improved. Low operating cost.
Advantages offered by TOROID MARYLAND.	
CUSTOM ENGINEERING USING PROPRIETARY SOFTWARE	Reduced losses in your power supplies and regulators. Fast turnaround. Prototypes that work the first time.
COMPUTER DESIGN FROM DC DATA	No need to determine transformer specs, just give us the required DC data for your equipment.
UL RECOGNITION	Fast and easy UL approval of your end product.
MEETS FOREIGN SAFETY STANDARDS	No redesign for export.

GENERAL INFORMATION

TOROID CORPORATION OF MARYLAND is a U.S. Manufacturer specializing in medium size to large toroids. In our plant in Bowie, Maryland, we make tape-wound toroidal cores of super grain oriented steel strip. We also have specially designed toroidal winding machines for a wide range of wire sizes and for insulation. Our Application Engineers use proprietary computer programs to optimize your Custom Designed Transformer for rectifier use as well as for AC applications. *This means we can offer the smallest, most economical transformer for your application and minimum losses in your power supply. And the prototypes we supply will meet your specifications, so trial and error is avoided.*

MOUNTING METHODS

Disk Mounting is the preferred method for transformers and chokes up to about 6.3 inches in diameter and 12-15 lbs. weight.

For larger units, and for applications where severe shock and vibration must be tolerated, we offer potted centers with hole for a mounting bolt.

We also offer hardware for mounting the toroid on edge, as well as hardware for mounting of terminal strips.

LEADS AND CONNECTORS

Standard is 8″ long flying self-leads. Other lead lengths, multistranded leads, and mounted connectors are options.

SHIELDING

Static shields can be included between primary and secondary windings in custom made transformers.

Magnetic shielding is rarely needed in a toroidal transformer. If shielding is required, we offer a low-cost alternative to the mumetal shield boxes required on stacked core transformers: A Shield Ring which can be fitted around the rim of both standard and custom made toroids.

TOROID CORPORATION OF MARYLAND • 6000 Laurel-Bowie Road • Bowie, MD 20715-4037 • 301-464-2100

POWER TRANSFORMERS OF TOROIDAL DESIGN

PRODUCT PROGRAM

CUSTOM MADE TRANSFORMERS in sizes listed in the Table on the opposite page, and in other sizes if required, are our speciality. They are economical alternatives to standard transformers even in small quantities.

STANDARD TRANSFORMERS for 117V-60Hz as listed in the Table below are off-the-shelf. A similar program is available for 50/60Hz with dual primaries (2 × 115V). We also have combination transformers for regulated 5V DC and ± 15V DC, and Kits for making your own breadboarding transformer.

3-PHASE TRANSFORMERS using three single phase units.

AUTOTRANSFORMERS.

INVERTER TRANSFORMERS for 50, 60 and 400 Hz.

CURRENT TRANSFORMERS for indication and control applications, such as overcurrent protection and peak load limiting.

FILTER REACTORS for rectifiers, including *Swinging Chokes.*

Toroidal Power Transformers

UL-RECOGNIZED
OFF-THE-SHELF STANDARD TRANSFORMERS FOR 117V - 60 Hz SUPPLY.

TRANSFORMERS

SUBMINIATURE AUDIO TRANSFORMERS

LT & LS SERIES
LU SERIES

The LS Series is electrically and mechanically the same as the LT Series except for phase relationships between terminals.

LS, LT, and LU Series transformers have successfully passed the rigid requirements of MIL-T-27, Class S, Grade 5.

Subminiature in size, weighing less than 0.1 ounce, these transformers have tenth inch grid spacing between terminals and are ideally suited for transistor circuit applications which utilize printed circuit board design. All three series have risers on mountng surfaces to facilitate inspection and board cleaning and also to prevent moisture traps.

A wide range of standard designs are available which meet the requirements of most common applications and allow for rapid delivery of prototype quantities. Special designs are also available in all three types.

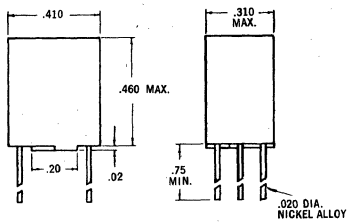
The new LU Series exhibits the same electrical characteristics as the LS and LT Series but has been packaged in a "thin line" configuration to allow for closer board spacing for "card cage" applications or where height dimensions are critical.

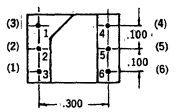
MAGNETIC SHIELDING

LS, LT and LU Series transformers are available with magnetic shields.

To order transformers with shields installed, add 500 to dash numbers shown in the table below. For example: to order an LS-22 with shield, specify LS-522.

LS/LT SERIES

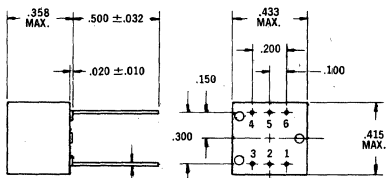




WT. 0.1oz

With Mag. Shield Dimensions are .365 Max. x .465 Max. x .531 Max.

LU SERIES



With Mag. Shield Dim.are .448 x Max. x .494 Max. x .400 Max.

Mech. Tol. = ±.010 unless indicated.

TRANSFORMERS

SUBMINIATURE AUDIO TRANSFORMERS

Torotel LA and LB series transformers are manufacturered to MIL-T-27, Grade 5, Class S specification. These series have 0.1 grid spaced terminals for printed circuit application. Both types have risers on mounting surfaces to prevent the formation of moisture traps and to facilitate cleaning of board assemblies.

The LA Series is electrically the same as the LB Series, but is packaged in a .460 inch cube with smaller outline dimensions for application where this configuration is more suitable.

Leads are made of 20 AWG tinned copper. Units utilizing Dumet wire are available on special request.

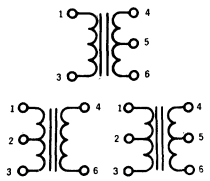
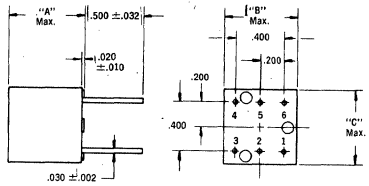
TRANSFORMERS

AUDIO TRANSFORMERS

LL & LR SERIES





Series	A	B	C
LL	.600	.590	.590
LR	.925	.800	.710

These tiny, versatile "LL" transformers are provided with .020 risers and 0.1 grid spacing for printed circuit board applications and are manufactured to MIL-T-27, Grade 5, Class S specifications.

Response: ±1 db 200 to 50,000 Hz

Distortion: 10% max. at rated power, 200 to 50,000 Hz

Weight: 0.4 oz.

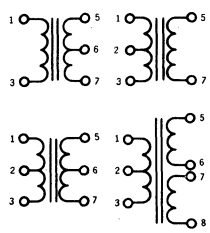
These miniaturized "LR" transformers are manufactured to MIL-T-27, Grade 5, Class S specifications and are ideally suited for a wide range of printed circuit applications.

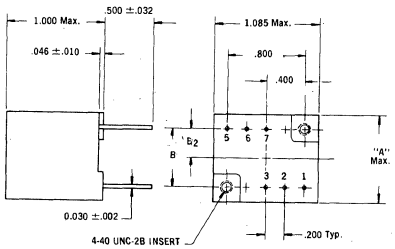
Response: ±1 db 200 to 20,000 Hz

Distortion: 10% max. at rated power, 200 to 20,000 Hz

Weight: 1.0 oz.

LW & LY SERIES





Series	A	B	B_2
LW	.900	.600	.300
LY	1.125	.800	.400

"LW" Series transformers are manufactured to MIL-T-27, Grade 5, Class S specifications. Riser areas and 0.1 grid spacing make these units ideal for printed circuit board applications.

Response: ±1 db 100 to 10,000 Hz

Distortion: 1.5% max. at 60 mW, 200 to 10,000 Hz

Weight: 2.0 oz.

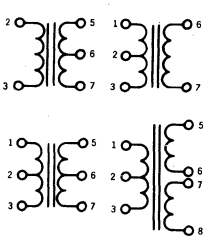
"LY" Series transformers are highly compact, efficient units with power output ratings to 7.5 watts. These transformers are manufactured to MIL-T-27, Grade 5, Class S specifications.

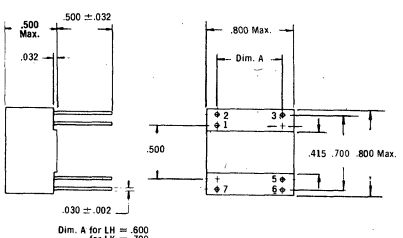
Response: ±1 db 60 to 10,000 Hz

Distortion: 1% max. at 250 mW, 200 to 10,000 Hz — 10% max. at rated power, 200 to 10,000 Hz

Weight: 2.5 oz.

LH & LK SERIES





Series	A
LK	.700
LH	.600

"LH & LK" Series transformers are the ultimate in compactness. Designed to meet MIL-T-27, Grade 5, Class S.

Response: ±1 db 200 to 10,000 Hz

Distortion: 10% max. at rated power, 200 to 10,000 Hz

Weight: .75 oz.

TRANSFORMERS

PC MOUNT POWER TRANSFORMERS

Torotel standard PC mount transformers are designed for 115 Vrms 60 Hz input and are generally usable to above 400 Hz. Voltages listed in table are standard values but transformers can be furnished with other voltage and current ratings. Transformers are available with Channel Frame mounting, either tab style, (Type C) twist prong (Type B) or without Frame (Style A).

Also custom designed power transformers and audio transformers are available in these and other types and sizes upon special request.

TRANSFORMERS

400 Hz MINIATURE POWER TRANSFORMERS

Reference for all Industrial and Military Standard 400 Hz Miniature Power Transformers

These 400 Hz Miniature Power Transformers are selected for use in all Military and Industrial applications requiring high performance in the smallest possible package size. They conform to all of the requirements of MIL-T-27, Class S (−55°C to +130°C). The minimum continuous operating life expectancy is 10,000 hours. This series is available having power ratings of 0.5 VA through 25 VA. The primaries are 115 Vrms with secondary voltages ranging from 5 Vrms through 300 Vrms.

It is recommended that these transformers be specified for all applications where space, weight, and cost effectiveness are prime considerations.

TRANSFORMERS

400 Hz MINIATURE POWER TRANSFORMERS

Reference for all Industrial and Military Standard 400 Hz Miniature Power Transformers

PHYSICAL SPECIFICATIONS

Size: Sizes for Standard VA Types are given in Table I, and Outline Drawings.

Construction: MIL-T-27, Grade 5; Black Epoxy Encapsulated.

Terminals: Printed circuit pins — tinned brass.

Terminal Strength (Method 211 of MIL-STD-202, Test Condition A): 2.0 pounds.

Marking: Includes MIL-T-27 Type Designation, winding ratings, maximum working voltage, schematc, Torotel name, and part number.

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature Range: −55°C to +130°C (ambient plus temperature rise).

Altitude: 70,000 feet, maximum.

Vibration: MIL-STD-202, Method 204, Test Condition D.

Life Expectancy: 10,000 hours minimum.

Other Environmental Specifications: In accordance with MIL-T-27, Grade 5 Class S, Family 03.

ELECTRICAL SPECIFICATIONS

Primary Voltage: 115 volts rms ±10%.

Frequency: 400 Hz ±5%.

Secondary Voltage: See Table II.

Secondary Voltage Tolerance: ±3% at full load and 115 volts, 400 Hz applied to primary.

Electrostatic Shielding (Schematics S and Y): 5 to 1 minimum voltage ratio at 20 KHz.

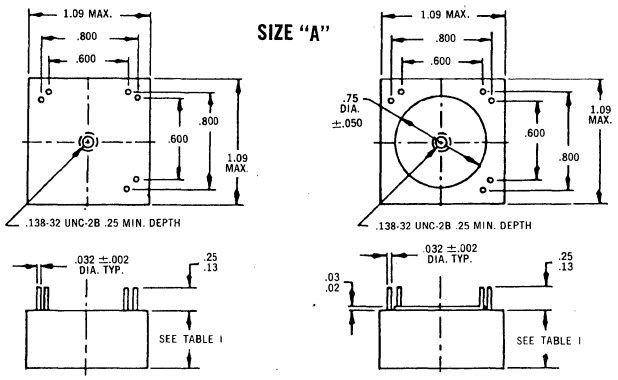
Phase Shift: 1.0 electrical degree between primary and secondary voltage at rated load, maximum.

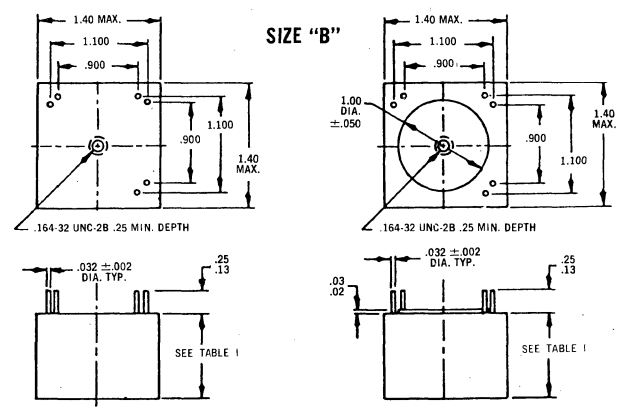
Insulation Resistance: 10,000 megohms minimum at 500 VDC.

Dielectric Strength: At sea level—2.8 times the maximum working voltage. At reduced barometric pressure—1.25 times the maximum working voltage.

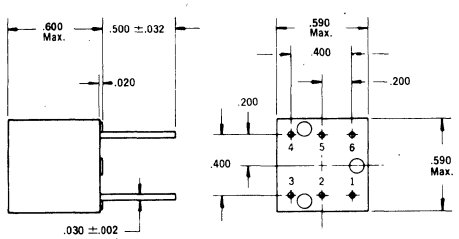
Mech. Tol. = ±.005 unless indicated.

PACKAGE STYLE E **PACKAGE STYLE P**





PACKAGE STYLE S



MECH. TOL. FOR STYLE "S" = ±.010 UNLESS INDICATED.

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

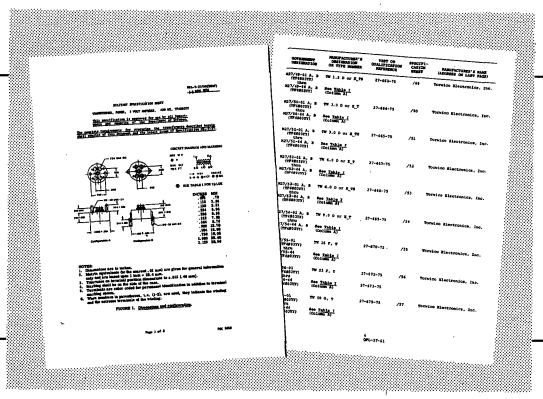
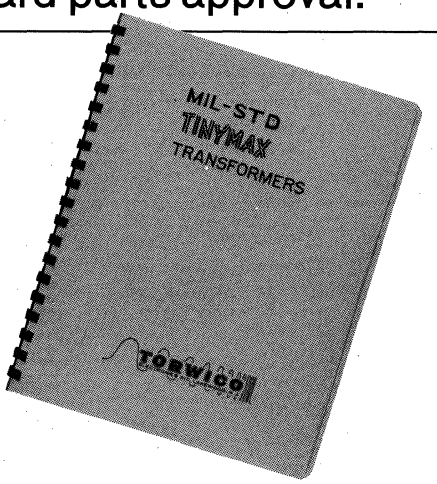
TORWICO ELECTRONICS INC

LEADER IN MAGNETIC COMPONENTS

TINYMAX® Transformers have QPL Status on Qualified Product List 27.



Now you can specify Military Standard Transformers without the need for Qualification Testing or requests for non-standard parts approval.



These miniature transformers are of toroidal construction and offer a size and weight reduction when compared to conventional laminated and "C" core designs. Yet, the prices on these custom engineered transformers are competitive with off-the-shelf stock items.

So, when you need a 115V, 400 Hz transformer having a specific secondary voltage don't settle for an off-the-shelf item that may only approximate your requirement. Torwico has over 2,000 MIL/STD units and an almost infinite selection of STD TINYMAX.

What's more, Torwico offers fast delivery and competitive pricing. Selection, delivery and price--Torwico has it all.

STD TINYMAX -- MIL-T-27, Grade 4 and Grade 5, Class S, 115 volt, 400 Hz transformers available in power ratings ranging from 1.5 VA through 250 VA, with an almost infinite combination of secondary voltages of 6V through 300V.

MIL-STD TINYMAX -- Grade 4 and Grade 5, Class S, 115 Volt, 400 Hz transformers. Reference M27/37 through M27/66. Over 2,000 choices of secondary voltages.

EXTENSION OF APPROVAL -- Any design selected directly from, or based, on our MIL/STD TINYMAX transformer may be qualified to MIL-T-27 by similarity.

PROCUREMENT NOTE -- Catalog information and cross referenced sheets may be obtained from the factory or for MIL-STD units, refer directly to specification sheets M27/37 through M27/66.

PROTOTYPE DELIVERIES -- A large assortment of TINYMAX transformers is always maintained in stock for immediate delivery. Others can be shipped within 10 days.

For a copy of Torwico's MIL-STD TINYMAX catalog, contact your local Torwico representative. He'll show you why Torwico is the easy way to deal with military standards.

* Windings may be connected in series to obtain their combined voltage when properly phased. Current will be equal to the current of the lowest winding. Example: Two 6.3V windings @ 2A in series would be 12.6V @ 2A. Windings may also be connected in parallel to obtain combined current. Example: Two 6.3V windings @ 2A in parallel would be 6.3V @ 4A. ¶ Tapped primary 105-115-125. ‡ 60 cycle operation.

New Product

Flat Pack Power

TRIAD-UTRAD
A Division of MagneTek, Inc.
Dept. EM, 1124 East Franklin Street, Huntington, IN 46750 • Phone: (219) 356-6500 • TWX: 810-333-1532

Triad-Utrad's new Flat Pack power transformer is designed to meet the needs of low clearance printed circuit board and solid state power designs. These new units can also be used for control and instrumentation applications. Voltages and currents were chosen for widely used power applications and could be used in single or dual output supplies. The Triad-Utrad Flat Pack has a unique construction feature allowing them to pass a 2000V HiPot test.

Specifications:

Flat Pack = allows ¾" card spacing for 2.5VA units, 1" card spacing for 6VA units or 1¼" for 12VA units

Split Bobbin = side by side windings reduce interwinding capacitance and eliminates the need for a static shield

Semi-Toroidal Construction reduces radiated magnetic fields and results in balanced windings

Terminals are precision spaced

Split Bobbin Tansformer

Triad-Utrad's new Split Pack split bobbin transformer increases the depth and versatility of Triad's already extensive line of PC board mounted transformers. Like Triad's recent Flat Pack™ series, the Split Pack transformers are nonconcentrically wound—with primary and secondaries wound side by side, unlike the secondary-on-top-of-primary windings of stancard PC board transformers. Split bobbin winding and low capacitive coupling eliminate costly electrostatic shielding. The Split Pack's unique construction make possible higher HiPot testing—2,500V rather than 1,500V. Dual primaries-115/230V, 50/400 Hz, plus precision spaced terminals.

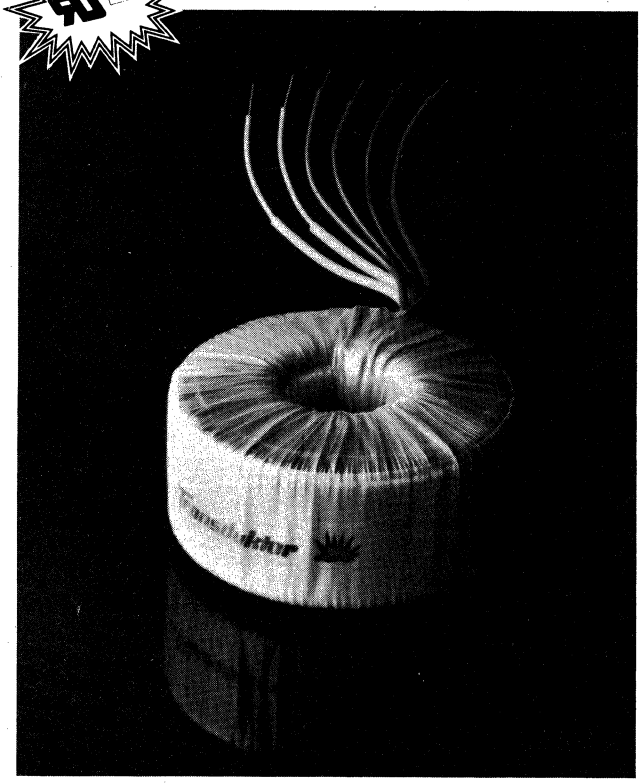
Ulveco

Toroidal Power Transformers



LOW WEIGHT
Typically 50% lighter than traditional stacked lamination transformers.

SMALL DIMENSIONS
Low height profile allows slim, compact design of electronic equipment.

FLEXIBLE DIMENSIONS
The Ulveco Toroidal Power Transformer can be "modeled" to fit very limited spaces and still conform to your electrical requirements.

EASY TO MOUNT
Just one center screw easily and quickly mounts the Ulveco Toroidal Power Transformer to the chassis.

LOW MAGNETIC STRAYFIELD
No air gap and the primary and secondary windings evenly spread around the core, resulting in a very low radiated magnetic field.

LOW MECHANICAL HUM
A single continuous strip of steel tightly wound into a roll results in a very solid and stable unit. No loose parts to buzz.

SMALL NO LOAD LOSSES
Ulveco Toroidal Power Transformers can reduce open circuit power by 90% compared to traditional stacked lamination transformers.

STANDARD OFF-THE-SHELF TRANSFORMERS SERIES 5000

Primary voltage: 120V, 60 Hz

Primary to secondary insulation: 4000V RMS

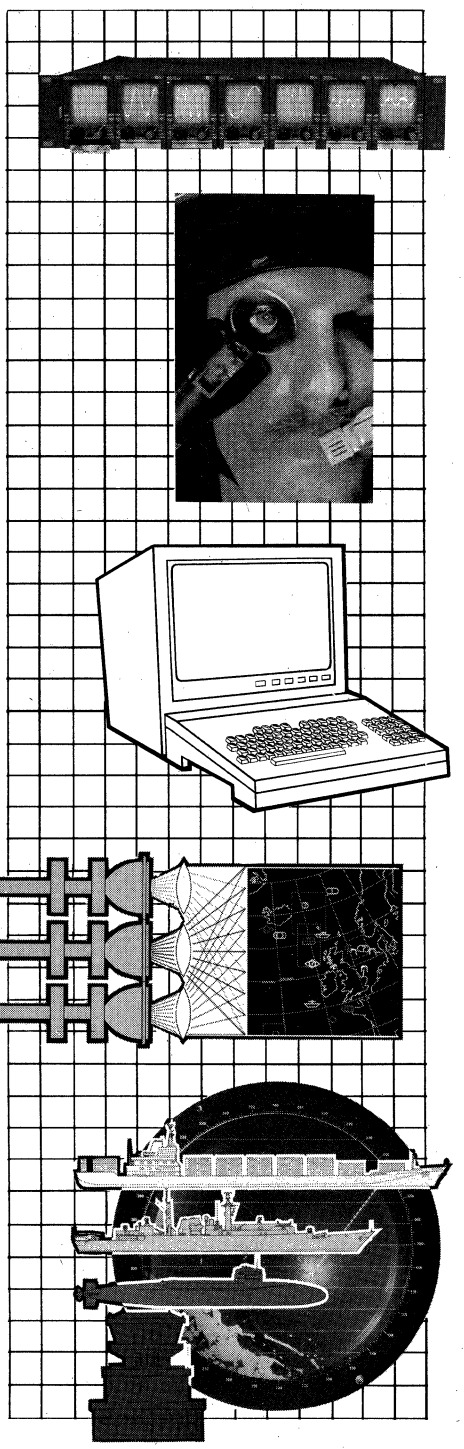
Brimar High-Performance

Cathode Ray Tubes

- Deflection and Focus Coils
- Precision Deflection Circuitry



WAVEFORM MONITORING INSTRUMENTS

Type D7-200 Series – The most widely used CRT of its kind. A real performer in high-volume, low-cost applications in portable instruments and in multi-readout control equipment.

AVIONICS AND MILITARY

Helmet-mounted Displays – Heads Up Displays (HUDS) and Head Down Displays (HDD) • Monitor Packages • Spot Injection and High-Resolution FLIR Displays • Ruggedized Monitors • P-53 Phosphor.

SPECIALTY AND HIGH-RESOLUTION MONITOR TUBES

CAD/CAM • Vending Systems • Analytical Instruments • Medical Monitors • Process Control • Tubes with diagonal measurements of 5-7-9-11-12-15-17-19-20 inches • Special Phosphor/Gun Designs.

ULTRA-HIGH RESOLUTION SYSTEMS APPLICATIONS

Projection/Simulators • Photo Typesetting • Digital Image Processing Film • Phosphor Matching • COM and other high-resolution recorders • Flying Spot Scanners • Deflection Amplifiers • Dynamic Focus Amplifiers • Busy Amplifiers

RADAR TUBES

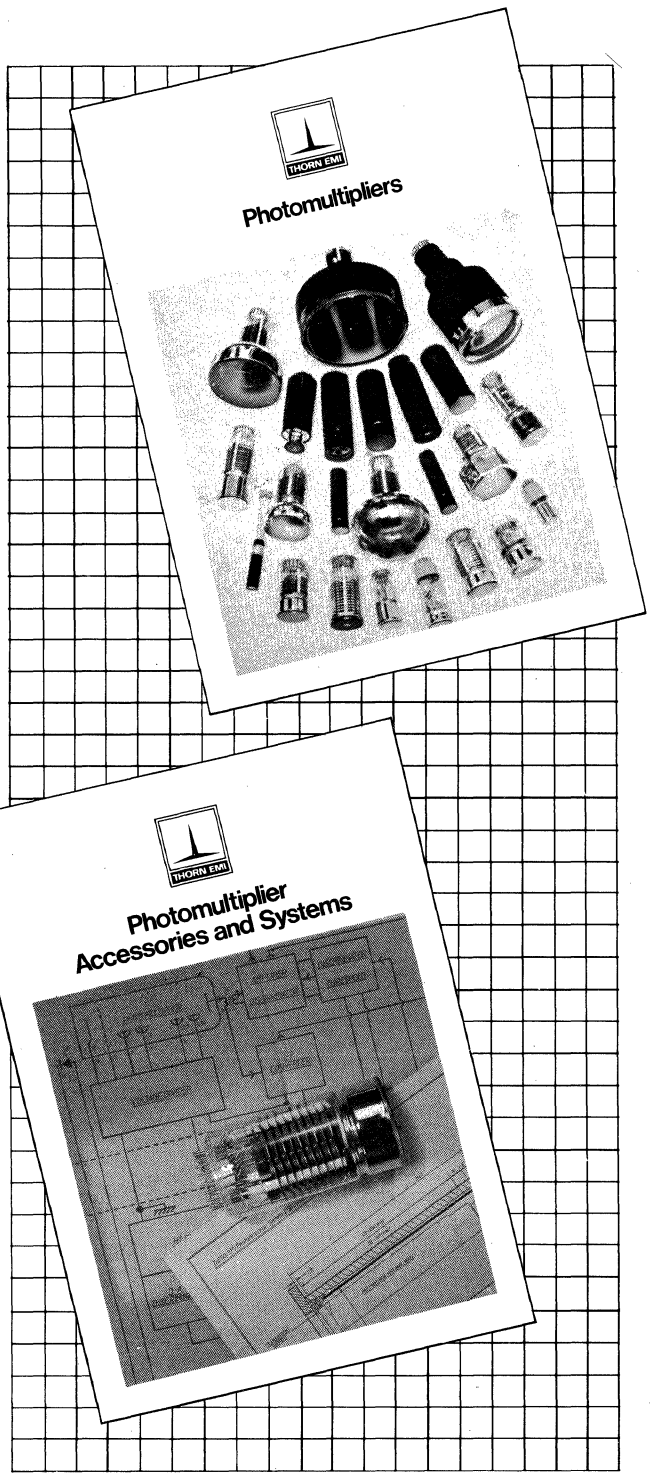
Marine Systems • Air Traffic Control • Airborne Displays • Weather Mapping.

THORN EMI Gencom Inc.

23 Madison Road, Fairfield, New Jersey 07006 • 201 575-5586 • Telex: RCA 22-1236

Photomultiplier Tubes

Accessories and Systems



A BROAD RANGE OF TUBES FOR:

- ☐ Scintillation Counting
- ☐ Gamma Cameras
- ☐ Photon Counting
- ☐ Spectrum Analyzers
- ☐ Spectrofluorometers
- ☐ T.L.D.
- ☐ R.I.A. Instruments
- ☐ Medical Instrumentation

ALL THE SUPPORT EQUIPMENT REQUIRED TO OBTAIN THE BEST PERFORMANCE FROM EACH TUBE

- ☐ Photon Counting Systems
- ☐ Ambient Housings
- ☐ Cooled Housings To −30°C
- ☐ Shielding
- ☐ Dynode Chains
- ☐ Transistorized Bases
- ☐ Amplifier/Discriminators
- ☐ High-Voltage Power Supplies
- ☐ Laser Detector Packages
- ☐ Custom Circuit Packaging

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

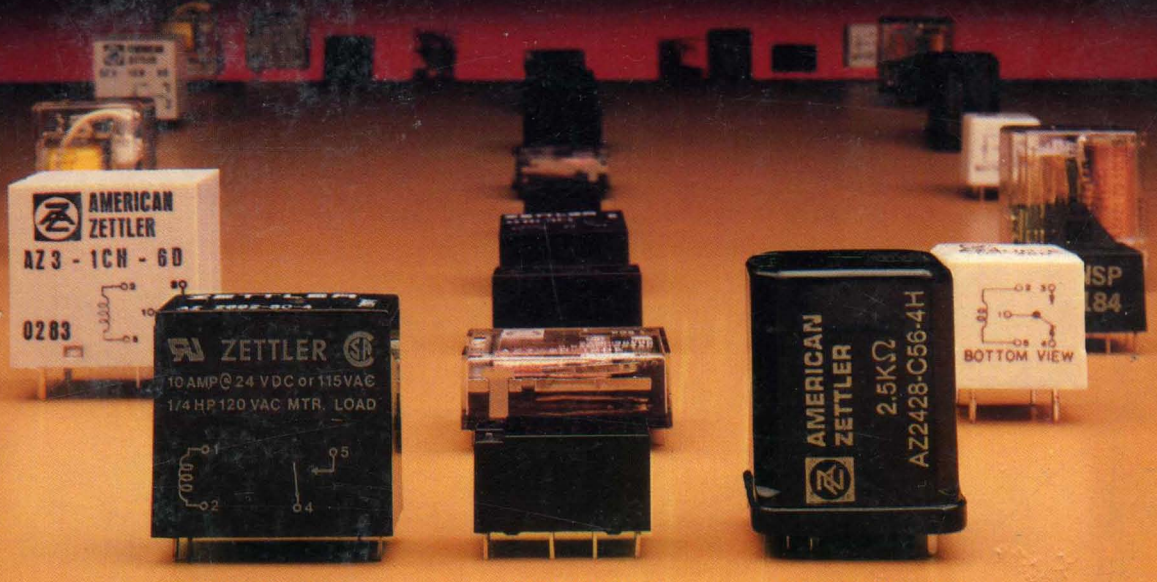
RELAYS FROM "A-Z"



MINIATURE POWER RELAYS | LOW PROFILE RELAYS | GENERAL PURPOSE RELAYS

American Zettler's broad line of quality relays makes it easy to find the relay that meets your specific needs. We've got the types, package styles, power ratings and sensitivities for your most demanding applications.

All types of American Zettler relays are available in Sealpak® epoxy-sealed versions. We lead the field in sealed relays—more than half of our total production consists of these tough, process-proof units.

General Purpose Relays for Many Applications
These versatile relays feature dry circuit to high current switching in many contact configurations, with coil sensitivity down to 40mW. A multitude of mounting options, including sockets are available.

Miniature Power Relays for High Current, Low Cost Switching
Capable of switching up to 10 Amp @ 120 VAC with only 100mW coil power, these compact relays are ideal for motor controllers and other high-power applications. Some types are designed to meet European Codes such as 4000 VRMS coil to contact. They're available with up to 4 PDT with a variety of terminations and sockets. When board space is at a premium, choose a compact, narrow Slimpak™ version.

Low Profile Relays for PC Board Applications
With a seated height of less than one-half inch, these Thinpak® relays are ideal for use where space is a consideration. They mount directly on PC boards and feature contact load up to 10 Amp @ 120 VAC. For telecommunications applications we offer models with bifurcated contacts and FCC 1500V surge (part 68) versions.

Find out more
To get complete information on the full line of American Zettler relays and receive a free copy of our "Relay Selection Guide," contact our Technical Services Department on our Engineering Hotline. Call **(800) 854-8474.** In California call **(714) 660-1670.** Or write American Zettler, 16881 Hale Avenue, Irvine, California 92714.
